

Subject index

Active alumina

Properties of the products of basic aluminium-ammonium sulphate decomposition in hydro- gen atmosphere and of the aluminium oxides obtained by their calcination 145

Adiabatic

Heat of saturation of apo and apo desialylated human serum transferrin at 298.15 K 287

Adiabatic calorimetry

The thermal properties of three (Cl-, Br-, I-) para-halotoluenes. Formation of glassy crys- tals 31

n-Alkane

Prediction of excess enthalpies for 1-al- kanol + *n*-alkane systems from infinite dilution activity coefficients 69

1-Alkanol

Prediction of excess enthalpies for 1-al- kanol + *n*-alkane systems from infinite dilution activity coefficients 69

Alumina catalysts

Thermochemical adsorptive and catalytic events occurring during isopropanol decom- position over MnO_x-modified aluminas. *In situ* infrared spectroscopic studies 257

Ball-milling

Influence of precipitation chemistry and ball- milling on the thermal behavior of zirconium hydroxide 119

Barium hydroxide

A study of the phase transitions in Ba(OH)₂, and a comment on the fusion of Sr(OH)₂ 1

Basic zinc carbonate

Thermal analysis of basic zinc carbonate. Part 1. Carbonation process of zinc oxide powders at 8 and 13°C 95

Binary system

Prediction of excess enthalpies for 1-al- kanol + *n*-alkane systems from infinite dilution activity coefficients 69

Bitetralyl ether

The thermal decomposition of α -tetralyl hydro- peroxide under non-isothermal conditions, in the presence of tetralin 195

Bitetralyl peroxide

The thermal decomposition of α -tetralyl hydro- peroxide under non-isothermal conditions, in the presence of tetralin 195

Bitumen

Application of thermal techniques in the recov- ery of heavy minerals from oil-sand tail- ings 103

Calibration

On the pressure dependence of the heat of fusion and melting temperature of indium 17

Calorimetry

A study of the phase transitions in Ba(OH)₂, and a comment on the fusion of Sr(OH)₂ 1

Development and applications of a method for kinetic analysis of consecutive reactions under isothermal conditions 53

Water vapor sorption by potash fertilizers studied by a kinetic method 277

Carbonation

Thermal analysis of basic zinc carbonate. Part 1. Carbonation process of zinc oxide powders at 8 and 13°C 95

Carboxylate

A kinetic and mechanistic study of the iso- thermal decomposition of calcium maleate dihydrate and calcium fumarate trihydrate 239

Cholic acid

Controlled rate thermogravimetry of inclusion complexes of cholic acid with fluorobenzyl alcohols: molecular adsorption on crystal surfaces 135

CI MS

The thermal decomposition of α -tetralyl hydro- peroxide under non-isothermal conditions, in the presence of tetralin 195

