

FORTHCOMING PAPERS IN THE JOURNAL OF STEROID BIOCHEMISTRY

- T. KEREPESI and P. ARANYI: Low levels of glucocorticoid binding sites in circulating lymphocytes of premature infants suffering from hyaline membrane disease
- E. K. SYMES, W. F. COULSON and D. N. L. RALPHS: The synthesis of 16α -[131 I]iodo-oestradiol and evaluation of its use as a radiotracer for oestrogen receptor positive breast tumours
- F. V. PEALE JR, J. BOND, R. HILF and R. BAMBARA: An analysis of the decrease in the assayed level of charged bovine estrogen receptor observed at physiological ionic strength
- A. WHITE, C. GRAY and J. E. T. CORRIE: Monoclonal antibodies to testosterone: the effect of immunogen structure on specificity
- O. L. KON: Characterization of an antiestrogen-binding protein in high salt extracts of human breast cancer tissue
- R. BOSCH, W. J. VISSER, J. M. M. ROELOFS, J. H. H. THIJSSSEN and S. A. DUURSMA: The distribution of (5E)-(10S)-10,19-dihydroercalciol and its metabolites in serum of rats
- R. CANTINEAU, P. KREMERS, J. DE GRAEVE, J. E. GIELEN and R. LAMBOTTE: 15 and 16 hydroxylations of androgens and estrogens in the human fetal liver: a critical step in estrol biosynthesis
- A. CROZAT, J. M. SAEZ and C. FINAZ: Inhibitory or stimulatory effect of human genes on the expression of adrenal function in human Leydig xY_1 cell hybrids
- D. J. LEVINSON and D. E. DECKER: Characterization of a [3 H]methyltrienolone (R1881) binding protein in rat liver cytosol
- L. H. JORNOT, A. M. CAPPONI and M. B. VALLOTTON: Responses of rat adrenal glomerulosa and inner zone cells to synthetic ACTH analogs and proopiomelanocortin-derived peptides
- R. H. ASCH and F. J. ROJAS: The effects of RU486 on the luteal phase of the Rhesus monkey
- A. D. TAIT and L. C. HODGE: Steroid biosynthesis by a sesterterpene pathway in the rat adrenal gland *in vitro*
- D. L. JONES and V. H. T. JAMES: The identification, quantification and possible origin of non polar conjugates in human plasma
- L. C. RAMIREZ, P. BOURNOT and B. F. MAUME: The role of ACTH in determining the metabolic pathways of deoxycorticosterone by newborn rat adrenal cells in primary culture
- S. SNOWBALL and W. TAYLOR: Effects of short-term treatment with a combined oestrogen-progestin oral contraceptive on biliary lipids and cholesterol saturation index in young women
- R. K. TCHOLAKIAN, A. S. BERKOWITZ and S. N. NEWAZ: [3 H]Oestradiol metabolism by 18-day rat interstitial cells in culture and the effect of FSH: presence of 16α -hydroxylase
- V. C. O. NJAR, S. SHAPIRO, T. ARUNACHALAM and E. CASPI: Biotransformation of progesterone to 14α -hydroxypregna-1,4-dione-3,20-dione, a novel fungal metabolite, by *Colletotrichum antirrhini*
- K. MOMOI, M. OKAMOTO and T. YAMANO: 19-Hydroxylation of 18-hydroxy-11-deoxycorticosterone by adrenal mitochondria prepared from various animal species
- J. SWIERCZYNSKI, J. KLIMEK and L. ZELEWSKI: The role of malic enzyme in the malate dependent biosynthesis of progesterone in the mitochondrial fraction of human term placenta
- R. V. CARSIA, C. G. SCANES and S. MALAMED: Isolated adrenocortical cells of the domestic fowl (*Gallus domesticus*): steroidogenic and ultrastructural properties
- M. H. PERRARD, J. M. SAEZ and A. DAZORD: FSH stimulation of cytosolic protein synthesis in cultured pig Sertoli cells
- Short Communication*
- T. TANAKA, N. SUGURO, Y. SHIRATORI and A. KUBODERA: Specific antisera for the radioimmunoassay of estradiol-3-sulfate
