

Sachverzeichnis

Das Sachverzeichnis umfaßt Originalarbeiten und Notizen (N)

Adsorption

- Analysis of Conducting and Insulating Surfaces by Means of Secondary Ion Mass Spectrometry (SIMS). M. De Paz and C. Macciò 831
- The Heats of Adsorption of the Trichloroethanes on Porous Alumina. . . . T. D. Tribbeck (N) 567

Atomphysik und -Spektren

- Van der Waals Forces between Copper and Noble-Gas Atoms. . . . A. Bielski and J. Szudy (N) 1203
- Values for the Electron Screening in Muonic Atoms for all Z. . . . B. Fricke and V. L. Telegdi (N) 1328
- Resonance Broadening and Oscillator Strength of the Mercury Absorption Line 1850 Å. D. Gebhard and W. Behmenburg 445
- Infinite Matrices, Ritz Theorem and Bound State Problems. . . . A. K. Mitra 256
- Frequency Dependence of Collisional Depolarization of Resonance Radiation. F. Schuller and W. Behmenburg 442
- Density-Functional Formalism. L. Szasz, I. Berrios-Pagan, and G. McGinn 1516
- Multipole Polarizabilities from Hartree-Fock Densities by Statistical Perturbation Theory, a Semiempirical Approach. . . . W. Witschel and J. Haars 876

Diffusion, Elektro- und Thermodiffusion in Kondensaten

- Conductivity Measurements with Concentrated Solutions of Alkali Chlorides and Nitrates. H. Behret and F. Schmithals (N) 1497
- Kinetics and Mechanism of Solid State Reactions in the AgI-TII System. G. Flor, V. Massarotti, and R. Riccardi 304
- Kinetics and Mechanism of MAg_2I_3 Formation in the Solid-State Reactions Between $\beta\text{-AgI}$ and MI ($\text{M}=\text{K}, \text{Rb}, \text{NH}_4$). G. Flor, V. Massarotti, and R. Riccardi (N) 909
- Direct Determination of the Rate Constants for the Sr- and Ba-exchange Between the Small and Large Channels in LMS 13X. . K. Frohnecke and H. Fischbach 951
- Self Diffusion in Liquid Metals. R. V. Gopala Rao and A. K. Murthy 619
- A Method for Measuring Interdiffusion Coefficients in Liquids by Wave-front-shearing Interferometry. S. E. Gustafsson, E. Karawacki, and I. Okada 35
- An Improved Method for Measuring and Analysing Chemical and Intrinsic Diffusion Coefficients Applied to Copper-Gold Alloys. Th. Heumann and Th. Rottwinkel 1282
- Direct Correlation between Diffusion Coefficient and Transport Numbers in Dilute Electrolyte Solutions. R. Haase (N) 1211
- Conductivity of the Liquid System Formic Acid + Acetic Acid. R. Haase, H. Jaramillo-Giraldo, and K. H. Dücker (N) 391

Diffusion in the Liquid System Chlorobenzene + Bromobenzene.

