

## FORTHCOMING PAPERS IN THE JOURNAL OF STEROID BIOCHEMISTRY

The next issue of the *Journal of Steroid Biochemistry* (Volume 11 number 1) will be devoted to the publication of the proceedings of the *Fifth International Congress on Hormonal Steroids* (New Delhi, October–November 1978).

The proceedings cover the following topics:

1. Advances in Steroid Chemistry
2. Steroid Antagonists
3. Analytical Methods
4. New Methods of Steroid Analysis
5. Steroid Biosynthesis in Isolated Cells
6. Steroid–Enzyme Repression/Induction
7. Steroid–Protein Interactions
8. Steroid Receptors: Biosynthesis, Biorhythms
9. Receptors: Purification and Properties
10. Receptor–Genome Interaction
11. Receptors—Non-Genome Aspects
12. Effects of Steroid Therapy
13. Sustained Release Preparations for the Delivery of Fertility Regulating Agents
14. Oral Contraceptives and Nutrition
15. Steroids in Parturition and Pregnancy
16. Perinatal Steroid Endocrinology
17. Puberty
18. Steroids and Human Prostatic Tumours
19. Metabolic Defects
20. Steroids in Male Reproduction
21. Ovum Maturation
22. Ovum Implantation
23. Steroidogenesis in Granulosa Cell and Corpus Luteum
24. Steroid Action in CNS and Anterior Pituitary—I
25. Steroid Action in CNS and Anterior Pituitary—II
26. Steroids and Aging
27. Anabolic Steroids
28. Photoperiodic Control of Steroid Production and Action
29. Biological Effects of Steroid Antibodies
30. Central Control of Steroid Production
31. Steroids and Hypertension
32. Diagnostic Relevance of Steroid Assays
