

ANNOUNCEMENTS

15–26 May 2000 – Utrecht, The Netherlands

International Course on Laboratory Animal Science

A 2-week intensive course on laboratory animal science will be organized at the Department of Laboratory Animal Science – Utrecht, The Netherlands, in May 2000. This course has been given once a year since 1993.

The objective of this course is to present basic facts and principles that are essential for the humane use of animals and for the quality of research. The contents of the course are in line with recommendations of the Federation of European Laboratory Animal Science Associations (FELASA) regarding the training of the young scientist whose research involves the use of vertebrate animals. The course may also be of interest to those who intend to set up a similar course at their location. For this purpose, during the course the acquisition of teaching materials can be discussed with the course committee.

For information and application forms please contact:
