

Publications of Professor Kenichi Fukui

1. Analysis of the Mixture of Thiourea and Ammonium Thiocyanate. S. Kodama, K. Fukui, and S. Fukushima, *Bulletin of the Institute for Chemical Research, Kyoto University*, 24, 69 (1951) (Short Commun.).
2. Studies on the Relation between the Composition and the Surface States in Binary Alloys. K. Fukui and T. Yonezawa, *Bulletin of the Institute for Chemical Research, Kyoto University*, 26, 84 (1951) (Short Commun.).
3. Vapor Phase Catalytic Condensation of Furfural and Acetaldehyde. K. Fukui and M. Takei, *Bulletin of the Institute for Chemical Research, Kyoto University*, 26, 85 (1951) (Short Commun.).
4. Studies on the Reaction between Ammonia and Carbon Disulfide at High Pressures. S. Kodama, K. Fukui, S. Fukushima, and T. Nagai, *Bulletin of the Institute for Chemical Research, Kyoto University*, 27, 70 (1952) (Short Commun.).
5. A Molecular Orbital Theory of Reactivity in Aromatic Hydrocarbons. K. Fukui, T. Yonezawa, and H. Shingu, *J. Chem. Phys.*, 20, 722–725 (1952).
6. A Free-Electron Model for Discussing Reactivity in Unsaturated Hydrocarbons. K. Fukui, T. Yonezawa, and C. Nagata, *J. Chem. Phys.*, 21, 174–176 (1953).
7. A Contribution to the Theory of Light Absorption of Symmetric Polymethine Dyes. K. Fukui, C. Nagata, and T. Yonezawa, *J. Chem. Phys.*, 21, 186–187 (1953).
8. Relation of Space Velocity and Space Time Yield. S. Kodama, K. Fukui, and A. Mazume, *Industrial and Engineering Chemistry*, 45, 1644–1648 (1953).
9. Molecular Orbital Theory of Orientation in Aromatic, Heteroaromatic and Other Conjugated Molecules. K. Fukui, T. Yonezawa, C. Nagata, and H. Shingu, *J. Chem. Phys.*, 22, 1433–1442 (1954).
10. Chemical Reactivity of the π -Electron System. K. Fukui, in “Symposium on Molecular Physics, Nikko, International Conference on Theoretical Physics” (Sept. 1953), Maruzen Co. (Tokyo), p. 41–42 (1954).
11. Molecular Orbital Theory of Reactivity in Radical Polymerization, Part I. T. Yonezawa, K. Hayashi, C. Nagata, S. Okamura, and K. Fukui, *J. Polym. Sci.*, 14, 312–314 (1954).
12. Molecular Orbital Theory of Reactivity in Radical Polymerization. Part II. K. Hayashi, T. Yonezawa, C. Nagata, S. Okamura, and K. Fukui, *J. Polym. Sci.*, 20, 537–550 (1956).
13. Electronic Structure and Carcinogenic Activity of Aromatic Compounds. I. Condensed Aromatic Hydrocarbons. C. Nagata, T. Yonezawa, and K. Fukui, *Cancer Res.*, 15, 233–239 (1955).
14. Reaction Rate of Water-Gas Shift Reaction. S. Kodama, A. Mazume, K. Fukuba, and K. Fukui, *Bull. Chem. Soc. Japan*, 28, 318–324 (1955).
15. Theory of Substitution in Conjugated Molecules. K. Fukui, T. Yonezawa, and C. Nagata, *Bull. Chem. Soc. Japan*, 27, 423–427 (1954).
16. On the Structure of Metabolites of Carcinogenic Hydrocarbons. C. Nagata, K. Fukui, T. Yonezawa, and Y. Tagashira, *Gann (The Japanese Journal of Cancer Research)*, 47, 207–213 (1956).
17. Interrelations of Quantum-Mechanical Quantities Concerning Chemical Reactivity of Conjugated Molecules. K. Fukui, T. Yonezawa, and C. Nagata, *J. Chem. Phys.*, 26, 831–841 (1957).
18. MO-Theoretical Approach to the Mechanism of Charge Transfer in the Process of Aromatic Substitutions. K. Fukui, T. Yonezawa, and C. Nagata, *J. Chem. Phys.*, 27, 1247–1259 (1957).
19. Molecular Orbital Theory of Reactivity in Ionic Polymerizations. T. Yonezawa, T. Higashimura, K. Katagiri, S. Okamura, and K. Fukui, *J. Polym. Sci.*, 26, 311–321 (1957).
20. Studies on Carbon-Chlorine Bonds in Some Aromatic Compounds by Their Pure Quadrupole Spectra. H. Negita, S. Satou, T. Yonezawa, and K. Fukui, *Bull. Chem. Soc. Japan*, 30, 721–723 (1957).
21. On the Analogy between Carcinogenic Compounds and Plant Growth Compounds in the Mechanism of Their Biological Actions. K. Fukui, C. Nagata, and T. Yonezawa, *Gann (The Japanese Journal of Cancer Research)*, 49, 43–48 (1958).
22. Electronic Structure and Auxin Activity of Benzoic Acid Derivatives. K. Fukui, C. Nagata and T. Yonezawa, *J. Am. Chem. Soc.*, 80, 2267–2270 (1958).
23. Expansion Formulae of Secular Determinant in Simple LCAO MO Treatment of Aromatic Hydrocarbons. K. Fukui, C. Nagata, T. Yonezawa, and A. Imamura, *Bull. Chem. Soc. Japan*, 32, 450–451 (1959).
24. Density Matrix in Simple LCAO MO Method. K. Fukui, C. Nagata, T. Yonezawa, and A. Imamura, *Bull. Chem. Soc. Japan*, 32, 452–454 (1959).
25. Novel Perturbation Theory in Simple LCAO Treatment of Conjugated Molecules. Method of Perturbed Secular Determinant. K. Fukui, C. Nagata, T. Yonezawa, H. Kato, and K. Morokuma, *J. Chem. Phys.*, 31, 287–293 (1959).
26. A Novel Catalytic Polymerization of Olefins. Part I. Metal-Metal Halide Catalysts for High Polymerization of Lower Olefins. K. Fukui, T. Kagiya, T. Shimidzu, T. Yagi, S. Machi, S. Yuasa, M. Hirata, and S. Kodama, *J. Polym. Sci.*, 37, 341–352 (1959).
27. A Novel Catalytic Polymerization of Olefins. Part II. High Polymerization of Ethylene by Al-TiCl₄ Catalyst. K. Fukui, T. Kagiya, T. Yagi, T. Shimidzu, and S. Yuasa, *J. Polym. Sci.*, 37, 353–362 (1959).
28. Reply to the Comments on the “Frontier Electron Theory”. K. Fukui, T. Yonezawa, and C. Nagata, *J. Chem. Phys.*, 31, 550–551 (1959).
29. Theoretical Considerations on the Mechanism of Stereospecific Cationic Polymerization in Homogeneous Systems. T. Higashimura, T. Yonezawa, S. Okamura, and K. Fukui, *J. Polym. Sci.*, 39, 487–492 (1959).
30. Localization Energy with Electronic Interaction. K. Fukui, K. Morokuma, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 32, 1015–1019 (1959).