- R. Haase, R. Kottmann, and K.-H. Dücker (N) 1084
- Viscosity of the Liquid System Chlorobenzene + Bromobenzene. R. Haase, M. Lethen, and K.-H. Dücker (N) 916
- Internal Cation Mobilities in the Molten Systems $\text{LiNO}_3\text{-TiNO}_3$ and $\text{RbNO}_3\text{-TiNO}_3$. K. Kawamura, I. Okada, and O. Odawara 69
- Isotope Effect of Cation Electromigration in Molten Lithium Chloride-Nitrate-Mixtures. V. Ljubimov and A. Lundén 75
- A new Procedure for the Determination of Diffusion Coefficients from Quasi-stationary Diffusion Measurements in Multicomponent Systems. W. Meiske, W. Schmidt, and E. Kahrig 561
- The Electric Conductivity of Molten $\text{Hg}_2\text{I}_2\text{-HgBr}_2$ and $\text{HgI}_2\text{-SbI}_3$ Binary Mixtures. S. V. Mentus and M. V. Šušić 312
- The Electric Conductivities and Densities of Molten $\text{SnCl}_2\text{-ZnCl}_2$ Binary Mixtures. S. V. Mentus and M. V. Šušić 797
- Sign Reversal of Thermo EMF of Hydrogen Diffusion in Thin Nickel Foils. A. N. Nigam and R. Rani (N) 1787
- The Conductance of Sodium Perchlorate in Water-sulfolane Mixtures at 35 °C. G. Petrella, M. Castagnolo, and A. Sacco 533
- Thermoelectric Power of the Molten Systems (Cu, Me)Cl and (Cu, Me)Br ($\text{Me}=\text{Na}, \text{K}, \text{Rb}, \text{Cs}$). E. Pezzati, A. Magistris, and A. Schiraldi (N) 388
- Low-Frequency Dielectric Relaxation of K^+ -Ions in the Two-Dimensional Tunnel Structure of $\text{K}_3\text{Sb}_2\text{O}_{14}$. G. Schön and U. Staudt (N) 385
- EMF Measurements on the Thermocell $\text{Ag(Tl)}|\text{AgI}/\text{Ag(Tl)}_2$ K. Shahi and S. Chandra 1055

Dünne Schichten

- The Electrical Properties of Thin Films of TiN_x and TiC_x . . . P. J. P. De Maayer and J. D. Mackenzie 1661
- An X-ray Optical Method for the Determination of Diffusion Properties in Very Thin Bimetallic Films. A. Wagendristel 1648
- On the Temperature Dependence of the Density of Thin Vacuum Deposited Copper Films. A. Wagendristel and E. Söllner 44

Elektronenbeugung

- Apparent Reflection of Fast Electrons for Glancing Incidence. . M. Abou Mandour and D. Harder (N) 265
- An Improved Formula for Radiative Tail in Electron Scattering. . . . E. Borie 1543
- Oxydation of Thin Ni-foils Investigated by Electron Diffraction. . . . S. Drautz and S. Steeb 471
- The Structure of Thiocarbonyl-chloro-fluoride as determined by Gas-Electron-Diffraction. F. Gleisberg, A. Haberl, and W. Zeil 549

