

Subject index to volume 88

AF-1 and AF-2

estrogenic effects of resveratrol in breast cancer cells expressing mutant and wild-type estrogen receptors, 223

5-Androstene-3 β ,17 β -diol

proliferative effects of, on cell cycle analysis and cell proliferation in MCF7, T47D and MDAMB231 breast cancer cell lines, 37

Antiandrogen(s)

screening of some, endocrine disruptors using a recombinant cell based *in vitro* bioassay, 157

Antiprogestational/antiglucocorticoid

activity of the putative metabolites and synthetic derivatives of CDB-2914, CDB-4124, and mifepristone, 277

AP1

effects of environmental estrogenic chemicals on, mediated transcription with estrogen receptors α and β , 53

Apoptosis

inhibition of, by dehydroepiandrosterone and its sulfate in human peripheral blood lymphocytes, 261

Aromatase cytochrome P450

and estrogen and progesterone receptors in uterine sarcomas: correlation with clinical parameters, 183

Breast cancer cells

concentration-dependent mitogenic and antiproliferative actions of 2-methoxyestradiol in estrogen receptor-positive human, 265

endogenous human prolactin and not exogenous human prolactin induces estrogen receptor alpha and prolactin receptor expression and increases estrogen responsiveness in, 69

estrogenic effects of resveratrol in, expressing mutant and wild-type estrogen receptors: role of activation function (AF) -1 and AF-2, 223

immediate early gene X-1 (IEX-1), a hydroxytamoxifen regulated gene with increased stimulation of MCF-7 derived resistant, 247

proliferative effects of 5-androstene-3 β ,17 β -diol and 5 α -dihydrotestosterone on cell cycle analysis and cell proliferation in MCF7, T47D and MDAMB23, 37

Cytochrome P450scc

expression of, mRNA and protein in the rat kidney from birth to adulthood, 79

suppression of human, aromatase activity by monoclonal and recombinant antibody fragments and identification of a stable antigenic complex, 235

Dehydroepiandrosterone

and its sulfate inhibit the apoptosis in human peripheral blood lymphocytes, 261

1,25-dihydroxyvitamin D3

treatment with 'non-hypercalcemic' analogs of, increases responsiveness to 17 β -estradiol, dihydrotestosterone or raloxifene in primary human osteoblasts, 213

5 α -Dihydrotestosterone

proliferative effects of, on cell cycle analysis and cell proliferation in MCF7, T47D and MDAMB231 breast cancer cell lines, 37

Endometrium

developmental and hormonal regulated gene expression of fibroblast growth factor 2 (FGF-2) and its receptors in porcine, 295

Enzymatic and non-enzymatic anti-oxidant

aging alters the functional expression of, defense systems in testicular rat Leydig cells, 61

