

The 6th Jerusalem Symposium

An International Symposium on : Chemical and Biochemical Reactivity

sponsored jointly by the Hebrew University, Jerusalem and the Institut de Biologie Physico-Chimique (Fondation Edmond de Rothschild), Paris will be hold, under the auspices of the Israël Academy of Sciences and Humanities, in Jerusalem, Israël, from April 9th to April 13th 1973.

The aim of this meeting will be the confrontation of the present status of our knowledge about the theoretical and experimental aspects of the problem. A particular emphasis will be laid on theoretical computations using refined allvalence electrons or all electrons methods in relation to experimental data obtained with modern techniques. The collaboration of both theoreticians and experimentalists is therefore wellcome at this symposium. The biochemical section implies also studies in the field of pharmacology.

Correspondance and applications should be send to Prof. E. D. Bergmann, Dept. of Organic Chemistry, the Hebrew University, Jerusalem, Israël and Prof. B. Pullman, Fondation Edmond de Rothschild, 13, rue Pierre et Marie Curie, Paris 5è, France.