- Bloch-Wave Analysis in Electron Diffraction Experiments. K. Ishida, A. W. S. Johnson, and G. Lehmpfuhl 1715
- The Gas Phase Molecular Structure of Vanadium(N-Chlorimide) Trichloride, $\text{Cl}_3\text{V}=\text{NCl}$, and Vanadium Oxide Trichloride, $\text{Cl}_3=\text{O}$ H. Oberhammer and J. Strähle 296
- Elektronenemission**
- Secondary Electron Yield from Various Materials under the Impact of Light Ions at High Energies. H. P. Beck and L. Langkau 981
- Elektronenkanone**
- Investigations Performed with the Lens Method Concerning the Influence of Space Charge on Brightness. R. Lauer 1395
- Focusing of an Intense Relativistic Electron Beam by a Hollow Conical Laser Beam. F. Winterberg 976
- Elektronenleitung**
- Various Donors in n-Zn-Sb and the Influence of Sample Treatment. A. Abou-Zeid and G. Schneider (N) 381
- 1/f Macroscopic Quantum Fluctuations of Electric Currents Due to Bremsstrahlung with Infrared Radiative Corrections. P. H. Handel (N) 1201
- On Excess Electron Mobility in Liquid and Glassy 3-Methylpentane. I. Kalinowski, J. G. Rabe, and W. F. Schmidt (N) 568
- Magnetoresistance and Band Shifts in Semiconducting Wismuth-Antimony Alloys under High Hydrostatic Pressure. D. Schneider, R. Kruse, and H. Neubauer 92
- Transport Properties and Quantum Oscillations of Te- and Sn-Doped $\text{Bi}_{94}\text{Sb}_6$ G. Schneider and R. Trommer 1071
- Elektronenmikroskopie**
- Study on the Ionic Bombardment in a Glow Discharge Lamp. F. Blum, P. A. Büger, and R. J. Murphy 1247
- Decoration of Cleavage Steps on CaF_2 Crystal Surfaces. P. A. Büger and K. Reichelt (N) 394
- Principles of Trace Structure Analysis in Electron Microscopy. W. Hoppe 1188
- Elektronenspektroskopie**
- Steric Inhibition of Resonance in Ortho-substituted Diphenylsulphides Studied by Photoelectron (He I) Spectroscopy. F. P. Colonna, G. Distefano, G. Reichenbach, and S. Satini (N) 1213
- Valence and Core Electron Spectra of Mg in MgO N. C. Halder, J. Alonso, Jr., and W. E. Swartz, Jr. 1485
- Multi Peak ESCA Bands in Substituted Benzenes and Heterocyclic Compounds. S. Pignataro and G. Distefano 815
- Monitoring Chemical Reactions by Variable Temperature Photoelectron Spectroscopy. A New Thermal Reaction. W. Schäfer and A. Schweig (N) 1785
- Elektronenzustände in Kondensaten**
- On the Paramagnetic Behaviour of Palladium-Silver-Iron Alloys. P. Brill 645
- Electronic Density of States of Noncrystalline Si and Ge: I. Spherically Symmetric Interference Function Approach. N. C. Halder and R. L. Wourms 55
- Phonon Contribution to the Dynamic Form Factor of the Electrons in Metals. H. Hinkelmann (N) 109
- The LCAO Interpolation Method Applied to Crystal Electrons in a Magnetic Field. H. G. Müller 1378
- Energy of the Quasi-free Electron State in Liquid Argon, Krypton, and Xenon. W. Tauchert and W. F. Schmidt (N) 1085
- Band Structure of Linear Polyacenes. N. N. Tyutyulkow, O. E. Polansky, and J. Fabian 1308
- Feldionisation**
- The Energetics of Formation of Doubly Charged Benzene Ions by Field Ionization. F. W. Röllgen and H. J. Heinen (N) 918
- A New Method for Surface Ionization of Organic Molecules by Attachment of Alkali Ions in Moderate Electric Fields. F. W. Röllgen and H.-R. Schulten 1685
- Festkörper**
- Theory of Stimulated Raman Effect in Crystals. G. Borstel, L. Merten, and K. Rath 1233
- Phase Transitions in the Alkali C_1-n . C_4 Alkanoates. P. Ferloni, M. Sanesi, and P. Franzosini 1447
- Vacancy Ordering in Anion-deficient LaNiO_3 P. L. Gai and C. N. R. Rao (N) 1092
- The Dependence of the Oxygen Isotope Fractionation in the Hydration Water of $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$ on the Crystallization Temperature. D. Götz, K. Heinzinger, and A. Klemm 1667
- Shock Compression of Plane Targets by Laser Ablation. C. G. M. van Kessel 1581
- A Study of the Cubic Phase of Solid Acetylene- d_2 H. K. Koski 1028
- On the Lattice Parameters of the Orthorhombic Low Temperature Phase of Crystalline Acetylene- d_2 H. K. Koski 1032
- Lattice Vibration Spectra. XIV. NiAs and Fe_2Se_4 Structure. H. D. Lutz, H. Haeuseler, and P. Willich 308
- Lattice Vibration Spectra. XV. FIR-Spectra and Vibration Analysis of FeS_2 Marcasite. H. D. Lutz and P. Willich 1458
- Theory of Optical Band Shape for $\text{A}_{1g}-\text{T}_{1u}$ Transition. II. K. Nasu 1060
- Dispersion of Localized Mode Polaritons in $\text{K}_3\text{Cu}(\text{CN})_4$ W. Nitsch 537
- Density of States of Polaritons in Cubic and Uniaxial Crystals. K. Rath, G. Borstel, G. Lamprecht, and L. Merten 1385
- Temperature and Pressure of Exploding Wires at the Onset of Vaporization. U. Seydel, R. Schöfer, and H. Jäger 1166
- Vibrational Assignment and Force Constants of Cyclo Octaselenium, Se_8 , and of the Cyclo Tetraselenium $(2+)$ Cation, Se_4^{2+} R. Steudel 1481
- On the General Formulation of Yield Conditions under Consideration of Anisotropy and Bauschinger-Effect. A. Troost and J. Betten 492
- Physical Interpretations of Isotropic and Anisotropic Yield-Condition. A. Troost and J. Betten 996