Enzymes inhibition

- selective nonsteroidal inhibitors of 5 α -reductase type 1, 1
- α -Epithelial amiloride-sensitive sodium channel (α ENaC) gene
 - sodium chloride regulation of the, requires syntheses of new protein(s), 305
- Estradiol
 - high glucose blocks the effects of estradiol on human vascular cell growth: differential interaction with, 101
 - nongenomic effects of 17 β , – diversity of membrane binding sites, 323
- Estrogen(s)
 - inducible uterine flavonoid binding sites, 377
 - receptor(s)
 - aromatase cytochrome P450 and progesterone and, receptors in uterine sarcomas: correlation with clinical parameters, 183
 - cross-talk between,-, protein kinase A-, and mitogen-activated protein kinase- mediated signaling pathways in the regulation of lactotroph proliferation in primary culture, 123
 - effects of environmental estrogenic chemicals on AP1 mediated transcription with, α and β , 53
 - estrogenic effects of resveratrol in breast cancer cells expressing mutant and wild-type, 223
 - identification of novel, - α antagonists, 351
 - induction of, - α in breast cancer cells, 69
 - molecular determinants of, α and β , involved in selectivity of 16 α -iodo-17 β estradiol, 17
 - molecular mechanism of, - α -specific, estradiol-dependent expression of the progesterone receptor (PR)B-isoform, 131
- Estrogen response element
 - differential regulation of the human progesterone receptor gene through an, half site and Sp1 sites, 113
- Flavonoid binding sites
 - estrogen-inducible uterine, 377
- Fibroblast growth factor 2
 - developmental and hormonal regulated gene expression of, and its receptors in porcine endometrium, 295
- Glucocorticoid(s)
 - differential expression of, receptor protein during mouse embryonic development, 367
 - receptor(s)
 - differential expression of 11 β -hydroxysteroid dehydrogenase types 1 and 2 mRNA and, protein during mouse embryonic development, 367
 - the treatment of, -induced osteoporosis, 337
- Glucocorticoid-dependent transactivation
 - skeletal muscle: a dual system to measure, and transrepression of gene regulation, 191
- 3 α / β ,20 β -Hydroxysteroid dehydrogenase
 - has a cysteine residue that is involved in binding of cofactor NADPH, 393
- 3 β -Hydroxysteroid dehydrogenase
 - flavonoid inhibition of overexpressed human, type II, 175
- 11 β -Hydroxysteroid dehydrogenase
 - types 1 and 2 mRNA : differential expression of, and glucocorticoid receptor protein during mouse embryonic development, 367
- Hydroxytamoxifen
 - immediate early gene X-1 (IEX-1), a -regulated gene with increased stimulation of MCF-7 derived resistant breast cancer cells, 247
- Inhibitors of steroid sulfatase
 - 2-phenylindole sulfamates as, with antiproliferative activity in MCF-7 breast cancer cells, 409
- Leukemic cells
 - impaired nuclear localization of vitamin D receptor in, resistant to calcitriol-induced differentiation, 361
 - mechanisms of resistance to the cytotoxic effects of oxysterols in human, 311
- Leydig cells
 - aging alters the functional expression of enzymatic and non-enzymatic anti-oxidant defense systems in testicular rat, 61

- LNCaP prostate cancer cell(s)
 aryl hydrocarbon receptor-mediated inhibition of, growth and hormone-induced transactivation, 27
- Lymphocytes
 dehydroepiandrosterone and its sulfate inhibit the apoptosis in human peripheral blood, 261
- MCF-7 breast cancer cells
 2-phenylindole sulfamates : inhibitors of steroid sulfatase with antiproliferative activity in, 409
- Membrane binding sites
 nongenomic effects of 17β -estradiol – diversity of, 323
- 2-Methoxyestradiol
 concentration-dependent mitogenic and antiproliferative actions of, in estrogen receptor-positive human breast cancer cells, 265
- Nongenomic effects
 of 17β -estradiol – diversity of membrane binding sites, 323
- Osteoblasts
 treatment with 'non-hypercalcemic' analogs of 1,25-dihydroxyvitamin D3 increases responsiveness to 17β -estradiol, dihydrotestosterone or raloxifene in primary human, 213
- Osteoporosis
 treatment of glucocorticoid-induced, 337
- Oxysterols
 mechanisms of resistance to the cytotoxic effects of, in human leukemic cells, 311
- Parathyroid cells
 vitamin D3 polyunsaturated side-chain analogues (EB1089, GS1590) and the 20-epi-vitamin D3 analogue CB1393 suppress parathyroid hormone secretion and mRNA level in bovine, 289
 Peroxisome proliferator-activated receptor α (PPAR α) activators, 203
 induce hepatic farnesyl diphosphate synthase gene expression in rodents, 203
- 2-Phenylindole sulfamates
 inhibitors of steroid sulfatase with antiproliferative activity in MCF-7 breast cancer cells, 409
- Progesterone
 receptor(s)
 aromatase cytochrome P450 and estrogen and, in uterine sarcomas: correlation with clinical parameters, 183
 differential regulation of the human, gene through an estrogen response element half site and Sp1 sites, 113
 molecular mechanism of estrogen receptor (ER) α -specific, estradiol-dependent expression of the, (PR)B-isoform, 131
- Prolactin
 receptor(s)
 endogenous human prolactin and not exogenous human prolactin induces, expression in breast cancer cells, 69
- Receptor(s)
 estrogen(s)
 aromatase cytochrome P450 and progesterone and, receptors in uterine sarcomas: correlation with clinical parameters, 183
 cross-talk between, -, protein kinase A-, and mitogen-activated protein kinase- mediated signaling pathways in the regulation of lactotroph proliferation in primary culture, 123
 effects of environmental estrogenic chemicals on AP1 mediated transcription with, α and β , 53
 estrogenic effects of resveratrol in breast cancer cells expressing mutant and wild-type, 223
 identification of novel, - α antagonists, 351
 induction of, - α in breast cancer cells, 69
 molecular determinants of, α and β , involved in selectivity of 16α -iodo- 17β estradiol, 17
 molecular mechanism of, - α -specific, estradiol-dependent expression of the progesterone receptor (PR)B-isoform, 131
- fibroblast growth factor 2
 developmental and hormonal regulated gene expression of, in porcine endometrium, 295
- glucocorticoid(s)
 differential expression of 11β -hydroxysteroid dehydrogenase types 1 and 2 mRNA and, protein during mouse embryonic development, 367
- progesterone