31. LCAO SCF Calculation of Anthracene and Reactivity Indexes in SCF Method. K. Fukui, K. Morokuma, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 32, 853–857 (1959).
32. Reaction of 4-Dimethylaminoazobenzene and Related Compounds with 4,4'-Bis-(Dimethylamino)-Benzhydrol. K. Fukui, Y. Inamoto, E. Kitano, and C. Nagata, *J. Am. Chem. Soc.*, 81, 5954–5957 (1959).
33. Electronic Structure and Carcinogenic Activity of Conjugated Compounds. Substituted Aromatic Hydrocarbons, Heteroaromatic Compounds and Azo Compounds. K. Fukui, C. Nagata, T. Yonezawa, Y. Inamoto, and A. Imamura, *Gann (The Japanese Journal of Cancer Research)* 51, 67–81 (1960).
34. Electronic Structure and Antifungal Activity of Quinoline- and Pyridine-N-Oxide Derivatives. K. Fukui, A. Imamura, and C. Nagata, *Bull. Chem. Soc. Japan*, 33, 122–123 (1960).
35. Electronic Structure and Anti-Tumor Activity of Stilbene Derivatives. K. Fukui, C. Nagata, T. Yonezawa, K. Morokuma, and A. Imamura, *Gann (The Japanese Journal of Cancer Research)*, 50, Suppl. 25–27 (1959).
36. High Pressure Polymerization of Ethylene. A Kinetic Study of Polymerization Initiated by 2,2'-Azobisisobutyronitrile. S. Kodama, Y. Matsushima, A. Ueyoshi, T. Shimidzu, T. Kagiya, S. Yuasa, and K. Fukui, *J. Polym. Sci.*, 41, 83–95 (1959).
37. Polymerization of Olefins by Ziegler Catalyst. I. Polymerization of Propylene by $AlEt_3$ - $TiCl_4$ Catalyst. S. Kodama, T. Kagiya, S. Machi, T. Shimidzu, S. Yuasa, and K. Fukui, *J. Appl. Polym. Sci.*, 3, 20–25 (1960).
38. Methioninemethylsulfonium Salts. K. Fukui, K. Kanai, and H. Kitano, *J. Org. Chem.*, 25, 804–807 (1960).
39. A Molecular Orbital Treatment of Phosphate Bonds of Biochemical Interest. I. Simple LCAO MO Treatment. K. Fukui, K. Morokuma, and C. Nagata, *Bull. Chem. Soc. Japan*, 33, 1214–1219 (1960).
40. Charge Transfer Mechanism of Reaction of Conjugated Molecules. K. Fukui, K. Morokuma, T. Yonezawa, and C. Nagata, *J. Chem. Phys.*, 32, 1743–1747 (1960).
41. A Further Study of Simple LCAO MO Perturbation Treatment of Conjugated Molecules. K. Fukui, K. Morokuma, T. Yonezawa, and C. Nagata, *Bull. Chem. Soc. Japan*, 33, 963–973 (1960).
42. A Molecular Orbital Theory of Saturated Compounds. I. Ionization Potential and Bond Dissociation Energy. K. Fukui, H. Kato, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 33, 1197–1200 (1960).
43. A Molecular Orbital Theory of Saturated Compounds. II. Chemical Reactivity in Nucleophilic Substitution. K. Fukui, H. Kato, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 33, 1201–1204 (1960).
44. Relation between the Electronic Structure and Carcinogenic Activity of 4-Nitroquinoline-N-Oxide and Related Compounds. K. Fukui, A. Imamura, and C. Nagata, *Gann (The Japanese Journal of Cancer Research)*, 51, 119–123 (1960).
45. Electronic Structure and Nicotine-Like Stimulant Activity in Choline Phenyl Ethers. K. Fukui, C. Nagata, and A. Imamura, *Science*, 132, 87–89 (1960).
46. A Quantum-Mechanical Approach to the Theory of Aromaticity. K. Fukui, A. Imamura, T. Yonezawa, and C. Nagata, *Bull. Chem. Soc. Japan*, 33, 1591–1599 (1960).
47. Abnormalities in Mouse Embryos Induced by Several Amino-Azobenzene Derivatives. T. Sugiyama, H. Nishimura, and K. Fukui, *Okajimas Folia Anatomica Japonica*, 36, 195–205 (1960).
48. On the Relation between the Electronic Structure and the Carcinogenic and Carcinostatic Activities of Urethan and Its Related Compounds. K. Fukui, C. Nagata, A. Imamura, and Y. Tagashira, *Gann (The Japanese Journal of Cancer Research)*, 51, Suppl. 139–140 (1960).
49. A Theory of Gel Formation with Terfunctional Interunit Junction. K. Fukui and T. Yamabe, *J. Polym. Sci.*, 45, 305–312 (1960).
50. Molecular Orbital Theory of Reactivity in Non-Alternant Hydrocarbons. K. Fukui, T. Yonezawa, and C. Nagata, *Bull. Chem. Soc. Japan*, 34, 37–40 (1961).
51. Theoretical Reactivity Index of Addition in the “Frontier Electron Theory.” K. Fukui, C. Nagata, T. Yonezawa, and K. Morokuma, *Bull. Chem. Soc. Japan*, 34, 230–232 (1961).
52. “Frontier Electron Density” in Saturated Hydrocarbons. K. Fukui, H. Kato, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 34, 442–445 (1961).
53. Reduction of Azobenzenes by Benzoin. K. Fukui, Y. Inamoto, H. Kitano, and C. Nagata, *J. Org. Chem.*, 26, 1394–1398 (1961).
54. On Cross Termination in Radical Polymerization. K. Fukui, T. Yonezawa, and K. Morokuma, *J. Polym. Sci.*, 49, S11–S14 (1961).
55. On the Relation between the Electronic Structure and Anti-Tumor Activity of Carcinostatic Compounds. K. Fukui, C. Nagata, T. Yonezawa, K. Morokuma, and A. Imamura, *Gann (The Japanese Journal of Cancer Research)*, 52, 1–14 (1961).
56. On the Relation between the Electronic Structure and Carcinogenic Activity of Urethan (Ethylcarbamate) and Related Compounds. K. Fukui, C. Nagata, A. Imamura, and Y. Tagashira, *Gann (The Japanese Journal of Cancer Research)*, 52, 127–134 (1961).
57. On the Fluorine Shift of Aromatic Fluorine Compounds. T. Yonezawa, K. Fukui, H. Kato, H. Kitano, H. Hattori, and S. Matsuoka, *Bull. Chem. Soc. Japan*, 34, 707–711 (1961).
58. An LCAO Treatment of Reactivity in Aromatic Hydrocarbons. K. Fukui, T. Yonezawa, C. Nagata, and Y. Konaka, *Bull. Chem. Soc. Japan*, 34, 712–714 (1961).
59. A UAO Treatment of the van der Waals Force. T. Yonezawa, H. Kato, K. Morokuma, and K. Fukui, *Bull. Chem. Soc. Japan*, 34, 747–749 (1961).
60. A Molecular Orbital Treatment of Triallyl Isocyanurates and Related Alkyl Esters. K. Fukui, H. Kato, T. Yonezawa, F. Tanimoto, and H. Kitano, *Bull. Chem. Soc. Japan*, 34, 851–854 (1961).
61. A Simple Reactivity Index for Alternant Hydrocarbons. K. Fukui, H. Kato, C. Nagata, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 34, 933–939 (1961).
62. A New Quantum-Mechanical Reactivity Index for Saturated Compounds. K. Fukui, H. Kato, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 34, 1111–1115 (1961).
63. An Attempt to Discuss Reactivities of Excited Molecules by the Molecular Orbital Method. K. Fukui, K. Morokuma, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 34, 1178–1184 (1961).
64. Reaction of Propylene with Formaldehyde. K. Fukui, T. Takino, and H. Kitano, *Bull. Jpn. Pet. Inst.*, 3, 27–32 (1961).
65. Electronic Structure and Biochemical Activities in Diethyl Phenyl Phosphates. K. Fukui, K. Morokuma, C. Nagata, and A. Imamura, *Bull. Chem. Soc. Japan*, 34, 1224–1227 (1961).
66. A Theoretical Treatment of Molecular Complexes. I. Silver-Aromatic Hydrocarbon Complexes. K. Fukui, A. Imamura, T. Yonezawa, and C. Nagata, *Bull. Chem. Soc. Japan*, 34, 1076–1080 (1961).
67. High-Pressure Ethylene Polymerization Initiated by Peroxide. S. Kodama, T. Shimidzu, S. Yuasa, T. Kagiya, and K. Fukui, *J. Polym. Sci.*, 55, 285–296 (1961).
68. A Kinetic Study of Polymerization of Ethylene with $Al-TiCl_4$ Catalyst. K. Fukui, T. Shimidzu, T. Yagi, S. Fukumoto, T. Kagiya, and S. Yuasa, *J. Polym. Sci.*, 55, 321–334 (1961).
69. A Theoretical Treatment of Molecular Complexes. II. Iodine-Aromatic Hydrocarbon Complexes. K. Fukui, A. Imamura,

- T. Yonezawa, and C. Nagata, *Bull. Chem. Soc. Japan*, 35, 33–38 (1961).
70. σ -Electronic Structure in Conjugated Systems. K. Fukui, H. Kato, T. Yonezawa, K. Morokuma, A. Imamura, and C. Nagata, *Bull. Chem. Soc. Japan*, 35, 38–45 (1961).
 71. Polymerization of Olefins by Ziegler Catalyst. II. Polymerization of Ethylene by $\text{AlEt}_3\text{-TiCl}_4$ Catalyst. K. Fukui, T. Kagiya, S. Machi, T. Shimidzu, and S. Yuasa, *Bull. Chem. Soc. Japan*, 35, 303–306 (1962).
 72. Polymerization of Olefins by Ziegler Catalyst. III. Polymerization of Ethylene by $\text{AlEt}_3\text{-TiCl}_4$ Catalyst. K. Fukui, T. Kagiya, S. Machi, T. Shimidzu, and S. Yuasa, *Bull. Chem. Soc. Japan*, 35, 306–368 (1962).
 73. Relationship between the Electronic Structure and Carcinogenic Activity of Acetamidofluorene and Related Compounds. K. Fukui, C. Nagata, A. Imamura, T. Yonezawa, and Y. Tagashira, *Gann (The Japanese Journal of Cancer Research)*, 53, 25–40 (1962).
 74. The Reactivity of the Growing Ion in Ionic Polymerization. T. Higashimura, Y. Imanishi, T. Yonezawa, K. Fukui, and S. Okamura, *Polymer*, 3, 167–174 (1962).
 75. An NBMO Method of Saturated Compounds. K. Fukui, H. Kato, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 35, 1475–1482 (1962).
 76. MO Interpretation of Some Physico-Chemical Properties of Alkyl Compounds. T. Yonezawa, H. Kato, H. Saito, and K. Fukui, *Bull. Chem. Soc. Japan*, 35, 1814–1818 (1962).
 77. A Simple Molecular Orbital Method for Discussing the Electronic Structures of Stereoisomers. The Theoretical Method and ESR Hyperfine Splittings of the Terephthalaldehyde Anion. K. Morokuma, T. Yonezawa, and K. Fukui, *Bull. Chem. Soc. Japan*, 35, 1646–1651 (1962).
 78. Frontier Electron Theory and Its Biochemical Applications. K. Fukui, C. Nagata, T. Yonezawa, H. Kato, A. Imamura, and K. Morokuma, *Selecta Chimica*, 63–124 (1962).
 79. σ -Electronic Structures and Some Physico-Chemical Properties of Halogenated-Conjugated Hydrocarbons. K. Morokuma, K. Fukui, T. Yonezawa, and H. Kato, *Bull. Chem. Soc. Japan*, 36, 47–53 (1963).
 80. The Polarographic Reduction and Electronic Structures of Organic Halides. K. Fukui, K. Morokuma, H. Kato, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 36, 217–222 (1963).
 81. Changes of π -Electron Distribution of Deoxyribonucleic Acid after Alkylation and Their Possible Relation to the Biological Effect. C. Nagata, A. Imamura, H. Saito, and K. Fukui, *Gann (The Japanese Journal of Cancer Research)*, 54, 109–117 (1963).
 82. A Physico-Chemical Study of Elastomeric Polyurethans. A. Nagasawa, H. Kitano, and K. Fukui, *Memories of the Faculty of Engineering, Kyoto University*, 25, 106–115 (1963).
 83. The Angular Dependency of the ESR Proton Hyperfine Coupling Constant of the CH_2 Group. K. Morokuma and K. Fukui, *Bull. Chem. Soc. Japan*, 36, 534–540 (1963).
 84. The Electronic Structures and Antioxidizing Activities of Substituted Phenols. K. Morokuma, H. Kato, and K. Fukui, *Bull. Chem. Soc. Japan*, 36, 541–546 (1963).
 85. A Possible $\pi\text{-}\sigma^*$ Transition in Organic Halides. K. Fukui and K. Morokuma, *Proceedings of the International Symposium on Molecular Structure and Spectroscopy, Science Council of Japan*, B-121, 1–4 (1962).
 86. Molecular Orbital Theory of Reactivity in Radical Polymerization. Part III. K. Hayashi, T. Yonezawa, S. Okamura, and K. Fukui, *J. Polym. Sci.*, A1, 1405–1416 (1963).
 87. A Theoretical Assignment of the ESR Spectra of Cyclohexadienyl and Phenyl Radicals. K. Morokuma, S. Ohnishi, T. Masuda, and K. Fukui, *Bull. Chem. Soc. Japan*, 36, 1228–1233 (1963).
 88. A Molecular Orbital Treatment of Phosphate Bonds of Biochemical Interest. II. Metal Chelate of Adenosine Triphosphate. K. Fukui, A. Imamura, and C. Nagata, *Bull. Chem. Soc. Japan*, 36, 1450–1453 (1963).
 89. Electron Spin Resonance Study on Free Radicals from Saturated Hydrocarbons and Antimony Pentachloride. K. Fukui, T. Kawamura, T. Masuda, and K. Morokuma, *Tetrahedron Letters*, 1964, 433–437.
 90. Quantity of Charge Transfer and Carcinogenic Activity of 4-Nitroquinoline 1-Oxides and of Some Aromatic Hydrocarbons. C. Nagata, A. Imamura, K. Fukui, H. Saito, *Gann (The Japanese Journal of Cancer Research)*, 54, 401–414 (1963).
 91. A Remark on the Cause of Saturation in γ -Ray Irradiation Polymerization of 3,3-Bis-Chloromethyl Cyclohexane. T. Kagiya, M. Izu, and K. Fukui, *Polym. Lett.*, 2, 93–96 (1964).
 92. A Molecular Orbital Interpretation of the Ring-Opening Polymerization. K. Fukui, H. Kato, T. Yonezawa, and S. Okamura, *Bull. Chem. Soc. Japan*, 37, 904–905 (1964).
 93. A New Synthetic Method for N-Substituted Urethans. A. Nagasawa, H. Kitano, and K. Fukui, *Bull. Jpn. Pet. Inst.*, 6, 72–78 (1964).
 94. A Theory of Gel Formation with a Multifunctional Interunit Junction, T. Yamabe and K. Fukui, *Bull. Chem. Soc. Japan*, 37, 1061–1064 (1964).
 95. Catalytic Effect of Inorganic Solid Additives on the Radiation-Induced Solid State Polymerization of 3,3-Bis-Chloromethylcyclohexane. T. Kagiya, M. Izu, and K. Fukui, *Polym. Lett.*, 2, 779–781 (1964).
 96. A Microanalytical Study on the Radiation-Induced Polymerization of 3,3-Bis-Chloromethyloxetane. T. Kagiya, M. Izu, and K. Fukui, *Makromolekulare Chemie*, 78, 216–223 (1964).
 97. Statistical Theory of the Polymerization of Polyepoxide Monomers. K. Fukui and T. Yamabe, *J. Polym. Sci.*, A2, 3743–3753 (1964).
 98. The Electronic Structure of NO_2 , NO_2^+ and NO_2^- . H. Kato, T. Yonezawa, K. Morokuma, and K. Fukui, *Bull. Chem. Soc. Japan*, 37, 1710–1713 (1964).
 99. The Reactivity of Hydrogen Atoms of Unsaturated Hydrocarbons in Metathetical Reactions. H. Kato, K. Fukui, and T. Yonezawa, *Bull. Chem. Soc. Japan*, 38, 189–193 (1965).
 100. Polymerization of N-Methyl- β -Propiolactam with Ionic Catalysts. T. Kagiya, H. Kishimoto, S. Narisawa, and K. Fukui, *J. Polym. Sci.*, A3, 145–152 (1965).
 101. Hydrogen Bond Studied by ^{14}N Nuclear Magnetic Resonance. I. H. Saito, K. Nukata, H. Kato, T. Yonezawa, and K. Fukui, *Tetrahedron Letters*, 1965, 111–117.
 102. Molecular Orbital Treatment of ^{13}C -H Spin-Spin Coupling Constant. T. Yonezawa, I. Morishima, M. Fujii, and K. Fukui, *Bull. Chem. Soc. Japan*, 38, 1224 (1965).
 103. The Liquid Phase Oxidation of Tetralin and p-Xylene in the Presence of Onium Salt Type Catalysts. K. Kanai, K. Ohkubo, H. Kitano, and K. Fukui, *Bulletin of the Japan Petroleum Institute*, 7, 52–58 (1965).
 104. Stereospecificity with Reference to Some Cyclic Reactions. K. Fukui, *Tetrahedron Letters*, 1965, 2009–2015.
 105. The Proton Chemical Shift of Styrene. S. Matsuoka, S. Hattori, T. Yonezawa, H. Yamabe, and K. Fukui, *J. Phys. Soc. Japan*, 20, 1212–1217 (1965).
 106. Stereoselectivity Associated with Noncycloaddition to Unsaturated Bonds. K. Fukui, *Tetrahedron Letters*, 1965, 2427–2432.
 107. A Molecular Orbital Treatment of Hydrogen Bonds. I. Preliminary Results. K. Morokuma, H. Kato, T. Yonezawa, and K. Fukui, *Bull. Chem. Soc. Japan*, 38, 1263–1270 (1965).
 108. Copolymerization of Ethylenimine and β -Propiolactone. T. Kagiya, S. Narisawa, K. Manabe, and K. Fukui, *Polym. Lett.*, 3, 617–623 (1965).

