

Subject index

- Activity coefficients**
Activity coefficients and excess Gibbs free energies for binary mixtures of N,N-dimethylformamide with substituted benzenes 133
- Alkaline composite oxides**
La thermochimie des oxydes complexes D'uranium (VI), du vanadium (V), (du niobium (V)) et des éléments alcalins 53
- Amylase**
Biochemical analysis of cyclodextrins using an enzyme thermistor 1
- Aragonite**
Phase transformation of calcium carbonate polymorphs 175
- Aromatic hydrocarbons**
Molar excess Gibbs free energy of 1-Propanol or 2-Propanol + aromatic hydrocarbons at 298.15 K in terms of an association model with a Flory contribution term 187
- Association model**
Molar excess Gibbs free energy of 1-Propanol or 2-Propanol + aromatic hydrocarbons at 298.15 K in terms of an association model with a Flory contribution term 187
- Binary mixtures**
Activity coefficients and excess Gibbs free energies for binary mixtures of N,N-dimethylformamide with substituted benzenes 133
- Biocalorimetry**
Biocalorimetry and laser flow cytometry for characterization of the physiological state of microorganisms 7
- Biosensor**
Biochemical analysis of cyclodextrins using an enzyme thermistor 1
- Boiling points**
Activity coefficients and excess Gibbs free energies for binary mixtures of N,N-dimethylformamide with substituted benzenes 133
- Ca(H₂PO₄)₂-SiO₂ system**
The thermal dehydration of the Ca(H₂PO₄)₂·H₂O-SiO₂ system. Part 1. Mechanism 107
- Calcite**
Phase transformation of calcium carbonate polymorphs 175
- Calcium carbonate**
Phase transformation of calcium carbonate polymorphs 175
- Calorimetry**
Biochemical analysis of cyclodextrins using an enzyme thermistor 1
- Coal**
Effect of mineral matter on the combustion curve of chars 65
- Coal-fired boilers**
The effect of the porous structure on sorbent sulfation under coal-fired boiler conditions 151
- Combustion**
Effect of mineral matter on the combustion curve of chars 65
- Complexes**
Preparation, properties and thermal decomposition of rare earth element complexes with 3, 5-dihydroxybenzoic acid 29
- CRTA**
The use of master plots for discriminating the kinetic model of solid state reactions from a single constant-rate thermal analysis (CRTA) experiment 165
- Cyclodextrin**
Biochemical analysis of cyclodextrins using an enzyme thermistor 1
- 3,5-Dihydroxybenzoates**
Preparation, properties and thermal decomposition of rare earth element complexes with 3, 5-dihydroxybenzoic acid 29
- Decomposition**
Stimulating the thermal decomposition of magnesite 75

Decrepiation

Stimulating the thermal decomposition of magnesite 75

Dehydration

The thermal dehydration of the $\text{Ca}(\text{H}_2\text{PO}_4)_2 \cdot \text{H}_2\text{O} - \text{SiO}_2$ system. Part 1. Mechanism 107

Density

Excess molar enthalpies, densities and excess molar volumes for binary mixtures containing dimethyl carbonate or diethyl carbonate + 2,2,4-trimethylpentane at 288.15, 298.15, and 313.5 K, and at atmospheric pressure. Application of an extended cell model 121

DSC

Phase transformation of calcium carbonate polymorphs 175

DTA

Effect of mineral matter on the combustion curve of chars 65

The thermal dehydration of the $\text{Ca}(\text{H}_2\text{PO}_4)_2 \cdot \text{H}_2\text{O} - \text{SiO}_2$ system. Part 1. Mechanism 107

Enhanced oil recovery

Thermogravimetric studies of systems pertinent to the in-situ combustion process for enhanced oil recovery. Part 1. Development of a high-pressure thermobalance 41

Enthalpies of formation

La thermochimie des oxydes complexes D'uranium (VI), du vanadium (V), (du niobium (V)) et des éléments alcalins 53

