LIST OF CONTENTS

JULY

| | |
|---------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Addresses of Associate and Corresponding Editors | I |
| Steroid Nomenclature and Abbreviations | V |
| Marija Radojic, Sam Okret, Örjan Wrangé and Jan-Åke Gustafsson | 1 Characterization of non-liganded glucocorticoid receptor in rat liver cytosol using indirect competitive enzyme-linked immunosorbent assay |
| Willem de Boer, Geert Ab and Max Gruber | 9 Estrogen receptor in chicken oviduct: receptor dissociation kinetics and transformation |
| Thresia Thomas and David T. Kiang | 19 Effect of ribonuclease on the physico-chemical properties of estrogen receptor |
| Akira Ito, Wakatsuna Sato and Yo Mori | 27 Identification and partial characterization of the cytoplasmic androgen receptor in bovine ovarian capsule |
| A. Ruokonen, M. Alén, N. Bolton and R. Vihko | 33 Response of serum testosterone and its precursor steroids, SHBG and CBG to anabolic steroid and testosterone self-administration in man |
| William J. Hendry III, Barbara C. Eller, Marie-Claire Orgebin-Crist and Benjamin J. Danzo | 39 Hormonal effects on the estrogen receptor system in the epididymis and accessory sex organs of sexually immature rabbits |
| Finn Olav Levy, Lars Eikvar, Nicolet H. P. M. Jutte, Jan Cervenka, Thillainathan Yoganathan and Vidar Hansson | 51 Appearance of the rat testicular receptor for calcitriol (1,25-dihydroxyvitamin D ₃) during development |
| Shiro Suzuki, Shozo Takamura, Junko Yoshida and Naoko Ozaki | 57 Effect of aldosterone antagonists on aldosterone-induced activation of Mg ²⁺ -HCO ₃ ⁻ -ATPase and carbonic anhydrase in rat intestinal mucosa |
| M. T. Gordon, D. C. Anderson, R. Mitchell and W. R. Robertson | 67 Some characteristics of human adrenal microsomal 21-hydroxylase activity |
| Miguel N. Llanos, Ana M. Ronco, Ana M. Pino and Luis E. Valladares | 73 The transmethylation inhibitor 3-deazaadenosine, inhibits <i>in vitro</i> testosterone production by rat testis interstitial cells stimulated with HCG |
| J. Gómez-Benítez and B. N. Díaz-Chico | 77 Time course of anterior pituitary estrogen receptor after low 17β-estradiol doses in ovariectomized rats |
| James M. Londowski, Larry K. Revelle, Susan Bollman Kost, Robert A. Corradino and Rajiv Kumar | 81 Synthesis and biologic activity of 3β-thiovitamin D ₃ |
| Ana M. Soto and Carlos Sonnenschein | 87 The role of estrogens on the proliferation of human breast tumor cells (MCF-7) |
| Blake Lee Neubauer, Neil G. Anderson, Gerald R. Cunha, John F. Towell and Leland W. K. Chung | 95 Androgen metabolism in tissue recombinants composed of adult urinary bladder epithelium and urogenital sinus mesenchyme |
| A. Ikegawa, A. Kambegawa, Y. Sano, T. Ohkawa, K. Dobashi, S. Okinaga and K. Arai | 103 A new radioimmunoassay for serum 16α-hydroxyandrost-4-ene-3,17-dione with specific antiserum |
| Yvonne A. Lefebvre, Elizabeth J. Golsteyn and Therese L. Michiel | 107 Androgen interactions with intact nuclear envelopes from the rat ventral prostate |

| | | |
|------------------------------------------------------------------------------------------------------|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Åke Pousette, Roland Fernstad, Nils-Olof Theve, Holger Skoldefors and Kjell Carlström | 115 | Further characterization of the estrogen binding macromolecule in human pancreas |
| <i>Short Communication</i> P. Bannister, P. Sheridan and M. S. Losowsky | 121 | Use of a new radioactive ligand, 7 α ,17 α -dimethyl[17 α -methyl- ³ H]19-nortestosterone for the estimation of androgen receptors in rat liver cytosol |
| Forthcoming Papers | i | |