Flüssige Kristalle

- Specific Volume Studies on Some Nematic Liquid Crystals. B. Bahadur (N) 1094
 Determination of the Elastic Constants of MBBA and EBBA by Electric Conductivity Measurements.
 M. Greulich, G. Heppke, and F. Schneider 515
 The Elastic Constants of a Nematic Liquid Crystal.
 H. Gruler 230
 Dielectric Constants and Molecular Structure of Nematic Liquid Crystals. II. Variation of the Bridging Group. W. H. de Jeu and Th. Lathouwers 79
 Investigation of the Electric Conductivity of Homologous 4,4'-Di-n-alkoxyazobenzene in their Nematic Phase. G. Heppke and F. Schneider 316
 Investigation of Phase Transitions in Liquid Crystals by Means of Electrical Conductivity Measurements.
 G. Heppke and F. Schneider 1640
 Irreversible Thermodynamics of Nonequilibrium Alignment Phenomena in Molecular Liquids and in Liquid Crystals. I. Derivation of Nonlinear Constitutive Laws, Relaxation of the Alignment, Phase Transition. S. Hess 728
 Irreversible Thermodynamics of Nonequilibrium Alignment Phenomena in Molecular Liquids and in Liquid Crystals. II. Viscous Flow and Flow Alignment in the Isotropic (Stable and Metastable) and Nematic Phases. S. Hess 1224
 Torsional Shear Flow of MBBA in Magnetic Fields.
 Th. Waltermann and F. Fischer 519
 Frequency Dependence of Proton Spin Relaxation in Liquid Crystalline PAA.
 W. Wölfel, F. Noack, and M. Stohrer 437

Flüssigkeiten

- Hypersound Properties of Water-Ethanol Mixtures.
 A. Asenbaum and M. Sedlacek 871
 The Density at 25 °C of D₂O with Natural Oxygen Isotopic Composition.
 T. Babeliowsky and J. Brulmans 103
 Densities and Excess Volumes of Fused Halides.
 H. C. Brookes and R. L. Paul 64
 Thermal Expansion of Heavy Water between 7 and 26 °C.
 J. Brulmans, J. Verdonck, and H. L. Eschbach (N) 107
 Miscibility Gaps in Fused Salts. Note VIII. Mixtures Formed by LiF and two Alkali Bromides.
 G. Flor, Ch. Margheritis, and C. Sinistri 821
 Structure Factors of Liquid Sodium and Potassium.
 R. V. Gopala Rao and A. K. Murthy (N) 383
 Structure of Aluminium-Indium-Melts by Means of X-Ray-Wide Angle Diffraction.
 J. Hoehler and S. Steeb 771
 Inhomogeneities or Concentration Fluctuations in Molten Al-In Alloys by Means of X-Rays Small Angle Scattering. J. Hoehler and S. Steeb 775
 Sound Velocity, Compressibility, and Partial Structure Factors ($s=0$) in Molten Al-In-Alloys.
 J. Hoehler and S. Steeb 784
 X-ray Diffraction Study of Molten Tellurium.
 W. Hoyer, E. Thomas, and M. Wobst 235
 X-ray Diffraction Study of Molten Selenium and Tellurium and of Molten Selenium-Tellurium-Alloys.
 W. Hoyer, E. Thomas and M. Wobst 1633