- aromatase cytochrome P450 and estrogen and, in uterine sarcomas: correlation with clinical parameters, 183
- differential regulation of the human, gene through an estrogen response element half site and Sp1 sites, 113
- molecular mechanism of estrogen receptor (ER) α -specific, estradiol-dependent expression of the, (PR)B-isoform, 131
- prolactin
 - endogenous human prolactin and not exogenous human prolactin induces, expression in breast cancer cells, 69
- vitamin D
 - impaired nuclear localization of, in leukemia cells resistant to calcitriol-induced differentiation, 361
- 5 α -Reductase
 - selective nonsteroidal inhibitors of 5 α -reductase type 1, 1
- Selective estrogen receptor modulator
 - comparative study of the short-term effects of a novel, ospemifene, and raloxifene and tamoxifen on rat uterus, 143
- Sex hormone binding globulin
 - concentrations, and urinary hydroxylated estrogen metabolites in postmenopausal women in relation to daidzein-metabolizing phenotypes, 399
- Steroid(s)
 - identification of a novel, -inducible gene associated with the *β hsd* locus of *comamonas testosteroni*, 91
- Steroid sulfatase inhibitors
 - development of novel, TZS-8478 potently inhibits the growth of breast tumors in postmenopausal breast cancer model rats, 167
- Sulfotransferases
 - sulfation of tibolone and tibolone metabolites by expressed human cytosolic, 383
- Tamoxifen
 - comparative study of the short-term effects of a novel selective estrogen receptor modulator, ospemifene, and raloxifene and, on rat uterus, 143
- Tibolone
 - sulfation of, and its metabolites by expressed human cytosolic sulfotransferases, 383
- Uterine sarcomas
 - aromatase cytochrome P450 and estrogen and progesterone receptors in, correlation with clinical parameters, 183
- Vitamin D
 - impaired nuclear localization of, in leukemia cells resistant to calcitriol-induced differentiation, 361
 - polyunsaturated side-chain analogues (EB1089, GS1590) and the 20-epi-vitamin D3 analogue CB1393 suppress parathyroid hormone secretion and mRNA level in bovine parathyroid cells, 289

We would like to express our deep thanks to the following persons for their kind collaboration in reviewing papers for this volume of **The Journal of Steroid Biochemistry & Molecular Biology**:

HAYASHI H., Saitama, JAPAN
HONG LIU, Chicago, U.S.A.
JACOBSEN B., Denver, U.S.A.

MORRIS D., Providence, U.S.A.
POIRIER D., Quebec, CANADA
RICHER J., Denver, U.S.A.
SIMARD J., Quebec, CANADA
TASSI H., Washington, U.S.A.
THEMMEN A.P.N., Rotterdam,
 The NETHERLANDS