AUGUST

| | | |
|------------------------------------------------------------------------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Virinder K. Moudgil and Virginia M. Caradonna | 125 | Modulation of DNA binding of glucocorticoid receptor by aurintricarboxylic acid |
| P. Deviller, P. Vallier and J. M. Saez | 133 | Activation of microsomal cAMP-dependent protein kinase isoenzyme I by ACTH ₁₋₂₄ in bovine adrenal cells |
| Avraham Geier, Michal Haimsohn, Rachel Beery and Bruno Lunenfeld | 137 | Physical-chemical properties of the estrogen receptor solubilized by micrococcal nuclease |
| Leen M. H. De Ryck, J. B. Alexander Ross, Philip H. Petra and Ertio Gurpide | 145 | Estradiol entry into endometrial cells in suspension |
| T. Fehér, K. Sz Szalay and G. Szilágyi | 153 | Effect of ACTH and prolactin on dehydroepiandrosterone, its sulfate ester and cortisol production by normal and tumorous human adrenocortical cells |
| Padmini Martyn and Ian R. Falconer | 159 | Inhibition of fatty acid synthesis in rabbit mammary alveolar explants by progesterone and related steroids |
| E. W. Bergink, P. B. A. Loonen and H. J. Kloosterboer | 165 | Receptor binding of allylestrenol, a progestagen of the 19-nortestosterone series without androgenic properties |
| I. Lihmann, P. Netchitailo, F. Leboulenger, C. Delarue and H. Vaudry | 169 | Effect of calcium on corticosteroid secretion by isolated frog interrenal gland |
| Satoru Watanabe | 177 | Circular dichroism study of the interaction between conformationally altered human serum albumin and testosterone |
| A. M. Cathiard, Ph. Durand, M. G. Seidah, M. Chrétien and J. M. Saez | 185 | Effects of several pro-opiomelanocortin derived peptides on steroidogenesis in ovine and bovine adrenal cells |
| Paulo C. Serafini, Jerome Catalino and Rogerio A. Lobo | 191 | The effect of spironolactone on genital skin 5 α -reductase activity |
| R. Vranckz, C. Plas, M. Ali, M. E. Martin and E. A. Nunez | 195 | Rat corticosteroid-binding globulin (CBG) biosynthesis by fetal hepatocytes in culture |
| Christiane Jean-Faucher, Michel Berger, Marc de Turckheim, Georges Veysiere and Claude Jean | 201 | Testosterone and dihydrotestosterone levels in epididymis, vas deferens, seminal vesicle and preputial gland of mice after hCG injection |
| M. Harnik, Y. Kashman, Y. Aharonowitz and D. J. Morris | 207 | Synthesis of 19-hydroxyaldosterone and the 3 β -hydroxy-5-ene analog of aldosterone, active mineralocorticoids |
| M. E. McAuley, G. P. Vinson, P. W. Raven, D. R. E. Abayesekara and B. J. Whitehouse | 219 | Factors affecting the trypsin induced release of aldosterone in rat adrenal zona glomerulosa tissue |
| R. Bosch, C. Versluis, J. K. Tertouw, J. H. H. Thijssen and S. A. Duursma | 223 | Isolation and identification of 25-hydroxydihydrotestosterone ₂ , 1 α ,25-dihydroxydihydrotestosterone ₂ and 1 β ,25-dihydroxydihydrotestosterone ₂ |
| <i>Short Communications</i> B. T. Hinton and D. A. Keefer | 231 | Binding of [³ H] aldosterone to a single population of cells within the rat epididymis |
| A. Lambert, R. Mitchell, J. Frost and W. R. Robertson | 235 | A simple <i>in vitro</i> approach to the estimation of the biopotency of drugs affecting adrenal steroidogenesis |

Itsuo Yoshizawa, Kazuhiro Watanabe, 239 The metabolism of estradiol 17-sulfate by pheochromocytoma tissue
Shinji Kurosawa and
Shoichi Nakagawa

Forthcoming Papers i

Papers published in *Biochimie* ii

Announcements iii

SEPTEMBER

D. Faict, G. Verhoeven, B. Mertens 243 Transcortin and α_{2u} -globulin messenger RNA activities during turpentine-induced inflammation in the rat
and P. De Moor

D. Gagne, M. Pons and D. Philibert 247 RU38486: a potent antiglucocorticoid *in vitro* and *in vivo*

Luiz B. S. Valle, 253 Pituitary-testicular axis abnormalities in immature male hypothyroid rats
Ricardo M. Oliveira-Filho,
João H. Romaldini and
Pedro F. Lara

Peter Kaspar and Herbert Witzel 259 Steroid binding to the cytosolic estrogen receptor from rat uterus. Influence of the orientation of substituents in the 17-position of the 8 β - and 8 α -series

Michel Pons, T. E. Joan Robinson, 267 Formation of a fluorescent glucocorticoid receptor-steroid complex in HTC cell cytosol
Louis Mercier, E. Brad Thompson
and S. Stoney Simons Jr

Gerald J. Pepe and Eugene D. Albrecht 275 The effects of cortisone on the interconversion of cortisol and cortisone in the baboon

C. Mastri, P. Mistry and G. W. Lucier 279 *In vivo* oestrogenicity and binding characteristics of α -zearalanol (P-1496) to different classes of oestrogen binding proteins in rat liver

Michèle Coutard and Dominique Duval 291 Autoradiographic study of the nuclear transfer of the antiglucocorticoid compound RU38486 in mouse tissues

Ellen E. Anderson and 299 Stabilization of glucocorticoid receptor association with RNA by a low molecular weight factor from rat liver cytosol
John L. Tymoczko

A. Y. Arinbasarova, A. G. Medentsev, 307 Redox reactions in hydrocortisone transformation by *Arthrobacter globiformis* cells
V. K. Akimenko,
K. A. Koshcheyenko and
G. K. Skryabin

Norma J. Greenfield, Ramon Parsons, 313 The side-chain cleavage of cholesterol sulfate—II. The effect of phospholipids on the oxidation of the sterol sulfate by inner mitochondrial membranes and by a reconstituted cholesterol desmolase system
Margaret Welsh and
Barbara Gerolmatos

I. Belič, T. Kastelic-Suhadolc and 323 Bioconversion of steroid glycosides by *Nocardia restricta*
B. Kralj

Robert W. Owen, Arthur N. Mason 327 The degradation of β -sitosterol by *Pseudomonas* sp. NCIB 10590 under aerobic conditions
and Rodney F. Bilton

V. G. Selyatitskaya, N. P. Mertvetsov, 333 A study of [3 H]aldosterone binding by nuclear and cytoplasmic receptors of the rat kidney with different content of aldosterone in the organism
V. A. Shulga, R. I. Salganik
and M. G. Kolpakov

C.-G. Eriksson 339 Investigation of rat liver microsomal 6 β -hydroxylation of 4-androstene-3,17-dione and 4-pregnene-3,20-dione using methodology which excludes steroid-3-imine induced introduction of the 6 β -hydroxyl group

R. C. Bonney, M. J. Reed, 347 Metabolism of adrenal androgens by human endometrium and adrenal cortex
P. A. Beranek and V. H. T. James

Giuseppina Mazzocchi, Claudia Robba, 353 Effect of somatostatin on the zona glomerulosa of rats treated with angiotensin II or captopril: stereology and plasma hormone concentrations
Piera Rebuffat, Guisepe Gottardo
and Gastone G. Nussdorfer

C. H. Blomquist, N. J. Lindemann 357 Inactivation of soluble 17 β -hydroxysteroid dehydrogenase of human placenta by fatty acids
and E. Y. Hakanson

