

ERRATUM

In the December 2006 issue of the *Journal*, in the article entitled “Premature Truncation of a Novel Protein, RD3, Exhibiting Subnuclear Localization Is Associated with Retinal Degeneration” by Friedman et al. (79:1059–1070), the RT-PCR panel of *rd3* and *Hprt* with use of *Nrl*^{-/-} and *Crx*^{-/-}

retina cDNA was reversed in figure 4B. For the first panel of *Nrl*^{-/-} and *Crx*^{-/-} samples, *Hprt* results are shown in the upper panel, and *rd3* results are shown in the lower panel. The authors regret the error.
