

ANNOUNCEMENTS

Satellite Workshop of XI Acta Congress

MULTIPLICITY OF STEROID-HORMONE RECEPTORS

Time: 23 June 1977; 2-6 p.m.
Place: The University, Lausanne, Switzerland

The workshop is intended mainly to discuss the role, the appearance, and the significance of the multiple peaks, evident during physical fractionation of cytoplasmic and nuclear proteins, that exhibit receptor activity for steroid hormones. Differences between the active and the inactive steroid-receptor complexes, macro-molecular transformations, interconversions, and their technical separation from a number of tissues will form an integral part of the discussion.

Because of time and space limitations, authors interested in participating are requested to send a title and a one page abstract as soon as possible and no later than 1 March 1977 to:

M. K. Agarwal,
INSERM U 36,
17, rue du Fer à Moulin,
75005 Paris, France.

B. C. Rossier,
Institut de Pharmacologie de l'Université de Lausanne,
Rue du Bugnon 21,
Lausanne CH 1011,
Suisse.

It is proposed to hold a

3-DAY INTERNATIONAL SYMPOSIUM

ON ENZYME LABELLED NONRADIOIMMUNOASSAY OF HORMONES

in general, especially of clinical importance, at the University of Ulm, West Germany, during the late Summer or early Autumn of 1978. The pioneer investigators in this particular field will be asked to present papers and the language of the Symposium will be English. Those who are interested in presenting papers and the prospective participants should write for further information to:

Dr. S. B. Pal/Dr. V. Maier,
Universität Ulm,
Department für Innere Medizin, I,
Steinhövelstrasse 9,
79 Ulm (Donau) Postfach 38 80,
West Germany.
