Erice/Sicily, Italy

The Prostate, Advances in Pathophysiology, Diagnosis and Treatment of Benign and Malignant Diseases

This course will deal extensively with basic research related to prostatic disease. Prostatitis, BPH and prostate cancer are other subjects. Besides dealing with pathophysiology and etiological aspects, treatment will be in the center of interest. The internationally recognised speakers from Europe and from the United States will concentrate on new treatment modalities, new technology and controversies in the field of management. *Directors:* M. Pavone-Macaluso, P. Smith, L. Andersson, F. H. Schröder.
