Two new diterpenes namely verbenacine (**1**) and salvinine (**2**) have been isolated from the aerial parts of *Salvia verbenaca*. Their structures have been elucidated on the basis of chemical and spectral data as 3 α -hydroxy-19-carboxykaur-15-ene and 19-hydroxy-12,14-dioxo labda-15,17-diene.

Key words: *Salvia verbenaca*, Verbenacine, Salvinine
