Z. Naturforsch. **58c**, 640–642 (2003); received February 28/April 8, 2003

Two compounds, (*p*-methoxyphenyl) diphenylmethanol (**1**) and tribenzylamine (**2**), were isolated from *Humulus lupulus*. Their structures were established on the basis of spectral evidence (MS, IR, NMR, HMBC, HMQC, ¹H-¹H COSY experiments). Compounds **1** and **2** were found as natural products at the first time.

Key words: *Humulus lupulus*, (*p*-Methoxyphenyl) diphenylmethanol, Tribenzylamine
