

Announcement

Fifth Triennial American Conference on Theoretical Chemistry

The fifth ACTC will be held June 15–20, 1984 in the Grand Teton National Park, Jackson, Wyoming. The park is without question one of the scenic wonders of North America, and it is hoped that this will be a particular attraction to theoretical chemists from outside the U.S. The conference site will be the four star Jackson Lake Lodge, overlooking beautiful Jackson Lake. Yellowstone National Park is only 50 miles from the site and tours will be organized for the periods during which no formal lectures are scheduled.

The conference will focus on the traditional mixture of quantum mechanics, dynamics, and statistical mechanics. Please put aside this week in June, 1984 for the Fifth ACTC. Further information and registration forms are available from Professor H. F. Schaefer, Chairman Fifth ACTC, Department of Chemistry, University of California, Berkeley, California 94720.
