thermochimica  
acta

## Subject index

- Activation energies  
The crystallization kinetics of amorphous alloys 303
- Activation energy  
Crystallization in fluoride glasses 343  
Estimation of activation energies for structural relaxation and viscous flow from DTA and DSC experiments 153  
Fabrication of mesoscopic composites composed of  $\alpha$ -AgI and AgI-based superionic glass 333
- Amorphous alloys  
The crystallization kinetics of amorphous alloys 303
- Annealed glass  
Viscosity and relaxation of glasses below the glass transition temperature 401
- Annealing  
Enthalpy relaxation in organic and inorganic glasses 383
- Apatite  
Formation of biologically active bone-like apatite on metals and polymers by a biomimetic process 479
- Atomic polarizabilities and their relation to critical volumes  
The transition points in the liquid state and their molecular modeling 417
- Bioactive glasses  
Devitrification behaviour of  $\text{CaO}\cdot 0.1\text{P}_2\text{O}_5\cdot 0.9\text{SiO}_2$  glass 237
- Biomimetic process  
Formation of biologically active bone-like apatite on metals and polymers by a biomimetic process 479
- $\text{CaO}\cdot 0.1\text{P}_2\text{O}_5\cdot 0.9\text{SiO}_2$  glass  
Devitrification behaviour of  $\text{CaO}\cdot 0.1\text{P}_2\text{O}_5\cdot 0.9\text{SiO}_2$  glass 237
- $\text{CaO}\cdot \text{SiO}_2$  glass  
Devitrification behaviour of  $\text{CaO}\cdot 0.1\text{P}_2\text{O}_5\cdot 0.9\text{SiO}_2$  glass 237
- Chiral  
Life and death: the ultimate phase transformation 1
- Classical nucleation theory  
Surface nucleation of  $\mu$ -cordierite in cordierite glass: thermodynamic aspects 191
- $\text{Co}_{75}\text{B}_{25}$   
Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279
- Cohesive energy density  
The transition points in the liquid state and their molecular modeling 417
- $\mu$ -Cordierite  
Surface nucleation of  $\mu$ -cordierite in cordierite glass: thermodynamic aspects 191
- Cordierite glass  
Crystal nucleation on glass surfaces. Theory and experiment 205  
Degassing of a cordierite glass melt during nucleation and crystallization 243  
Surface nucleation of  $\mu$ -cordierite in cordierite glass: thermodynamic aspects 191
- $\text{Co}_{78}\text{Si}_{13}\text{B}_9$   
Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279
- Critical parameters  $T_c$ ,  $V_c$ ,  $p_c$   
The transition points in the liquid state and their molecular modeling 417
- Cryoprotectors  
The theory of membrane "vitrification" 465
- Crystal growth  
Crystal nucleation and growth in soda-lime-silica glasses close to the  $\text{Na}_2\text{O}\cdot 2\text{CaO}\cdot 3\text{SiO}_2(\text{NC}_2\text{S}_3)$  composition. Crystal nucleation kinetics in the stoichiometric  $\text{NC}_2\text{S}_3$  composition 223  
Crystal growth activation energy  
Devitrification behaviour of  $\text{CaO}\cdot 0.1\text{P}_2\text{O}_5\cdot 0.9\text{SiO}_2$  glass 237

- Crystal nucleation  
 Crystal nucleation and growth in soda-lime-silica glasses close to the  $\text{Na}_2\text{O} \cdot 2\text{CaO} \cdot 3\text{SiO}_2(\text{NC}_2\text{S}_3)$  composition. Crystal nucleation kinetics in the stoichiometric  $\text{NC}_2\text{S}_3$  composition 223
- Crystal nucleation kinetics  
 Crystal nucleation and growth in soda-lime-silica glasses close to the  $\text{Na}_2\text{O} \cdot 2\text{CaO} \cdot 3\text{SiO}_2(\text{NC}_2\text{S}_3)$  composition. Crystal nucleation kinetics in the stoichiometric  $\text{NC}_2\text{S}_3$  composition 223  
 Crystal nucleation on glass surfaces. Theory and experiment 205
- Crystallization  
 Crystallization in fluoride glasses 343  
 Crystallization kinetics of  $\text{Ge}_{0.3}\text{Sb}_{1.4}\text{S}_{2.7}$  glass 353  
 Glass-formation and crystallization kinetics 63  
 Identifying internal and surface crystallization by differential thermal analysis for the glass-to-crystal transformations 163  
 Non-steady-state effects in the kinetics of crystallization of organic polymer glass-forming melts 127  
 The applicability of the general theory of phase transformations to glass crystallization 73  
 Transient nucleation 101  
 Use of phenomenological kinetics and the enthalpy versus temperature diagram (and its derivative—DTA) for a better understanding of transition processes in glasses 175
- Crystallization kinetics  
 Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279  
 The crystallization kinetics of amorphous alloys 303  
