

PERGAMON

Journal of Steroid Biochemistry & Molecular Biology 85 (2003) VII–X

The Journal of
Steroid Biochemistry
&
Molecular Biology

www.elsevier.com/locate/jsbmb

Subject Index of Vol. 85, Nos. 1–5

ACTH

salt-inducible kinase-mediated regulation of steroidogenesis at the early stage of, stimulation, 397

Adrenal cortical steroidogenesis

regulation of differential chicken ovalbumin upstream promoter-transcription factor (COUP-TF)-coregulator interactions in, 449

Adrenal hyperplasia

molecular pathogenesis of lipoid, and congenita, 483

Adrenocortical cell

transplantation of, in *scid* mice: role of the host animal's adrenal glands, 285

Aldosterone

pathophysiological roles of vascular 11 β -hydroxysteroid dehydrogenase and aldosterone, 443

rapid, actions: from the membrane to signaling cascades to gene transcription and physiological effects, 375

regulation of T-type calcium channels by, 383

Alzheimer's disease

estrogens and menopause: pharmacology of conjugated equine estrogens and their potential role in the prevention of neurodegenerative diseases such as, 473

Androgen(s)

deficiency in the aging male: benefits and risks of, supplementation, 349

in women, 363

receptor(s)

activation function-1 domain of, 201

functions of, from reverse genetic models, 95

treatment by, of male hypogonadism in older males, 367

Antiestrogen, FaslodexTM

studies on the development of resistance to the pure, in three human breast cancer cell lines, 33

Apoptosis of leukemic cells

gene networks in glucocorticoid-evoked, 183

Brain

detection of 20(*S*)-hydroxycholesterol in extracts of rat, by a gas chromatograph/mass spectrometry technique, 57

Breast cancer cell(s)

studies on the development of resistance to the pure antiestrogen FaslodexTM in three human, lines, 33

Breast cancer growth

estrogen-responsive RING finger protein controls, 101

Cell proliferation

11 β -hydroxysteroid dehydrogenases, and malignancy, 415

nuclear receptor modifications and endocrine, 133

Cerebellar Purkinje neuron

biosynthesis and action of neurosteroids in the, 311

Coactivators

roles of protein–protein interactions and protein methylation in transcriptional activation by nuclear receptors and their, 139

Corticosteroid(s)

concurrent, and phenanthrene transformation by filamentous fungus *Cunninghamella elegans*, 63

effect of, on spontaneous and follicle-stimulating hormone induced oocyte maturation in mouse oocytes during culture, 423

Dehydroepiandrosterone

prevention of diabetes, hepatic injury, and colon cancer with, 469

1 α ,25-Dihydroxyvitamin D3

inhibition of fatty acid synthase expression by, in prostate cancer cells, 1

ErbB2

receptor

crosstalk between the extracellular domain of the, and insulin growth factor IGF-1 receptor signaling, 105

Estrogen(s)

and phytoestrogens: brain plasticity of sexually dimorphic brain volumes, 299

receptor(s)

ligand-independent coactivation of, - α AF-1 by steroid receptor RNA activator (SRA) via mitogen-activated protein kinase activation, 123

modulation of, activity by selective coregulators, 117

Estrogen-responsive RING finger protein

control of breast cancer growth by, 101

Fatty acid synthase

inhibition of, expression by 1 α ,25-dihydroxyvitamin D3 in prostate cancer cells, 1

GATA transcription factors

novel roles for, in the regulation of steroidogenesis, 291

Genomic steroid action

starts at the plasma membrane in membrane-initiated steroid signaling (MISS), 9

Germ cell apoptosis

deciphering the pathways of, in the testis, 175

Glomerulosa cells

rat, in primary culture and *E. coli* lipopolysaccharide action, 81

Glucocorticoid(s)

effect of, on spontaneous and follicle-stimulating hormone induced oocyte maturation in mouse oocytes during culture, 423

Gonadotropin releasing hormone

activation and nuclear translocation of PKC δ , Pyk2 and ERK1/2 by, in HEK293 cells, 337

Histone deacetylase complexes

dual mechanisms of regulation of transcription of luteinizing hormone receptor gene by nuclear orphan receptors and, 401

20(S)-Hydroxycholesterol

detection of, in extracts of rat brains and human placenta by a gas chromatograph/mass spectrometry technique, 57

3 α -Hydroxysteroid dehydrogenase(s)

structure–function relationships in, a comparison of the rat and human isoforms, 247

3 β -Hydroxysteroid dehydrogenase/ Δ^5 - Δ^4 isomerase

molecular cloning and characterization of, cDNAs from Japanese eel ovary, 49

3 β -Hydroxysteroid dehydrogenase isomerase (3 β -HSD)

activity of, in the rat sciatic nerve: kinetic analysis and regulation by steroids, 89