109. Ring-Opening Polymerization of Ethylene Alkylphosphites. T. Shimidzu, T. Hakozaiki, T. Kagiya, and K. Fukui, *Polym. Lett.*, 3, 871–873 (1965).
110. The Hydrogen Bond in the Diols. I. T. Yonezawa, H. Saito, S. Matsuoka, and K. Fukui, *Bull. Chem. Soc. Japan*, 38, 1431–1435 (1965).
111. A Molecular Orbitals Study of the Nucleophilic Substitution in Methylchloride. H. Kato, K. Morokuma, T. Yonezawa, and K. Fukui, *Bull. Chem. Soc. Japan*, 38, 1749–1757 (1965).
112. The Isocyanurates. I. A Novel Method of Synthesizing Trialkyl Isocyanurates. K. Fukui, F. Tanimoto, and H. Kitano, *Bull. Chem. Soc. Japan*, 38, 1586–1589 (1965).
113. A Theoretical Account for Stereoselective E2 Reactions. K. Fukui and H. Fujimoto, *Tetrahedron Letters*, 1965, 4303–4307.
114. The Effect of Hydrogen-Bonding on the g -Value of Diphenyl Nitric Oxide. T. Kawamura, S. Matsunami, T. Yonezawa, and K. Fukui, *Bull. Chem. Soc. Japan*, 38, 1935–1940 (1965).
115. The Electronic Structure of Some Hydrides, Halides and Alkyl Compounds of Boron and Aluminum. H. Kato, K. Yamaguchi, T. Yonezawa, and K. Fukui, *Bull. Chem. Soc. Japan*, 38, 2144–2149 (1965).
116. The Transition State of the Claisen and the Cope Rearrangements. K. Fukui and H. Fujimoto, *Tetrahedron Letters*, 1966, 251–255.
117. An MO-Theoretical Illumination for the Principle of Stereoselection. K. Fukui, *Bull. Chem. Soc. Japan*, 39, 498–503 (1966).
118. The Ring-Opening Polymerization of Ethylene-Methylphosphite. T. Shimidzu, T. Hakozaiki, T. Kagiya, and K. Fukui, *Bull. Chem. Soc. Japan*, 39, 562–565 (1966).
119. Preparation of a Crystalline Poly(Ester-Amide) by the Polyaddition Reaction of Bisoxazoline and a Dicarboxylic Acid. T. Kagiya, S. Narisawa, T. Maeda, and K. Fukui, *Polym. Lett.*, 4, 257–260 (1966).
120. Ring-Opening Polymerization of 2-Substituted 2-Oxazolines. T. Kagiya, S. Narisawa, T. Maeda, and K. Fukui, *Polym. Lett.*, 4, 441–445 (1966).
121. Alternative Copolymerization of Aziridines and Carbon Monoxide by γ -Ray Irradiation. T. Kagiya, S. Narisawa, T. Ichida, K. Fukui, H. Yokota, and M. Kondo, *J. Polym. Sci., Part A-1*, 4, 293–299 (1966).
122. The Intramolecular Hydrogen Bond of the Diol Ethers as Model Compounds of the Diols. H. Saito, T. Yonezawa, S. Matsuoka, and K. Fukui, *Bull. Chem. Soc. Japan*, 39, 989–994 (1966).
123. Radiation-Induced Polymerization of Maleimide. T. Kagiya, M. Izu, S. Kawai, and K. Fukui, *Polym. Lett.*, 4, 387–392 (1966).
124. Preparation of Crystalline Polyamides by the Alternating Copolymerization of Aziridines and Cyclic Imides. T. Kagiya, S. Narisawa, K. Manabe, M. Kobata, and K. Fukui, *J. Polym. Sci., Part A-1*, 4, 2081–2092 (1966).
125. Influence of Addition of Ethylene on the γ -Ray-Induced Alternating Copolymerization of Ethylenimine and Carbon Monoxide. T. Kagiya, S. Narisawa, T. Ichida, and K. Fukui, *J. Polym. Sci., Part A-1*, 4, 2171–2178 (1966).
126. The Isocyanurates. II. The Syntheses of Several Unsaturated Aliphatic Isocyanurates. F. Tanimoto, T. Tanaka, H. Kitano, and K. Fukui, *Bull. Chem. Soc. Japan*, 39, 1922–1925 (1966).
127. Sigma-Pi Interaction Accompanied by Stereoselection. K. Fukui and H. Fujimoto, *Bull. Chem. Soc. Japan*, 39, 2116–2126 (1966).
128. The Isocyanurates. III. The Formation of Tributyl Isocyanurates from Bromides in the Presence of 1-Butanol. A. Nagasawa, H. Kitano, and K. Fukui, *Bull. Chem. Soc. Japan*, 39, 2434–2437 (1966).
129. Chemical Carcinogenesis. A Quantum Theoretical Illumination for the Nature of the Charge-Transfer Interaction. K. Fukui and T. Yonezawa, “*Rerum Cognoscere Causas*” (The Journal of Science Society, Stellenbosch University, South Africa), 7, 47–53 (1966).
130. A Theoretical Account for the Stereoselective Free-Radical Halogenation in Norbornane. H. Fujimoto and K. Fukui, *Tetrahedron Letters*, 1966, 5551–5554.
131. A Classification of Polymerizations from a Kinetic Point of View. T. Kagiya, M. Izu, and K. Fukui, *Bull. Chem. Soc. Japan*, 40, 1045–1049 (1967).
132. Graphical Evaluation of the Rate Constants of the Elementary Reaction of the Non-stationary Polymerization. T. Kagiya, M. Izu, S. Machi, and K. Fukui, *Bull. Chem. Soc. Japan*, 40, 1049–1054 (1967).
133. The Role of Various Inorganic Solid Additives in Radiation-Induced Solid State Polymerization of 3,3-Bis-Chloromethyl-oxetane. T. Kagiya, M. Izu, and K. Fukui, *Makromolekulare Chemie*, 102, 39–46 (1967).
134. Synthesis of Polyamides by the Polyaddition of Bissuccinimides with Dianines. T. Kagiya, M. Izu, T. Matsuda, and K. Fukui, *J. Polym. Sci., Part A-1*, 5, 15–20 (1967).
135. Synthesis of Polyamides by the Polyaddition of Bisimidazoline with Dicarboxylic Acids. T. Kagiya, M. Izu, M. Hatta, T. Matsuda, and K. Fukui, *J. Polym. Sci., Part A-1*, 5, 1129–1135 (1967).
136. The Stereoselection Rule for Electrocyclic Reactions. K. Fukui and H. Fujimoto, *Bull. Chem. Soc. Japan*, 40, 2018–2025 (1967).
137. A General Theory of Gel Formation with Multifunctional Interunit Junctions. K. Fukui and T. Yamabe, *Bull. Chem. Soc. Japan*, 40, 2052–2063 (1967).
138. Radiation-Induced Bulk Polymerization of Maleimide. T. Kagiya, M. Izu, S. Kawai, and K. Fukui, *J. Polym. Sci., Part A-1*, 5, 1415–1423 (1967).
139. Influence of Addition of Olefins on the Alternating Copolymerization of Carbon Monoxide and Ethylenimine by Azobisisobutyronitrile or by γ -Ray Irradiation. T. Kagiya, I. Maruta, T. Ichida, S. Narisawa, and K. Fukui, *J. Polym. Sci., Part A-1*, 5, 1645–1658 (1967).
140. Radical-Initiated Copolymerization of Carbon Monoxide and Ethylenimine in the Presence of Ethylene. T. Kagiya, T. Ichida, S. Narisawa, and K. Fukui, *J. Polym. Sci., Part A-1*, 5, 2031–2043 (1967).
141. Isomerization Polymerization of 2-Vinyl-1,3-Dioxolane by α,α^+ -Azobisisobutyronitrile or by γ -Ray Irradiation. T. Kagiya, T. Nakayama, Y. Nakai, and K. Fukui, *J. Polym. Sci., Part A-1*, 5, 2351–2358 (1967).
142. Some Remarks on the Extended Hückel Approximation in the Independent-Electron MO Theory. K. Fukui and H. Fujimoto, *Bull. Chem. Soc. Japan*, 40, 2787–2792 (1967).
143. Kinetics of γ -Ray Polymerization of Formaldehyde in the Presence of Carbon Dioxide. H. Yokota, Y. Otsuka, T. Kagiya, and K. Fukui, *J. Polym. Sci., Part A-1*, 5, 2825–2834 (1967).
144. Retardation of Spontaneous Polymerization of Formaldehyde by Acidic Substances. H. Yokota, M. Kondo, T. Kagiya, and K. Fukui, *J. Polym. Sci., Part A-1*, 5, 3129–3137 (1967).
145. A Note on the Theory of Interatomic Long-Range Forces. K. Fukui and T. Yamabe, *Int. J. Quantum Chem.*, 2, 359–369 (1968); 5, 478 (1971).
146. Copolymerization of N-Phenylethylenimine and β -Propiolactone. T. Kagiya, T. Kondo, S. Narisawa, and K. Fukui, *Bull. Chem. Soc. Japan*, 41, 172–176 (1968).
147. Cationic Polymerization of Formaldehyde in Liquid Carbon Dioxide. Part I. H. Yokota, M. Kondo, T. Kagiya, and K. Fukui, *J. Polym. Sci., Part A-1*, 6, 425–434 (1968).
148. Cationic Polymerization of Formaldehyde in Liquid Carbon Dioxide. Part II. A Kinetic Study of the Polymerization. H. Yokota, M. Kondo, T. Kagiya, and K. Fukui, *J. Polym. Sci., Part A-1*, 6, 435–446 (1968).
149. Solid-State Polymerization of Maleimide by 2,2'-Azo-Bisisobutyronitrile. T. Kagiya, M. Izu, S. Kawai, and K. Fukui, *J. Polym. Sci., Part A-1*, 6, 1719–1728 (1968).

