The following citation was inadvertently omitted from the list of reviews in Ref. [4] of the overview: J. Cioslowski (ed) (2001) Quantum-mechanical prediction of thermochemical data. Kluwer, Dordrecht, pp 67–98. In addition, we neglected to notify the editors of the pending publication of that book chapter and the similar nature of the review contained in it. We express regret for this significant omission. We note, however, that all of the material was originally published elsewhere by us and is correctly cited.
