thermochimica
acta

Subject index

- Acetylsalicylic acid**
Thermal decomposition of acetylsalicylic acid (aspirin) 177
- Acidity and basicity variations**
The thermodynamics of dipeptides in water. Part IV. Calorimetric study of the influence of methyl and isopropyl chains on the free α -carboxyl and free α -amino groups 35
- Aerobic metabolism**
Microcalorimetric study of myocardial tissue metabolism in experimental hyperthyroidism in rats 83
- Alkali bromides**
Formation enthalpies of the $MBr-LaBr_3$ liquid mixtures ($M = Li, Na, K, Rb, Cs$) 1
Formation enthalpies of $MBr-NdBr_3$ liquid mixtures ($M = Li, Na, K, Rb, Cs$) 11
- Anaerobic metabolism**
Microcalorimetric study of myocardial tissue metabolism in experimental hyperthyroidism in rats 83
- Aqueous solubility**
The aqueous solubility and thermal behaviour of some β -carbolines 77
- Argon**
Copper-zinc oxide catalysts. Part IV. Thermal treatment in air, argon and hydrogen and XRD study of new bimetallic precursors–direct formation of alloys 65
- As–P and As–P bonds**
Thermochemistry of adducts of triphenyl derivatives of N, P and As with arsenic trihalides 167
- Bimetallic compounds**
Copper-zinc oxide catalysts. Part IV. Thermal treatment in air, argon and hydrogen and XRD study of new bimetallic precursors–direct formation of alloys 65
- Biofuels**
Determination of calorific values of some renewable biofuels 111
- Calorific values**
Determination of calorific values of some renewable biofuels 111
- Calorimetry**
The thermodynamics of dipeptides in water. Part IV. Calorimetric study of the influence of methyl and isopropyl chains on the free α -carboxyl and free α -amino groups 35
- β -Carbolines**
The aqueous solubility and thermal behaviour of some β -carbolines 77
- Catalyst precursors**
Copper-zinc oxide catalysts. Part IV. Thermal treatment in air, argon and hydrogen and XRD study of new bimetallic precursors–direct formation of alloys 65
- Cell metabolism**
Microcalorimetric study of myocardial tissue metabolism in experimental hyperthyroidism in rats 83
- Cellular automata**
Heterogeneous chemical kinetics in two dimensions: two ways of discrete description 191
- Chemical individuality**
Heterogeneous chemical kinetics in two dimensions: two ways of discrete description 191
- Coal oxidation**
A study of the self-heating of fresh and oxidized coals by differential thermal analysis 93
- Coal self-heating**
A study of the self-heating of fresh and oxidized coals by differential thermal analysis 93
- Compensation mechanism**
Dehydration of β -cyclodextrin: facts and opinions 27
- Concentric belts**
Heterogeneous chemical kinetics in two dimensions: two ways of discrete description 191

