thermochimica
acta

Subject index

- Adiabatic calorimeter**
Application of an adiabatic calorimeter with safety concept 189
- Adsorption**
Flow microcalorimetry and competitive liquid sorption I. Sorption behaviour of some polymer networks 59
- Aluminium alloys**
Calorimetric investigations in a dispersion strengthened 7075 alloy 93
- Anoxia**
Calorimetric and biochemical studies on the effects of environmental hypoxia and chemicals on freshwater fish 101
- Atmosphere**
Influence of atmosphere on the reactivity of nitro compounds 195
- Binary liquid mixture**
Excess enthalpy H^E of binary mixtures containing alkanes, methanol and tert-amyl-methyl ether (TAME) 49
- Binary metallic melts**
Electromagnetic levitation and its application in high temperature calorimetry 75
- Brachydanio***
Calorimetric and biochemical studies on the effects of environmental hypoxia and chemicals on freshwater fish 101
- Calcium oxalate monohydrate**
Comparison of different non-linear evaluation methods in thermal analysis 23
- Calorimetry**
An isoperibol drop calorimeter 85
Calorimetric investigations in a dispersion strengthened 7075 alloy 93
Thermal investigations of enzyme-catalyzed reactions for detection of heavy metals in the case of cadmium 41
- Carassius***
Calorimetric and biochemical studies on the effects of environmental hypoxia and chemicals on freshwater fish 101
- Carbon modifications**
Thermoanalytical investigations on the formation, properties and reactivity of carbon modifications 163
- o*-Chloronitrobenzene**
Influence of atmosphere on the reactivity of nitro compounds 195
- Clathrate**
Thermochemical study of clathrate-forming host-guest reactions for the detection of organic solvent vapours 141
- Cold crystallization**
Modulated temperature DSC measurements: the influence of the experimental conditions 127
- Combined thermoanalytical investigation;**
Thermoanalytical investigations on the formation, properties and reactivity of carbon modifications 163
- Corundum**
Influence of different amounts of hematite seedings on the temperature of phase transformation of transition aluminas into corundum 155
- 2,4-Dinitrophenol**
Calorimetric and biochemical studies on the effects of environmental hypoxia and chemicals on freshwater fish 101
- Direct calorimetry**
Metabolic rate of the brackish water polychaete *Marenzelleria viridis* under reducing conditions 31
- Dispersoids**
Calorimetric investigations in a dispersion strengthened 7075 alloy 93

- Drop calorimeter
 An isoperibol drop calorimeter 85
- DSC
 Isobaric and isothermal DSC measurements of metal–hydrogen systems 67
- Electromagnetic levitation
 Electromagnetic levitation and its application in high temperature calorimetry 75
- Enthalpy
 Electromagnetic levitation and its application in high temperature calorimetry 75
 Isobaric and isothermal DSC measurements of metal–hydrogen systems 67
- Enthalpy of inclusion
 Thermochemical study of clathrate-forming host-guest reactions for the detection of organic solvent vapours 141
- Enthalpy of solution
 Thermal behaviour of isomalt 149
- Enzyme kinetic data
 Thermal investigations of enzyme-catalyzed reactions for detection of heavy metals in the case of cadmium 41
- Enzyme
 Thermal investigations of enzyme-catalyzed reactions for detection of heavy metals in the case of cadmium 41
- ERAS model
 Excess enthalpy H^E of binary mixtures containing alkanes, methanol and tert-amyl-methyl ether (TAME) 49
- Ethanol
 Calorimetric and biochemical studies on the effects of environmental hypoxia and chemicals on freshwater fish 101
- Excess enthalpy
 Excess enthalpy H^E of binary mixtures containing alkanes, methanol and tert-amyl-methyl ether (TAME) 49
- Excess heat capacity
 Electromagnetic levitation and its application in high temperature calorimetry 75
- Experimental conditions
 Modulated temperature DSC measurements: the influence of the experimental conditions 127
- Flow microcalorimetry
 Flow microcalorimetry and competitive liquid sorption I. Sorption behaviour of some polymer networks 59
- Fullerenes, diamond, graphite
 Thermoanalytical investigations on the formation, properties and reactivity of carbon modifications 163
- Glass transition
 Modulated temperature DSC measurements: the influence of the experimental conditions 127
 Thermal behaviour of isomalt 149
- Group contribution
 Extension of the UNIVAP group contribution method: enthalpies of vaporization of special alcohols in the temperature range from 313 to 358 K 9
- Hazard
 Influence of atmosphere on the reactivity of nitro compounds 195
- Heat capacity
 Application of an adiabatic calorimeter with safety concept 189
 Mischstromverfahren zur Wärmekapazitätsbestimmung an elektrischen Leitern in einem Pulskalorimeter 115
- Heat content
 An isoperibol drop calorimeter 85
- Heats of vaporization
 Extension of the UNIVAP group contribution method: enthalpies of vaporization of special alcohols in the temperature range from 313 to 358 K 9
- Heavy metal detection
 Thermal investigations of enzyme-catalyzed reactions for detection of heavy metals in the case of cadmium 41
- Hematite
 Influence of different amounts of hematite seedings on the temperature of phase transformation of transition aluminas into corundum 155
- Hydride
 Isobaric and isothermal DSC measurements of metal–hydrogen systems 67
- Hydrogen peroxide
 Application of an adiabatic calorimeter with safety concept 189
- Hydrogen sulphide
 Metabolic rate of the brackish water polychaete *Marenzelleria viridis* under reducing conditions 31
- Hypoxia
 Calorimetric and biochemical studies on the effects of environmental hypoxia and chemicals on freshwater fish 101

