

ANNOUNCEMENT

THE LAURENTIAN HORMONE CONFERENCE

25-29 August 1990, Copper Mountain, Colorado

Program:

- Bert O'Malley:** Molecular biology of steroid receptor action
Lynn Loriaux: Review of the clinical applications of GnRH super agonists
John Marshall: GnRH pulse-regulators of gonadotropin synthesis and ovulatory cycles
Jon Levine: Neuroendocrine regulation of the LHRH pulse generator
Pam Mellon: Immortalization of neuroendocrine cells by targeted oncogenes
John Baxter: Molecular biology of renin and its gene
John Funder: Steroids, receptors, response elements; the limits of signal specificity
A. E. Boyd: Mechanisms of sulfonylurea signal transduction in the beta cell
Daryl Granner: Identification of the insulin response sequence
Graham Bell: Molecular biology of glucose transport
Gladys Teitleman: Molecular analysis of pancreatic islet cell lineage and differentiation

For registration information contact:

Dr James H. Clark,
The Laurentian Hormone Conference,
Department of Cell Biology,
Baylor College of Medicine,
Houston,
TX 77030, U.S.A.