- Consecutive irreversible first-order reactions
Use of spreadsheets in the kinetic analysis of two consecutive first-order reactions 113
- Consecutive reaction
Development and applications of a method for kinetic analysis of consecutive reactions under isothermal conditions 53
- Controlled rate thermal analysis
Controlled rate thermogravimetry of inclusion complexes of cholic acid with fluorobenzyl alcohols: molecular adsorption on crystal surfaces 135
- Convergence temperatures
The enthalpy-convergence temperature for the dissolution into water of solid α -amino acids 43
- Crystal structure
A study of the phase transitions in $\text{Ba}(\text{OH})_2$, and a comment on the fusion of $\text{Sr}(\text{OH})_2$ 1
- Crystallization temperature
Influence of precipitation chemistry and ball-milling on the thermal behavior of zirconium hydroxide 119
- Cu(II) complex
Solid state synthesis of a new compound $\text{Cu}(\text{HQ})\text{Cl}_2$ and its formation reaction 61
- DCS
Influence of precipitation chemistry and ball-milling on the thermal behavior of zirconium hydroxide 119
- DETA
Physical ageing in amorphous and crystalline polymers. Part 2. Polyethylene terephthalate 217
- Differential scanning calorimetry
Simulations for evaluation of kinetic methods in differential scanning calorimetry. Part 2. Effect of additional noise on single-peak methods 169
- DMTA
Physical ageing in amorphous and crystalline polymers. Part 2. Polyethylene terephthalate 217
- DSC
On the pressure dependence of the heat of fusion and melting temperature of indium 17
Physical ageing in amorphous and crystalline polymers. Part 2. Polyethylene terephthalate 217
Solid state synthesis of a new compound $\text{Cu}(\text{HQ})\text{Cl}_2$ and its formation reaction 61
Thermal studies of *N,N'*-diethylethane-1,2-diamine complexes of nickel(II) in the solid state 185
- DTA
A thermoanalytical study of solid state reactions between tellurium oxide and the oxides of zirconium and hafnium 85
Preparation and properties of Y(III) and lanthanide(III) complexes with pyridine-2,4-dicarboxylic acid 205
Thermal analysis of basic zinc carbonate. Part 1. Carbonation process of zinc oxide powders at 8 and 13°C 95
Thermal studies of *N,N'*-diethylethane-1,2-diamine complexes of nickel(II) in the solid state 185
- Enthalpic relaxation and the glass transition
Physical ageing in amorphous and crystalline polymers. Part 2. Polyethylene terephthalate 217
- Enthalpy of formation
A study of the phase transitions in $\text{Ba}(\text{OH})_2$, and a comment on the fusion of $\text{Sr}(\text{OH})_2$ 1
The enthalpy of isomerization of peroxyxynitrite to nitrate 11
- Enthalpy of fusion
On the pressure dependence of the heat of fusion and melting temperature of indium 17
- Enthalpy of isomerization
The enthalpy of isomerization of peroxyxynitrite to nitrate 11
- Epoxy resins
Simulations for evaluation of kinetic methods in differential scanning calorimetry. Part 2. Effect of additional noise on single-peak methods 169
- Excess enthalpy
Prediction of excess enthalpies for 1-alkanol + *n*-alkane systems from infinite dilution activity coefficients 69
- Fertilizer
Water vapor sorption by potash fertilizers studied by a kinetic method 277
- FTIR
Influence of precipitation chemistry and ball-milling on the thermal behavior of zirconium hydroxide 119
- Glassy crystal
The thermal properties of three (Cl-, Br-, I-) para-halotoluenes. Formation of glassy crystals 31