- Inclusion compound**
Thermochemical study of clathrate-forming host-guest reactions for the detection of organic solvent vapours 141
- Inhibitor**
Thermal investigations of enzyme-catalyzed reactions for detection of heavy metals in the case of cadmium 41
- Isomalt**
Thermal behaviour of isomalt 149
- Isothermal calorimetry**
Extension of the UNIVAP group contribution method: enthalpies of vaporization of special alcohols in the temperature range from 313 to 358 K 9
- Kinetic parameters**
Comparison of different non-linear evaluation methods in thermal analysis 23
- Kinetics**
A new method for determination of vapour sorption isotherms using a twin double microcalorimeter 179
Isobaric and isothermal DSC measurements of metal-hydrogen systems 67
- Macroreticular resins**
Flow microcalorimetry and competitive liquid sorption I. Sorption behaviour of some polymer networks 59
- Marenzelleria viridis***
Metabolic rate of the brackish water polychaete *Marenzelleria viridis* under reducing conditions 31
- Melting**
Modulated temperature DSC measurements: the influence of the experimental conditions 127
- Metabolic rate**
Metabolic rate of the brackish water polychaete *Marenzelleria viridis* under reducing conditions 31
- Microcalorimetry**
A new method for determination of vapour sorption isotherms using a twin double microcalorimeter 179
Calorimetric and biochemical studies on the effects of environmental hypoxia and chemicals on freshwater fish 101
- Mixing enthalpy**
Electromagnetic levitation and its application in high temperature calorimetry 75
- Modulated direct current**
Mischstromverfahren zur Wärmekapazitätsbestimmung an elektrischen Leitern in einem Pulskalorimeter 115
- Modulated temperature DSC**
Modulated temperature DSC measurements: the influence of the experimental conditions 127
- Networks**
Flow microcalorimetry and competitive liquid sorption I. Sorption behaviour of some polymer networks 59
- Non-linear optimization**
Comparison of different non-linear evaluation methods in thermal analysis 23
- Polyamide**
Simultaneous X-ray diffraction and differential thermal analysis of polymers 1
- Polychaete**
Metabolic rate of the brackish water polychaete *Marenzelleria viridis* under reducing conditions 31
- Polymer blend**
Simultaneous X-ray diffraction and differential thermal analysis of polymers 1
- Polymers**
Flow microcalorimetry and competitive liquid sorption I. Sorption behaviour of some polymer networks 59
- Precipitation**
Calorimetric investigations in a dispersion strengthened 7075 alloy 93
- Pulse calorimeter**
Mischstromverfahren zur Wärmekapazitätsbestimmung an elektrischen Leitern in einem Pulskalorimeter 115
- Reduction**
Influence of atmosphere on the reactivity of nitro compounds 195
- Safety**
Application of an adiabatic calorimeter with safety concept 189
- Seeding transformation**
Influence of different amounts of hematite seedings on the temperature of phase transformation of transition aluminas into corundum 155
- Simultaneous XRD/DTA**
Simultaneous X-ray diffraction and differential thermal analysis of polymers 1
- Software**
Comparison of different non-linear evaluation methods in thermal analysis 23

Solvent vapour

Thermochemical study of clathrate-forming host-guest reactions for the detection of organic solvent vapours 141

Sorption enthalpy

A new method for determination of vapour sorption isotherms using a twin double microcalorimeter 179

Substitution

Influence of atmosphere on the reactivity of nitro compounds 195

TG-DSC

Thermochemical study of clathrate-forming host-guest reactions for the detection of organic solvent vapours 141

Thermochemical reactivity

Thermoanalytical investigations on the formation, properties and reactivity of carbon modifications 163

Thermodynamics

Excess enthalpy H^E of binary mixtures containing alkanes, methanol and tert-amyl-methyl ether (TAME) 49

Thermokinetics

Comparison of different non-linear evaluation methods in thermal analysis 23

Thiosulphate

Application of an adiabatic calorimeter with safety concept 189

UNIVAP

Extension of the UNIVAP group contribution method: enthalpies of vaporization of special alcohols in the temperature range from 313 to 358 K 9

Vapour sorption isotherm

A new method for determination of vapour sorption isotherms using a twin double microcalorimeter 179