A. G. Medentsev, A. Y. Arinbasarova, 365 Regulation of 3-ketosteroid-1-en-dehydrogenase activity of *Arthrobacter globiformis* cells by a respiratory chain
K. A. Koshcheyenko,
V. K. Akimenko and G. K. Skryabin

Short Communications

Wojciech J. Koper, Susan R. Cordle 369 Effect of high and low density lipoproteins on corticotropin-mediated cortisol synthesis by bovine zona fasciculata cells
and Stephen J. Yeaman

| | | |
|------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| J. Tamm, U. Volkwein and H. Becker | 373 | The effect of infusions of 5 α -dihydrotestosterone or estradiol-17 β on the concentration of some steroids in the human testicular vein and artery |
| Babetta L. Marrone, John P. Wiebe, Kevin D. Buckingham and Frank Hertelendy | 375 | Analysis of steroid metabolites produced by theca cells from the adult domestic hen |
| Forthcoming Papers | i | |
| Papers published in <i>Biochimie</i> | ii | |
| Announcements | iii | |

OCTOBER

| | | |
|----------------------------------------------------------------------------------------------------|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| P. D. Darbre, A. Moriarty, S. A. Curtis and R. J. B. King | 379 | Androgen regulates MMTV RNA in the short-term in S115 mouse mammary tumour cells |
| Naoki Terakawa, Ikuya Shimizu, Toshihiro Aono, Osamu Tanizawa and Keishi Matsumoto | 385 | Dexamethasone suppresses estrogen action at the pituitary level without modulating estrogen receptor dynamics |
| Robert W. Bonsall, Howard D. Rees and Richard P. Michael | 389 | The distribution, nuclear uptake and metabolism of [³ H]dihydrotestosterone in the brain, pituitary gland and genital tract of the male rhesus monkey |
| Georges Veysiere, Michel Berger, Christiane Jean-Faucher, Marc de Turckheim and Claude Jean | 399 | Androgen receptor in genital tubercle of rabbit fetuses and newborns. Ontogeny and properties |
| Abdulmaged M. Traish, R. Enzo Müller and Herbert H. Wotiz | 405 | A new exchange procedure for the quantitation of prostatic androgen receptor complexes formed <i>in vivo</i> |
| C. Longcope and S. E. Fineberg | 415 | Production and metabolism of dihydrotestosterone in peripheral tissues |
| Susan P. Bowman, Diana M. Barnes and N. J. Blacklock | 421 | A mini-column method for routine measurement of human prostatic androgen receptors |
| Michael J. Finnen, Maureen L. Herdman and Sam Shuster | 431 | Strain differences in the induction of mono-oxygenase activity in mouse skin by topical clobetasol propionate: evidence of a role for the HR locus |
| Glen K. Andrews | 437 | Glucocorticoid receptors in murine visceral yolk sac and liver during development |
| K. Nahoul, F. Daffos, F. Forestier and R. Scholler | 445 | Cortisol, cortisone and dehydroepiandrosterone sulfate levels in umbilical cord and maternal plasma between 21 and 30 weeks of pregnancy |
| G. L. Hammond, M. S. Langley and P. A. Robinson | 451 | A liquid-phase immunoradiometric assay (IRMA) for human sex hormone binding globulin (SHBG) |
| O. V. Smirnova, T. G. Vishnyakova, A. N. Smirnov and V. B. Rozen | 461 | The unusual estrogen-binding protein (UEBP) of rat liver: the role of sex steroids and hypophysis in its regulation |
| S. H. G. Andersson and J. Sjövall | 469 | Analysis of profiles of unconjugated steroids in rat testicular tissue by gas chromatography-mass spectrometry |
| Howard D. Colby and Patrick I. Eacho | 477 | Mitochondrial steroid metabolism in the inner and outer zones of the guinea-pig adrenal cortex |
| Robert M. Riehl and David O. Toft | 483 | Effect of culture medium composition on pheromone receptor levels in <i>Achlya ambisexualis</i> |
| Yuhzo Kinoshita, Yotsuo Higashi, Hiroyuki Oshima and Philip Troen | 491 | Studies of the human testis. XX—Effect of NADH on 17 α -hydroxypregnenone C17-20 lyase activity |
| D. A. N. Sirett, J. I. Quivy, D. Foret, C. F. Rolin Jacquemyns and G. G. Rousseau | 497 | Effects of dicyclohexane derivatives on androgen metabolism in the rat prostate |
| Martin J. McDermott, Mary Freiburger, Syed A. Latif and David J. Morris | 503 | The synthesis of reduced metabolites of aldosterone by subcellular fractions of rat kidney: effects of antiminerlocorticoids |
| Eduardo N. Cozza, Carlos P. Lantos and Gerardo Burton | 511 | A highly lipophilic form of aldosterone. Isolation and characterization of an aldosterone dimer |
| Nagaratnam P. Das, Firyal S. Khan-Dawood and M. Yusoff Dawood | 517 | The effects of steroid hormones and gonadotropins on <i>in vitro</i> placental conversion of pregnenolone to progesterone |

| | | |
|---------------------------------------------------------|-----|------------------------------------------------------------------------------------------------------------------------------------------|
| M. McDonald Francis, N. Kowalsky and M. Watanabe | 523 | Extraction of a steroid transport system from <i>Pseudomonas testosteroni</i> membranes and incorporation into synthetic liposomes |
| <i>Short Communications</i> | | |
| Frank Svec | 529 | The effect of molybdate on glucocorticoid receptor transformation and translocation in intact, viable AtT-20 mouse pituitary tumor cells |
| Jane Gorsline and David J. Morris | 535 | The hypertensinogenic activity of 19-nor-deoxycorticosterone in the adrenalectomized spontaneously hypertensive rat |
| Forthcoming Papers | i | |
| Papers published in <i>Biochimie</i> | ii | |

