

FORTHCOMING PAPERS IN THE JOURNAL OF STEROID BIOCHEMISTRY

- C. H. SPILMAN, J. W. WILKS and J. A. CAMPBELL: Relationship between progesterone receptor binding and progestin biological activity
- E. M. J. J. BERNIS, A. O. BRINKMAN, F. F. G. ROMMERTS, E. MULDER and H. J. VAN DER MOLEN: Changes of oestrogen receptor levels in Leydig cells from mice and rats during culture
- C. M. BERGAMINI, F. PANSINI, S. BETTOCCHI Jr, V. SEGALA, F. DALLOCCIO, B. BAGNI and G. MOLLIKA: Hormonal sensitivity of adenylate cyclase from human endometrium: modulation by estradiol
- D. J. FRETLAND, E. A. BROWN and P. S. CAMMARATA: Specificity and structural relationships of steroids which affect phospholipase/prostaglandin synthetase, *in vivo*: a possible relation to blood pressure
- G. H. BAKKER, J. W. HOGERBRUGGE, F. F. G. ROMMERTS and H. J. VAN DER MOLEN: Lutropin stimulates *de novo* synthesis of short-lived proteins required for lutropin-dependent steroid production in tumour Leydig cells
- Y. TREMBLAY and A. BELANGER: Changes in plasma steroid levels after single administration of hCG or LHRH agonist analogue in dog and rat
- A. BUTKUS, J. P. COGHLAN, D. A. DENTON and B. A. SCOGGINS: The effect of ACTH on the plasma concentrations of the 'hypertensinogenic' steroids, 17 α -hydroxyprogesterone and 17 $\alpha,20\alpha$ -dihydroxy-4-pregnen-3-one in sheep
- C. A. SNIDER and R. W. BRUEGGEMEIER: Covalent modification of aromatase by a radiolabeled irreversible inhibitor
- V. LAKSHMI and C. MONDER: Extraction of 11 β -hydroxysteroid dehydrogenase from rat liver microsomes by detergents
- M. FRANEK and K. HRUSKA: Specificity of the immune response to the oestrone-azo-hapten structure
- D. W. JOHNSON, M. MCEVOY, R. F. SEAMARK, L. W. COX and G. PHILLIPOU: Deuterium labelled steroid hormones: tracers for the measurement of androgen plasma clearance rates in women
- P. MAK and G. V. CALLARD: Characterization of estrogen receptors in the hamster brain
- H. VIERHAPPER, P. NOWOTNY, W. WALDHÄUSL and H. FRISCH: Capillary gas chromatography as a tool for characterization of urinary steroid excretion in patients with congenital adrenal hyperplasia
- P. R. DOW, J. C. DAVIS, J. G. GOW, A. P. WADE and M. E. ROSE: Metabolism of testosterone by human semen
- R. GARCIA, M. D. VILORIA and A. M. MUNICIO: Influence of *E. Coli* endotoxin on ACTH induced adrenal cell steroidogenesis
- J. G. LEWIS and P. A. ELDER: Fractionation of cortisol antisera by immunoadsorption chromatography: characterisation and use in an enzyme-linked immunosorbent assay (ELISA)
- P. OFNER, W. H. J. DOUGLAS, S. D. SPILMAN, R. L. VENA, P. KRINSKY-FEIBUSH and P. W. LEQUESNE: Hydroxylation of [³H]5 α -androstane-3 $\beta,17\beta$ -diol by whole tissue, epithelial cells and fibroblasts from the same hyperplastic human prostate
- N. TERADA, H. KURODA, D. TAKATSUKA, K. MATSUMOTO and Y. KITAMURA: Effect of serum and 12-O-tetradecanoylphorbol-13-acetate on FSH-stimulated conversion of 4-androstene-3,17-dione to oestrogens in cell and organ cultures of suckling mouse ovaries
- J. M. LARNER, N. J. MACLUSKY and R. B. HOCHBERG: The naturally occurring C-17 fatty acid esters of estradiol are long-acting estrogens
- S. E. SADLER, M. A. BOWER and J. L. MALLER: Studies of a plasma membrane steroid receptor in *Xenopus* oocytes using the synthetic progestin RU 486
- Short communications*
- R. E. KNYBA, D. Y. WANG and V. E. FANTL: A solid-phase radio-immunoassay of serum dehydroepiandrosterone sulphate using a monoclonal antibody
- M. O. TURREL, A. Y. PROPPER and G. L. ADESSI: Characterization of a glucocorticoid receptor in neonatal rat mammary gland
- G. PHILLIPOU and B. A. HIGGINS: A new defect in the peripheral conversion of cortisone to cortisol
