

BIOCHIMIE 1984, TOME 66 Nos 11-12 SOMMAIRE

<i>News</i>	
Calcium dependent potassium channels	VII
<i>Colloquia and congresses</i>	IX
<i>Literature</i>	XVII
<i>Review</i>	
Intracellular proteolysis. M. C. DUQUE-MAGALHÃES	653
<i>Original papers</i>	
Further results on lipase-colipase interactions studied by affinity chromatography. J.-M. ALESSANDRI, C. LÉGER and N. MAHÉ	663
Cloning cDNAs corresponding to the 5' end of messenger RNAs using specific DNA primers. J.-C. DAGORN and R. J. MACDONALD	673
Rescue of silent integrated polyoma genomes suggests homologous recombination between resident and transfected DNA fragments. M. KATINKA	681
The spacing of <i>Escherichia coli</i> DNA gyrase sites cleaved <i>in vivo</i> by treatment with oxolinic acid and sodium dodecyl sulfate. S. BÉJAR and J. P. BOUCHÉ	693
Albumin extinction followed by <i>de novo</i> methylation of its gene in somatic hybrids of rat hepatoma. L. SPERLING, M. O. OTT and M. C. WEISS	701
<i>Short communications</i>	
A method facilitating the demonstration of synergism in the tissue-responses to mixed peptide stimuli. J.-J. BOURGARIT and S. CHOLIN	711
The essential cationic charge of phospholipid polar head in the reactivation of D- β -hydroxybutyrate apodehydrogenase revealed by cationic surfactants. J.-M. BERREZ, N. LATRUFFE and Y. GAUDEMER	717
Hexose metabolism in pancreatic islets. Phosphoglycerate 2,3-mutase and enolase activities in rat islets. F. MALAISSE-LAGAE, A. SENER and W. J. MALAISSE	723
<i>List of referees consulted in 1984</i>	723
<i>Key-word table</i>	729
<i>Index of the authors, BIOCHIMIE, vol. LXVI</i>	733