- Double Dielectric Relaxation of Non-Confocal Membrane-Covered Ellipsoidal Particle Suspensions.
 H. Ichimura, D. Feinstein, and R. F. Schwartz 1675
 Thermodynamic and Physical Behaviour of Binary Mixtures Involving Sulfolane Viscosity, Dielectric Constant and Solid+Liquid Phase Diagram of Mixtures of Dioxane+Sulfolane.
 L. Janelli, A. Inglese, A. Sacco, and P. Ciani 87
 The Structure of Liquid Silver-Copper Alloys.
 W. E. Lukens and C. N. J. Wagner 242
 Miscibility Gaps in Fused Salts.
 Ch. Margheritis, G. Flor, and C. Sinistri 896
 Monte Carlo Computations on Molten Caesium Bromide. C. Margheritis and C. Sinistri 83
 Renormalized and Unrenormalized Jastrow Expansions of the Liquid Structure Function for Dense Fermi Liquids. J. Nitsch 1372
 A Model of the Structure of Liquid Germanium.
 B. R. Orton (N) 1500
 Origin of the Small Maxima in Molten Au, Ag, and Ga. H. Richter and G. Breitling 992
 Computing of the Free Excess Energy and the Osmotic Coefficient to obtain Potential Parameters of Short-range Interaction of Electrolyte Solutions.
 E. Schollmeyer 806
 A Molecular Dynamics Study of Aqueous Solutions. II. Cesium Chloride in H₂O.
 P. C. Vogel and K. Heinzinger 789
 Effective Interionic Potentials and Properties of Molten Noble and Transition Metals.
 Y. Waseda and M. Ohtani 485
 X-ray Diffraction Study of Molten Te and Ti-Te Alloys. Y. Waseda and S. Tamaki 1655
 Structure of Molten Mg, Ca, Sr, and Ba by X-ray Diffraction.
 Y. Waseda, K. Yokoyama, and K. Suzuki 801

Gaskinetik

- Third Virial Coefficients for Ar, Kr, and Xe Including Nonadditive Effects.
 R. E. Caligaris, O. H. Scalise, and J. R. Grigera 227
 Magnetic-field Induced Change of the Viscosity of Diamagnetic Gases with Anisotropic Magnetic Susceptibility. S. Hess 111
 Waldmann-Snyder Collision Integrals and Nonspherical Molecular Interaction. II. DWBA-Scattering Amplitude and Cross Sections for Linear Molecules.
 W. E. Köhler 117
 Kinetic Theory of Thermal Diffusion in a Magnetic Field. W. E. Köhler and J. Halbritter 1114
 Slip Effects in Mixtures of Monatomic Gases for General Surface Accommodation.
 H. Lang and W. J. C. Müller 855
 Condensation and Evaporation of a Dilute Vapour on a Spherical Droplet. . . . M. M. R. Williams 134
 The Motion of a Thermally Conducting Sphere in a Rarefied Gas, I. Low Speed Case. M. M. R. Williams 636

Hochfrequenzspektroskopie

a) Elektronenspinresonanz

- Molecular Nature of the g Anomalies in Bis(diselenocarbamate)copper(II) Complexes.
 E. Buluggiu, G. Dascola, and D. C. Giori 292
 Electron Spin Relaxation of (Diphenyl)⁻ in Dimethoxyethane. F. Köksal and G. J. Krüger 883

EPR of Radiation Damage Centers in NaNO_3 , $\text{Sr}(\text{NO}_3)_2$, BaS , and $\text{MgC}_2\text{O}_4 \cdot 2\text{H}_2\text{O}$.

F. Köksal and H. Yüksel (N) 269

ESR of Gamma Irradiated KHSO_4 Single Crystal. 750

F. Köksal and H. Yüksel 1044

Irradiation Damage Centers in Magnesiumhypophosphite. F. Köksal and H. Yüksel

Spin Lattice Relaxation in the Triplet State of Quinoxaline in Perdeuteronaphthalene and of two Similar Mixed Crystals. 754

U. Konzelmann, D. Kilpper, and M. Schwoerer 28

EPR of Fe^{3+} in Low Quartz Isomorphs A (III) B (V) O_4 . 1175

U. Krauß and G. Lehmann 361

Temperature Dependence of ESR-Phosphorus Coupling Constants of Imunophosphorane Radicals. 571

