THERMOCHIMICA ACTA, VOLUME 20 (1977)

SUBJECT INDEX

- L*- α -alanine,
thermodynamics of nitrogen compounds.
III. Thermodynamic study of glycine and —
(Ngauv et al.) 371
- Alloys,
thermogravimetric oxidation experiments
with — of copper with rare earth metals
(Krajewski et al.) 93
- 4-Aminopyridine,
a new calorimetric standard: — (Van Til,
Johnson) 177
- Arrhenius equation,
application of the — to solid-state reactions
(Krug) 53
- Calorimeter,
design, calibration, and use of a convective
air flow dynamic — (Miller et al.) 253
- Calorimetric standard,
a new —: 4-aminopyridine (Van Til,
Johnson) 177
- Calorimetry,
thermal analysis, — and chemical thermo-
dynamics—A review (Marti) 1
- CaOsO₃ decomposition products,
thermal stability of mixed osmium oxides.
I. —: A new orthorhombic phase Ca₂Os₂O₇
(Shaplygin, Lazarev) 381
- Carboxime system,
the —. IV. Heat capacities and enthalpies
of melting of *dl*-carboxime, *l*-carboxime and
standard *n*-heptane (Meijer et al.) 325
- Ceramic multilayer capacitors,
thermoanalytic studies by the development
of — (Hoppert) 81
- Chemical kinetics,
thermoanalytic methods in the development
of chemical processes (Regenass) 65
- Chemical thermodynamics,
thermal analysis, calorimetry and — —A
review (Marti) 1
- Chromium-manganese spinels,
— with Jahn-Teller phase transitions as
potential high temperature DTA-standards
(Oswald et al.) 23
- cis*-[Co(en)₂(OH)(H₂O)]S₂O₆,
the thermal olation reaction of — (Nambiar,
Wendlandt) 422
- Clays,
DTA-TG-MS in the investigation of —.
Quantitative determination of H₂O, CO and
CO₂ by evolved gas analysis with a mass
spectrometer (Müller-Vonmoos et al.) 387
- (*n*-C₁₀H₂₃-1NH₂)₂ZnCl₂,
transition metal complexes with long-chain
amines. Thermal behaviour and crystal
structure of — (Salerno et al.) 407
- CO,
DTA-TG-MS in the investigation of clays.
Quantitative determination of H₂O, — and
CO₂ by evolved gas analysis with a mass
spectrometer (Müller-Vonmoos et al.) 387
- CO₂,
DTA-TG-MS in the investigation of clays.
Quantitative determination of H₂O, CO and
— by evolved gas analysis with a mass
spectrometer (Müller-Vonmoos et al.) 387
- Cold worked copper,
quantitative differential thermal analysis for
determining the stored energy of — (Hem-
minger) 37
- Convective air flow dynamic calorimeter,
design, calibration, and use of a — (Miller
et al.) 253
- Copper,
thermogravimetric oxidation experiments
with alloys of — with rare earth metals
(Krajewski et al.) 93
- Critical temperature measurements of liquids,
— by means of differential thermal analysis
(Hentze) 27
- Diathermic-chemical-reaction-data,
non-adiabatic treatment of — by the
integrational minimization method (Frank-
voort) 279

