

## STUDENT SET Book II (ADT) (645-55B40-004)

### 1. Student Guide Introduction.

a. The student guide is provided for each student attending the 55B40 TATS course. Some MOS specific lessons have been designated as non-resident and are to be completed by the student during the months of IDT and prior to attendance of the ADT phase. The ADT phase is primarily hands-on training that relates specifically to the MOS. The student set of books is divided up as shown below, and the student guide front matter is provided in each book. Become familiar with its content and bring it with you to ADT.

- **STUDENT SET Book I** (Non-resident): Contains Annex A, Annex B, and Annex C non-resident lessons, associated practical exercises and solutions, and required supplemental reading material.
- **STUDENT SET Book II** (ADT): Contains Annex A, Annex B, and Annex C ADT lessons, practical exercise worksheets, and handouts.

**Note:** The student will receive Student Set Books II at the ADT Location.

b. This guide provides you with an explanation of testing procedures, the course map, and an outline showing the preferred sequence of classes for the applicable phase/annex of instruction.

c. The U.S. TASS presenting this training will furnish you with a copy of the training schedule for this course. It is recommended that you post the schedule within this guide for your ready reference.

### 2. Administrative

a. This course is taught as a combination of individual, self-paced instruction, instructor-led practical exercises, and performance examinations conducted during ADT. The student uses Student Set Books I and II to accomplish the training objectives. He/she may work without supervision and without any further references or support materials or under the supervision of a Reserve Component Training Instructor (RCTI).

b. Students should address technical questions concerning this course material to their Reserve Unit's Training NCO or RCTI. If the Training NCO or RCTI, as appropriate, cannot directly provide a response, he/she will contact the course proponent for comment resolution. Once questions are resolved, the Training NCO or RCTI will provide resolution to the students.

c. General content questions and lesson/course feedback should be submitted via the Student Feedback Report found in each Student Set Booklet. Students should complete the Student Feedback Reports and return them to their unit Training NCO or RCTI.

## STUDENT SET Book II (ADT) (645-55B40-004)

d. During ADT, progress of the student will be measured by his/her ability to perform Practical Exercises of tasks as they are trained before going on to the next task or series of tasks. Retraining and retesting will be a continuous requirement of the instructor to ensure student proficiency. Written examinations scheduled throughout the course represent testing of the soldier's knowledge and understanding of the tasks within each annex.

### 3. Student Evaluation Procedures

a. Testing of students to assess and ensure proficiency in MOS tasks is a requirement for course completion. The course includes the following methods of evaluating the students' performance of the learning objectives:

