

FORTHCOMING PAPERS IN THE JOURNAL OF STEROID BIOCHEMISTRY

- R. Y. KIRDANI, L. J. EMRICH, E. J. PONTES, R. L. PRIORE and G. P. MURPHY: A comparison of estrogen and androgen receptor levels in human prostatic tissue from patients with non-metastatic and metastatic carcinoma and benign prostatic hyperplasia
- N. R. NICHOLS, H. H. NGUYEN and W. J. MEYER III: Physical separation of aortic corticoid receptors with type I and type II specificities
- W. W. LEAVITT and W. C. OKULICZ: Progesterone control of nuclear estrogen receptor: demonstration in hamster uterus during the estrous cycle and pseudopregnancy using a new exchange assay
- J. A. KATZENELLENBOGEN, K. E. CARLSON and B. S. KATZENELLENBOGEN: Facile geometric isomerization of phenolic non-steroidal estrogens and antiestrogens: limitations to the interpretation of experiments characterizing the activity of individual isomers
- E. F. HAHN and J. FISHMAN: Stereochemistry of 1,2-hydrogen loss during aromatization in the brain
- M. BOUTHILLIER, G. BLEAU, A. CHAPDELAIN and K. D. ROBERTS: The purification of 3β -hydroxysteroid sulfotransferase of the hamster epididymis
- A. M. TRASH, R. E. MULLER and H. H. WOTIZ: Resolution of non-activated androgen receptors based on differences in their hydrodynamic properties
- L. TSENG, L. Y. LEE and J. MAZELLA: Estrogen sulfotransferase in human placenta
- V. K. MOUDGIL, M. CIKALO, V. M. SAMOKYSZYN, T. E. EESSALU and V. B. SINGH: Interaction of chick oviduct progesterone receptor with immobilized aurotricarboxylic acid
- T. Y. AW, D. P. JONES, D. J. O'SHANNESY, J. H. PRIEST and R. E. PRIEST: Oxygen dependence of oestrogen production by human placental microsomes and cultured choriocarcinoma cells
- M. TAKEYAMA, T. NAGAREDA and K. MATSUMOTO: 17α -Oxidoreductase activity in kidneys of male and female mice of various ages
- L. BELKIEN, T. SCHÜRMEYER, R. HANO, P. O. GUNNARSSON and E. NIESCHLAG: Pharmacokinetics of 19-nortestosterone esters in normal men
- J.-P. BERCOVICI, K. NAHOUL, T. MAUDELONDE, D. TATER and R. SCHOLLER: Plasma androgens during the luteal phase in a case of true hermaphroditism with bilateral ovotestis
- P. A. ELDER and J. G. LEWIS: An enzyme-linked immunosorbent assay (ELISA) for plasma testosterone
- E. S. UMSTOT, J. E. BAXTER and R. N. ANDERSEN: A theoretically sound and practicable equilibrium dialysis method for measuring percentage of free testosterone
- C.-G. ERIKSSON, P. ENEROTH and L. NORDSTRÖM: 6-Oxygenation of 3-oxo-4-ene-steroids in high yields after 3-imine-formation
- T. RABE, L. KIESEL and B. RUNNEBAUM: Regulation of human placental progesterone synthesis *in vitro* by naturally occurring steroids
- J. G. LEWIS and P. A. ELDER: An enzyme-linked immunosorbent assay (ELISA) for plasma cortisol
- M. J. VIDAL and E. AGUILAR: Can neonatal beta-adrenergic stimulation prevent the effects of androgenization in female rats?
- H. INANO and B.-I. TAMAOKI: Affinity labeling of the cofactor-binding site of estradiol 17β -dehydrogenase of human placenta by 5'-*p*-fluorosulfonylbenzoyl adenosine
