Announcement

Thermal Analysis Consultancy Service
Short Course: DSC Calibration—Temperature,
Enthalpy, Heat Capacity

8 June 1995

An intensive one day course on 'DSC Calibration' will be organised by the Thermal Analysis Consultancy Service, Leeds Metropolitan University in Leeds on June 8th, 1995.

The course will deal with differential scanning calorimetry calibration techniques for the measurement of temperature, enthalpy and heat capacity. These will be considered in the light of requirements for quality assurance and for accreditation schemes such as NAMAS and BS/ISO 9000.

The course tutors will be Professor E.L. Charsley (Leeds Metropolitan University), Dr. M.J. Richardson (National Physical Laboratory) and Mr. P.H. Willcocks (ICI, Wilton).

The course is intended for all those working in the field of DSC in research, development and quality control who would like to obtain the best performance from their instruments.

The meeting will be chaired by Dr. P.G. Laye, School of Chemistry, Leeds University.

For further details please contact: Professor Edward Charsley