- α -Dicalcium silicate hydrate,
thermal decomposition of — (Jernejčič et al.) 237
- Differential thermal analysis,
critical temperature measurements of liquids
by means of — (Hentze) 27
- Differential thermal analysis,
quantitative — for determining the stored
energy of cold worked copper (Hemminger) 37
- Differential thermal analysis,
results of a joint trial on the method of the —
in the temperature range from 25 to 1000°C
(Krien) 11
- Diflalone,
thermal properties of — and compounds
related to its metabolism (Pelizza et al.) 426
- dl*-Carvoxime,
the carvoxime system. IV. Heat capacities
and enthalpies of melting of —, *l*-carvoxime
and standard *n*-heptane (Meijer et al.) 325
- Energy,
quantitative differential thermal analysis for
determining the stored — of cold worked
copper (Hemminger) 37
- Ferrous chloride,
the enthalpy of solution of — in water at
298 K (Cerutti, Hepler) 309
- Flame-retardant polyester/cotton textile blends,
thermoanalytical studies of —: a comparison
of THPC-urea-PVEr and THPOHammonia
treatments (Perkins et al.) 263
- Glycine,
thermodynamics of nitrogen compounds.
III. Thermodynamic study of — and *L*- α -
alanine (Ngauv et al.) 371
- Halides,
investigation of phase diagrams by DTA and
X-ray methods. The systems $AX_2/CoX_2(A = Na, Cs, Tl; X = Cl, Br, I)$ (Seifert) 31
- n*-Heptane,
the carvoxime system. IV. Heat capacities
and enthalpies of melting of *dl*-carvoxime,
l-carvoxime and standard — (Meijer et al.) 325
- H₂O,
DTA-TG-MS in the investigation of clays.
Quantitative determination of —, CO and
CO₂ by evolved gas analysis with a mass
spectrometer (Müller-Vonmoos et al.) 387
- Hydroxides,
effect of metal oxide additives on the thermal
decomposition of perchlorates, oxalates and
— (Shimikawabe et al.) 347
- Hydroxo-aquo-tetrammine cobalt(III) com-
plexes,
the kinetics ofolation of some — in the
solid state (Nambiar, Wendlandt) 417
- Inorganic ion exchangers,
DTA, ETA, and TG investigations of
zirconium phosphates of different crystal-
linity (Herbell et al.) 87
- Isoperibol calorimeter,
a compact differential — with variable heat
shields (Van Til, Johnson) 141
- Jahn-Teller phase transitions,
chromium-manganese spinels with — as
potential high temperature DTA-standards
(Oswald et al.) 23
- Kinetics of solid-state reactions,
contribution to the — under non-isothermal
conditions (Boy, Böhme) 195
- l*-Carvoxime,
the carvoxime system. IV. Heat capacities
and enthalpies of melting of *dl*-carvoxime,
— and standard *n*-heptane (Meijer et al.) 325
- Lithium bromide,
calorimetric studies in organic solvents. The
enthalpy of solution of — in tetrahydro-
furan (Claudy et al.) 315
- Long-chain amines,
transition metal complexes with —. Thermal
behaviour and crystal structure of $(n-C_{12}H_{25-1}NH_2)_2ZnCl_2$ (Salerno et al.) 407
- Magnesium compounds,
RPE study of radicals formed during the
vacuum thermal decomposition of sulfites
and thiosulfates. III. Potassium and —
(Hubin, Gabelica) 395
- Metal oxide additives,
effect of — on the thermal decomposition
of perchlorates, oxalates and hydroxides
(Shimokawabe et al.) 347
- Nitrogen compounds,
thermodynamics of —. III. Thermodynamic
study of glycine and *L*- α -alanine (Ngauv
et al.) 371
- Non-isothermal kinetics,
the non-linear least squares method in —
(Marcu, Segal) 211
- Non-linear least squares method,
the — in non-isothermal kinetics (Marcu,
Segal) 211
- Non-saturated heterocyclic compounds,

