HEADQUARTERS
 DEPARTMENT OF THE ARMY
 WASHINGTON, D.C., 3 March 1978

**ORGANIZATIONAL MAINTENANCE
 REPAIR PARTS AND SPECIAL TOOLS LIST**

**TANK, COMBAT, FULL-TRACKED:
 105-MM GUN, M48A5
 (2350-00-582-5595)
 TURRET**

Current as of 4 November 1977

Reporting Errors and Recommending Improvements. You can help improve this manual. If you find any mistake or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publication and Blank Forms), or DA Form 2028-2 located in the back of this manual direct to: Commander, US Army Armament Materiel Readiness Command, ATTN: DRSAR-MAS, Rock Island, IL 61299. A reply will be furnished to you.

	Figure	Page
SECTION I. Introduction		1
SECTION II. Repair parts list		7
Group 06 Electrical System		7
0609—Domelight resistor and domelight mounting parts	1	7
0609—Domelight assembly	2	9
0614—Turret slipping mounting and external parts	3	11
0616—Accessories control box and mounting parts	4	14
0616—Ventilator blower, silencer, and related parts	5	17
0618—Turret power relay and searchlight relay distribution box mounting parts	6	19
0618—Gunner's control box and mounting parts	7	21
0618—Gunner's control box wiring harness assembly	8	23
0618—Searchlight control box connector and mounting parts	9	25
0618—Gun elevation interference switch and related parts	10	27
0618—Loader's safety switch	11	29
0618—Turret gun firing relay and mounting parts	12	31
0618—Gun elevation interference switch support bracket and radiation detector connector clip	13	33
0618—Elevation shutoff valve lead assembly	14	35
0618—Blasting machine and mounting parts	15	37
0618—M1 cupola interconnecting box, power control relay, power control switch, and contact board wiring harness (vehicle serial numbers A3001 thru A3420)	16	39
0618—M1 cupola cable clamps, machinegun safety switch, ground lead assembly, and related parts (vehicle serial numbers A3001 thru A3420)	17	41
0619—Radio shelf, radio amplifier support, and mounting parts (Vehicle serial numbers A1001 thru A1999 and A3421 thru A3999)	18	43
0620—Turret power wiring harness	19	45
0620—Power relay box and searchlight relay box wiring harness, power pack motor wiring harness, ground lead, and related parts	20	47
0620—Turret slipping interphone cable assembly	21	49
0620—Turret searchlight ground lead assembly and attaching parts	22	51
0620—Turret electrical system harness clamps and mounting parts	23	55
0620—Turret electrical system gun harness clamps and mounting parts	24	59
Group 19 Turret		
1901—Turret structure covers, shields, blisters, and related parts	25	61
1901—Turret traverse lock and related parts	26	63

SECTION II. Repair parts list—Continued
 Group 19 Turret—Continued

	Figure	Page
1901—Commander's seat assembly and mounting parts	27	65
1901—Commander's backrest assembly and mounting parts	28	67
1901—Loader's seat assembly	29	69
1901—Gunner's seat assembly and mounting parts	30	71
1901—Turret platform, hangers, and related parts	31	75
1903—M1 cupola cover, adapter, and mounting parts (vehicle serial numbers A3001 thru A3374)	32	77
1903—M1 cupola cradle and body assembly (vehicle serial numbers A3001 thru A3374)	33	79
1903—M1 cupola hatch assembly (vehicle serial numbers A3001 thru A3374)	34	81
1903—M1 cupola body assembly (vehicle serial numbers A3001 thru A3374)	35	85
1903—Caliber .50 box retainer, rear gun mount pin assembly, and elevation stop (vehicle serial numbers A3001 thru A3374)	36	87
1903—M1 cupola traverse lock assembly and azimuth interlock assembly (vehicle serial numbers A3001 thru A3374)	37	89
1903—Loader's escape hatch and mounting parts	38	91
1903—Personnel ballistic protector shield and mounting parts	39	93
1903—Gun shield cover assembly and related parts	40	95
1903—Low profile cupola assembly (vehicle serial numbers A1001 thru A1999 and A3375 thru A3999)	41	97
1903—Low profile cupola door lock assembly and related parts (vehicle serial numbers A1001 thru A1999 and A3375 thru A3999)	42	99
1903—Low profile cupola body assembly (vehicle serial numbers A1001 thru A1999 and A3375 thru A3999)	43	101
1903—Low profile cupola 7.62-mm machinegun scissors mount assembly (vehicle serial numbers A1001 thru A1999 and A3375 thru A3999)	44	103
1903—Turret hand traversing drive assembly and mounting parts	45	105
1904—Turret hand elevating pump handle assembly and related parts	46	107
1904—M1 cupola azimuth gearbox assembly and mounting parts (vehicle serial numbers A3001 thru A3374)	47	109
1904—Low profile cupola azimuth gearbox and mounting parts (vehicle serial numbers A1001 thru A1999 and A3375 thru A3999)	48	111
1904—M1 cupola screwjack assembly and related parts (vehicle serial numbers A3001 thru A3374)	49	113
1905—Commander's control and related parts	50	117
1905—Power pack control and deck clearance valve mounting parts	51	119
1905—Deck clearance and elevation shutoff valves	52	121
1905—Power pack control assembly	53	125
1905—Gunner's control assembly	54	129
1905—Gunner's control hydraulic valve assembly	55	131
1905—Power pack accumulator assembly	56	133
1905—Elevating mechanism and mounting parts	57	135
1905—Superelevation actuator assembly and related parts	58	137
1905—Pressure gage, accumulator, and elevation shutoff valve mounting parts	59	139
1905—Accumulator assembly	60	141
1905—Turret traversing gearbox and mounting parts	61	143
1905—Turret traversing gearbox nobak assembly	62	145
1905—Turret traversing gearbox pin lock assembly	63	147
1905—Turret traverse gearbox assembly	64	151
1905—Turret hydraulic system tubes, fittings, and related parts	65	157
1906—Turret exterior stowage brackets, straps, and related parts	66	161
1906—Turret interior stowage racks, boxes, and related parts	67	165
1906—105-mm ammunition retainer and clamp assembly and mounting parts (vehicle serial numbers A3001 thru A3420)	68	167
1906—105-mm ammunition retainer and clamp assembly and mounting parts (vehicle serial numbers A1001 thru A1999 and A3421 thru A3999)	69	169
1906—Turret bustle ammunition trays, oddment tray, and mounting parts (vehicle serial numbers A3001 thru A3420)	70	173
1906—Turret bustle ammunition trays, rack, oddment tray, and mounting parts (vehicle serial numbers A1001 thru A1999 and A3421 thru A3999)	71	176
1906—Turret shield, grille, supports, straps, and mounting parts	72	181
1906—Turret platform covers, guards, and plates	73	184
1906—Turret platform 105-mm ammunition rack, cover, and related parts	74	187
1906—Portable fire extinguisher bracket	75	189
1906—Infrared periscope stowage box and mounting parts	76	191
1906—Infrared periscope spare head stowage box and mounting parts (vehicle serial numbers A3001 thru A3420)	77	193

Section I.

INTRODUCTION

1. Scope. This manual lists spares and repair parts, special tools, special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of organizational maintenance of the M48A5 tank. It authorized the requisitioning and issue of spares and repair parts as indicated by the source and maintenance codes.

2. General. This Repair Parts and Special Tools List is divided into the following sections:

a. Section II. Repair Parts List. A list of spares and repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in numeric sequence with the parts in each group listed in figure and item number sequence. Bulk materials are listed NSN sequence.

b. Section III. Special Tools List. A list of special tools, special TMDE and other special support equipment authorized for the performance of maintenance at the organizational level.

c. Section IV. National Stock Number and Part Number Index. A list in National item identification number (NIIN) sequence of all National stock numbers (NSN) appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

3. Explanation of Columns.

a. Illustration. This column is divided as follows:

(1) *Figure Number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item Number.* The number used to identify each item called out in the illustration.

b. Source, Maintenance, and Recoverability (SMR) Codes.

(1) *Source Code.* Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

Code	Definition
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply system.

PC—Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.

PD—Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.

PE—Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.

PF—Support equipment which will not be stocked but which will be centrally procured on demand.

PG—Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which, because of probable discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later time.

KD—An item of a depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.

KF—An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.

KB—Item included in both a depot overhaul/repair kit and maintenance kit.

MO—Item to be manufactured or fabricated at organizational level.

MF—Item to be manufactured or fabricated at the direct support maintenance level.

MH—Item to be manufactured or fabricated at the general support maintenance level.

MD—Item to be manufactured or fabricated at the depot maintenance level.

AO—Item to be assembled at organizational level.

AF—Item to be assembled at direct support maintenance level.

AH—Item to be assembled at general support maintenance level.

AD—Item to be assembled at depot maintenance level.

XA—Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.

XB—Item is not procured or stocked. If not available through salvage, requisition.

XC—Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.

XD—A support item that is not stocked. When required, item will be procured through normal supply channels.

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA.