K. Scheffler, S. Hieke, R. Haller, and H. B. Stegmann 175

Optically Detected Spin Locking of Zero Field Electronic Triplet States and Cross Relaxation in the Rotating Frame. H. Schuch and C. B. Harris

Analysis of Spin Polarisation Transients in Periodically Photo-excited Triplet States. C. J. Winscom

b) Kernresonanz

^{53}Cr Fourier Transform Nuclear Magnetic Resonance Studies. B. W. Epperlein, 1237

H. Krüger, O. Lutz, A. Nolle, and W. Mayr 955

Fourier Transform NMR Studies of ^{10}B and ^{11}B in Aqueous Solutions. 175

B. W. Epperlein, O. Lutz, and A. Schwenk 1615

Determination of NMR Parameters by Lorentzian-Line-Shape-Analysis I: $[\text{C}_6\text{F}_5\text{Si}(\text{CH}_3)_2]_2$. 690

G. Hägele and V. Lueg 1207

Coupled Proton and Fluorine Nuclear Spin-Lattice Relaxation in Polycrystalline Magnesium and Zinc Fluorosilicate Hexahydrate. 1122

H.-D. Jannek and H. Rager 1707

The Proton-resonance on Dioxane Adsorbed in Ca-Faujasites with Different Si/Al-ratio. 1495

H. Lechert, K.-P. Wittern, and H. J. Hennig (N) 1491

The Proton Resonance of Adsorbed Benzene in Zeolites of the Faujasite Type with Different Si/Al-ratios. H. Lechert, W. Haupt, and H. Kacirek (N) 1302

Fourier Transform Nuclear Magnetic Resonance Studies of ^{25}Mg and ^{43}Ca . 1185

O. Lutz, A. Schwenk, and A. Uhl 1707

Nuclear Magnetic Resonance Investigation of Molecular Rotation and Diffusion in Solid Benzene: $T_{1\rho}$ -Spectroscopy. 1495

F. Noack, M. Weithase, and J. von Schütz 1491

Isotope Effect in the Knight Shift of Potassium. 1302

W. Säger and J. Voigtländer (N) 1185

NMR Spin-Spin Coupling in HD. 1330

Proton Spin-Lattice Relaxation on Crystalline Methyl-naphthalenes by Spin-Rotational Interaction. 1250

J. U. von Schütz and M. Weithase 1250

Semiempirical SCF-LCAO-MO-calculations as an Aid for the ^{13}C -shift Determination. 1185

H. Sterk and H. W. Schmidt 1330

Nuclear Magnetic Relaxation Measurements on the OH-Protons of a Crystalline Silicic Acid. 1250

E. K.-H. Wittich, J. Voigtländer, and G. Lagaly (N) 1250

Knight-Shift in Liquid Cu-Ga Alloys with Mn Impurities. 1250

R. Zollner, S. Sotier, Ch. Holzhey, and E. Lüscher

c) Mikrowellenspektroskopie

Comment on the Analysis of Microwave Rotational Zeeman Effect Spectra of Symmetric Top Molecules. 1265

L. Engelbrecht and D. H. Sutter 904

r_0 -Structure, Partial r -Structure, and Nitrogen Nuclear Quadrupole Coupling Constants of N-Nitrosodimethylamine. 1403

A. Guarnieri, F. Rohwer, and F. Scappini 183

Dielectric Relaxation of α,ω -Halogen Alkanes in Dilute Solution. G. Klages and M. Straßmann 1476

Microwave Spectrum, Spectroscopic Constants and r_0 Structure of CSFCl H. J. Kohrmann and W. Zeil 1256

The Influence of Higher Order Modes upon the Accuracy of Dielectric Constant Determination Using Transmission Measurement Cells for Electrolyte Solutions Having Strongly Depressed Dielectric Constants in the Gigahertz Range. 1782

J. Krüger, E. Schollmeyer, and J. Barthel 541

Vibration-Rotation Interaction in the Microwave Spectrum of KOH. 1279

P. Kuijpers, T. Törring, and A. Dymanus 180

A Contribution to the Microwave Spectrum of Dimethylether-D6 in Excited Torsional States. 1742