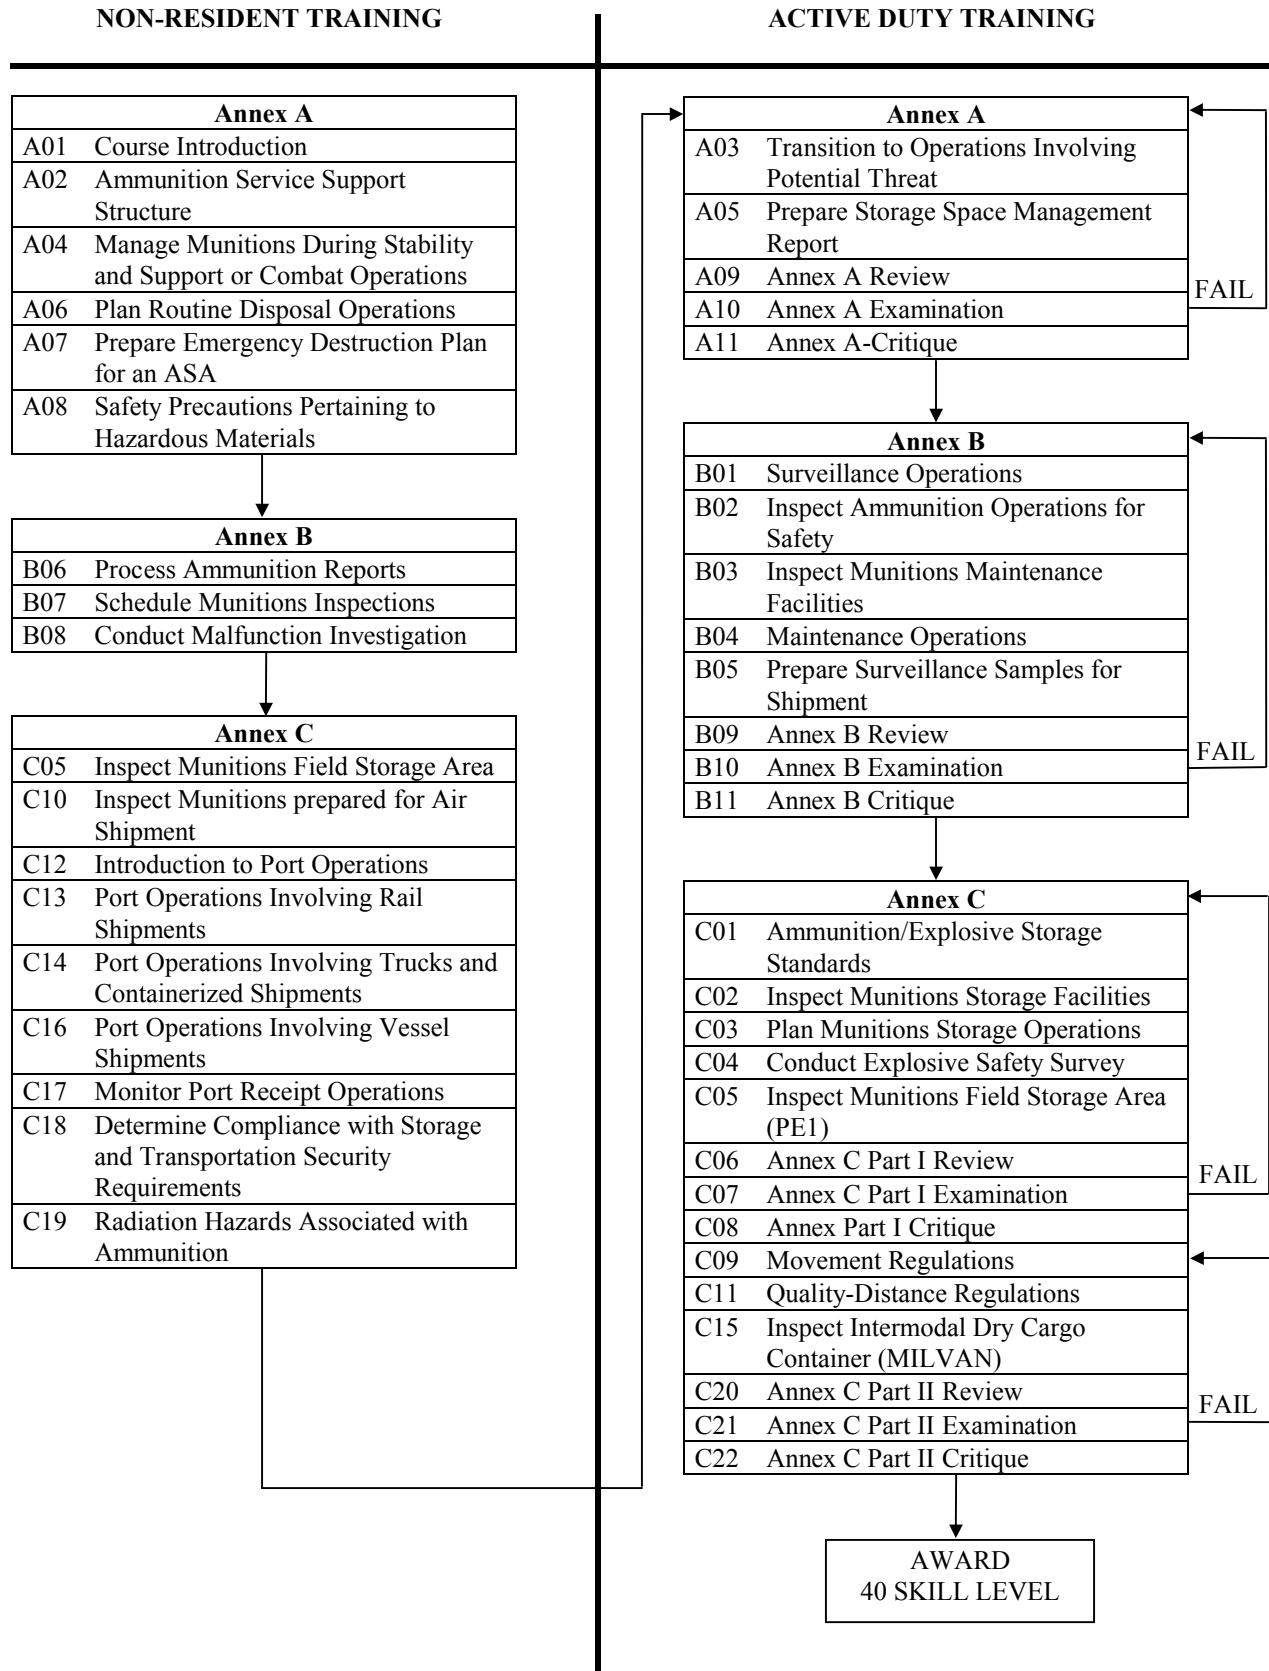

(1) Practical Exercises are incorporated into the course POI to instill confidence in the student by having him/her demonstrate their ability to perform the task(s). These Practical Exercises can be either hardware or non-hardware specific.

(2) Written Examinations are given at the completion of each annex to ensure the soldier has acquired the knowledge and skills necessary to complete his/her mission. The instructor maintains formal records as a basis for certifying the student's successful completion of course requirements. Retesting may be on a case-by-case basis, but will occur at times other than the scheduled academic hours. A student may be formally retested if he/she achieves less than 70 percent on the test. All examination material must be regarded as sensitive and handled accordingly.

### 4. Progress Control Records

Two progress control documents will be used by the instructor to track individual student and class performance. Instructors will use these forms to track performance during each lesson, as well as to record the end-of-annex testing results.
