

THE JOURNAL OF STEROID BIOCHEMISTRY

Contents

Third International Symposium of the Journal of Steroid Biochemistry

Cancer and Steroids

King R. J. B., Cambray G. J. and Robinson J. H.: The role of receptors in the steroidal regulation of tumour cell proliferation Discussion by: King, Lippman, Pasqualini and Rousseau	869
McGuire W. L., Horwitz K. B., Chamness G. C. and Zava D. T.: A physiological role for estrogen and progesterone in breast cancer Discussion by: Jungblut, King, Mainwaring, McGuire, Pasqualini, Saez and Siiteri.	875
Nenci I., Piffanelli A., Beccati M. D. and Lanza G.: <i>in vivo</i> and <i>in vitro</i> immunofluorescent approach to the physiopathology of estradiol kinetics in target cells Discussion by: Jungblut, King, Martini, O'Malley, Piffanelli, Spelsberg and Stumpf	883
Gurpide E., Gusberg S. B. and Tseng Linda: Estradiol binding and metabolism in human endometrial hyperplasia and adenocarcinoma Discussion by: Gurpide, Munck and Pasqualini	891
Siiteri P. K., Williams J. E. and Takaki N. K.: Steroid abnormalities in endometrial and breast carcinoma: a unifying hypothesis Discussion by: Kellie, Siiteri, McGuire, Lidner, Johnsen and Clark	897
Terenius L., Simonsson B. and Nilsson K.: Glucocorticoid receptors, DNA synthesis, membrane antigens and their relation to disease activity in chronic lymphatic leukemia Discussion by: Munck and Terenius	905
Jensen E. V., Smith S. and Desombre E. R.: Hormone dependency in breast cancer Discussion by: Jensen, Kellie, King, Lidner, Lippman and McGuire	911
Saez Simone and Sakai F.: Androgen receptors in human pharyngo-laryngeal mucosa and pharyngo-laryngeal epithelioma	919
Concolino G., Marocchi A., Di Silverio F. and Conti C.: Progestational therapy in human renal carcinoma and steroid receptors	923
Taylor W.: Urinary excretion of metabolites of steroid hormones by men with cancer of the stomach Discussion by: James, Jungblut and Taylor	929
Discussion by: Bergink, Concolino, Jungblut and McGuire	935

Steroids and Hypertension

Liddle G. W., Hollifield J. W., Slaton P. E. and Wilson H. M.: Effects of various adrenal inhibitors in low-renin essential hypertension Discussion by: Adlercreutz, Birmingham, Grant, James, Liddle, O'Malley, Stumpf and Ulick	937
James V. H. T., Tunbridge R. D. G. and Wilson G. A.: Studies on the control of aldosterone secretion in man Discussion by: Adlercreutz, Crabbé, Fraser, James, Jones and Morris	941
Li M. P., Chan T. H. and Birmingham M. K.: Antihypertensive action of 18,20-cyclo-20,21-dihydroxy-4-pregnen-3-one, a structural analogue of 18-hydroxydeoxycorticosterone Discussion by: Birmingham, Crabbé, Fraser, Jones, Pasqualini and Ulick	949
Ulick S. and Ramirez L. C.: Adrenocortical factors in hypertension: The significance of 16-oxygenated C-19 steroids Discussion by: Adlercreutz, Birmingham, Crabbé, Fraser, Liddle, Pasqualini and Ulick	953
Fraser R., Brown J. J., Brown W. C., Ferriss J. B., Kennedy A., Lever A. F., Mason P. A., Morton J. J., Nicholls M. G., Ramsay L. E., Robertson J. I. S., Schalekamp M. A. D. and Wilson A.: The adrenal cortex and hypertension: some observations on a possible role for mineralocorticoids other than aldosterone	

