Vol. 275, No. 1

REGULAR PAPERS

Thermodynamics and Calorimetry

- Quantification of small enthalpic differences in anaerobic microbial metabolism—a calorimetry-supported approach
M. Meier-Schneiders (Eningen, Germany) and F. Schäfer (Stuttgart, Germany) 1
- Thermodynamic properties and phase transformations in methylhydrazine monohydrate
N. Lebrun and M. Foulon (Cédex, France) and J.C. van Miltenburg, J.P. van der Eerden and H.A.J. Oonk (Utrecht, The Netherlands) 17

Thermal Analysis

- Thermal decomposition of 2,4,6-trinitrotoluene during the induction period
A. Książczak and T. Książczak (Warsaw, Poland) 27
- Thermal behaviour of cotton-modacrylic fibre blends: kinetic study using the invariant kinetic parameters method
L. Richard-Campisi, S. Bourbigot and M.L. Bras (Cedex, France) and R. Delobel (Mines, France) 37
- Excess heat of mixing of 1-propanol or 2-propanol with benzene, toluene, *o*-, *m*- and *p*-xylenes at 298.15 K
K.C. Singh, K.C. Kalra, S. Maken and V. Gupta (Rohtak, India) 51
- The enthalpies of solution of 2-chloro-2-methylpropane, 2-chloro-2-methylbutane and 3-chloro-3-methylpentane in mono- and dialcohols at 298.15 K
L.M.P.C. Albuquerque, M.L.C.J. Moita, A.M.N. Simões and R.M.C. Gonçalves (Lisboa, Portugal) 67
- Sol-gel processing and crystallization of yttria-doped zirconia
A. Aronne, A. Marotta, P. Pernice and M. Catauro (Naples, Italy) 75
- The role of copper cobaltite spinel, $\text{Cu}_x\text{Co}_{3-x}\text{O}_4$ during the thermal decomposition of ammonium perchlorate
A.A. Said (Assiut, Egypt) and R. Al-Qasbi (United Arab Emirates) 83
- Thermoanalytical behaviour of histidine complexes with transition metal ions
S. Materazzi, R. Curini and G. D'Ascenzo (Rome, Italy) 93
- A microcalorimetric method to study the activation of murine peritoneal macrophages
D. Gebreselassie, B. Kasravi, P. Bäckman and B. Jeppson (Lund, Sweden) 109
- Analysis of the chemical processes occurring in the system $\text{PbSO}_4\text{--ZnS}$
C. Malinowski, K. Malinowska and S. Małecki (Krakow, Poland) 117
- Water activity and viscosity—relations with glass transition temperature in model food systems
M. Anese and I. Shtylla (Udine, Italy), D. Torreggiani (Milano, Italy) and E. Maltini (Udine, Italy) 131

NOTE

Thermal Analysis

An improved DSC glass sample container technique

I.J. Goldfarb and H. Feng (Dayton, USA) and J.C. Oxley (Socorro, USA) 139

Studying the mechanisms of ignition of coal particles by TG-DTA

Y. Chen, S. Mori (Nagoya, Japan) and W.-P. Pan (Bowling Green, USA) 149