- Hafnium tellurate
A thermoanalytical study of solid state reactions between tellurium oxide and the oxides of zirconium and hafnium 85
- Halotoluenes
The thermal properties of three (Cl-, Br-, I-) para-halotoluenes. Formation of glassy crystals 31
- Heat conduction calorimeter
Time integrals of input signal and output signal in linear measurement systems 269
- Heat of reaction
Heat of saturation of apo and apo desialylated human serum transferrin at 298.15 K 287
- Heat of saturation
Heat of saturation of apo and apo desialylated human serum transferrin at 298.15 K 287
- Heavy minerals
Application of thermal techniques in the recovery of heavy minerals from oil-sand tailings 103
- High pressure
On the pressure dependence of the heat of fusion and melting temperature of indium 17
- 8-Hydroxyquinoline
Solid state synthesis of a new compound $\text{Cu}(\text{HQ})\text{Cl}_2$ and its formation reaction 61
- γ -o-Hydroxyphenyl butyric acid
The thermal decomposition of α -tetralyl hydroperoxide under non-isothermal conditions, in the presence of tetralin 195
- Inclusion complex
Controlled rate thermogravimetry of inclusion complexes of cholic acid with fluorobenzyl alcohols: molecular adsorption on crystal surfaces 135
- Indium
On the pressure dependence of the heat of fusion and melting temperature of indium 17
- Infinite dilution activity coefficient
Prediction of excess enthalpies for 1-alkanol + *n*-alkane systems from infinite dilution activity coefficients 69
- Infrared spectroscopy
The infrared spectrum and vapour pressure of lead diiodide 231
Thermochemical adsorptive and catalytic events occurring during isopropanol decomposition over MnO_x -modified aluminas. *In situ* infrared spectroscopic studies 257
- IR
Preparation and properties of Y(III) and lanthanide(III) complexes with pyridine-2,4-dicarboxylic acid 205
- Isopropanol catalytic decomposition
Thermochemical adsorptive and catalytic events occurring during isopropanol decomposition over MnO_x -modified aluminas. *In situ* infrared spectroscopic studies 257
- Isothermal
A kinetic and mechanistic study of the isothermal decomposition of calcium maleate dihydrate and calcium fumarate trihydrate 239
Heat of saturation of apo and apo desialylated human serum transferrin at 298.15 K 287
- Kinetics
A kinetic and mechanistic study of the isothermal decomposition of calcium maleate dihydrate and calcium fumarate trihydrate 239
Development and applications of a method for kinetic analysis of consecutive reactions under isothermal conditions 53
Simulations for evaluation of kinetic methods in differential scanning calorimetry. Part 2. Effect of additional noise on single-peak methods 169
Water vapor sorption by potash fertilizers studied by a kinetic method 277
- Knudsen effusion
The infrared spectrum and vapour pressure of lead diiodide 231
- Lanthanides
Preparation and properties of Y(III) and lanthanide(III) complexes with pyridine-2,4-dicarboxylic acid 205
- Laser Raman
Influence of precipitation chemistry and ball-milling on the thermal behavior of zirconium hydroxide 119
- Lead diiodide
The infrared spectrum and vapour pressure of lead diiodide 231
- Linear measurement system
Time integrals of input signal and output signal in linear measurement systems 269
- Lutidinic acid
Preparation and properties of Y(III) and lanthanide(III) complexes with pyridine-2,4-dicarboxylic acid 205
- Manganese oxide-modified alumina catalysts
Thermochemical adsorptive and catalytic events occurring during isopropanol decomposition over MnO_x -modified aluminas. *In situ* infrared spectroscopic studies 257

- Measurement theory
Time integrals of input signal and output signal in linear measurement systems 269
- Model compounds
The enthalpy-convergence temperature for the dissolution into water of solid α -amino acids 43
- Nickel diamine complex
Thermal studies of *N,N'*-diethylethane-1,2-diamine complexes of nickel(II) in the solid state 185
- Noise
Simulations for evaluation of kinetic methods in differential scanning calorimetry. Part 2. Effect of additional noise on single-peak methods 169
- Oil-sand processing
Application of thermal techniques in the recovery of heavy minerals from oil-sand tailings 103
- Oxoperoxonitrate(1-)
The enthalpy of isomerization of peroxyinitrite to nitrate 11
- Peak area
Time integrals of input signal and output signal in linear measurement systems 269
- Peroxyinitrite
The enthalpy of isomerization of peroxyinitrite to nitrate 11
- Phase diagram
Phase diagram of the system $\text{KF}-\text{KBF}_4-\text{K}_2\text{TiF}_6$ 157
- Phase transformation
A study of the phase transitions in $\text{Ba}(\text{OH})_2$, and a comment on the fusion of $\text{Sr}(\text{OH})_2$ 1
- Phase transition
Thermal studies of *N,N'*-diethylethane-1,2-diamine complexes of nickel(II) in the solid state 185
- Polyethylene terephthalate PET
Physical ageing in amorphous and crystalline polymers. Part 2. Polyethylene terephthalate 217
- Potash
Water vapor sorption by potash fertilizers studied by a kinetic method 277
- Precipitation
Influence of precipitation chemistry and ball-milling on the thermal behavior of zirconium hydroxide 119
- Protein stability
The enthalpy-convergence temperature for the dissolution into water of solid α -amino acids 43
- Pyrolysis
A kinetic and mechanistic study of the isothermal decomposition of calcium maleate dihydrate and calcium fumarate trihydrate 239
- Quaternizations
Development and applications of a method for kinetic analysis of consecutive reactions under isothermal conditions 53
- Rate constant
Use of spreadsheets in the kinetic analysis of two consecutive first-order reactions 113
- Reduction calcination
Properties of the products of basic aluminium-ammonium sulphate decomposition in hydrogen atmosphere and of the aluminium oxides obtained by their calcination 145
- Simulations
Simulations for evaluation of kinetic methods in differential scanning calorimetry. Part 2. Effect of additional noise on single-peak methods 169
- Site-directed mutagenesis
Calorimetric evidence for different structural roles of Glu132 and Glu133 residues in human superoxide dismutase 25
- Solid state reaction
Solid state synthesis of a new compound $\text{Cu}(\text{HQ})\text{Cl}_2$ and its formation reaction 61
- Solid state reactions
A thermoanalytical study of solid state reactions between tellurium oxide and the oxides of zirconium and hafnium 85
- Solid state synthesis
Solid state synthesis of a new compound $\text{Cu}(\text{HQ})\text{Cl}_2$ and its formation reaction 61
- Solution calorimetry
The enthalpy of isomerization of peroxyinitrite to nitrate 11
- Spreadsheet
Use of spreadsheets in the kinetic analysis of two consecutive first-order reactions 113
- Structural stability
Calorimetric evidence for different structural roles of Glu132 and Glu133 residues in human superoxide dismutase 25