150. Cationic Polymerization of Formaldehyde in Liquid Carbon Dioxide. Part III. Thermal Stabilization of the Resulting Polymer. H. Yokota, M. Kondo, T. Kagiya, and K. Fukui, *Bull. Chem. Soc. Japan*, 41, 1668–1671 (1968).
151. Cationic Polymerization of Formaldehyde in Liquid Carbon Dioxide. Part IV. A Kinetic Study of the Polymerization in the Presence of Acetic Anhydride. H. Yokota, M. Kondo, T. Kagiya, and K. Fukui, *Bull. Chem. Soc. Japan*, 41, 1672–1679 (1968).
152. Initiation and Propagation in the Copolymerization of N-Phenylethylenimine with β -Propiolactone. T. Kagiya, T. Kondo, and K. Fukui, *Bull. Chem. Soc. Japan*, 41, 1682–1686 (1968).
153. An MO-theoretical Interpretation of the Nature of Chemical Reactions. I. Partitioning Analysis of the Interaction Energy. K. Fukui and H. Fujimoto, *Bull. Chem. Soc. Japan*, 41, 1989–1997 (1968).
154. Synthesis of Ordered Copolyamides by the Interfacial Polycondensation of the Hydrolyzate of Bisimidazoline with Diacid Chloride. T. Kagiya, M. Izu, T. Matsuda, M. Matsuda, and K. Fukui, *J. Polym. Sci., Part A-1*, 6, 2059–2067 (1968).
155. A Cationic Polymerization of N-Phenylethylenimine by Various Carboxylic Acid Catalysts. T. Kagiya, T. Kondo, and K. Fukui, *Bull. Chem. Soc. Japan*, 41, 2473–2479 (1968).
156. Mechanism of a Stereospecific Photosensitized Cyclization Reaction of 3-Methylene-1,5-heptadiene. S. Kita and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 66–70 (1969).
157. The Catalytic Activity of Onium Compounds in the Homogeneous Liquid Phase Oxidation of Cumene and α -Pinene. K. Fukui, K. Ohkubo, and T. Yamabe, *Bull. Chem. Soc. Japan*, 42, 312–318 (1969).
158. An MO-Theoretical Study of Several Bimolecular Reactions of Nucleophilic Reagents. K. Fukui, H. Hao, and H. Fujimoto, *Bull. Chem. Soc. Japan*, 42, 348–355 (1969).
159. A Study of the Solvent Effect on the Polymerization of N-Phenyl-ethyleneimine. T. Kagiya, Y. Kondo, K. Nakao, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 1094–1098 (1969).
160. An MO-Theoretical Study of the E2 Reaction of Ethyl Chloride. H. Hao, H. Fujimoto, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 1256–1263 (1969).
161. A Cationic Polymerization of Formaldehyde in Liquid Carbon Dioxide. V. Reaction Mechanism. H. Yokota, M. Kondo, T. Kagiya, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 1412–1416 (1969).
162. γ -Ray-Induced Copolymerization of Carbon Monoxide with Cyclic Ethers. T. Kagiya, M. Kondo, K. Fukui, and H. Yokota, *J. Polym. Sci., Part A-1*, 7, 183–199 (1969).
163. A Study of the Solvent Effect in the Copolymerization of N-Phenyl-ethyleneimine with β -Propiolactone. T. Kagiya, T. Kondo, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 1628–1633 (1969).
164. Effect of the Binary Solvent System on the Copolymerization of N-Phenylethylenimine with β -Propiolactone. T. Kagiya, T. Kondo, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 1634–1640 (1969).
165. Polymerization of Formaldehyde in Liquid Carbon Dioxide. I. The Cause of the Polymerizability of the Monomer. T. Kagiya, M. Kondo, K. Narita, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 1688–1693 (1969).
166. A Theory of the Gel-forming Polymerization of Polyvinyl Compounds. K. Fukui and T. Yamabe, *Bull. Chem. Soc. Japan*, 42, 1862–1870 (1969).
167. A Kinetic Study on the Homogeneous Liquid-phase Oxidation of Cumene in the Presence of Triphenylsulfonium Chloride. K. Ohkubo, T. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 1800–1806 (1969).
168. Relationship between Structures and Activities of Silver Salt-Organic Halide Catalyst Systems for Styrene Polymerization. T. Kagiya, M. Izu, H. Maruyama, and K. Fukui, *J. Polym. Sci., Part A-1*, 7, 917–923 (1969).
169. γ -Ray-Induced Terpolymerization of Carbon Monoxide, Aziridines, and Cyclic Ethers. T. Kagiya, M. Kondo, I. Murata, and K. Fukui, *J. Polym. Sci., Part A-1*, 7, 351–362 (1969).
170. Theory of the Gel-forming Polymerization of Polyepoxy and Related Compounds. T. Yamabe and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 2112–2119 (1969).
171. A Study of the Low-temperature Oxidation of Cumene in the Presence of Triphenylsulfonium Chloride. Propagation and Termination Steps. K. Ohkubo, T. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 2220–2227 (1969).
172. Copolymerization of Formaldehyde and Succinic Anhydride in the Presence of Carbon Dioxide. H. Yokota, Y. Toriuchi, T. Kagiya, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 2343–2347 (1969).
173. Kinetic Features of the Redox-Polymerization of Acrolein with the Potassium Persulfate-Silver Nitrate System. T. Kagiya, S. Morita, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 2578–2583 (1969).
174. Graphical Evaluation of the Rate Constants of the Elementary Reactions in the Acrolein Polymerization with the Potassium Persulfate-Silver Nitrate Redox Systems. T. Kagiya, S. Morita, and K. Fukui, *Bull. Chem. Soc. Japan*, 42, 2583–2588 (1969).
175. An MO-Theoretical Interpretation of the Nature of Chemical Reactions. II. The Governing Principles. K. Fukui and H. Fujimoto, *Bull. Chem. Soc. Japan*, 42, 3399–3409 (1969).
176. Reaction Mechanism of the Alternating Copolymerization of Aziridines with Cyclic Imides. T. Kagiya, T. Adachi, and K. Fukui, *J. Polym. Sci., A-1*, 7, 2651–2658 (1969).
177. Structural Study of Alternating Copolymerization of Aziridines with Cyclic Imides. T. Kagiya, M. Izu, T. Adachi, and K. Fukui, *J. Polym. Sci., A-1*, 7, 2659–2667 (1969).
178. Variational Calculation of Atoms and Molecules by a Modified H \ddot{a} ss \acute{e} Method Using Hulth \acute{e} n Functions. T. Yamabe, S. Ishimaru, and K. Fukui, *Bull. Chem. Soc. Japan*, 43, 2012–2017 (1970).
179. Chemical Reactivity of Adamantane and Related Compounds. H. Fujimoto, Y. Kitagawa, H. Hao, and K. Fukui, *Bull. Chem. Soc. Japan*, 43, 52–56 (1970).
180. A Study of the Decomposition Reaction of Cumene Hydroperoxide in the Presence of Triphenyl Sulfonium Chloride. K. Ohkubo, T. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, 43, 1–8 (1970).
181. A Formulation of the Reaction Coordinate. K. Fukui, *J. Phys. Chem.*, 74, 4161–4163 (1970).
182. Recognition of Stereochemical Paths by Orbital Interaction. K. Fukui, *Acc. Chem. Res.*, 4, 57–64 (1971).
183. An MO-theoretical Interpretation of the Origin of the Orienting Effect in Aliphatic Systems. H. Fujimoto, S. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, 44, 971–974 (1971).
184. The Significance of Charge-Transfer in the Bond Interchange. H. Fujimoto, S. Yamabe, and K. Fukui, *Tetrahedron Letters*, 1971, 443–446.
185. A Theoretical Interpretation of the Interaction Energy in Biomolecular Substitution Reactions. H. Fujimoto, S. Yamabe, and K. Fukui, *Tetrahedron Letters*, 1971, 439–442.
186. A Remark on the Applicability of the CNDO Calculation to the Chemical Reactivity Theory. H. Fujimoto, S. Sugihara, S. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, 44, 2565–2566 (1971).
187. An MO-Theoretical Interpretation of the Nature of Chemical Reactions. III. Bond Interchange. H. Fujimoto, S. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, 44, 2936–2941 (1971).
188. A Consideration of Orbital Interaction in Nitrogen Extrusion of Cyclic Azo Compounds. S. Inagaki and K. Fukui, *Bull. Chem. Soc. Japan*, 45, 824–829 (1972).

