

## Announcement of New Editorship

In 1983 Professor H. Hartmann approached Professor K. Ruedenberg with the question whether he would be willing to take over the editorship of *Theoretica Chimica Acta*. After careful consideration Professor Ruedenberg proposed to form a group of active editors. In Summer 1984 Professor Hartmann together with the publisher agreed to turn over the editorship to an editorial team headed by Professor Ruedenberg. Tragically, Professor Hartmann was not granted the satisfaction to witness the installment of this group of distinguished international scientists joining forces to edit the journal which he founded in 1962, the oldest journal focussing on theoretical chemistry. Springer Verlag is happy to announce that, starting with Volume 67, Number 1, 1985, the following gentlemen will become active editors of *Theoretica Chimica Acta*.

Professor Klaus Ruedenberg, Iowa State University, Ames, Iowa, USA, Editor-in-Chief

Professor Ernest R. Davidson, University of Indiana, Bloomington, Indiana, USA

Professor Nicholas C. Handy, University of Cambridge, Cambridge, England

Professor Joshua Jortner, Tel-Aviv University, Tel-Aviv, Israel

Professor Werner Kutzelnigg, University of Bochum, West Germany

Professor Rudolph A. Marcus, California Institute of Technology, Pasadena, California, USA

Professor Josef Michl, Chemistry Department, University of Utah, Salt Lake City, Utah, USA

Professor William H. Miller, University of California, Berkeley, California, USA

Professor Keiji Morokuma, Institute for Molecular Science, Okazaki, Japan

Professor Björn O. Roos, University of Lund, Sweden

Professor Henry F. Schaefer, University of California, Berkeley, California, USA

Professor Donald G. Truhlar, University of Minnesota, Minneapolis, Minnesota, USA

As in the past, the publisher will make every effort to maintain *Theoretica Chimica Acta*'s record of careful and prompt publication.