 The crystallization kinetics of  $\text{Fe}_{80}\text{Si}_4\text{B}_{16}$  metallic glass 289
- Death  
 Life and death: the ultimate phase transformation 1
- Dental glass  
 Opalescence in dental products 491
- Dental products  
 Opalescence in dental products 491
- Differential scanning calorimetry  
 Estimation of activation energies for structural relaxation and viscous flow from DTA and DSC experiments 153
- Differential thermal analysis  
 Estimation of activation energies for structural relaxation and viscous flow from DTA and DSC experiments 153
- Diffuse interface  
 Diffuse interface model of volume nucleation in glasses 83
- Dilatometry  
 Opalescence in dental products 491
- $\text{D}_2\text{O}$   
 Thermodynamic strength of the glassy state and the maximum enthalpy stored in the propylene glycol– $\text{D}_2\text{O}$  system 501
- Double compounds  
 Empirical dependences of the standard enthalpy of formation for related inorganic compounds enhancing glass formers 511
- Double oxides  
 Empirical dependences of the standard enthalpy of formation for related inorganic compounds enhancing glass formers 511
- DSC  
 Crystallization kinetics of  $\text{Ge}_{0.3}\text{Sb}_{1.4}\text{S}_{2.7}$  glass 353  
 Fabrication of mesoscopic composites composed of  $\alpha$ -AgI and AgI-based superionic glass 333  
 Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279  
 The crystallization kinetics of  $\text{Fe}_{80}\text{Si}_4\text{B}_{16}$  metallic glass 289  
 Use of phenomenological kinetics and the enthalpy versus temperature diagram (and its derivative—DTA) for a better understanding of transition processes in glasses 175
- DTA  
 Crystal nucleation and growth in soda-lime-silica glasses close to the  $\text{Na}_2\text{O} \cdot 2\text{CaO} \cdot 3\text{SiO}_2(\text{NC}_2\text{S}_3)$  composition. Crystal nucleation kinetics in the stoichiometric  $\text{NC}_2\text{S}_3$  composition 223  
 Devitrification behaviour of  $\text{CaO} \cdot 0.1\text{P}_2\text{O}_5 \cdot 0.9\text{SiO}_2$  glass 237  
 Identifying internal and surface crystallization by differential thermal analysis for the glass-to-crystal transformations 163  
 Use of phenomenological kinetics and the enthalpy versus temperature diagram (and its derivative—DTA) for a better understanding of transition processes in glasses 175  
 Viscosity and relaxation of glasses below the glass transition temperature 401

- Enthalpy  
 Empirical dependences of the standard enthalpy of formation for related inorganic compounds enhancing glass formers 511  
 Enthalpy relaxation in organic and inorganic glasses 383
- Enthalpy–temperature diagram  
 Use of phenomenological kinetics and the enthalpy versus temperature diagram (and its derivative—DTA) for a better understanding of transition processes in glasses 175
- Entropic barrier  
 Life and death: the ultimate phase transformation 1
- Eutectic crystallization  
 Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279
- Evolved gas  
 Degassing of a cordierite glass melt during nucleation and crystallization 243
- Fast crystallization  
 Theoretical models of fast crystallization of a-Si thin films 261
- $\text{Fe}_{80}\text{B}_{20}$   
 Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279
- $\text{Fe}_{80}\text{Si}_4\text{B}_{16}$   
 The crystallization kinetics of  $\text{Fe}_{80}\text{Si}_4\text{B}_{16}$  metallic glass 289
- Finemet  
 The crystallization kinetics of amorphous alloys 303
- Fluid lipid membranes  
 The theory of membrane “vitrification” 465
- Fluoride  
 Crystallization in fluoride glasses 343
- Fragile glasses  
 On the viscosity change in strong and fragile glasses 393  
 Thermodynamic strength of the glassy state and the maximum enthalpy stored in the propylene glycol– $\text{D}_2\text{O}$  system 501
- Fragmentation model  
 On the viscosity change in strong and fragile glasses 393
- Frozen food  
 Glass transitions in aqueous carbohydrate solutions and their relevance to frozen food stability 449
- Fusion temperature  
 Parameters that determine the kinetics of glass formation in the presence of perturbing nanoparticles 251
- General theory  
 The applicability of the general theory of phase transformations to glass crystallization 73
- Gibbs free energy  
 Thermodynamic and viscous behaviour of undercooled liquids 25
- Glass  
 Crystallization in fluoride glasses 343  
 Crystallization kinetics of  $\text{Ge}_{0.3}\text{Sb}_{1.4}\text{S}_{2.7}$  glass 353  
 Diffuse interface model of volume nucleation in glasses 83  
 Enthalpy relaxation in organic and inorganic glasses 383  
 Glass-formation and crystallization kinetics 63  
 Glass transitions in aqueous carbohydrate solutions and their relevance to frozen food stability 449  
 Identifying internal and surface crystallization by differential thermal analysis for the glass-to-crystal transformations 163  
 Kinetics of structural relaxation of glass-forming melts 363  
 Nucleation and coalescence phenomena in the transformation of semiconductor-doped glasses 319  
 The applicability of the general theory of phase transformations to glass crystallization 73  
 The glass, the glassy state and the Alice number 15
- Glass composite  
 Fabrication of mesoscopic composites composed of  $\alpha$ -AgI and AgI-based superionic glass 333
- Glass crystallization  
 Degassing of a cordierite glass melt during nucleation and crystallization 243
- Glass formation kinetics  
 Parameters that determine the kinetics of glass formation in the presence of perturbing nanoparticles 251
- Glass-forming ability  
 Thermodynamic and viscous behaviour of undercooled liquids 25
- Glass microstructure  
 Opalescence in dental products 491
- Glass nucleation  
 Degassing of a cordierite glass melt during nucleation and crystallization 243

- Glass thermal properties  
 Opalescence in dental products 491
- Glass transition  
 Estimation of activation energies for structural relaxation and viscous flow from DTA and DSC experiments 153  
 Thermodynamic strength of the glassy state and the maximum enthalpy stored in the propylene glycol–D<sub>2</sub>O system 501  
 Use of phenomenological kinetics and the enthalpy versus temperature diagram (and its derivative—DTA) for a better understanding of transition processes in glasses 175
- Glass transition temperature  
 Viscosity and relaxation of glasses below the glass transition temperature 401
- Glass viscosity  
 On the viscosity change in strong and fragile glasses 393  
 Viscosity and relaxation of glasses below the glass transition temperature 401
- Glassy state  
 The glass, the glassy state and the Alice number 15
- Heat of crystallisation  
 Thermodynamic and viscous behaviour of undercooled liquids 25
- High-temperature calorimetry  
 Surface nucleation of  $\mu$ -cordierite in cordierite glass: thermodynamic aspects 191
- High-temperature mass spectrometry  
 Degassing of a cordierite glass melt during nucleation and crystallization 243
- Hindrance of crystallization  
 Parameters that determine the kinetics of glass formation in the presence of perturbing nanoparticles 251
- Hole theory  
 Thermodynamic and viscous behaviour of undercooled liquids 25
- Ideal glass transition temperature  
 Thermodynamic and viscous behaviour of undercooled liquids 25
- Indialite  
 Degassing of a cordierite glass melt during nucleation and crystallization 243
- Interfacial energy  
 Crystal nucleation and growth in soda-lime–silica glasses close to the Na<sub>2</sub>O·2CaO·3SiO<sub>2</sub>(NC<sub>2</sub>S<sub>3</sub>) composition. Crystal nucleation kinetics in the stoichiometric NC<sub>2</sub>S<sub>3</sub> composition 223
- Isothermal  
 Glass-formation and crystallization kinetics 63
- Johnson–Mehl–Avrami kinetics  
 The crystallization kinetics of Fe<sub>80</sub>Si<sub>4</sub>B<sub>16</sub> metallic glass 289
- Kinetic freezing criteria  
 The glass, the glassy state and the Alice number 15
- Kinetics  
 Crystallization kinetics of Ge<sub>0.3</sub>Sb<sub>1.4</sub>S<sub>2.7</sub> glass 353  
 Glass-formation and crystallization kinetics 63  
 Kinetics of structural relaxation of glass-forming melts 363  
 Non-steady-state effects in the kinetics of crystallization of organic polymer glass-forming melts 127  
 Thermodynamic strength of the glassy state and the maximum enthalpy stored in the propylene glycol–D<sub>2</sub>O system 501  
 Transient nucleation 101
- Life  
 Life and death: the ultimate phase transformation 1
- Mechanism  
 Identifying internal and surface crystallization by differential thermal analysis for the glass-to-crystal transformations 163
- Melt  
 Non-steady-state effects in the kinetics of crystallization of organic polymer glass-forming melts 127
- Melting enthalpy  
 Surface nucleation of  $\mu$ -cordierite in cordierite glass: thermodynamic aspects 191
- Melting temperature  
 Surface nucleation of  $\mu$ -cordierite in cordierite glass: thermodynamic aspects 191
- Membrane vitrification  
 The theory of membrane “vitrification” 465
- Metal alloys  
 Parameters that determine the kinetics of glass formation in the presence of perturbing nanoparticles 251
- Metallic glass  
 The crystallization kinetics of Fe<sub>80</sub>Si<sub>4</sub>B<sub>16</sub> metallic glass 289

- Metallic glasses**  
 Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279
- Metals**  
 Formation of biologically active bone-like apatite on metals and polymers by a biomimetic process 479
- $2\text{MgO} \cdot 2\text{Al}_2\text{O}_3 \cdot 5\text{SiO}_2$   
 Surface nucleation of  $\mu$ -cordierite in cordierite glass: thermodynamic aspects 191
- Microstructure**  
 Nucleation and coalescence phenomena in the transformation of semiconductor-doped glasses 319
- Model**  
 Diffuse interface model of volume nucleation in glasses 83  
 Theoretical models of fast crystallization of a-Si thin films 261  
 Transient nucleation 101
- Molecular orbital calculations**  
 Life and death: the ultimate phase transformation 1
- Nanoparticles**  
 Parameters that determine the kinetics of glass formation in the presence of perturbing nanoparticles 251
- Nonequilibrium phase transitions**  
 The theory of membrane "vitrification" 465
- Non-isothermal**  
 Glass-formation and crystallization kinetics 63
- Non-isothermal devitrification**  
 Devitrification behaviour of  $\text{CaO} \cdot 0.1\text{P}_2\text{O}_5 \cdot 0.9\text{SiO}_2$  glass 237
- Non-isothermal kinetics**  
 Use of phenomenological kinetics and the enthalpy versus temperature diagram (and its derivative—DTA) for a better understanding of transition processes in glasses 175
- Non-stationary nucleation**  
 Crystal nucleation on glass surfaces. Theory and experiment 205
- Nucleation**  
 Crystallization in fluoride glasses 343  
 Diffuse interface model of volume nucleation in glasses 83  
 Nucleation and coalescence phenomena in the transformation of semiconductor-doped glasses 319  
 Theoretical models of fast crystallization of a-Si thin films 261  
 Transient nucleation 101
- Nucleation frequency**  
 Parameters that determine the kinetics of glass formation in the presence of perturbing nanoparticles 251
- Onsager fluctuation theory**  
 The theory of membrane "vitrification" 465
- Opalescence**  
 Opalescence in dental products 491
- Opalescent glass**  
 Opalescence in dental products 491
- Order factors**  
 Life and death: the ultimate phase transformation 1
- $\text{Pd}_{80}\text{Si}_{20}$   
 Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279
- Phase separation in glasses**  
 Opalescence in dental products 491
- Phase transformation**  
 Fabrication of mesoscopic composites composed of  $\alpha$ -AgI and AgI-based superionic glass 333  
 Life and death: the ultimate phase transformation 1  
 The applicability of the general theory of phase transformations to glass crystallization 73  
 Transient nucleation 101
- Polymer**  
 Non-steady-state effects in the kinetics of crystallization of organic polymer glass-forming melts 127
- Polymers**  
 Formation of biologically active bone-like apatite on metals and polymers by a biomimetic process 479
- Polymorphic crystallization**  
 Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279
- Primary crystallization**  
 Kinetics of the primary, eutectic and polymorphic crystallization of metallic glasses studied by continuous scan methods 279
- Propylene glycol**  
 Thermodynamic strength of the glassy state and the maximum enthalpy stored in the propylene glycol– $\text{D}_2\text{O}$  system 501
- Pseudobinary systems**  
 Empirical dependences of the standard en-

- enthalpy of formation for related inorganic compounds enhancing glass formers 511
- Relaxation
  - Enthalpy relaxation in organic and inorganic glasses 383
  - Kinetics of structural relaxation of glass-forming melts 363
- Relaxation in glasses
  - Viscosity and relaxation of glasses below the glass transition temperature 401
- Relaxation mechanism
  - Viscosity and relaxation of glasses below the glass transition temperature 401
- Relaxation phenomena
  - Thermodynamic and viscous behaviour of undercooled liquids 25
- Residual stress
  - Viscosity and relaxation of glasses below the glass transition temperature 401