Enthalpy

Excess molar enthalpies, densities and excess molar volumes for binary mixtures containing dimethyl carbonate or diethyl carbonate + 2,2,4-trimethylpentane at 288.15, 298.15, and 313.5 K, and at atmospheric pressure. Application of an extended cell model 121

Thermochemistry of heteroatomic compounds. Part 8. Enthalpies of vaporization and solvation of three-coordinated organophosphorous halides 145

Enzyme thermistor

Biochemical analysis of cyclodextrins using an enzyme thermistor 1

Excess Gibbs free energies

Activity coefficients and excess Gibbs free energies for binary mixtures of N,N-dimethylformamide with substituted benzenes 133

Excess molar volume

Excess molar enthalpies, densities and excess molar volumes for binary mixtures containing dimethyl carbonate or diethyl carbonate + 2,2,4-trimethylpentane at 288.15, 298.15, and 313.5 K, and at atmospheric pressure. Application of an extended cell model 121

Extended cell model

Excess molar enthalpies, densities and excess molar volumes for binary mixtures containing dimethyl carbonate or diethyl carbonate + 2,2,4-trimethylpentane at 288.15, 298.15, and 313.5 K, and at atmospheric pressure. Application of an extended cell model 121

Flory contribution term

Molar excess Gibbs free energy of 1-Propanol or 2-Propanol + aromatic hydrocarbons at 298.15 K in terms of an association model with a Flory contribution term 187

Gibbs free energy of mixing

Molar excess Gibbs free energy of 1-Propanol or 2-Propanol + aromatic hydrocarbons at 298.15 K in terms of an association model with a Flory contribution term 187

Halides

Thermochemistry of heteroatomic compounds. Part 8. Enthalpies of vaporization and solvation of three-coordinated organophosphorous halides 145

Heavy oil

Thermogravimetric studies of systems pertinent to the in-situ combustion process for enhanced oil recovery. Part 1. Development of a high-pressure thermobalance 41

Helmholz free energy

An extensive study of the Helmholtz free energy of Lennard-Jones fluids using WCA theory 85

High temperature approximation

An extensive study of the Helmholtz free energy of Lennard-Jones fluids using WCA theory 85

High-pressure thermobalance

Thermogravimetric studies of systems pertinent to the in-situ combustion process for enhanced oil recovery. Part 1. Development of a high-pressure thermobalance 41

In-situ combustion

Thermogravimetric studies of systems pertinent to the in-situ combustion process for en-

- hanced oil recovery. Part 1. Development of a high-pressure thermobalance 41
- IR**
- La thermochimie des oxydes complexes D'uranium (VI), du vanadium (V), (du niobium (V)) et des éléments alcalins 53
- Preparation, properties and thermal decomposition of rare earth element complexes with 3, 5-dihydroxybenzoic acid 29
- The thermal dehydration of the $\text{Ca}(\text{H}_2\text{PO}_4)_2 \cdot \text{H}_2\text{O}-\text{SiO}_2$ system. Part 1. Mechanism 107
- Isothermal decomposition kinetics
- Isothermal decomposition kinetics of Werner-type β - $[\text{Ni}(\text{NCS})_2(4\text{-MePy})_4]$ clathrates with aromatic guests 199
- KEKAM equation**
- Stimulating the thermal decomposition of magnesite 75
- Kinetic model**
- The use of master plots for discriminating the kinetic model of solid state reactions from a single constant-rate thermal analysis (CRTA) experiment 165
- Laser flow cytometry**
- Biocalorimetry and laser flow cytometry for characterization of the physiological state of microorganisms 7
- Lennard-Jones fluids**
- An extensive study of the Helmholtz free energy of Lennard-Jones fluids using WCA theory 85
- Magnesite**
- Stimulating the thermal decomposition of magnesite 75
- Master plots**
- The use of master plots for discriminating the kinetic model of solid state reactions from a single constant-rate thermal analysis (CRTA) experiment 165
- Mechanical activation**
- Stimulating the thermal decomposition of magnesite 75
- Mineral matter**
- Effect of mineral matter on the combustion curve of chars 65
- Molecular dynamics**
- An extensive study of the Helmholtz free energy of Lennard-Jones fluids using WCA theory 85
- Monotectic crystallization**
- Solidification behaviour of binary organic monotectic alloys 209
- Monotectic phase diagram**
- Solidification behaviour of binary organic monotectic alloys 209
- N,N*-Dimethylformamide**
- Activity coefficients and excess Gibbs free energies for binary mixtures of *N,N*-dimethylformamide with substituted benzenes 133
- Organic monotectic alloys**
- Solidification behaviour of binary organic monotectic alloys 209
- Organic monotectic**
- Solidification behaviour of binary organic monotectic alloys 209
- Phase transformation**
- Phase transformation of calcium carbonate polymorphs 175
- Physiological state**
- Biocalorimetry and laser flow cytometry for characterization of the physiological state of microorganisms 7
- Pore size**
- The effect of the porous structure on sorbent sulfation under coal-fired boiler conditions 151
- Radial distribution function**
- An extensive study of the Helmholtz free energy of Lennard-Jones fluids using WCA theory 85
- Rare earth elements**
- Preparation, properties and thermal decomposition of rare earth element complexes with 3, 5-dihydroxybenzoic acid 29
- Solid state reaction**
- The use of master plots for discriminating the kinetic model of solid state reactions from a single constant-rate thermal analysis (CRTA) experiment 165
- Solvation**
- Thermochemistry of heteroatomic compounds. Part 8. Enthalpies of vaporization and solvation of three-coordinated organophosphorous halides 145
- Sorbent**
- The effect of the porous structure on sorbent sulfation under coal-fired boiler conditions 151
- Styrene-maleic anhydride**
- Simultaneous TA and MS analysis of alternating styrene-maleic anhydride and styrene-maleimide copolymers 17