- structure-reactivity relation. Proton ionisation thermodynamical quantities of saturated and — (Blais et al.) 335
- NTC thermistors,
a high sensitivity DC thermometric circuit using operational amplifiers and a hybrid combination of PTC and — (Van Til, Johnson) 115
- Olation,
the kinetics of — of some hydroxo-aquo-tetrammine cobalt(III) complexes in the solid state (Nambiar, Wendlandt) 417
- Olation,
the thermal — reaction of *cis*-[Co(en)₂(OH)(H₂O)]S₂O₈ (Nambiar, Wendlandt) 422
- Organic solvents,
calorimetric studies in —. The enthalpy of solution of lithium bromide in tetrahydrofuran (Claudy et al.) 315
- Orthorhombic Ca₂O₅O₇,
thermal stability of mixed osmium oxides. I. CaOsO₃ decomposition products: A new phase — (Shaplygin, Lazarev) 381
- Osmium oxides,
thermal stability of mixed —. I. CaOsO₃ decomposition products: a new orthorhombic phase Ca₂O₅O₇ (Shaplygin, Lazarev) 381
- Oxalates,
effect of metal additives on the thermal decomposition of perchlorates, — and hydroxides (Shimokawabe et al.) 347
- Perchlorates,
effect of metal oxide additives on the thermal decomposition of —, oxalates and hydroxides (Shimokawabe et al.) 347
- Phase diagrams,
investigation of — by DTA and X-ray methods. The systems AX₂/CoX₂ (A = Na-Cs, Tl; X = Cl, Br, I) (Seifert) 31
- Polymers,
thermoanalytic studies by the development of ceramic multilayer capacitors (Hoppert) 81
- Potassium compounds,
RPE study of radicals formed during the vacuum thermal decomposition of sulfites and thiosulfates. III. Magnesium and — (Hubin, Gabélica) 395
- Proton ionisation thermodynamical quantities, structure-reactivity relation. — of saturated and non-saturated heterocyclic compounds (Blais et al.) 335
- PTC thermistors,
a high sensitivity DC thermometric circuit using operational amplifiers and a hybrid combination of NTC and — (Van Til, Johnson) 115
- PtO₂/carbon,
differential thermal analysis of — (Kino-shita) 297
- Pyrometric differential thermal analyser,
a — for high temperatures (Wehner et al.) 17
- Quadrupole mass spectrometers coupled with thermoanalyzers,
modern methods for — for temperatures up to 1500°C (Eppler, Selhofer) 45
- Rare earth metals,
thermogravimetric oxidation experiments with alloys of copper with — (Krajewski et al.) 93
- Ribonucleosides,
a differential scanning calorimetry-thin-layer chromatography study of — (Bryan et al.) 363
- Saturated heterocyclic compounds,
structure-reactivity relation. Proton ionisation thermodynamical quantities of non-saturated and — (Blais et al.) 335
- Silver selenide-silver telluride,
study of the — system (Aramov et al.) 107
- Solid-state reactions,
application of the Arrhenius equation to — (Krug) 53
- Solid-state reactions,
contribution to the kinetics of — under non-isothermal conditions (Boy, Böhm) 195
- Solution calorimeter,
a compact differential isoperibol calorimeter with variable heat shields (Van Til, Johnson) 141
- Structure-reactivity relation,
— Proton ionisation thermodynamical quantities of saturated and non-saturated heterocyclic compounds (Blais et al.) 335
- Sugar,
a differential scanning calorimetry-thin-layer chromatography study of ribonucleosides (Bryan et al.) 363
- Sulfites,
RPE study of radicals formed during the vacuum thermal decomposition of — and thiosulfates. III. Magnesium and potassium compounds (Hubin, Gabélica) 395
- Temperature lag,
sample — in quantitative DTA (Dupont DSC) (Barron) 248
- Temperature variations of some reaction

- enthalpies,
a study of — suitable as calibration standards
in DTA (Pompe) 229
- Tetrahydrofuran,
calorimetric studies in organic solvents. The
enthalpy of solution of lithium bromide in —
(Claudy et al.) 315
- Thermal analysis,
— calorimetry and chemical thermo-
dynamics—A review (Marti) 1
- Thermal hazards,
thermoanalytic methods in the development
of chemical processes (Regnass) 65
- Thermal maturation,
a differential scanning calorimetry-thin-
layer chromatography study of ribonucleo-
sides (Bryan et al.) 363
- Thermometric circuit using operational am-
plifiers,
a high sensitivity DC — and a hybrid
combination of NTC and PTC thermistors
(Van Til, Johnson) 115
- Thiosulfates,
RPE study of radicals formed during the
vacuum thermal decomposition of sulfites
and —. III. Magnesium and potassium
compounds (Hubin, Gabelica) 395
- Transition metal complexes,
— with long-chain amines. Thermal be-
haviour and crystal structure of $(n-C_{18}H_{37}+1-$
 $NH_2)_2ZnCl_2$ (Salerno et al.) 407
- Viscosity of $Mn(NO_3)_2 \cdot H_2O$ solution,
weak transverse magnetic field effect on the
— at several temperatures (Lielmezs,
Aleman) 219
- Weak transverse magnetic field,
— effect on the viscosity of $Mn(NO_3)_2 \cdot$
 H_2O solution at several temperatures
(Lielmezs, Aleman) 219
- Zirconium phosphates,
DTA, ETA, and TG investigations of — of
different crystallinity (Herbell et al.) 87

Corrigendum

Critical temperature measurements of liquids by means of differential thermal analysis, by G. Hentze, *Thermochim. Acta*, 20 (1977) 27–30.

page 29, 7th line from the top: “must be able to withstand the critical pressure (225 kgf cm⁻² for water) . . .” should read “must be able to withstand the critical pressure (225 bar for water) . . .”