11 β -Hydroxysteroid dehydrogenase(s)

cell proliferation and malignancy, 415

pathophysiological roles of vascular, and aldosterone, 443

type 2: possible role of, in cardiac fibrosis in the spontaneously hypertensive rat, 439

Hypogonadism

androgen treatment of, in older males, 367

Luteinizing hormone receptor

dual mechanisms of regulation of transcription of, gene by nuclear orphan receptors and histone deacetylase complexes, 401

Menopause

pharmacology of conjugated equine estrogens and their potential role in the prevention of neurodegenerative diseases such as Alzheimer's, 473

- Mineralocorticoid(s)
receptor
 detecting, structure and function, 389
 possible role of, in cardiac fibrosis in the spontaneously hypertensive rat, 439
- Neuroactive steroids
 effects of, on myelin of peripheral nervous system, 323
 new biomarkers of cognitive aging, 329
- Neurosteroids
 biosynthesis and action of, in the cerebellar Purkinje neuron, 311
- Nuclear orphan receptors
 dual mechanisms of regulation of transcription of luteinizing hormone receptor gene by, 401
- Nuclear receptor(s)
 modifications and endocrine cell proliferation, 133
 roles of protein-protein interactions and protein methylation in transcriptional activation by nuclear receptors and their coactivators, 139
- Peripheral nervous system
 effects of neuroactive steroids on myelin of, 323
- Peroxisome proliferator activated receptor(s) (PPAR)
 induction of endogenous genes by, - α ligands in a human kidney cell line and in vivo, 71
 regulation of transcriptional activities and roles in inflammation, 267
 the anti-apoptotic role of, - β contributes to efficient skin wound healing, 257
- Phytoestrogens
 estrogens and, brain plasticity of sexually dimorphic brain volumes, 299
- Placenta
 detection of 20(*S*)-hydroxycholesterol in extracts of human, placenta by a gas chromatograph/mass spectrometry technique, 57
- Progesterone
 as a regulator of granulosa cell viability, 167
 receptor(s)
 functional properties of the N-terminal region of, and their mechanistic relationship to structure, 209
 mitogen-activated protein kinases couple multiple functions of human, 147
 regulation of, isoforms expression by sex steroids in the rat lung, 25
- Prostate cancer cells
 inhibition of fatty acid synthase expression by 1 α ,25-dihydroxyvitamin D3 in, 1
- Receptor(s)
 androgen
 activation function-1 domain of, 201
 functions of, from reverse genetic models, 95
 ErbB2
 crosstalk between the extracellular domain of the, and insulin growth factor IGF-1 receptor signaling, 105
 estrogen(s)
 ligand-independent coactivation of, - α AF-1 by steroid receptor RNA activator (SRA) via mitogen-activated protein kinase activation, 123
 modulation of, activity by selective coregulators, 117
 mineralocorticoid(s)
 detecting, structure and function, 389
 possible role of, in cardiac fibrosis in the spontaneously hypertensive rat, 439
 progesterone
 functional properties of the N-terminal region of, and their mechanistic relationship to structure, 209
 mitogen-activated protein kinases couple multiple functions of human, 147
 regulation of, isoforms expression by sex steroids in the rat lung, 25
- Resistance/hypersensitivity syndromes
 tissue glucocorticoid effect on, 457

Sciatic nerve

3 β -hydroxysteroid dehydrogenase isomerase (3 β -HSD) activity in the, of rat: kinetic analysis and regulation by steroids, 89

Selective coregulators

modulation of estrogen receptor activity by, 117

Sex hormone binding globulin

structure/function analyses of human, and effects of zinc on steroid-binding specificity, 195

Steroid glucuronidation

the cynomolgus monkey (*Macaca fascicularis*) is the best animal model for the study of, 235

Steroid hormone production

by parasites: the case of *Taenia crassiceps* and *Taenia solium* cysticerci, 221

in toads, 227

Steroidogenesis

involvement of 5-lipoxygenase metabolites of arachidonic acid in cyclic AMP-stimulated, and steroidogenic acute regulatory protein gene expression, 159

novel roles for GATA transcription factors in the regulation of, 291

PAP7, a peripheral-type benzodiazepine receptor/protein kinase-R1 α -associated protein: a new element in the relay of the hormonal induction of, 275

salt-inducible kinase-mediated regulation of, at the early stage of ACTH-stimulation, 397

Sterol regulatory element binding protein (SREBP)

lanosterol metabolism and, expression in male germ cell maturation, 429

Testicular function

regulation of, in men: implications for male hormonal contraceptive development, 357

Testis

deciphering the pathways of germ cell apoptosis in, 175

We would like to express our deep thanks to the following persons for their kind collaboration in reviewing papers for this volume of **The Journal of Steroid Biochemistry & Molecular Biology**:

HONG LIU, Chicago, U.S.A.

LUU-THE V., Quebec, CANADA

RIEGEL A.T., Washington, U.S.A.

SCHMAUDER H.-P., Bad Langensalza, GERMANY