NOVEMBER

| | | |
|--------------------------------------------------------------------------------------------------------------------------------|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Thomas W. Jasper, Mary F. Ruh and Thomas S. Ruh | 537 | Estrogen and antiestrogen binding to rat uterine and pituitary estrogen receptor: evidence for at least two physicochemical forms of the estrogen receptor |
| Avraham Geier, Michal Haimsohn, Rachel Beery and Bruno Lunenfeld | 547 | Characterization of the 4-hydroxytamoxifen (4-OHTAM) bound estrogen receptor of MCF-7 cells solubilized by micrococcal nuclease |
| Dirk Faict, Jan L. Ceuppens and Pieter De Moor | 553 | Transcortin modulates the effect of cortisol on mitogen-induced lymphocyte proliferation and immunoglobulin production |
| Bea Mertens and Guido Verhoeven | 557 | Influence of neonatal androgenization on the expression of α_{2u} -globulin in rat liver and submaxillary gland |
| Christian Marth and Günter Daxenbichler | 567 | Pulsatile versus continuous estradiol exposure in inducing proliferation of cultured ZR-75.1 human breast cancer cells |
| Padmanabhan P. Nair, George Kessie and Nabila Turjman | 573 | Synthesis of <i>N</i> - ϵ -lithocholyl-L-lysine, a component of tissue-bound lithocholic acid, via lithocholyl- <i>N</i> -hydroxysuccinimide |
| Teresa Duda, Alicja Waliszewska, W. H. Trzeciak and L. K. Malendowicz | 577 | Sex differences in adrenocortical structure and function—XX. The effects of gonadectomy and testosterone or estradiol replacement on cholesterol content and distribution in the gland |
| Y. P. So, D. R. Idler, B. Truscott and J. M. Walsh | 583 | Progestogens, androgens and their glucuronides in the terminal stages of oocyte maturation in landlocked Atlantic salmon |
| Thierry Idziorek, Bernard Sablonniere, Pierre Formstecher, Viviane Dumur and Michel Dautrevaux | 593 | Covalent chromatography by thiol-disulfide interchange of the highly-purified non-transformed rat liver glucocorticoid-receptor |
| Marco A. Vázquez-Alcántara, Marco A. Juárez-Oropeza, Rodrigo Miranda Zamora, Juan C. Díaz-Zagoya and Josué Garza-Flores | 599 | Synthesis and biological assessment of long-acting estradiol fatty acid esters in ovariectomized rats |
| Brigitte Vandewalle, Jean-Philippe Peyrat, Jacques Bonnetterre and Jean Lefebvre | 603 | Catecholesterogen binding sites in breast cancer |
| Peter Kaspar and Herbert Witzel | 611 | Shielding effects at 17 α -substituted estrogens. A tentative explanation for the low biological activity of 17 α -ethyl-estradiol based on i.r. and NMR spectroscopic studies |
| C. M. Feek, N. L. Tuzi, B. C. Williams, D. Burt, F. C. W. Wu, A. M. Wallace, C. E. Gray and C. R. W. Edwards | 617 | The adrenal secretion of progesterone stimulates testicular steroidogenesis in the rat <i>in vitro</i> |
| Egil Haug and Kaare M. Gautvik | 625 | Demonstration and characterization of a 1 α ,25-(OH) $_2$ D $_3$ receptor-like macromolecule in cultured rat pituitary cells |
| Janice M. Larner, Arnold J. Eisenfeld and Richard B. Hochberg | 637 | Synthesis of estradiol fatty acid esters by human breast tumors: fatty acid composition and comparison to estrogen and progesterone receptor content |
| Yuko Ohara-Nemoto, Takayuki Nemoto and Minoru Ota | 643 | Conversion from 4S androgen receptor from rat submandibular gland to higher molecular form and the effect of sodium molybdate |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| H. Martikainen, L. Rönberg, A. Ruokonen and R. Vihko | 651 Testicular responsiveness to hCG before and after long-term antiestrogen treatment in oligozoospermic men |
| G. Niort, G. Boccuzzi, E. Brignardello, L. Bonino and A. Bosia | 657 Effect of dehydroepiandrosterone on human erythrocytes redox metabolism: inhibition of glucose-6-phosphate dehydrogenase activity <i>in vivo</i> and <i>in vitro</i> |
| Roman M. Chicz, Robert M. Nakamura, Uwe Goebelsmann, Joseph D. Campeau, Sharon A. Tonetta, James J. Frederick and Gere S. diZerega | 663 Follicle regulatory protein noncompetitively inhibits microsomal 3 β -hydroxysteroid dehydrogenase activity |
| <i>Short Communications</i> | |
| Frank Svec | 669 Biopotency of corticosterone and dexamethasone in causing glucocorticoid receptor downregulation |
| P. Genard and M. Palem-Vliers | 673 Effect of 6-dehydro-DOCA and 6-dehydro-9 α -fluorocortisol acetate on the excretion of sodium and potassium in the rat |
| Forthcoming Papers | i |
| Announcement | ii |

PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON GONADOTROPIN RELEASING HORMONE IN CONTROL OF FERTILITY AND MALIGNANCY

