Theoret. Chim. Acta (Berl.) **22**, 111–129 (1971)

Some interchanges have occurred in the ordering of the χ_{ii} axes on conversion of the reported experimental values of the χ_{ii} components to the axis systems used in the above paper. The correct ordering of the experimental χ_{ii} values requires to exchange the χ_{xx} and χ_{zz} exp (MW) values for compounds V and VI and to exchange the χ_{yy} and χ_{zz} exp (MW) values for compound I.

Also: the axes given on page 115 refer to compounds I–V; read in Table 1, compound IX *trans*: (at N(1)): $\theta = -59^{\circ}16'$ (*y*).