(2) *Maintenance Code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

Code	Application/Explanation
C	Crew or operator maintenance performed within organizational maintenance.
O	Support item is removed, replaced, used at the organizational level.
F	Support item is removed, replaced, used at the direct support level.
H	Support item is removed, replaced, used at the general support level.
D	Support items that are removed, replaced, used at depot, mobile depot, or specialized repair activity only.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain the following maintenance code:

Code	Application/Explanation
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F	The lowest maintenance level capable of complete repair of the support item is the direct support level.
H	The lowest maintenance level capable of complete repair of the support item is the general support level.
D	The lowest maintenance level capable of complete repair of the support item is the depot level.
L	Repair restricted to Specialized Repair Activity.
Z	Nonreparable. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) *Recoverability Code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Recoverability Codes	Definition
Z	Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.
O	Reparable item. When uneconomically repairable, condemn and dispose at organizational level.
F	Reparable item. When uneconomically repairable, condemn and dispose at the direct support level.
H	Reparable item. When uneconomically repairable, condemn and dispose at the general support level.
D	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
L	Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.

A—Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. *National Stock Number.* Indicates the National stock number assigned to the item and will be used for requisitioning purposes.

d. *Part Number.* Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or government activity) which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE

When a stock-numbered item is requisitioned, the item received may have a different part number than the part being replaced.

e. *Federal Supply Code for Manufacturer (FSCM).* The FSCM is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or government agency, etc.

f. *Description.* Indicates the Federal item name and, if required, a minimum description to identify the item. Items that are included in kits and sets are listed below the name of the kit or set with the quantity of each item in the kit or set indicated in the quantity incorporated in unit column. In the Special Tools List, the initial basis of issue (BOI) appears as the last line in the entry for each special tool, special TMDE, and other special support equipment. When density of equipments supported exceeds density spread indicated in the basis of issue, the total authorization is increased accordingly.

g. *Unit of Measure (U/M).* Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in, pr, etc.). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. *Quantity Incorporated in Unit.* Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable (e.g., shims, spacers, etc.).

4. Special Information.

a. Usable on codes are shown in the description column. Uncoded items are applicable to all models.

Identification of the usable on codes used in this publication are:

Code	Used On
A	Vehicle serial numbers A1001 through A1999
B	Vehicle serial numbers A3001 through A3999
C	Vehicle serial numbers A3001 through A3374
D	Vehicle serial numbers A3001 through A3420
E	Vehicle serial numbers A3375 through A3999
F	Vehicle serial numbers A3421 through A3999

b. Detailed manufacturing instructions for items source coded to be manufactured or fabricated are found in TM 9-2350-258-20-2. Bulk materials required to manufacture items are listed in the Bulk Material Group of this manual.

c. Detailed assembly instructions for items source coded to be assembled are found in TM 9-2350-258-20-2. Assembly components are listed immediately following the item to be assembled.

d. Repair parts kits and gasket sets are listed at the end of the repair parts listing for the last figure containing parts of the kit.

e. The following publications pertain to the M48A5 tank and its components:

LO 9-2350-258-12

Lubrication Order for Tank, Combat, Full-Tracked: 105-MM Gun, M48A5

TM 9-2350-258-20

Operator's Manual for Tank, Combat, Full-Tracked: 105-MM Gun, M48A5

TM 9-2350-258-20-1

Organizational Maintenance Manual for Tank, Combat, Full-Tracked: 105-MM Gun, M48A5, Hull

TM 9-2350-258-20-2

Organizational Maintenance Manual for Tank, Combat, Full-Tracked: 105-MM Gun, M48A5, Turret

TM 9-2350-258-20P-1

Organizational Maintenance Repair Parts and Special Tools List for Tank, Combat, Full-Tracked: 105-MM Gun, M48A5, Hull

f. The illustrations in this manual are identical to those published in TM 9-2350-258-34P-2. Only those parts assigned the third position SMR maintenance code "C" or "O" are listed in the tabular listing; therefore, there may be a break in the item number sequence. Only illustrations containing organizational authorized items appear in this manual.

5. How to Locate Repair Parts.

a. *When National Stock Number or Part Number is Unknown:*

(1) *First.* Using the table of contents, determine the functional subgroup within which the repair part belongs. This is necessary since illustrations

are prepared for functional subgroups, and listing are divided into the same groups.

(2) *Second.* Find the illustration covering the functional subgroup to which the repair part belongs.

(3) *Third.* Identify the item on the illustration and note the illustration figure and item number of the item.

(4) *Fourth.* Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. *When National Stock Number or Part Number is Known.*

(1) *First.* Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. This index is in NSN sequence followed by a list of part numbers in alphameric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* After finding the figure and item number, locate the figure and item number in the repair parts list.

6. Abbreviations.

Abbreviations	Explanation
ADJ	adjust
ADPTR	adapter
AMMO	ammunition
APPROX	approximately