- Superoxide dismutase**
Calorimetric evidence for different structural roles of Glu132 and Glu133 residues in human superoxide dismutase 25
- Synthetic alunite**
Properties of the products of basic aluminium-ammonium sulphate decomposition in hydrogen atmosphere and of the aluminium oxides obtained by their calcination 145
- Tellurate synthesis**
A thermoanalytical study of solid state reactions between tellurium oxide and the oxides of zirconium and hafnium 85
- Tetralin**
The thermal decomposition of α -tetralyl hydroperoxide under non-isothermal conditions, in the presence of tetralin 195
- α -Tetralyl hydroperoxide
The thermal decomposition of α -tetralyl hydroperoxide under non-isothermal conditions, in the presence of tetralin 195
- TG**
A thermoanalytical study of solid state reactions between tellurium oxide and the oxides of zirconium and hafnium 85
Preparation and properties of Y(III) and lanthanide(III) complexes with pyridine-2,4-dicarboxylic acid 205
Thermal analysis of basic zinc carbonate. Part 1. Carbonation process of zinc oxide powders at 8 and 13°C 95
Thermal studies of *N,N'*-diethylethane-1,2-diamine complexes of nickel(II) in the solid state 185
- TG/DTA**
The thermal decomposition of α -tetralyl hydroperoxide under non-isothermal conditions, in the presence of tetralin 195
- TG-DTA-FTIR**
Application of thermal techniques in the recovery of heavy minerals from oil-sand tailings 103
- Thermal decomposition**
Thermal analysis of basic zinc carbonate. Part 1. Carbonation process of zinc oxide powders at 8 and 13°C 95
- Thermal denaturation**
Calorimetric evidence for different structural roles of Glu132 and Glu133 residues in human superoxide dismutase 25
- Thermochemical properties**
The infrared spectrum and vapour pressure of lead diiodide 231
- Thermochromism**
Thermal studies of *N,N'*-diethylethane-1,2-diamine complexes of nickel(II) in the solid state 185
- Thermodynamic analysis**
Phase diagram of the system $\text{KF-KBF}_4\text{-K}_2\text{TiF}_6$ 157
- Thermomagnetometry**
Application of thermal techniques in the recovery of heavy minerals from oil-sand tailings 103
- Transferrin**
Heat of saturation of apo and apo desialylated human serum transferrin at 298.15 K 287
- Water vapor**
Water vapor sorption by potash fertilizers studied by a kinetic method 277
- X-ray diffraction**
Application of thermal techniques in the recovery of heavy minerals from oil-sand tailings 103
- XRD**
A thermoanalytical study of solid state reactions between tellurium oxide and the oxides of zirconium and hafnium 85
- Zirconium hydroxide polymorphs**
Influence of precipitation chemistry and ball-milling on the thermal behavior of zirconium hydroxide 119
- Zirconium tellurate**
A thermoanalytical study of solid state reactions between tellurium oxide and the oxides of zirconium and hafnium 85