189. A Molecular Orbital Calculation of Chemically Interacting Systems. Bimolecular Nucleophilic Substitution. K. Fukui, H. Fujimoto, and S. Yamabe, *J. Phys. Chem.*, **76**, 232–237 (1972).
190. An MO-theoretical Study of the Nucleophilic Bimolecular Ring-Opening of Ethylene Oxide. H. Fujimoto, M. Katata, S. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, **45**, 1320–1324 (1972).
191. A Remark on the Importance of Particular Orbital Interaction in the Dimerization of Methylenes. H. Fujimoto, S. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, **45**, 1566 (1972).
192. On the Long-Range Interaction between Two Hydrogen Atoms and Two Helium Atoms. T. Yamabe, S. Ishimaru, and K. Fukui, *Bull. Chem. Soc. Japan*, **45**, 1384–1387 (1972).
193. A Molecular Orbital Calculation of Chemically Interacting Systems. Addition of Singlet Methylene to Ethylene. H. Fujimoto, S. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, **45**, 2424–2429 (1972).
194. Semi-empirical UHF Treatment for the Solvated Electron. S. Ishimaru, T. Yamabe, and K. Fukui, *Chem. Phys. Letters*, **17**, 264–268 (1972).
195. A Consideration of Orbital Interaction in the Reaction of $^1\Delta$ g Molecular Oxygen with Ethylene Derivatives. S. Inagaki, S. Yamabe, H. Fujimoto, and K. Fukui, *Bull. Chem. Soc. Japan*, **45**, 3510–3514 (1972).
196. Molecular Orbital Calculation of Chemically Interacting Systems. Interaction between Radical and Closed-Shell Molecules. H. Fujimoto, S. Yamabe, T. Minato, and K. Fukui, *J. Am. Chem. Soc.*, **94**, 9205–9210 (1972).
197. Orbital Symmetry Control in the Interaction of Three Systems. H. Fujimoto, S. Kato, S. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, **46**, 1071–1076 (1973).
198. On the MO Perturbation Theory of Molecular Rearrangements. H. Fujimoto, M. Miyagi, S. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, **46**, 1357–1361 (1973).
199. A Common Feature in the 2 + 2 Cycloadditions of Benzynes and $^1\Delta$ g Molecular Oxygen to Ethylene Derivatives. S. Inagaki and K. Fukui, *Bull. Chem. Soc. Japan*, **46**, 2240–2242 (1973).
200. Semiempirical Unrestricted Hartree-Fock Treatment for Trapped Electrons in Water, Ammonia, and Hydrogen Fluoride. S. Ishimaru, H. Kato, T. Yamabe, and K. Fukui, *J. Phys. Chem.*, **77**, 1450 (1973).
201. Variational Calculation of Atoms and Molecules by a Modified Hassé Method Using Hulthén Functions. III. Long-Range Interactions between Hydrogen Atom and Proton and between Two Hydrogen Atoms. T. Yamabe, S. Ishimaru, and K. Fukui, *Bull. Chem. Soc. Japan*, **46**, 2361–2369 (1973).
202. An MO-Theoretical Calculation of Solvent Effect upon the $\text{NH}_3 + \text{HF} = \text{NH}_4\text{F}$ Reaction. S. Yamabe, S. Kato, H. Fujimoto, and K. Fukui, *Theor. Chim. Acta (Berl.)*, **30**, 327–337 (1973).
203. Molecular Orbital Calculation of the Electronic Structure of Borane Carbonyl. S. Kato, H. Fujimoto, S. Yamabe, and K. Fukui, *J. Am. Chem. Soc.*, **96**, 2024–2029 (1974).
204. A Study of the Upper and Lower Bounds of the Second-order Perturbation Energy. T. Yamabe, K. Tanaka, S. Ishimaru, and K. Fukui, *Bull. Chem. Soc. Japan*, **47**, 1578–1581 (1974).
205. An MO Calculation of 1,3-Dipolar Cycloaddition between Ethylene and Diazomethane. T. Minato, S. Yamabe, S. Inagaki, H. Fujimoto, and K. Fukui, *Bull. Chem. Soc. Japan*, **47**, 1619–1623 (1974).
206. An *ab initio* MO Study of the Hydrogen Bond in $\text{NH}_3\text{-HF}$. S. Yamabe, S. Kato, H. Fujimoto, and K. Fukui, *Bull. Chem. Soc. Japan*, **46**, 3619–3620 (1973).
207. An MO Study of Bridge Bonds in B_2H_6 . S. Yamabe, T. Minato, H. Fujimoto, and K. Fukui, *Theor. Chim. Acta (Berlin)*, **32**, 187–201 (1974).
208. On the Behavior of the Excess Electron in Methane. S. Ishimaru, T. Yamabe, K. Fukui, and H. Kato, *J. Phys. Chem.*, **78**, 148–152 (1974).
209. *Ab initio* MO Calculations on the Electronic Structures of H_2S^+ and H_2O^+ . H. Sakai, S. Yamabe, T. Yamabe, K. Fukui, and H. Kato, *Chem. Phys. Letters*, **25**, 541–545 (1974).
210. Origin and Direction of Nonequivalent Orbital Extension and Stereochemical Behaviors of Plane-asymmetric Olefins. Exo-electrophilic Addition to Norbornene. S. Inagaki and K. Fukui, *Chem. Lett.*, 1974, 509–514.
211. Molecular Orbital Calculation of the Electronic Structure of Borazane. H. Fujimoto, S. Kato, S. Yamabe, and K. Fukui, *J. Chem. Phys.*, **60**, 572–578 (1974).
212. Conformational Analysis of Thiophene-3-carbaldehyde and 3-Methoxy Carbonyl-thiophene. S. Nagata, T. Yamabe, and K. Fukui, *Tetrahedron*, **30**, 1315–1318 (1974).
213. MO Calculations of Episulfonium Ion Intermediates and Regiospecificity in the Additions of Cl^- . Y. Kikuzono, T. Yamabe, S. Nagata, H. Kato, and K. Fukui, *Tetrahedron*, **30**, 2197–2206 (1974).
214. Mechanism of Thermal 2+2 Cycloaddition Reactions between Electron-Donors and Electron-Acceptors. Reactions of Heteronuclear Cycloaddends, C=O Groups. S. Inagaki, T. Minato, S. Yamabe, H. Fujimoto, and K. Fukui, *Tetrahedron*, **30**, 2165–2171 (1974).
215. *Ab initio* Calculation of the Electronic Structure and the Barrier to Pyramidal Inversion for H_3S^+ . T. Yamabe, T. Aoyagi, S. Nagata, H. Sakai, and K. Fukui, *Chem. Phys. Letters*, **28**, 182–185 (1974).
216. An MO Study on the Hydrogen Bond System of $\text{H}_2\text{O-HF}$. S. Yamabe, S. Kato, H. Fujimoto, and K. Fukui, *Bull. Chem. Soc. Japan*, **48**, 1–5 (1975).
217. An MO-Theoretical Treatment of the Cationic Ring-Opening Polymerization. I. Ethylene Oxide. G. Frenking, H. Kato, and K. Fukui, *Bull. Chem. Soc. Japan*, **48**, 6–12 (1975).
218. An MO Theoretical Investigation of the Electronic Spectra of Divalent Sulfur Compounds. H. Sakai, T. Yamabe, H. Kato, S. Nagata, and K. Fukui, *Bull. Chem. Soc. Japan*, **48**, 33–36 (1975).
219. Constituent Analysis of the Potential Gradient along a Reaction Coordinate. Method and Application to CH_4^+ T Reaction. K. Fukui, S. Kato, and H. Fujimoto, *J. Am. Chem. Soc.*, **97**, 1–7 (1975).
220. A Study on Electronic Spectra of Organic Compounds with S-Cl Group. T. Yamabe, S. Nagata, Y. Kikuzono, and K. Fukui, *Bull. Chem. Soc. Japan*, **48**, 1349–1353 (1975).
221. CNDO/2 Calculation on the Configurations of the Ion-molecule Complexes. The $\text{NH}_4^+\text{-CH}_4$, $\text{H}_3\text{O}^+\text{-CH}_4$ and $\text{CH}_4^+\text{-H}_2$ Systems. K. Tanaka, T. Yamabe, H. Kato, and K. Fukui, *Bull. Chem. Soc. Japan*, **48**, 1740–1744 (1975).
222. An Orbital Interaction Rationale for the Role of Catalysts. K. Fukui and S. Inagaki, *J. Am. Chem. Soc.*, **97**, 4445–4452 (1975).
223. Molecular Orbital Calculations on the Nitrogen Nuclear Spin-Spin Coupling Constants. S. Nagata, T. Yamabe, K. Hirao, and K. Fukui, *J. Phys. Chem.*, **79**, 1863–1867 (1975).
224. Semi-empirical Localized MO Calculations of Saturated Carbocyclic and Heterocyclic Compounds. G. Frenking, H. Kato, K. Hirao, and K. Fukui, *Bull. Chem. Soc. Japan*, **48**, 2769–2774 (1975).
225. Calculation of the Pseudopotential for the Excess Electron in Water and Methane. S. Ishimaru, K. Fukui, and H. Kato, *Theor. Chim. Acta (Berl.)*, **39**, 103–110 (1975).
226. Chemical Pseudoexcitation and Paradoxical Orbital Interaction Effect. S. Inagaki, H. Fujimoto, and K. Fukui, *J. Am. Chem. Soc.*, **97**, 6108–6116 (1975).
227. Long-range Interaction between a Hydrogen Atom and a Hydride Ion. T. Yamabe, K. Tanaka, H. Ueno, and K. Fukui, *Bull. Chem. Soc. Japan*, **48**, 3500–3505 (1975).