H. Lutz and H. Dreizler (N) 693

A Contribution to the Investigation of Collision-Induced Transitions in the Microwave Range. 511

H. Mäder, H. Dreizler, and A. Guarnieri (N) 1279

Microwave Spectrum and Quadrupole Coupling Constants of 2-Bromothiophene. 180

P. J. Mjöberg, W. M. Ralowski, and S. O. Ljunggren 1742

Microwave Spectrum and Barrier to Internal Rotation of 5-Methylisoxazole. 1756

P. J. Mjöberg, W. M. Ralowski, and S. O. Ljunggren 1765

A Contribution to the Radiofrequency Microwave Double Resonance Method. 497

R. Schwarz, H. Dreizler, and A. Guarnieri 986

Double Resonance Modulation as a Technique in Microwave Spectroscopy I. O. L. Stiefvater 1606

Double Resonance Modulation as a Technique in Microwave Spectroscopy II. O. L. Stiefvater 1001

The Microwave Spectrum of 2,6-Difluoropyridine. I. 672

O. L. Stiefvater 497

Microwave Zeeman Spectrum of Hypochlorous Acid. 986

M. Suzuki and A. Guarnieri 1606

Rotational Spectrum of IBr. 986

E. Tiemann and Th. Möller 1001

Adiabatic Correction of the Born-Oppenheimer Approximation of PbS. 672

E. Tiemann, W. U. Stieda, T. Törring, and J. Hoeft 1001

Ground State Centrifugal Distortion Constants of Trans-Acrolein, $\text{CH}_2=\text{CH}-\text{CHO}$ from the Microwave and Millimeter Wave Rotational Spectra. M. Winnen-wisser, G. Winnen-wisser, T. Honda, and E. Hirota 672

Ground State Centrifugal Distortion Constants of Vinyl Isocyanide, $\text{CH}_2=\text{CH}-\text{CN}$, from the Microwave and Millimeter Wave Rotational Spectra. 672

K. Yamada and M. Winnen-wisser 1441

Microwave Spectrum and Rotational Constants of Methylchlorosilanes: $\text{CH}_3\text{SiH}_2\text{Cl}$, $\text{CH}_3\text{SiD}_2\text{Cl}$, and $\text{CD}_3\text{SiD}_2\text{Cl}$ W. Zeil, W. Braun, B. Haas, H. Knehr, F. Rückert, and M. Dakkouri 1441

H. Knehr, F. Rückert, and M. Dakkouri 1441

d) Zyklotronresonanz

Studies by the Electron Cyclotron Resonance (ECR)-Technique IX: Interactions of Low-Energy Electrons with the Molecules CH_2Cl_2 and CHCl_3 in the Gas