| | |
|--------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| | v Preface |
| Kevin J. Catt, Ernest Loumaye, Peter C. Wynn, Mitsutoshi Iwashita, Kenji Hirota, Reginald O. Morgan and John P. Chang | 677 GnRH receptors and actions in the control of reproductive function |
| R. N. Clayton, A. Detta, S. I. Naik, L. S. Young and H. M. Charlton | 691 Gonadotrophin releasing hormone receptor regulation in relationship to gonadotrophin secretion |
| P. Michael Conn, Daphne Staley, Hyder Jinnah and Michael Bates | 703 Molecular mechanism of gonadotropin releasing hormone action |
| Zvi Naor, Ludwig Kiesel, Jack Y. Vanderhoek and Kevin J. Catt | 711 Mechanism of action of gonadotropin releasing hormone: role of lipoxigenase products of arachidonic acid in luteinizing hormone release |
| Gyorgy Keri, Aniko Horvath, Karoly Nikolics and Istvan Teplan | 719 In the central role of GnRH in the regulation of reproductive functions: mechanism of action and practical results |
| Pushpa S. Kalra | 725 Stimulation of hypothalamic LHRH levels and release by gonadal steroids |
| Satyra P. Kalra | 733 Neural circuits involved in the control of LHRH secretion: a model for estrous cycle regulation |
| Maria L. Dufau and Gail F. Knox | 743 Fetal Leydig cell culture—an <i>in vitro</i> system for the study of trophic hormone and GnRH receptors and actions |
| Aaron J. W. Hsueh and James H. Schaeffer | 757 Gonadotropin-releasing hormone as a paracrine hormone and neurotransmitter in extra-pituitary sites |
| Takeshi Maruo, Tetsuo Otani and Matsuto Mochizuki | 765 Antigonadotropic actions of GnRH agonist on ovarian cells <i>in vivo</i> and <i>in vitro</i> |
| Michael Knecht, Tapio Ranta, Pei Feng, Osamu Shinohara and Kevin J. Catt | 771 Gonadotropin-releasing hormone as a modulator of ovarian function |
| Brian H. Vickery | 779 Comparisons of the potential utility of LHRH agonists and antagonists for fertility control |
| M. S. K. Prasad, V. V. Vani, V. S. Raju and P. R. K. Reddy | 793 Inhibition of sex-steroid hormone induced ornithine decarboxylase and poly(A)-polymerase activities by a GnRH agonist in the rat kidney |
| G. P. Talwar | 795 Immunobiology of gonadotropin-releasing hormone |
| Vinod Singh, Om Singh, Savita Kaul and G. P. Talwar | 801 The dominant role of amide group at C-terminus for recognition by antibody in primates against gonadotropin releasing hormone |
| Chandana Das, S. K. Gupta and G. P. Talwar | 803 Pregnancy interfering action of LHRH and anti-LHRH |

- A. Jagannadha Rao, R. Chakraborti, S. G. Kotagi, N. Ravindranath and N. R. Moudgal 807 Effect of LHRH agonists and antagonists in male and female bonnet monkeys (*Macaca radiata*)
- Rosemarie B. Thau, Patrizia Limonta, Fred Schmidt and Kalyan Sundaram 811 Species differences in the sensitivity to GnRH analogs
- P. R. K. Reddy, I. M. Rao, V. S. Raju, V. Rukmini and R. L. Reddy 819 Direct inhibitory actions of GnRH on accessory reproductive organs of rat

CHEMOTHERAPY IN COMBINATION WITH HORMONAL THERAPY IN BREAST CANCER. AN UPDATE

V Opening Remarks

I. Biological and Clinical Rationale for a Combined Approach to Breast Cancer

- | | | |
|---------------------------------------------------------------------------------------------------------------|------|--------------------------------------------------------------------------------------------------------------|
| Italo Nenci | 1093 | Expression and modulation of estrogen receptors in human breast cancer |
| M. R. Sertoli, P. G. Scarsi and R. Rosso | 1097 | Rationale for combining chemotherapy and hormonal therapy in breast cancer |
| S. Toma, F. Leonessa and R. Paridaens | 1105 | The effects of therapy on estrogen receptors in breast cancer |
| G. Leclercq, N. Devleeschouwer, A. Danguy, A. Verrijdt and J. C. Heuson | 1111 | <i>In vitro</i> synergism between estrogens and cytotoxic agents |
| Luigi Castagnetta, Adele Traina, Marcello Ciaccio, Giuseppe Carruba, Lucia Polito and Antonino Di Carlo | 1115 | Modulation of oestrogen excretion profiles by adjuvant chemotherapy in pre- and postmenopausal breast cancer |

II. Antiestrogens in Combination with Chemotherapy in Advanced Breast Cancer

- | | | |
|---------------------------------------------------------------------------------------------------------------|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Francesco Boccardo, Alessandra Rubagotti, Riccardo Rosso and Leonardo Santi | 1123 | Chemotherapy with or without tamoxifen in post-menopausal patients with late breast cancer. A randomized study |
| F. Cavalli, A. Goldhirsch, R. Joss and K. W. Brunner | 1129 | Hormono-chemotherapy in the treatment of advanced breast cancer |
| Michael C. Perry, Carl G. Kardinal, Vivian Weinberg, Sandra J. Ginsberg, Ann Hughes and William Wood | 1135 | Chemotherapy with cyclophosphamide, adriamycin, and 5-fluorouracil compared to chemotherapy plus hormonal therapy with tamoxifen in the treatment of advanced breast cancer: an interim analysis |
| H. T. Mouridsen, C. Rose, E. Engelsmann, R. Sylvester and N. Rotmensz | 1141 | Combined cytotoxic and endocrine therapy in postmenopausal patients with advanced breast cancer. A randomized EORTC study of CMF vs CMF + tamoxifen |

III. Antiestrogens in Combination with Chemotherapy in Early Breast Cancer

- | | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------------------------------------------------------------------------------------------------------|
| C. A. Hubay, O. H. Pearson, A. Manni, N. H. Gordon and W. L. McGuire | 1147 | Adjuvant endocrine therapy, cytotoxic chemotherapy and immunotherapy in stage II breast cancer: 6-year result |
| Saul E. Rivkin, William A. Knight III, Robert McDivitt, Tony Cruz, Mary Foulkes, C. Kent Osborne, Carol J. Fabian and John J. Costanzi | 1151 | Adjuvant therapy for breast cancer with positive axillary nodes designed according to estrogen receptor status |
| A. Goldhirsch | 1155 | Adjuvant treatment in operable breast cancer |
| Arne Wallgren, Edward Baral, Ulla Glas, Leif Karnström, Bo Nordenskiöld, Nils-Olof Theve and Claes Silfverswärd | 1161 | Adjuvant tamoxifen treatment in postmenopausal patients with operable breast cancer |