228. A Study of the Electronic Spectra of Thioacetic Acid and Its Ethyl Ester. S. Nagata, T. Yamabe, and K. Fukui, *J. Phys. Chem.*, **79**, 2335–2340 (1975).
229. Mechanism of 2+2 Cycloaddition and Related Reactions between Electron-donors and Electron-acceptors. Peroxide Quasi-Intermediate and Its Roles in the Reactions of $^1\Delta_g$ Molecular Oxygen with Olefins. S. Inagaki and K. Fukui, *J. Am. Chem. Soc.*, **97**, 7480–7484 (1975).
230. A Multi-cyclic Interaction Effect on Symmetry-imposed Stereo-selection Rule. Anti-Bisallylic System. S. Inagaki, T. Minato, H. Fujimoto, and K. Fukui, *Chem. Lett.*, 1976, 89–92.
231. Charge Transfer Interaction between Thioacetic Acid or Its Ethyl Ester and Triethylamine. T. Yamabe, K. Akagi, S. Nagata, H. Kato, and K. Fukui, *J. Phys. Chem.*, **80**, 611–617 (1976).
232. On the Donor-Acceptor Relationship in Cyclic Additions. H. Fujimoto, S. Inagaki, and K. Fukui, *J. Am. Chem. Soc.*, **98**, 2670–2671 (1976).
233. Hybridization in Some Three-Membered Ring Organic Molecules. H. Fujimoto, T. Minato, S. Inagaki, and K. Fukui, *Bull. Chem. Soc. Japan*, **49**, 1508–1511 (1976).
234. The Selection of O_2 ($^1\Delta_g$)-Olefin Reaction Courses. Intermolecular Nonbonded Attraction and π Bond Polarity of Olefins. S. Inagaki, H. Fujimoto, and K. Fukui, *Chem. Lett.*, 1976, 749–752.
235. Orbital Mixing Rule. S. Inagaki, H. Fujimoto, and K. Fukui, *J. Am. Chem. Soc.*, **98**, 4054–4060 (1976).
236. An Orbital Interaction Rationale for Organic Molecules and Reactions. K. Fukui, *Israel Journal of Chem.*, **14**, 1–10 (1975).
237. Orbital Interaction in Three Systems. S. Inagaki, H. Fujimoto, and K. Fukui, *J. Am. Chem. Soc.*, **98**, 4693–4701 (1976).
238. MO-theoretische Untersuchung der Nucleophilen Substitution Einiger Silacycloalkane. G. Frenking, H. Kato, and K. Fukui, *Bull. Chem. Soc. Japan*, **49**, 2095–2099 (1976).
239. Reaction Ergodography – Methane-Tritium Reaction. S. Kato and K. Fukui, *J. Am. Chem. Soc.*, **98**, 6395–6397 (1976).
240. A Theoretical Treatment on the Behavior of the Hydrogen-Bonded Proton in Malonaldehyde. S. Kato, H. Kato, and K. Fukui, *J. Am. Chem. Soc.*, **99**, 684–691 (1977).
241. The Electronic States of $(SN)_x$ and $(SCH)_x$ Polymers. T. Yamabe, K. Tanaka, A. Imamura, H. Kato, and K. Fukui, *Bull. Chem. Soc. Japan*, **50**, 798–801 (1977).
242. A Theoretical Study on Biradicals. I. Theoretical Characteristics of Biradicals. K. Fukui and K. Tanaka, *Bull. Chem. Soc. Japan*, **50**, 1391–1398 (1977).
243. Electronic States of an Infinite Polyene under Local Perturbation. K. Tanaka, T. Yamabe, K. Fukui, and H. Kato, *Chem. Phys. Letters*, **48**, 141–144 (1977).
244. An MO Calculation of the Reaction Path of a Symmetry-Disfavored 1,3-Sigmatropic Rearrangement. T. Minato, S. Inagaki, H. Fujimoto, and K. Fukui, *Bull. Chem. Soc. Japan*, **50**, 1651–1656 (1977).
245. A Molecular Orbital Theoretical Study on $(SN)_2$ Molecules at the Initial Stage of Polymerization to $(SN)_x$. T. Yamabe, K. Tanaka, K. Fukui, and H. Kato, *J. Phys. Chem.*, **81**, 727–731 (1977).
246. A Molecular Orbital Calculation of Adsorption of Ethylene and Acetylene on Nickel Cluster. H. Kobayashi, H. Kato, K. Tarama, and K. Fukui, *J. Catal.*, **49**, 294–304 (1977).
247. Hydrogen Bonding Type Charge Transfer Interaction between Thiols and Amines. T. Yamabe, K. Akagi, T. Hashimoto, S. Nagata, and K. Fukui, *J. Chem. Soc. Faraday Trans. I*, **73**, 1860–1869 (1977).
248. Experimental and Theoretical Studies on Protonation of Thioketones. T. Yamabe, S. Nagata, K. Akagi, R. Hashimoto, K. Yamashita, and K. Fukui, *J. Chem. Soc. Perkin Trans. II*, 1516–1522 (1977).
249. A Molecular Orbital Calculation of Chemically Interacting Systems. Interaction between Two Radicals. T. Minato, S. Yamabe, H. Fujimoto, and K. Fukui, *Bull. Chem. Soc. Japan*, **51**, 1–10 (1978).
250. Theory of Decaying States Based on a Method of Coupled Equations: Kapur-Peierls and Siegert Resonant States and the ‘Extended’ Hellmann-Feynman Theorem. A. Tachibana, T. Yamabe, and K. Fukui, *J. Phys. B Atom. Molec. Phys.*, **10**, 3175–3188 (1977).
251. Periodic Surface Calculations on Chemisorption of H_2 on a Ni Surface. H. Kobayashi, S. Yoshida, K. Fukui, K. Tarama, and H. Kato, *Chem. Phys. Letters*, **53**, 457–461 (1978).
252. On the Interchain Interaction in the $(SN)_x$ Polymer. K. Tanaka, T. Yamabe, K. Fukui, A. Imamura, and H. Kato, *Chem. Phys. Letters*, **53**, 452–456 (1978).
253. A Molecular-Orbital Calculation of Chemically Interacting Systems. Interaction between Two Radicals. Self-reaction of Peroxyl Radicals. T. Minato, S. Yamabe, M. Miyake, K. Tanaka, H. Kato, and K. Fukui, *J. Phys. Chem.*, **82**, 272–277 (1978).
254. A Localized Molecular Orbital Calculation of Chemically Interacting Systems. Interaction between Amines and Carbonyls. T. Minato, H. Fujimoto, and K. Fukui, *Bull. Chem. Soc. Japan*, **51**, 1621–1626 (1978).
255. Orbital Interaction in the Dimerization of Disulfide Dinitride to Tetrasulfur Tetranitride. K. Tanaka, T. Yamabe, A. Noda, K. Fukui, and H. Kato, *J. Phys. Chem.*, **82**, 1453–1454 (1978).
256. A Stereoselective Rule for the Cross-bicyclization in Linear Conjugated Polyenes. K. Tanaka and K. Fukui, *Bull. Chem. Soc. Japan*, **51**, 2209–2214 (1978).
257. A Molecular orbital Approach to the Fragmentation of the Acetaldehyde Cation Radical. K. Yamashita, S. Kato, T. Yamabe, and K. Fukui, *Theor. Chim. Acta (Berl.)*, **49**, 25–35 (1978).
258. Theoretical Studies on the Electronic Structure of the H_2S Anion Radical. S. Nagata, T. Yamabe, and K. Fukui, *Bull. Chem. Soc. Japan*, **51**, 2795–2799 (1978).
259. Orbital Pattern Rationale in Chemical Empiricism. K. Fukui, *Int. J. Quantum Chem.*, **12**, S1, 277–288 (1977).
260. Electronic Structures of Tetrasulfur Tetranitride, Tetra-arsenic Tetrasulfide, and Tetraarsenic Tetraselenide, and Their Anionic Species. K. Tanaka, T. Yamabe, A. Tachibana, H. Kato, and K. Fukui, *J. Phys. Chem.*, **82**, 2121–2126 (1978).
261. Differential Geometry of Chemically Reacting Systems. A. Tachibana and K. Fukui, *Theor. Chim. Acta (Berl.)*, **49**, 321–347 (1978).
262. Exact Formula for the Gradient of the CI Potential Energy Hypersurface. A. Tachibana, K. Yamashita, T. Yamabe, and K. Fukui, *Chem. Phys. Letters*, **59**, 255–260 (1978).
263. Complex Eigenvalue Problems in Atoms and Molecules. T. Yamabe, A. Tachibana, and K. Fukui, *Adv. Quant. Chem.*, **11**, 195–221 (1978).
264. Theoretical Studies of Hydrogen Molecule. Adsorption on Flat and Stepped Platinum Surfaces, H. Kobayashi, S. Yoshida, H. Kato, K. Fukui, and K. Tarama, *Surface Sci.*, **79**, 189–204 (1979).
265. Nature of the Chemical Reaction Paths. K. Fukui, *Rec. Trav. Chim. Pays-Bas*, **98**, 75–78 (1979).
266. Orbital Interaction in the Cycloaddition Reactions of Tetrasulfur Tetranitride, Tetraarsenic Tetrasulfide, and Tetraarsenic Tetraselenide with Olefins. T. Yamabe, K. Tanaka, A. Tachibana, K. Fukui, and H. Kato, *J. Phys. Chem.*, **83**, 767–769 (1979).
267. The Electronic Structures of Cis-Polyacetylene. T. Yamabe, K. Tanaka, H. Teramae, and K. Fukui, *Solid State Commun.*, **29**, 329–333 (1979).
268. Electronic Properties of Pure and Doped Polyacetylenes. T. Yamabe, K. Tanaka, H. Teramae, K. Fukui, A. Imamura, H. Shirakawa, and S. Ikeda, *J. Phys. C. Solid State Phys.*, **121**, L257–L262 (1979).

269. Electronic Structures of S_8^{2+} and Se_8^{2+} . K. Tanaka, T. Yamabe, H. Teramae, and K. Fukui, *Nouveau J. de Chimie.*, 3, 379–384 (1979).
270. Intrinsic Dynamism in Chemically Reacting Systems. A. Tachibana and K. Fukui, *Theor. Chim. Acta (Berl.)*, 51, 189–206 (1979).
271. Stability of Crown Ether Complexes; A MO Theoretical Study. T. Yamabe, K. Hori, K. Akagi, and K. Fukui, *Tetrahedron*, 35, 1065–1072 (1979).
272. Intrinsic Field Theory of Chemical Reactions. A. Tachibana and K. Fukui, *Theor. Chim. Acta (Berl.)*, 51, 275–296 (1979).
273. Structure of Protonated Thioformaldehyde. T. Yamabe, K. Yamashita, K. Fukui, and K. Morokuma, *Chem. Phys. Letters*, 63, 433–435 (1979).
274. On the Virial of Quasi-stationary Molecular Systems. A. Tachibana, T. Yamabe, and K. Fukui, *Mol. Phys.*, 37, 1045–1057 (1979).
275. Photochemically Generated Silicon-Carbon Double Bonded Intermediates. 10. Photochemical Behavior of 1-Disilanyl- and 2-Disilanylnaphthalenes. M. Ishikawa, M. Oda, N. Miyoshi, L. Fabry, M. Kumada, T. Yamabe, K. Akagi, and K. Fukui, *J. Am. Chem. Soc.*, 101, 4612–4618 (1979).
276. A Molecular Orbital Calculation of Chemically Interacting Systems. Recombination of Two Methyl Radicals. S. Yamabe, T. Minato, H. Fujimoto, and K. Fukui, *Bull. Chem. Soc. Japan*, 52, 3242–3248 (1979).
277. An MO Theoretical Study on the Dications of Tetrasulfur, Tetrarselenium, and Tetratellurium. K. Tanaka, T. Yamabe, H. Teramae, and K. Fukui, *Inorg. Chem.*, 18, 3591–3595 (1979).
278. A Theoretical Study on the Photochemical Reaction of Carbon Suboxide with Ethylene. T. Minato, Y. Osamura, S. Yamabe, and K. Fukui, *J. Am. Chem. Soc.*, 102, 581–589 (1980).
279. An Aspect of Molecular Dynamics on the CI Potential Energy Surface. K. Yamashita, A. Tachibana, T. Yamabe, and K. Fukui, *Chem. Phys. Letters*, 69, 413–416 (1980).
280. Molecular Orbital Theory of the Electronic Structures of One-Dimensional Molecular Crystals. A. Imamura, K. Tanaka, T. Yamabe, and K. Fukui, *Theor. Chim. Acta (Berl.)*, 54, 1–14 (1980).
281. A Study on the Vibronic Intensification of Absorption Bands by Means of Floating Orbital Method. K. Akagi, T. Yamabe, H. Kato, and K. Fukui, *J. Phys. Chem.*, 84, 98–105 (1980).
282. The Electronic Structures of Fluorinated Polyacetylenes. A Design of New Organic Polymer Alternatives to Polyacetylene. T. Yamabe, K. Tanaka, H. Teramae, and K. Fukui, *Synthetic Metals*, 1, 321–327 (1979/80).
283. A Theoretical Aspect of the Formation and Breaking of Chemical Bonds in Reactions. H. Fujimoto and K. Fukui, *Israel Journal of Chemistry*, 19, 317–322 (1980).
284. Analysis of the Rotational Strength by Means of Configuration Analysis Based on the Localized Molecular Orbitals. K. Akagi, T. Yamabe, H. Kato, A. Imamura, and K. Fukui, *J. Am. Chem. Soc.*, 102, 5157–5165 (1980).
285. Theoretical Study on the Bonding Nature of Transition Metal Complexes of Molecular Nitrogen. T. Yamabe, K. Hori, T. Minato, and K. Fukui, *Inorg. Chem.*, 19, 2154–2159 (1980).
286. An Orbital Phase Study of Adsorption of Ethylene on Flat and Stepped Platinum Surfaces. H. Kobayashi, S. Yoshida, H. Kato, K. Fukui, K. Tarama, and M. Yamaguchi, *Surface Sci.*, 97, 329–345 (1980).
287. Interaction Frontier Orbitals. K. Fukui, N. Koga, and H. Fujimoto, *J. Am. Chem. Soc.*, 103, 196–197 (1981).
288. Hybrid Molecular Orbitals for Reacting Systems. H. Fujimoto, N. Koga, M. Endo, and K. Fukui, *Tetrahedron Letters*, 22, 1263–1266 (1981).
289. IRC Approach to Chemical Dynamics: Toward Mode-Selective Chemical Reactions. K. Yamashita, T. Yamabe, and K. Fukui, *Chem. Phys. Letters*, 84, 123–126 (1981).
290. Electronic Structure of Doped Polyacetylene — Mechanism of Isomerization from Cis to Trans Form. T. Yamabe, K. Akagi, H. Shirakawa, K. Ohzeki, and K. Fukui, *Chemica Scripta*, 17, 157–158 (1981).
291. Hybrid Molecular Orbitals for Reacting Systems. Elucidation of Reactive Domains. H. Fujimoto, N. Koga, M. Endo, and K. Fukui, *Tetrahedron Letters*, 22, 3427–3430 (1981).
292. A Theoretical Study on the Stability of the CH_3NN Radical and Its Decomposition Path. K. Yamashita, M. Kamino-yama, T. Yamabe, and K. Fukui, *Chem. Phys. Letters*, 83, 78–82 (1981).
293. The Path of Chemical Reactions. The IRC Approach. K. Fukui, *Acc. Chem. Res.*, 14, 363–368 (1981).
294. A Coupled Fragment Molecular Orbital Method for Interacting Systems. H. Fujimoto, N. Koga, and K. Fukui, *J. Am. Chem. Soc.*, 103, 7452–7457 (1981).
295. Electronic Structure of As_4S_5 As a Local Structural Model Amorphous As_2S_3 Film. T. Yamabe, K. Tanaka, A. Tachibana, Y. Kobayashi, H. Teramae, and K. Fukui, *Solid State Commun.*, 40, 521–523 (1981).
296. Toward Chemodynamics. K. Fukui, A. Tachibana, and K. Yamashita, *Int. J. Quantum Chem., Quant. Chem. Symp.*, 15, 621–632 (1981).
297. Variational Principles in a Chemical Reaction. K. Fukui, *Int. J. Quantum Chem., Quant. Chem. Symp.*, 15, 633–642 (1981).
298. A Hydrogen Rearrangement of Formamidine and the Solvent Effects Thereupon. K. Yamashita, M. Kaminoyama, T. Yamabe, and K. Fukui, *Theor. Chim. Acta (Berl.)*, 60, 303–312 (1981).
299. Dynamic Behavior of the IRC in Chemical Laser Systems. K. Yamashita, T. Yamabe, and K. Fukui, *Theor. Chim. Acta (Berl.)*, 60, 523–533 (1982).
300. Photolysis of Organopolysilanes. Photochemical Behavior of Phenylethylidisilanes. M. Ishikawa, H. Sugisawa, T. Fuchikami, M. Kumada, T. Yamabe, H. Kawakami, K. Fukui, Y. Ueki, and H. Shizuka, *J. Am. Chem. Soc.*, 104, 2872–2878 (1982).
301. Electronic Structures of Copper (II) Complexes with N_4 and S_4 Ligand Fields. T. Yamabe, K. Hori, T. Minato, K. Fukui, and Y. Sugiura, *Inorg. Chem.*, 21, 2040–2046 (1982).
302. Theoretical Study on Dinitrogen Complexes. Position of the Third Protonation and the Reduction Mechanism. T. Yamabe, K. Hori, and K. Fukui, *Inorg. Chem.*, 21, 2816–2818 (1982).
303. Electronic Excited States of Linear Conjugated Polyenes. T. Yamabe, K. Akagi, T. Matsi, K. Fukui, and H. Shirakawa, *J. Phys. Chem.*, 86, 2365–2369 (1982).
304. Chemical Reactivity Theory – Its Pragmatism and Beyond. K. Fukui, *Pure and Appl. Chem.*, 54, 1825–1836 (1982).
305. The Role of Frontier Orbitals in Chemical Reactions (Nobel Lecture). K. Fukui, *Angew. Chem. Intern. Ed. English*, 21, 801–809 (1982).
306. Grenzorbitale – Ihre Bedeutung bei Chemischen Reaktionen (Nobel-Vortrag). K. Fukui, *Angew. Chem.*, 94, 852–861 (1982).
307. Role of Frontier Orbitals in Chemical Reactions. K. Fukui, *Science*, 218, 747–754 (1982).
308. A Role of the Lowest Unoccupied Molecular Orbital of the Local Structure of Amorphous Materials. K. Tanaka, T. Yamabe, and K. Fukui, *Solar Energy Materials*, 8, 9–13 (1982).
309. Isomerization Mechanism from Cis to Trans Form in Polyacetylene. T. Yamabe, K. Akagi, K. Ohzeki, K. Fukui, and H. Shirakawa, *J. Phys. Chem. Solids*, 43, 577–581 (1982).
310. Electronic and Vibrational Structures of Finite Polyenes. T. Yamabe, K. Akagi, Y. Tanabe, K. Fukui, and H. Shirakawa, *J. Phys. Chem.*, 86, 2359–2365 (1982).