Discussion by: Adlercreutz, Birmingham, Crabbé, Fraser, Grant, James, Liddle, Taylor and Ulick Morris D. J., Tsai R. and DeConti G. A.: Regulation of plasma levels of aldosterone and its metabolites during the latent period of aldosterone	963
Discussion by: Crabbé, Johnsen, Morris, Taylor and Ulick	971
Stárka L. and Obenberger J.: Steroids and intraocular pressure	979
General Discussion by: Adlercreutz, Crabbé, Fraser, Hökfelt and Liddle	981

Mechanism of Action of Steroid Hormones

Heyns W., Verhoeven G. and De Moor P.: A comparative study of androgen binding in rat uterus and prostate	
Discussion by: Heyns, Jungblut, Kreig, Liao, Mainwaring and O'Malley	987
Davies P., Thomas P. and Griffiths K.: The influence of steroid-receptor complexes on the stages of transcription of target-tissue chromatin	
Discussion by: Davies, Hamilton, Jensen, McGuire and Spelsberg	993
Hung S. C., Liang T., Gluesing L. M. and Liao S.: On the factors affecting the initiation of protein synthesis in the rat ventral prostate: androgens, polyamines and conjugated proteins	
Discussion by: Clark, Crabbé, Jensen, King and Liao	1001
Krieg M. and Voigt K. D.: <i>in vitro</i> binding and metabolism of androgens in various organs: a comparative study	
Discussion by: Krieg, O'Malley, Munck and Siiteri	1005
Mainwaring W. I. P., Keen J. and Stewart M. W.: Further studies on the DNA-unwinding protein of the rat ventral prostate: evidence for local areas of denaturation	
Discussion by: Crabbé, Liao, Mainwaring, Rousseau, Siiteri and Spelsberg	1013
Parvinen M. and Soderstrom K.-O.: Effect of FSH testosterone on the RNA synthesis in different stages of rat spermatogenesis	
Discussion by: Johnsen, Parvinen and Siiteri	1021
Notides A. C., Hamilton D. E. and Muechler E. K.: A molecular analysis of the human estrogen receptor	
Discussion by: Clark and Notides	1025
Pasqualini J. R., Sumida C., Gelly C. and Nguyen D. L.: Specific [³ H]-estradiol binding in the fetal uterus and testis of guinea pig. Quantitative evolution of [³ H]-estradiol receptors in the different fetal tissues (Kidney, lung, uterus and testis) during fetal development	
Discussion by: Bergink, Clark, Crabbé, Hamilton, Lippman, Mousseron-Canet and Pasqualini	1031
Clark J. H., Eriksson H. A. and Hardin J. W.: Uterine receptor-estradiol complexes and their interaction with nuclear binding sites	
Discussion by: Bell, Clark, Jungblut, Lippman and Pasqualini	1039
Lippman M., Bolan G., Monaco M., Pinkus L. and Engel L.: Model systems for the study of estrogen action in tissue culture	
Discussion by: Clark, Crabbé, Jungblut, King, Liddle and Lippman	1045
Toft D., Lohmar P., Miller J. and Moudgil V.: The properties and functional significance of ATP binding to progesterone receptors	
Discussion by: Birmingham, Jensen, Jungblut, Liao, O'Malley, Munck, Notides and Toft	1053
Jänne O., Kontula K. and Vihko R.: Progesterin receptors in human tissues: concentrations and binding kinetics	
Discussion by: Bell, Jänne and Jungblut	1061
Borgna J.-L., Bonnafous J.-C., Barbanel G., Mani J.-C. and Mousseron-Canet M.: Early transcriptional events induced by estradiol in rat uterus partial purification of specific protein fraction	1069
Kniewald J., Čala S., Mildner P. and Kniewald Z.: Calorimetric approach to the study of 5 α -dihydro-testosterone and estradiol receptors in rat hypothalamus cytosol	
Discussion by: Clark, Jensen, Kniewald, Munck and Rousseau	1077
Walker M. D., Gozes I., Kaye A. M., Reiss N. and Littauer U. Z.: The 'Estrogen Induced Protein': quantitation by autoradiography of polyacrylamide gels	1083
Hemminki K. and Vauhkonen M.: Estrogen receptors and ovalbumin genes in hen oviduct chromatin fractions	
Discussion by: Spelsberg	1087
Spelsburg T. C., Webster R., Pikler G., Wells D. and Thrall C.: Role of Nuclear proteins as high affinity sites ("Acceptors") for progesterone in the avian oviduct	
Discussion by: Clark, O'Malley, Munck and Spelsberg	1091