- Scanning electron microscopy
  - Opalescence in dental products 491
- Semiconductor
  - Nucleation and coalescence phenomena in the transformation of semiconductor-doped glasses 319
- Silicon thin films
  - Theoretical models of fast crystallization of a-Si thin films 261
- SiO<sub>2</sub>-Al<sub>2</sub>O<sub>3</sub>-K<sub>2</sub>O
  - Opalescence in dental products 491
- SiO<sub>2</sub>-Al<sub>2</sub>O<sub>3</sub>-ZnO
  - Use of phenomenological kinetics and the enthalpy versus temperature diagram (and its derivative—DTA) for a better understanding of transition processes in glasses 175
- Soda-lime-silica glass
  - Crystal nucleation and growth in soda-lime-silica glasses close to the Na<sub>2</sub>O·2CaO·3SiO<sub>2</sub>(NC<sub>2</sub>S<sub>3</sub>) composition. Crystal nucleation kinetics in the stoichiometric NC<sub>2</sub>S<sub>3</sub> composition 223
- Solidification velocity
  - Theoretical models of fast crystallization of a-Si thin films 261
- Specific surface
  - Crystallization kinetics of Ge<sub>0.3</sub>Sb<sub>1.4</sub>S<sub>2.7</sub> glass 353
- Stability
  - Crystallization in fluoride glasses 343
  - Glass transitions in aqueous carbohydrate solutions and their relevance to frozen food stability 449
- Stationary nucleation
  - Crystal nucleation on glass surfaces. Theory and experiment 205
- Stoichiometric glass
  - Crystal nucleation and growth in soda-lime-silica glasses close to the Na<sub>2</sub>O·2CaO·3SiO<sub>2</sub>(NC<sub>2</sub>S<sub>3</sub>) composition. Crystal nucleation kinetics in the stoichiometric NC<sub>2</sub>S<sub>3</sub> composition 223
- Stretching parameter
  - Viscosity and relaxation of glasses below the glass transition temperature 401
- Strong glasses
  - On the viscosity change in strong and fragile glasses 393
  - Thermodynamic strength of the glassy state and the maximum enthalpy stored in the propylene glycol-D<sub>2</sub>O system 501
- Structure
  - Kinetics of structural relaxation of glass-forming melts 363
- Superionic conductor
  - Fabrication of mesoscopic composites composed of α-Agl and AgI-based superionic glass 333
- Surface nucleation
  - Devitrification behaviour of CaO·0.1P<sub>2</sub>O<sub>5</sub>·0.9SiO<sub>2</sub> glass 237
  - Surface nucleation of μ-cordierite in cordierite glass: thermodynamic aspects 191
- System AC-BC
  - Empirical dependences of the standard enthalpy of formation for related inorganic compounds enhancing glass formers 511
- T<sub>c</sub> transitions
  - The transition points in the liquid state and their molecular modeling 417
- T<sub>g</sub> transitions
  - The transition points in the liquid state and their molecular modeling 417
- Theory of holes and T<sub>g</sub>
  - The transition points in the liquid state and their molecular modeling 417
- Transformation
  - Identifying internal and surface crystallization by differential thermal analysis for the glass-to-crystal transformations 163
- Transition
  - Enthalpy relaxation in organic and inorganic glasses 383
  - Glass transitions in aqueous carbohydrate solutions and their relevance to frozen food stability 449

- Undercooled liquids  
Thermodynamic and viscous behaviour of undercooled liquids 25
- Vacuum effusion  
Degassing of a cordierite glass melt during nucleation and crystallization 243
- Viscosity  
Crystal nucleation and growth in soda-lime-silica glasses close to the  $\text{Na}_2\text{O}\cdot 2\text{CaO}\cdot 3\text{SiO}_2(\text{NC}_2\text{S}_3)$  composition. Crystal nucleation kinetics in the stoichiometric  $\text{NC}_2\text{S}_3$  composition 223  
Estimation of activation energies for structural relaxation and viscous flow from DTA and DSC experiments 153  
Surface nucleation of  $\mu$ -cordierite in cordierite glass: thermodynamic aspects 191  
Thermodynamic and viscous behaviour of undercooled liquids 25
- Viscous flow activation energy  
Devitrification behaviour of  $\text{CaO}\cdot 0.1\text{P}_2\text{O}_5\cdot 0.9\text{SiO}_2$  glass 237
- Vitrification  
Use of phenomenological kinetics and the enthalpy versus temperature diagram (and its derivative—DTA) for a better understanding of transition processes in glasses 175
- X-ray diffraction  
Devitrification behaviour of  $\text{CaO}\cdot 0.1\text{P}_2\text{O}_5\cdot 0.9\text{SiO}_2$  glass 237  
Opalescence in dental products 491
- XRD  
Fabrication of mesoscopic composites composed of  $\alpha$ -AgI and AgI-based superionic glass 333