IV. Experimental Models and New Perspectives in a Combined Approach to Breast Cancer

- | | | |
|------------------------------------------------------------------------------------------------------------------|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| M. Sluysen, S. G. Evers and C. C. J. de Goeij | 1163 | Chemotherapy and hormonal therapy of mouse mammary tumors |
| P. F. Conte, G. Fraschini and B. Drewinko | 1169 | Estrogen induced expansion of the growth fraction in receptor negative human breast cancer |
| Marc E. Lippman, Jane Cassidy, Margaret Wesley and Robert C. Young | 1173 | Increasing the response rate to cytotoxic chemotherapy by endocrine means |
| R. Paridaens, J. Blonk Van Der Wijst, J. P. Julien, A. Clarysse, E. Ferrazzi, M. Rotmensz and J. C. Heuson | 1181 | Aminoglutethimide and estrogenic stimulation before chemotherapy for treatment of advanced breast cancer. Preliminary results of a phase II study conducted by the E.O.R.T.C. breast cancer cooperative group |

SUBJECT INDEX

ACTH

- activation of microsomal cAMP-dependent protein kinase isoenzyme I by, 133
- effect on DHA, DHA sulfate and cortisol production, 153

Adrenal(s)

- cholesteryl esters as substrate source for steroidogenesis, 967
- drugs affecting steroidogenesis in, 235
- effect of several pro-opiomelanocortin derived peptides on steroidogenesis in, 185

Adrenocortical

- structure and function, 577

Affinity chromatography

- extraction procedure for the measurement of estradiol and testosterone, 1043

Aldosterone

- antagonists, 57
- binding in the rat epididymis, 231
- factors affecting the secretion of, 219
- isolation and characterization of an, dimer, 517
- receptor(s)
- in rat kidney, 333
- reduced metabolites, in rat kidney, 503
- synthesis of analog of, 207

Allylestrenol

- receptor binding to, 165

Aminoglutethimide

- and estrogenic stimulation before chemotherapy for treatment of advanced breast cancer, 1181

Androgen(s)

- conversion to estrogen in the fetal and neonatal female gonad, in the rat, 995
- in rat ventral prostate, 107
- metabolism by human endometrium and adrenal cortex, 347
- metabolism in the adult urinary bladder epithelium and urogenital sinus mesenchyme, 95
- production, by rabbit adrenocortical cells, 1071
- receptor(s)
- in the bovine ovarian capsule, 27
- in the genital tubercle of fetal and newborn rabbit, 399
- mini-column method for routine measurement of, 421
- new exchange procedure for, 405
- structure and effect of sodium molybdate, 643

Anti-estrogen

- binding to rat uterine and pituitary estrogen receptor, 537

Baboon

- interconversion of cortisol and cortisone, 275

Bovine

- activation of microsomal cAMP-dependent protein kinase isoenzyme I by ACTH, in adrenal cells of, 133
- effect of high and low density lipoprotein on cortisol synthesis, in the adrenals of, 369
- identification of androgen receptor, in ovarian capsule of, 27
- monoclonal antibodies against, adrenal cytochrome P-450, 1013
- steroidogenesis, in adrenal cells of, 185

Brain

- nuclear uptake of dihydrotestosterone, 389

Breast cancer

- adjuvant tamoxifen treatment, 1161
- adjuvant therapy in operative, 1151, 1156
- aminoglutethimide and, 1181
- and estrogen excretion in pre- and postmenopausal, 1115
- binding of catecholestrogens in, 603
- chemotherapy and hormonotherapy, in mouse, 1163
- chemotherapy with and without tamoxifen in postmenopausal patients, 1123
- chemotherapy with cyclophosphamide, adriamycin and 5-fluorouracil, 1135
- combined cytotoxic and endocrine therapy, 1141
- effect of estradiol on proliferation of ZR-75 cells of, 567
- effect of molybdate on classification of estrogen and progesterone receptor status in, 949
- effect of therapy on estrogen receptors in, 1105
- endocrine therapy, cytotoxic chemotherapy and immunotherapy in, 1147
- endocrinological and clinical aspects of GnRH in, 843
- estrogen effect in receptor-negative, 1169
- expression and modulation of estrogen receptor in, 1093
- GnRH agonist in, 867
- hormone-chemotherapy in advanced, 1129
- increasing the response rate to cytotoxic chemotherapy by endocrine means, 1173
- rationale for combining chemotherapy and hormonal therapy, 1097
- role of estrogen in proliferation of MCF-7 cell line, in human 87
- synthesis of estradiol fatty acid esters by, 637

Calcitriol

- rat testicular receptor for, 51

Calcium

- effect of, on corticosteroid secretion, 169

Catecholestrogen

- binding in breast cancer, 603

Cholesterol sulfate

- the side-chain cleavage of, 313

Clobetasol propionate

- induction of mono-oxygenase activity by, 431

Corticosteroid-binding globulin (CBG)

- biosynthesis by fetal hepatocytes, 195

Cortisol

- levels in umbilical cord and maternal plasma, 445
- transformation by *Arthrobacter globiformis* cells, 307

Cortisone

- effect in the interconversion of cortisone \rightleftharpoons cortisol, in the baboon, 275
- levels in umbilical cord and maternal plasma, 445

Cytochrome P-450

- inhibition of steroidogenic, enzymes, in rat testes 1023

Dehydroepiandrosterone (DHA)

- effect of, in human erythrocytes, 657

6-Dehydro-9 α -fluorocortisol

- effect on sodium and potassium excretion in the rat, 673

Dexamethasone

- suppresses estrogen action at pituitary level, 385

DHA-sulfate

- levels in umbilical cord and maternal plasma, 445

1,2-Diaryl-3,4-dihydronaphthalenes

- photofluorogenic ligands for the estrogen receptor, 929

5 α -Dihydrotestosterone

- effect of, on steroid concentration in the human testicular vein and artery, 373

