

Erratum

Theor. Appl. Genet. (1991) 81: 597–605. K. Iijima, K. Kakeda, and K. Fukui: Identification and characterization of somatic rice chromosomes by imaging methods. Unfortunately the discriminant No. 9 in Table 2 which was the list of the discriminants was incorrect. These sentences should read as follows: “No. 9 Select one chromosome with the shortest long arm among the remaining four chromosomes and then select one chromosome with the longest short arm among the three chromosomes. Then the selected two chromosomes are either chromosomes 5 or 8.”