311. Theoretical Study on Dinitrogen Complexes. Charge of the Electronic Structure of the N_2 Moiety Due to Protonation. T. Yamabe, K. Hori, and K. Fukui, *Inorg. Chem.*, 21, 2046–2050 (1982).
312. A Theoretical Discrimination of Active Regions of Molecules in Chemical Reaction. H. Fujimoto, N. Koga, M. Endo, I. Hataue, and K. Fukui, *Israel Journal of Chemistry*, 23, 49 (1983).
313. Dynamics of Double Proton Exchange in the Formamidinium-Water System. T. Yamabe, K. Yamashita, M. Kaminoyama, M. Koizumi, A. Tachibana, and K. Fukui, *J. Phys. Chem.*, 88, 1459–1463 (1984).
314. Reaction Ergodography for Dehydrogenation Reaction of Methanethiol. T. Yamabe, Cheng-Da Zhao, M. Koizumi, A. Tachibana, and K. Fukui, *Can. J. Chem.*, 63, 1532 (1985).
315. Intersoliton Hopping in Lightly Doped Polyacetylene: Assistance by Vibrational Motion of the Dopant. T. Yamabe, K. Tanaka, S. Yamanaka, T. Koide, and K. Fukui, *J. Chem. Phys.*, 82, 5737–5743 (1985).
316. Dynamic Electron Current Induced by Molecular Vibration. A. Tachibana, K. Hori, Y. Asai, T. Yamabe, and K. Fukui, *J. Mol. Structure (Theochem)*, 123, 267–285 (1985).
317. Adsorption and Fluid-mixing Characteristics of Packed Bed Catalysts with Blow-by Sections. Part II. A Theoretical Approach to the Concentration Distribution. T. Inui, M. Funabiki, and K. Fukui, *Mem. Fac. Eng., Kyoto Univ.*, 48, 168–177 (1986).
318. Theoretical Study on Carbocation with a Triple Bond. K. Hori, T. Yamabe, K. Fukui, S. Kobayashi, and H. Taniguchi, *J. Mol. Structure (Theochem)*, 153, 295–305 (1987).
319. A Study on the Active Region of Molecules and Chemical Reactivity. H. Fujimoto, J. Endo, Y. Mizutani, and K. Fukui, *J. Mol. Structure (Theochem)*, 163, 249–258 (1988).
320. On the Hartree-Fock Approximation to the Electronic Structure of Molecules in the Intense Radiation Field and the Strong Vibronic Coupling. Y. Asai, T. Yamabe, and K. Fukui, *Theor. Chim. Acta*, 73, 147–154 (1988).
321. Electronic Structures of Electrically Conductive Fragment Models in Pyrolyzed Polymers. T. Yamabe, S. Yamashita, H. Yamabe, K. Fukui, and K. Tanaka, *Collection of Czechoslovak Chemical Commun.*, 53, 1881–1889 (1988).
322. Orbital Interaction in Large Molecular Systems: Adsorption of H_2 on Ni Surfaces. H. Fujimoto, H. Kawamura, T. Ichiishi, and K. Fukui, *J. Mol. Structure (Theochem)*, 179, 417–425 (1988).
323. A Study of Orbital Interactions in the Reactions of Bicyclo 1.1.0 butane. H. Fujimoto, T. Yabuki, and K. Fukui, *J. Mol. Structure (Theochem)*, 198, 267–275 (1989).
324. Double Proton Transfer in the Dihydroxyethylene-Glyoxal Complex. A. Tachibana, M. Koizumi, E. Tanaka, T. Yamabe, K. Fukui, and T. Minato, *J. Mol. Structure (Theochem)*, 200, 207–217 (1989).
325. A Theoretical Study on the Electrophilic Strength of Singlet Carbenes in the Addition to $C=C$ Double Bonds, H. Fujimoto, S. Ohwaki, J. Endo, and K. Fukui, *Gazzetta Chimica Italiana*, 120, 229 (1990).
326. A Heuristic Potential Function for Intramolecular and Intrasupermolecular Chemical Reactions, M. Nagaoka, Y. Okuno, T. Yamabe, and K. Fukui, *Int. J. Quantum Chem.*, 42, 889 (1992).
327. Second Hyperpolarizabilities of Nitrogen-Containing Polymers, Y. Matsuzaki, K. Fukui, K. Tanaka, and T. Yamabe, *J. Mol. Structure (Theochem)*, 297, 221–226 (1993).
328. Orbital Interactions in Sizable Systems. Chemical Bonding and Regioselectivities in C_{60}^- transition Metal Complexes. H. Fujimoto, Y. Nakao, and K. Fukui, *J. Mol. Structure (Theochem)*, 300, 425–434 (1993).
329. Ion-Molecule Reactions between SiH_3^+ and NH_3^+ . A. Tachibana, S. Kawauchi, N. Yoshida, T. Yamabe, and K. Fukui, *J. Mol. Structure (Theochem)*, 300, 501–508 (1993).
330. The Uniqueness of Nature and Human Beings. K. Fukui, *Int. J. Quantum Chem.*, 53, 119–124 (1995).
331. Transient Bonds and Chemical Reactivity of Molecules. H. Fujimoto, K. Sakata, and K. Fukui, *Int. J. Quantum Chem.*, 60, 401–408 (1996).
332. Structural Analysis of Certain Linear Operators Representing Chemical Network Systems via the Existence and Uniqueness Theorems of Spectral Resolution. III. S. Arimoto, K. Fukui, H. Ohno, K. F. Taylor, and P. G. Mezey, *Int. J. Quantum Chem.*, 63, 149–163 (1997).
333. Mixing of Triply Degenerated Molecular Orbitals in C_{60}^{2-} and C_{60}^{3-} . Y. Huang, M. Okada, K. Fukui, K. Tanaka, H. Aoki, and T. Yamabe, *Int. J. Quantum Chem.*, 63, 361–366 (1997).
334. Inhibition Mechanism of Flavin by Deprenyl as an Acetylenic Irreversible Inhibitor. S. Nakai, F. Yoneda, T. Yamabe, and K. Fukui, *Theor. Chem. Acc.*, in press (this volume).

Books

In English:

1. Theory of Orientation and Stereoselection. Springer-Verlag, Berlin, June 1970; Revised Ed. October 1975.

In Japanese:

2. Quantum Chemistry of Living Body. Kyoritsu Syuppan Co., Tokyo, June 1967. (Editor and contributor)
3. Quantum Chemistry. Asakura Shoten, Tokyo, February 1968.
4. Chemical Reactions and Electron Orbitals. Maruzen Co., Tokyo, June 1976.
5. Frontier Orbitals and Organic Chemical Reactions. by I. Fleming, John Wiley & Sons, Ltd., 1976; Japanese Translation, Y. Takeuchi and S. Tomoda, supervised by K. Fukui, Kodansha Scientific Co., Ltd., 1978.

Contributions to Books Written in English:

1. A Simple Quantum-Theoretical Interpretation of the Chemical Reactivity of Organic Compounds. K. Fukui, in *Molecular Orbitals in Chemistry, Physics, and Biology* (P.-O. Löwdin and B. Pullman, ed.), Academic Press, New York, 1964, p. 513–537.
2. Sigma Molecular Orbital Theory and Chemical Reactivity. K. Fukui, in *Modern Quantum Chemistry. Istanbul Lectures* (O. Sinanoglu, ed.), Part I, Academic Press, New York, 1965, p. 49–84.
3. Orbital Symmetry and Electrocyclic Rearrangements. K. Fukui and H. Fujimoto, in *Mechanisms of Molecular Migrations* (B. S. Thyagarajan, ed.), Vol. 2, Interscience Publishers, New York, 1969, p. 117–190.
4. Hybrid-Based Molecular Orbitals and Their Chemical Applications. K. Fukui, in *Sigma Molecular Orbital Theory* (O. Sinanoglu and K. S. Wiberg, ed.), Yale University Press, New Haven, 1970, p. 121–129.
5. The Interaction of Particular Orbitals in Chemical Reactions. K. Fukui, in *XXIII rd Intern. Congr. Pure Appl. Chem.*, Vol. 1, Butterworths, London, 1971, p. 65–89.
6. Molecular Orbital Theory of Chemical Reactions. H. Fujimoto and K. Fukui, in *Advances in Quantum Chemistry*, Vol. 6, Academic Press, Inc., New York, 1972, p. 177–201.
7. The Charge and Spin Transfers in Chemical Reaction Paths. K. Fukui, in *Proc. First Intern. Congress Quant. Chem. Menton-France 1973*, ed. R. Daudel and B. Pullman, D. Reidel Publ. Co., Dordrecht-Holland, 1974, p. 113–141.
8. Intermolecular Interactions and Chemical Reactivity. H. Fujimoto and K. Fukui, in *Chemical Reactivity and Reaction Paths*, ed. G. Klopman, John Wiley & Sons, Inc., 1974, P. 23–54.
9. Introductory Remarks on the Quantum Theory of Catalysis and Related Surface Phenomena. K. Fukui, in *The New World of Quantum Chemistry*, ed. B. Pullman and R. Parr, D. Reidel Publ. Co., Dordrecht-Holland, 1976, p. 273–277.

10. A Theoretical Aspect of Chemical Interactions of Free Radicals. K. Fukui, in *Radicaux Libres Organiques*, Éditions du CNRS, 1978, p. 21–28.
11. Molecular Interactions through Orbitals. H. Fujimoto and K. Fukui, in *Molecular Interactions Vol. 1*, ed. H. Ratajczak and W. J. Orville-Thomas, John Wiley & Sons, Ltd., 1980, p. 89–116.
12. The Role of Frontier Orbitals in Chemical Reactions. K. Fukui, in the Nobel Foundation Les Prix Nobel 1981, Almqvist & Wiksell International, Stockholm, p. 146–166, 1982.
13. Introductory Remarks on the Time-Dependent Phenomena and Related Topics. K. Fukui, in *New Horizons of Quantum Chemistry*, P.-O. Löwdin and B. Pullman, eds., D. Reidel Publ. Co., Dordrecht, Holland, 1983, p. 111–115.
14. Frontier-Orbital-Theorie: Moderne Aspekte. K. Fukui, in *Enzyklopädie Naturwissenschaft und Technik, Jahresband 1982*, Verlag moderne Industrie, p. 189–195.
15. Reminiscences – My Forty Years' Study of Chemical Reactions. K. Fukui, in *Applied Quantum Chemistry*, V. H. Smith, Jr., H. F. Schaefer III and K. Morokuma, eds., D. Reidel Publ. Co., Dordrecht, Holland, 1986, p. 1–25.
16. Orbital Presentation of Chemical Reactions. K. Fukui, in *Schrödinger – Centenary Celebration of a Polymath*, C. W. Kilmister, ed., Cambridge University Press, Cambridge, p. 102–111, 1987.
17. Characteristic Electronic Processes in Etching Reaction of Silicon, by A. Tachibana, S. Kawauchi, T. Yamabe, and K. Fukui, in "Molecules in Natural Science and Medicine: An Eucomum for Linus Pauling." (Z. B. Maksic and M. Echert-Maksic, eds.), Ellis Horwood, New York, 375 (1991).
18. Importance of an Interdisciplinary Approach to the Progress in Polymer Chemistry by K. Fukui in "Conjugated Polymers and Related Materials," (W. R. Salaneck, et al. eds.), Oxford University Press, Oxford, 7 (1993).
