

Addendum

Thermal conversion of synthetic cymrite into hexagonal barium feldspar, by C. Colella and R. Aiello, *Thermochim. Acta*, 27 (1978) 253-260.

It has come to the authors' attention that a paper has been published by V. A. Drits, A. A. Kashaev and G. V. Sokolova in *Kristallografiya* [20 (1975) 280] on the crystal structure of cymrite which appears to be in agreement with that they themselves have suggested.