- levels in epididymis, vas deferens, seminal vesicle and preputial gland of mouse, 201
- production and metabolism, 415
- uptake and metabolism, in the Rhesus monkey, 389
- 1 α ,25-Dihydroxy-D₃
 - influence of triamcinolone, estradiol and testosterone on binding of, to chick intestinal receptor, 913
 - receptor-like, in cultured rat pituitary cells, 625
- 7 α ,17 α -Dimethyl[17 α -methyl-³H]19-nortestosterone
 - use for estimation of androgen receptors in rat liver cytosol, 121
- DNA
 - modulation of, binding of glucocorticoid receptor, 125
- Estradiol
 - fatty-acid esters of, in ovariectomized rats, 599
 - 2,4-hydroxylase activities in rat hypothalamus and hippocampus, 919
 - metabolism, oral compared to intravenous administration, 1097
 - synthesis of fatty acids of, in human breast cancer, 637
- Estradiol-17-sulfate
 - metabolism of, by pheochromocytoma tissue, 239
- Estrogen(s)
 - effect in receptor-negative human breast cancer, 1169
 - entry into endometrial cells, 145
 - in vitro* synergism between, and cytotoxic agents, 1111
 - receptor(s)
 - expression and modulation in human, 1093
 - in anterior pituitary, 77
 - in human pancreas, 115
 - in the epididymis and accessory sex organs, of sexually immature rabbits, 39
 - properties of, solubilized by micrococcal nuclease, 137
 - 17 α -substituted, shielding effects of, 611
- Flutamide
 - combination therapy with, and castration in advanced prostate cancer, 833
- FSH
 - responses to GnRH, 823
- α_2 -Globulin
 - influence of neonatal androgenization on, 557
- Glucocorticoid(s)
 - receptor(s)
 - binding to DNA, 125
 - biopotency of corticosterone on, 669
 - effect of molybdate on, 529
 - in murine visceral yolk sac and liver, 437
 - in rat liver, 593
- GnRH
 - agonist and prostate cancer, 833
 - agonistic effect in the rat kidney, 793
 - agonist in human male, 855
 - agonists and antagonists for fertility control, 779
 - agonists and antagonists of, in monkeys, 807
 - agonist treatment in clinical and experimental breast cancer, 867
 - and breast cancer, 843
 - and contraception, 827, 849
 - and role of lipoxigenase products of arachidonic acid in luteinizing hormone release, 711
 - antibody in primates against, 801
 - antigonadotropic actions of, on ovarian cells, 765

- as a modulator of ovarian function, 771
 - as a paracrine hormone and neurotransmitter in extra-pituitary sites, 757
 - immunobiological aspects of, 795
 - inhibition of 17α -hydroxylase; $17-20$ desmolase, 743
 - inhibitory actions of, on accessory reproductive organs in rat, 819
 - LH and FSH responses to, in health and disease, 823
 - molecular mechanism of, action, 703
 - neural circuits involved in the secretion of, 733
 - pregnancy interfering action of, and anti-GnRH, 803
 - receptor-mediated actions of, in the pituitary gonadotroph, 677
 - receptor regulation, in relationship to gonadotropin secretion, 691
 - receptors and actions in adult Leydig cells, 743
 - receptors and actions in fetal Leydig cells in culture, 743
 - role of, in the regulation of reproductive functions, 719
 - species differences in sensitivity to, analogs, 811
 - stimulation of, by steroids, 725
 - testicular action of, 743
 - unexplained infertility, 823
- Gonadotropin(s)**
- actions in fetal and adult Leydig cells, 743
 - effect of, in placental conversion of pregnenolone to progesterone, 517
 - secretion and relationship to GnRH, 691
- hCG**
- testicular responsiveness to, before and after anti-estrogen treatment, 651
- High and low density proteins**
- on corticotropin-mediated cortisol synthesis, 369
- Human breast cancer**
- estrogen and progesterone receptors, 949
- Human breast cancer cells (ZR-75)**
- estradiol effect on, 567
- Human sex hormone binding globulin**
- a liquid-phase immunoradiometric assay for, 451
- 19-Hydroxyaldosterone**
- synthesis of, 207
- 16α -Hydroxyandrost-4-ene-3,17-dione**
- radioimmunoassay of, 103
- 25-Hydroxydihydrotestosterone**
- isolation and identification, 223
- 21-Hydroxylase**
- microsomal activity in human adrenal, 67
- 6β -Hydroxylation**
- of 4-androstene-3,17-dione and 4-pregnene-3,20-dione in rat liver, 339
- 17α -Hydroxypregnene C17-20 lyase**
- activity, in human testis, 491
- 20α -Hydroxysteroid dehydrogenase**
- purification and characterization, from bull testis, 1001
- 3β -Hydroxysteroid dehydrogenase**
- regulatory mechanism in the follicle, 663
- 17β -Hydroxysteroid dehydrogenase**
- of human placenta, 357
- 4-Hydroxytamoxifen**
- binding to estrogen receptors in MCF-7 cells, 547
- 25-Hydroxyvitamin D₃**
- effect of ketoconazole and miconazole in the metabolism of, 991
- 3-Ketosteroid-1-en-dehydrogenase**
- activity regulation of, 365
- LH**
- responses to GnRH, 823

