---

**Theor Appl Genet (2003) 106:794–803**

*Pi-lm2* and *Pi-tq5* were misplaced in figure 2. *Pi-lm2* is located on chromosome 11 near marker RZ536. *Pi-tq5* is located on chromosome 2 near marker RG520. As a consequence, *Pi-25* could be at the same locus as *Pi-tq5* and it should not be considered as a new resistance gene until additional work is carried out.

We thank Shannon R. Pinson for pointing out this error.
