

ELSEVIER

Thermochimica Acta 278 (1996) 177–179

thermochimica
acta

Subject index

- Alkylammonium tetrachlorozincates
Thermoanalytical and X-ray study of some alkylammonium tetrachlorozincates 39
- Arrhenius parameters
Dehydration kinetics of Wyoming montmorillonite studied by controlled transformation rate thermal analysis 165
- Baseline
Modelling of the experimental phenomena occurring during simultaneous TG-DSC measurements of water desorption 145
- Calibration
The melting point of gallium under calorimetric conditions 71
- Calorimetry
Heat capacities and thermodynamic functions of BaCuO₂ in the temperature range 8–305 K 1
- Catalytic decomposition
Catalytic effects of metal oxides on the decomposition of Potassium perchlorate 119
- Cellulose
The effect of salt and oxide-hydroxide additives on the pyrolysis of cellulose and *Pinus halepensis* pine needles 99
- Cobalt-Zincophosphates
Dehydration behavior of some microporous zincophosphates 157
- Combustion efficiency
Heat release rate in diffusion flames 19
- Composites
Characterisation of amorphous materials by modulated differential scanning calorimetry 9
- Convective and radiative components
Heat release rate in diffusion flames 19
- Dehydration reaction
Dehydration kinetics of Wyoming montmorillonite studied by controlled transformation rate thermal analysis 165
- Dehydration
Dehydration behavior of some microporous zincophosphates 157
- Dicarboxylate
Structure and thermal decomposition of lithium-manganese dicarboxylate systems 135
- Dielectric constant
Studies on the formation of lead titanate by solid state reaction from PbO and TiO₂ 109
- DISQUAC model
DISQUAC analysis of binary liquid organic mixtures containing cyclic or linear alkanols and cycloalkanes or *n*-alkanes 57
- DSC
Modelling of the experimental phenomena occurring during simultaneous TG-DSC measurements of water desorption 145
The effect of salt and oxide-hydroxide additives on the pyrolysis of cellulose and *Pinus halepensis* pine needles 99
Thermoanalytical and X-ray study of some alkylammonium tetrachlorozincates 39
- DTA
A thermal analysis study of tungsten oxide gels 91
Studies on the formation of lead titanate by solid state reaction from PbO and TiO₂ 109
- Enthalpies of transition
Thermoanalytical and X-ray study of some alkylammonium tetrachlorozincates 39
- Fire retardants
The effect of salt and oxide-hydroxide additives on the pyrolysis of cellulose and *Pinus halepensis* pine needles 99
- Gallium fixed point
The melting point of gallium under calorimetric conditions 71
- Glasses
Characterisation of amorphous materials

- by modulated differential scanning calorimetry 9
- Heat capacity
 - Heat capacities and thermodynamic functions of BaCuO_2 in the temperature range 8–305 K 1
- Heat of combustion
 - The determination of the heats of combustion and the resonance energies of some substituted naphthalenes 49
- Heat release rate calorimetry
 - Heat release rate in diffusion flames 19
- International temperature scale of 1990
 - The melting point of gallium under calorimetric conditions 71
- Kinetics
 - Dependence of zinc oxide reduction rate on the CO concentration in CO/CO_2 mixtures 129
- Lattice constants
 - Thermoanalytical and X-ray study of some alkylammonium tetrachlorozincates 39
- Lead titanate
 - Studies on the formation of lead titanate by solid state reaction from PbO and TiO_2 109
- LiMn_2O_4 spinel
 - Structure and thermal decomposition of lithium-manganese dicarboxylate systems 135
- Model
 - Modelling of the experimental phenomena occurring during simultaneous TG-DSC measurements of water desorption 145
- Modeling
 - Dependence of zinc oxide reduction rate on the CO concentration in CO/CO_2 mixtures 129
- Modulated DSC
 - Characterisation of amorphous materials by modulated differential scanning calorimetry 9
- Montmorillonite
 - Dehydration kinetics of Wyoming montmorillonite studied by controlled transformation rate thermal analysis 165
- MS
 - A thermal analysis study of tungsten oxide gels 91
- Pine needles
 - The effect of salt and oxide-hydroxide additives on the pyrolysis of cellulose and *Pinus halepensis* pine needles 99
- Polyester resins
 - The effects of structure on the thermal degradation of polyester resins 77
- Polymer structure
 - The effects of structure on the thermal degradation of polyester resins 77
- Potassium perchlorate
 - Catalytic effects of metal oxides on the decomposition of Potassium perchlorate 119
- Precursor
 - Structure and thermal decomposition of lithium-manganese dicarboxylate systems 135
- Pyrolysis
 - The effect of salt and oxide-hydroxide additives on the pyrolysis of cellulose and *Pinus halepensis* pine needles 99
- Quasichemical coefficients
 - DISQUAC analysis of binary liquid organic mixtures containing cyclic or linear alkanols and cycloalkanes or *n*-alkanes 57
- Reduction
 - Dependence of zinc oxide reduction rate on the CO concentration in CO/CO_2 mixtures 129
- Resonance energy
 - The determination of the heats of combustion and the resonance energies of some substituted naphthalenes 49
- Ring strain
 - DISQUAC analysis of binary liquid organic mixtures containing cyclic or linear alkanols and cycloalkanes or *n*-alkanes 57
- Saturated and unsaturated bonds
 - Heat release rate in diffusion flames 19
- Simultaneous measurements
 - Modelling of the experimental phenomena occurring during simultaneous TG-DSC measurements of water desorption 145
- Sol-gel
 - A thermal analysis study of tungsten oxide gels 91
- 1-Substituted naphthalenes
 - The determination of the heats of combustion and the resonance energies of some substituted naphthalenes 49
- Temperature of formation
 - Studies on the formation of lead titanate by solid state reaction from PbO and TiO_2 109
- Ternary system
 - Heat capacities and thermodynamic functions

- of BaCuO_2 in the temperature range 8–305 K 1
- TG
 - A thermal analysis study of tungsten oxide gels 91
 - Modelling of the experimental phenomena occurring during simultaneous TG-DSC measurements of water desorption 145
- TG-DTG-DSC
 - Dehydration behavior of some microporous zincophosphates 157
- TGA
 - The effect of salt and oxide-hydroxide additives on the pyrolysis of cellulose and *Pinus halepensis* pine needles 99
- Thermal analysis
 - Characterisation of amorphous materials by modulated differential scanning calorimetry 9
- Thermal degradation
 - The effects of structure on the thermal degradation of polyester resins 77
- Thermodynamics
 - Characterisation of amorphous materials by modulated differential scanning calorimetry 9
- Thermogravimetry
 - The effects of structure on the thermal degradation of polyester resins 77
- Thermometric fixed points
 - The melting point of gallium under calorimetric conditions 71
- Thermometry
 - The melting point of gallium under calorimetric conditions 71
- Transformation rate thermal analysis
 - Dehydration kinetics of Wyoming montmorillonite studied by controlled transformation rate thermal analysis 165
- Tungsten oxide
 - A thermal analysis study of tungsten oxide gels 91
- X-ray diffraction.
 - Studies on the formation of lead titanate by solid state reaction from PbO and TiO_2 109
- Zinc oxide
 - Dependence of zinc oxide reduction rate on the CO concentration in CO/CO_2 mixtures 129
- Zincophosphates
 - Dehydration behavior of some microporous zincophosphates 157