- Lithocholic acid
 - synthesis of *N*- ϵ -lithocholyl-*l*-lysine, a component of tissue-bound to, 823
- MCF-7 cancer cells
 - binding of 4-hydroxytamoxifen to, 547
 - kinetic studies of oestradiol 17 β -hydroxysteroid dehydrogenase in, 1079
 - role of estrogens in the proliferation of, 87
- Medroxyprogesterone acetate
 - effects of, on enzyme activities in human endometrial carcinoma, 1059
- Monkeys
 - effect of GnRH agonists and antagonists in, 803
- Monoclonal antibodies
 - against bovine adrenal cytochrome P-450, 1013
- Mouse
 - mammary tumors, chemotherapy and hormonal therapy, 1163
- Neurotransmitter
 - in extrapituitary sites, 757
- 19-nor Deoxycorticosterone
 - hypertensinogenic activity of, 535
- Oocyte maturation
 - in landlocked Atlantic salmon, 583
- Ovarian cells
 - antigonadotropic action of GnRH, 765
- Ovulation
 - GnRH analogs for female contraception by inhibition of, 849
- Pheromone receptor
 - levels in *Achlya ambisexualis*, 483
- Pituitary–testicular axis
 - abnormalities in immature rats, 253
- Poly (A) polymerase activities
 - by GnRH agonist, in the rat kidney, 793
- Pregnancy
 - interfering action of GnRH and anti-GnRH, 803
- Progesterone
 - adrenal secretion of, in rat, 617
 - 21-hydroxylase activity of, in rabbit liver, 1087
 - inhibition of fatty acids, in rabbit mammary alveolar explants, 159
 - metabolism in gingiva, 1031
 - metabolism in rabbit liver, 1007
 - receptor,
 - binding affinity of 4-ene-3-one steroids of, 895
- Progestins
 - specifically suppress α -lactalbumin synthesis, 901
- Prostate
 - effects of dicyclohexane derivatives on androgen metabolism in, of rat, 497
- Rat
 - hypothalamus and hippocampus, activities of 2,4-hydroxylases, 919
 - testicular receptor for calcitriol, 51
- Receptor(s)
 - aldosterone
 - in rat epididymis, 231
 - in rat kidney, 333
 - androgen(s)
 - a new exchange assay for, 405
 - in bovine ovarian capsule, 19
 - in the genital tubercle of fetal and newborn rabbit, 399

- structure and effects of sodium molybdate, 643
- use of $7\alpha,17\alpha$ -dimethyl[17α -methyl- ^3H]19-nortestosterone for the estimation of, 121
- calcitriol
 - in the testis, 51
- cytosol
 - binding of ester and amide epimers of 20ϵ -dihydroprednisolonic acid, 943
- estrogen(s)
 - 1,2-diaryl-3,4-dihydronaphthalenes, photofluorogenic ligands for, 929
 - hormonal effects on, in the epididymis and accessory sex organs, 39
 - in anterior pituitary of rats, 73
 - in chick oviduct, 9
 - in human breast cancer, 949
 - in human pancreas, 115
 - physical-chemical properties of, 137
- glucocorticoid(s)
 - and association with RNA, 299
 - biopotency of corticosterone and dexamethasone in, 669
 - characterization of non-liganded, in rat liver cytosol, 1
 - formation of a fluorescent, in HCT cell cytosol, 267
 - in rat liver, 593
 - modulation of DNA binding to, 125
- progesterone
 - binding affinity of 4-en-3-one steroids, 895
 - size exclusion of, in HPLC, 939
- steroids
 - effect of denervation or castration, 907
- α -zearalanol (P-1496)
 - in rat liver, 279
- RU-38486
 - autoradiographic study of the nuclear transfer of, in mouse tissues, 291
 - a potent antiglucocorticoid, 247
 - does not impair gonadotropin-stimulated luteal adenylyl cyclase activity or gonadotropin release by pituitary cells, 1053
 - effect on tryptophan oxygenase, 1091
- Saliva
 - progesterone content in, 975
- β -Sitosterol
 - degradation of, by *Pseudomonas* sp. NCIB 10590, 327
- S-115 mammary tumor cells
 - effect of androgens in the regulation of RNA, 379
- Somatostatin
 - effect of, in the zona glomerulosa of rats, 353
- Spirolactone
 - effect of, on genital skin 5α -reductase activity, 191
- Steroid-receptor
 - structural conversion of, 583
- Steroid(s)
 - analysis of, metabolites produced by theca cells, 375
 - analysis of profiles of, in rat testicular tissues, 469
 - binding to cytosolic estrogen receptor, 259
 - glycosides, bioconversion of, 323
 - hydrophobic interaction chromatography for the separation of protein-bound and free, 955
 - α -ketol oxidase, solubilisation and fractional precipitation of, 1083
 - metabolism, in the inner and outer zones of the guinea pig adrenal cortex, 477
 - receptors, effect of denervation or castration, 907
 - stimulation of hypothalamic GnRH by, 725

- Tamoxifen
 adjuvant treatment with, in postmenopausal patients, 1161
 chemotherapy with and without, in postmenopausal patients, 1123
- Tamoxifen aziridine
 biological activities and binding, 875
- Testosterone
 binding to human serum albumin, 177
 19-*o*-carboxymethyl ether and 19-hemisuccinate derivatives of, iodinated radioligands for RIA of, 981
 inhibitor of, biosynthesis, in rat testis, 73
 levels in epididymis, vas deferens, seminal vesicle and preputial gland of mice after hCG, 201
 response of serum, and its precursors, SHBG and CBG, to anabolic steroids, 33
- 3 β -Thiovitamin D₃
 synthesis and biologic activity, 81
- Transcortin
 and α_{20} -globulin messenger RNA activities, in the rat, 243
 modulates the effect of cortisol on mitogen-induced lymphocyte proliferation, 553
- Triamcinolone
 effect on 1,25-dihydroxyvitamin D₃ binding, 913
- Unusual estrogen-binding protein
 of rat liver: the role of sex steroids and hypophysis in its regulation, 461
- Uterine cell proliferation
 effect of estrogen, 1037
- Vitamin D
 preliminary X-ray analysis of, binding protein from human serum, 1077
- α -Zearalanol (P-1496)
 binding to proteins in the rat liver, 279

We wish to thank the following for their kind cooperation in reviewing papers for the *Journal of Steroid Biochemistry*:
