

Errata

Temperature dependence of precipitate redissolution: a calcium adsorption model, by M.S. Celik, *Thermochim. Acta*, 99 (1986) 1–9.

Page 2, sixth line of Experimental should read
concentrations (CMCs) of these two sulfonates were found to be 1.5×10^{-3}

Page 7, Figure 4 legend should read

Fig. 4. CMC of NaDDS/CaCl₂ system by specific conductivity at different temperatures.

Page 8, eqn. (23), the superscript should read

($\Delta H_{ad}/\Delta H_{sp}$)