- Phase. A. A. Christodoulides, R. Schumacher, and R. N. Schindler 811
- Ion Chemistry of Phosphirane and Structure of the Phosphirane Molecular Ion. Z.-Ch. Profous, K.-P. Wanczek, and H. Hartmann 1470
- Mass Spectra and Ion Chemistry of Methylphosphine, Dimethylphosphine and Dimethyldeuterophosphine, Investigated by Ion Cyclotron Resonance Spectrometry. K.-P. Wanczek 329
- Ionisation und Reaktion in Gasen**
- Mobility and Formation of Cluster Ions in Their Own Gas in He, Ne and Ar at High Pressures. R. von der Heide 868
- Relative O(¹D) Quantum Yields in the near UV-Photolysis of Ozone at 298 K. G. K. Moortgat and P. Warneck 835
- Ionisierte Gase**
- Electron Density Determination in the Arc Plasma by Later Interferometry. M. Brünger and M. Kock 1560
- Spectroscopic Investigations of the Plasma of a Glow Discharge Lamp. P. A. Büger 216
- Measurement of Excitation Temperatures in a Glow Discharge Lamp. P. A. Büger and S. El Alfy 466
- Population Densities and Ionisation Coefficients of Fast Transient Hydrogen Plasma. M. Cacciatore and M. Capitelli 48
- Plasma Correlation Effects on Stark Broadening. H. Capes and D. Voslamber (N) 913
- Electron Temperature Determination from Non-LTE Populations in a Nitrogen Plasma JET. A. Catherinot and A. Sy 1143
- The Influence of Deviations from the Maxwellian Electron Distribution on the Population Densities in a low Temperature Monatomic Plasma. H. A. Claaßen 451
- Measurement of Stark Broadening and Shift of the Helium I Line $\lambda=4471.5$ Å and its Forbidden Component $\lambda=4470$ Å for Electron Densities $7 \cdot 10^{14} \lesssim N_e [\text{cm}^{-3}] \lesssim 3 \cdot 10^{16}$ C. S. Diatta, A. Czernichowski, and J. Chapelle 900
- Analysis of the Relaxation of Wall Electrons in a Plasma. G. Ecker, K.-U. Riemann, and A. Scholz 937
- Dynamic Screening Model of the Electric Microfield Distribution. G. H. Ecker and A. Schumacher 413
- Continuum Radiation of a Single Ionized Helium-Plasma in the Spectra Range 300 nm to 650 nm. D. Einfeld and G. Sauerbrey 1413
- The Interaction of a Large Amplitude Travelling Wave with a Cylindrical Plasma. K. H. Finken, A. Stampa, and H. Tuzcek 195
- Electron-Electron Bremsstrahlung in a Hot Plasma. E. Haug 1546
- Adiabatic Invariance in the Average. L. Janicke 421
- Absolute Measurement of Power Transfer to a Deuterium Plasma Near the Lower Hybrid Resonance. B. Lammers, U. Oberlack, and H. Schlüter 204
- Applicability of the Uniformly Expanding Universe Model to Laser Produced Plasmas. L. Lengyel and M. Salvat 1577
- Simulation of the Electron Energy Relaxation in a Weakly Ionized Plasma. K. G. Müller and W. O. Müller 1553
- Microwave Diagnostics of a Strong Arc Discharge Plasma in SF₆. J. Musil and F. Žáček 947
- Quantitative Investigation of the Radiation of the Negative Iodine Ion. M. Neiger 474
- The Behaviour of Populations in a Rapidly Expanding Plasma Flow. M. Nishida 1563
- Energy Transfer and Superradiance Between Two High Temperature Carbon or Nitrogen Plasmas. B. A. Norton (N) 263
- Stark Broadening of A III and A IV Lines. M. Platiša, M. Popović, M. Dimitrijević, and N. Konjević 212
- Reflection Phenomena of Torsional Alfvén Waves in Inhomogeneous Magnetic Fields. E. Räuchle and P. G. Schüller 1594
- Observation of Turbulent Waves in a Helium Plasma by Optical Spectroscopy. W. R. Rutgers 1271
- Calculations and Measurements of the Dynamic Stark Effect in Hydrogen. W. R. Rutgers and H. W. Kalfsbeek 739
- Wave Absorption in a Plasma with Two Ion Species. H. Schlüter and G. Schürger 1600
- Thermal Instability in Plasma with Finite Larmor Radius. R. C. Sharma and K. Prakash 461
- Parametric Side-Scattering by Waves Near the Hybrid Resonance Frequencies in Inhomogeneous Plasma. P. K. Shukla, M. Y. Yu, and K. H. Spatschek (N) 911
- Kernphysik, experimentell**
- Q-values for (d, p) and (d, t) Reactions on Even-A Tin Isotopes. M. J. Bechara and O. Dietzsch 356
- Precision Measurement of the γ -Ray Energies from the Radioactive Decay of ⁵¹Cr, ¹⁶⁹Yb, ¹⁷⁰Tm, ¹⁹²Ir and ²⁰³Hg. G. L. Borchert, W. Scheck, and K. P. Wieder 274
- Lifetime Estimation of the 317.9 keV-Level in ¹²⁹Xe. H. Engel, E. Gerst, H. Schneider, and R. Spitz (N) 1778
- Kernphysik, theoretisch**