- Copper-zinc
Copper-zinc oxide catalysts. Part IV. Thermal treatment in air, argon and hydrogen and XRD study of new bimetallic precursors—direct formation of alloys 65
- Copper(II)
Thermal stability and non-isothermal decomposition kinetics of three coordination compounds of copper(II) 183
- Cyano complexes
Copper-zinc oxide catalysts. Part IV. Thermal treatment in air, argon and hydrogen and XRD study of new bimetallic precursors—direct formation of alloys 65
- β -Cyclodextrins
Dehydration of β -cyclodextrin: facts and opinions 27
- Dehydration enthalpies
Dehydration of β -cyclodextrin: facts and opinions 27
- Differential scanning calorimetry
Thermal decomposition of acetylsalicylic acid (aspirin) 177
- Dipeptides
The thermodynamics of dipeptides in water. Part IV. Calorimetric study of the influence of methyl and isopropyl chains on the free α -carboxyl and free α -amino groups 35
- Dirichlet tessellations
Heterogeneous chemical kinetics in two dimensions: two ways of discrete description 191
- DSC
Thermal decomposition of magnesium peroxotitanate to MgTiO_3 137
- DTA
A study of the self-heating of fresh and oxidized coals by differential thermal analysis 93
Thermal decomposition of magnesium peroxotitanate to MgTiO_3 137
- Electronic spectra
New trivalent lanthanide complexes of phthalate-containing hydrazinium cation—preparation, and spectral and thermal studies 143
- Enthalpies of As–N, As–P and As–P bonds
Thermochemistry of adducts of triphenyl derivatives of N, P and As with arsenic trihalides 167
- Enthalpy of formation
Geminal Substituenteneffekte. Teil 9. Standardbildungsenthalpien und spannungsfreie Inkremente verzweigter Ester und Ether 47
- Enthalpy of mixing
Formation enthalpies of the MBr-LaBr_3 liquid mixtures ($M = \text{Li, Na, K, Rb, Cs}$) 1
Formation enthalpies of MBr-NdBr_3 liquid mixtures ($M = \text{Li, Na, K, Rb, Cs}$) 11
- Enthalpy of vaporization
Geminal Substituenteneffekte. Teil 9. Standardbildungsenthalpien und spannungsfreie Inkremente verzweigter Ester und Ether 47
- Ester
Geminal Substituenteneffekte. Teil 9. Standardbildungsenthalpien und spannungsfreie Inkremente verzweigter Ester und Ether 47
- Ether
Geminal Substituenteneffekte. Teil 9. Standardbildungsenthalpien und spannungsfreie Inkremente verzweigter Ester und Ether 47
- Group increments
Geminal Substituenteneffekte. Teil 9. Standardbildungsenthalpien und spannungsfreie Inkremente verzweigter Ester und Ether 47
- Heat of ionization
The thermodynamics of dipeptides in water. Part IV. Calorimetric study of the influence of methyl and isopropyl chains on the free α -carboxyl and free α -amino groups 35
- Heat of neutralization
The thermodynamics of dipeptides in water. Part IV. Calorimetric study of the influence of methyl and isopropyl chains on the free α -carboxyl and free α -amino groups 35
- Heat of protonation
The thermodynamics of dipeptides in water. Part IV. Calorimetric study of the influence of methyl and isopropyl chains on the free α -carboxyl and free α -amino groups 35
- High temperature calorimetry
Formation enthalpies of the MBr-LaBr_3 liquid mixtures ($M = \text{Li, Na, K, Rb, Cs}$) 1
Formation enthalpies of MBr-NdBr_3 liquid mixtures ($M = \text{Li, Na, K, Rb, Cs}$) 11
- High-pressure DSC
Vaporization effects in evaluation of decomposition kinetic parameters by high-pressure DSC 157
- Hydrazinium lanthanide phthalates
New trivalent lanthanide complexes of phthalate-containing hydrazinium cation—preparation, and spectral and thermal studies 143
- Hydrogen
Copper-zinc oxide catalysts. Part IV. Thermal treatment in air, argon and hydrogen and XRD