Tuohimaa P., Jussila M. and Haapala O.: Effect of progesterone on HnRNA and avidin mRNA of the chick oviduct Discussion by: Hamilton, O'Malley and Tuohimaa	1103
Jungblut P. W., Gaus J., Hughes A., Kallweit E., Sierralta W., Szendro P. and Wagner R. K.: Activation of transcription-regulating proteins by steroids Discussion by: Cidlowski, Clark, Jungblut, Kellie and Rousseau	1109
Munck A. and Foley R.: Kinetics of glucocorticoid-receptor complexes in rat thymus cells Discussion by: Birmingham, Jungblut, O'Malley, Munck and Siiteri	1117
Rao G. S., Schulze-Hagen K., Rao M. L. and Breuer H.: Kinetics of steroid transport through cell membranes: comparison of the uptake of cortisol by isolated rat liver cells with binding of cortisol to rat liver cytosol Discussion by: Clark, King, Liddle and Rao	1123
Rousseau G. G. and Wérenne J.: Possible mechanisms for the permissive action of glucocorticoid hormones: studies on cyclic AMP-dependent protein kinase activity of rat liver and of mouse L1210 cells Discussion by: Munck and Rousseau	1131
Evain D., Morera A. M. and Saez J. M.: Glucocorticoid receptors in interstitial of the rat testis	1135
Cidlowski J. A. and Munck A. U.: Concanavalin A-induced glucocorticoid resistance in rat thymus cells: decreased cytoplasmic and nuclear receptor binding of dexamethasone Discussion by: Cidlowski and Toft	1141
Bell P. A. and Borthwick N. M.: Glucocorticoid effects on DNA-dependent RNA polymerase activity in rat thymus cells Discussion by: Bell and Hamilton	1147
O'Malley B. W., Schwartz R. J. and Schrader W. T.: Regulation of gene expression by steroid hormone receptors Discussion by: Clark, O'Malley, Notides, Pasqualini, Rousseau and Tuohimaa	1151
General Discussion by: Bell, Jungblut, King, Krieg, Lidner, McGuire, Mouseron-Canet and Siiteri	1161

Steroid Hormones and Neuroendocrine Function

Stumpf W. E. and Sar M.: Steroid hormone target sites in the brain: The differential distribution of estrogen, progestin, androgen and glucocorticosteroid Discussion by: Beyer, Crabbé, Stumpf and Terenius	1163
Beyer C., Morali G., Larsson K. and Södersten P.: Steroid regulation of sexual behavior Discussion by: Beyer, Grant and Taylor	1171
Motta M. and Martini L.: Studies on the feedback activity of 5 α -reduced metabolites of testosterone	1177
Kato J.: Cytosol and nuclear receptors for 5 α -dihydrotestosterone and testosterone in the hypothalamus and hypophysis, and testosterone 'Receptors' isolated from neonatal female rat hypothalamus Discussion by: Beyer, Kato, Stumpf and Toft	1179
Jones M. T. and Hillhouse E. W.: Structure-activity relationship and the mode of action of corticosteroid feedback on the secretion of corticotrophin-releasing factor (Corticoliberin) Discussion by: Beyer, Birmingham, Crabbé, Jones, Jungblut, Martini and Stumpf	1189
General Discussion by: Beyer, Clark, Jones, Martini and Taylor	1203