- Styrene-maleimide copolymers
Simultaneous TA and MS analysis of alternating styrene-maleic anhydride and styrene-maleimide copolymers 17
- Substituted benzenes
Activity coefficients and excess Gibbs free energies for binary mixtures of N,N-dimethylformamide with substituted benzenes 133
- Sulfation
The effect of the porous structure on sorbent sulfation under coal-fired boiler conditions 151
- TG
The thermal dehydration of the $\text{Ca}(\text{H}_2\text{PO}_4)_2 \cdot \text{H}_2\text{O}-\text{SiO}_2$ system. Part 1. Mechanism 107
- Thermal analysis
Preparation, properties and thermal decomposition of rare earth element complexes with 3,5-dihydroxybenzoic acid 29
- Thermal treatment
The thermal dehydration of the $\text{Ca}(\text{H}_2\text{PO}_4)_2 \cdot \text{H}_2\text{O}-\text{SiO}_2$ system. Part 1. Mechanism 107
- Thermogravimetry
Thermogravimetric studies of systems pertinent to the in-situ combustion process for enhanced oil recovery. Part 1. Development of a high-pressure thermobalance 41
- Vaporization
Thermochemistry of heteroatomic compounds. Part 8. Enthalpies of vaporization and solvation of three-coordinated organophosphorous halides 145
- Vapour-liquid equilibrium
Activity coefficients and excess Gibbs free energies for binary mixtures of N,N-dimethylformamide with substituted benzenes 133
- Vaterite
Phase transformation of calcium carbonate polymorphs 175
- Weeks-Chandler-Andersen theory
An extensive study of the Helmholtz free energy of Lennard-Jones fluids using WCA theory 85
- Werner clathrates
Isothermal decomposition kinetics of Werner-type β - $[\text{Ni}(\text{NCS})_2(4\text{-MePy})_4]$ clathrates with aromatic guests 199
- Wilson parameters
Activity coefficients and excess Gibbs free energies for binary mixtures of N,N-dimethylformamide with substituted benzenes 133
- XRD
La thermochimie des oxydes complexes D'uranium (VI), du vanadium (V), (du niobium (V)) et des éléments alcalins 53
The thermal dehydration of the $\text{Ca}(\text{H}_2\text{PO}_4)_2 \cdot \text{H}_2\text{O}-\text{SiO}_2$ system. Part 1. Mechanism 107