- study of new bimetallic precursors direct formation of alloys 65
- Hyperthyroidism**
Microcalorimetric study of myocardial tissue metabolism in experimental hyperthyroidism in rats 83
- Infrared absorption spectra**
Thermal decomposition of acetylsalicylic acid (aspirin) 177
- Kinetic parameters of decomposition**
Vaporization effects in evaluation of decomposition kinetic parameters by high-pressure DSC 157
- Lanthanum bromide**
Formation enthalpies of the $MBr-LaBr_3$ liquid mixtures ($M = Li, Na, K, Rb, Cs$) 1
- Magnesium peroxotitanate**
Thermal decomposition of magnesium peroxotitanate to $MgTiO_3$ 137
- Mass energy balance**
Vaporization effects in evaluation of decomposition kinetic parameters by high-pressure DSC 157
- Melting transition**
The aqueous solubility and thermal behaviour of some β -carbolines 77
- $MgTiO_3$**
Thermal decomposition of magnesium peroxotitanate to $MgTiO_3$ 137
- Microcalorimetry**
Microcalorimetric study of myocardial tissue metabolism in experimental hyperthyroidism in rats 83
- Mo-V-Al system**
Thermal reduction of $AlVMoO_7$ 205
- Molten bromides**
Formation enthalpies of the $MBr-LaBr_3$ liquid mixtures ($M = Li, Na, K, Rb, Cs$) 1
Formation enthalpies of $MBr-NdBr_3$ liquid mixtures ($M = Li, Na, K, Rb, Cs$) 11
- Molten salt mixture**
Formation enthalpies of the $MBr-LaBr_3$ liquid mixtures ($M = Li, Na, K, Rb, Cs$) 1
Formation enthalpies of $MBr-NdBr_3$ liquid mixtures ($M = Li, Na, K, Rb, Cs$) 11
- Myocardial metabolism**
Microcalorimetric study of myocardial tissue metabolism in experimental hyperthyroidism in rats 83
- Neodymium bromide**
Formation enthalpies of $MBr-NdBr_3$ liquid mixtures ($M = Li, Na, K, Rb, Cs$) 11
- Non-isothermal kinetics**
Thermal stability and non-isothermal decomposition kinetics of three coordination compounds of copper(II) 183
- Nuclear magnetic resonance**
Thermal decomposition of acetylsalicylic acid (aspirin) 177
- Oxidation/catalyst**
Thermal reduction of $AlVMoO_7$ 205
- Reaction dynamics**
Heterogeneous chemical kinetics in two dimensions: two ways of discrete description 191
- Sepiolite**
Reversible folding in sepiolite: study by thermal and textural analysis 103
- Solution heats of arsenic trihalide adducts**
Thermochemistry of adducts of triphenyl derivatives of N, P and As with arsenic trihalides 167
- Structural transformation**
Dehydration of β -cyclodextrin: facts and opinions 27
- Structure folding**
Reversible folding in sepiolite: study by thermal and textural analysis 103
- Symmetry changes**
Thermophysical and structural investigations of crystalline solvates based on tetraphenylporphyrin and its copper complex 121
- Tetraphenylporphyrin**
Thermophysical and structural investigations of crystalline solvates based on tetraphenylporphyrin and its copper complex 121
- Tetraphenylporphyrin copper complexes**
Thermophysical and structural investigations of crystalline solvates based on tetraphenylporphyrin and its copper complex 121
- Textural changes**
Reversible folding in sepiolite: study by thermal and textural analysis 103
- Thermal analysis**
Reversible folding in sepiolite: study by thermal and textural analysis 103
New trivalent lanthanide complexes of phthalate-containing hydrazinium cation—preparation, and spectral and thermal studies 143

- Thermal behaviour
Thermophysical and structural investigations of crystalline solvates based on tetraphenylporphyrin and its copper complex 121
- Thermal decomposition
Thermal decomposition of acetylsalicylic acid (aspirin) 177
- Thermal methods
Determination of calorific values of some renewable biofuels 111
- Thermal stability
Thermal stability and non-isothermal decomposition kinetics of three coordination compounds of copper(II) 183
- Thermal studies of arsenic trihalides adducts
Thermochemistry of adducts of triphenyl derivatives of N, P and As with arsenic trihalides 167
- Thermal treatment
Copper-zinc oxide catalysts. Part IV. Thermal treatment in air, argon and hydrogen and XRD study of new bimetallic precursors—direct formation of alloys 65
- Thermochemical parameters of arsenic trihalide adducts
Thermochemistry of adducts of triphenyl derivatives of N, P and As with arsenic trihalides 167
- Thermochemistry of arsenic trihalides adducts
Thermochemistry of adducts of triphenyl derivatives of N, P and As with arsenic trihalides 167
- Thermogravimetry
Thermal decomposition of acetylsalicylic acid (aspirin) 177
- Thyroid hormones
Microcalorimetric study of myocardial tissue metabolism in experimental hyperthyroidism in rats 83
- TPR
Thermal reduction of AlVMoO_7 205
- X-ray.
Thermophysical and structural investigations of crystalline solvates based on tetraphenylporphyrin and its copper complex 121
- XRD
New trivalent lanthanide complexes of phthalate-containing hydrazinium cation—preparation, and spectral and thermal studies 143
- Zwitterions.
The thermodynamics of dipeptides in water. Part IV. Calorimetric study of the influence of methyl and isopropyl chains on the free α -carboxyl and free α -amino groups 35
