Technical Manual

No. 1-1520-248-23P

HEADQUARTERS
DEPARTMENT OF THE ARMY
Washington, D.C. 3 March 2000

**AVIATION UNIT AND INTERMEDIATE MAINTENANCE
REPAIR PARTS AND SPECIAL TOOLS LISTS
(INCLUDING DEPOT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS)
FOR
HELICOPTER, OBSERVATION, OH-58D
NSN 1520-01-125-5476**

Current as of 16 April 2001

REPORTING OF ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve these procedures, please let us know. Mail your letter or DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual directly to: Commander, U.S. Army Aviation and Missile Command, ATTN: AMSAM-MMC-MA-NP, Redstone Arsenal, AL 35898-5230. You may also submit your recommended changes by E-mail directly to ls-lp@redstone.army.mil in the format provided in the back of this manual immediately preceding the hard copy 2028. DA Form 2028s may also be faxed to DSN 788-6546 or Commercial FAX 205-842-6546. A reply will be furnished to you.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

IV	NATIONAL STOCK NUMBER AND PART NUMBER INDEX		
	Numerical Stock Number Listing	I-1	
	Alphanumeric Part Number Listing	I-87	

1. Scope.

This manual lists repair parts; special tools; test, measurement, and diagnostic equipment (TMDE); and other support equipment required for operation and performance of Aviation Unit Maintenance (AVUM). Aviation Intermediate Maintenance (AVIM), and depot maintenance of the Helicopter, Observation, OH-58D.

2. General.

This Repair Parts and Special Tools List is divided into the following sections:

a. Section II. Repair Parts Lists. A list of repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. This section is arranged by functional group, usually in disassembly order, and listed in figure and item sequence. Items are indented when required to indicate the relationship to the next higher assembly. The illustrations in this section will appear immediately preceding each figure of text.

b. Section III. Special Tools List. A list of special tools, TMDE, and support equipment authorized for the performance of maintenance. This section, which is arranged in figure and item number sequence, contains Airframe Tools (figure numbers prefixed A), Flyaway items (figure numbers prefixed F), and Ground Support items (figure numbers prefixed G). The illustrations will appear prior to the text portion of each group.

c. Section IV. National Stock Number and Part Number Index. A list, in ascending National Item Identification Number (NIIN) sequence, of all national stock numbers appearing in the listings, followed by a list, in alphanumeric sequence, of all part numbers appearing in the listings. National stock number and part numbers are cross-referenced to each illustration figure and item number appearance.

3. Explanation of Columns.

The following provides an explanation of columns found in the tabular listings:

a. Illustration. This column is divided as follows:

(1) Figure Number. Indicates the figure number of the illustration in which the item is shown. An alpha designator in this column indicates a specific functional group as follows:

BULK - Functional Group 60.

(2) Item Number. The number used to identify each item called out in the illustration.

b. Source, Maintenance, and Recoverability Codes (SMR).

(1) Source Code. Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

Code	Application/Explanation
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PR	Support item, terminal or obsolete and replaced. No longer authorized for procurement. On hand assets may be issued until exhausted.

PZ	Support item, terminal or obsolete and replaced. No longer authorized for procurement. On hand assets may be issued until exhausted.
MO	Item to be manufactured or fabricated at Aviation Unit Maintenance (AVUM) level.
MF	Item to be manufactured or fabricated at Aviation Intermediate Maintenance (AVIM) level.
MD	Item to be manufactured or fabricated at the depot maintenance level.
AO	Item to be assembled at Aviation Unit Maintenance (AVUM) level.
AF	Item to be assembled at Aviation Intermediate Maintenance (AVIM) level.
AD	Item to be assembled at depot maintenance level.
XA	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB	Item is not procured or stocked. If not available through salvage, requisition.
XC	Installation drawing, diagram, instruction sheet, field source drawing, that is identified by manufacturer's part number.
XD	A support item that is not stocked. When required, item will be procured through normal supply channels, Using contractor and government entity (CAGE) and part number. Not obtainable from salvage/cannibalization.

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA, XC, XD, and aircraft support items as restricted by AR750-1.

(2) Maintenance Code. Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

Code	Application/Explanation
O	Support item is removed, replaced, used at the Aviation Unit Maintenance (AVUM) level.
F	Support item is removed, replaced, used at the Aviation Intermediate Maintenance (AVIM) level.
D	Support item is removed, replaced, used at depot, mobile depot or specialized repair activity only.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

Code	Application/Explanation
O	The lowest maintenance level capable of complete repair of the support item is the Aviation Unit Maintenance (AVUM) level.
F	The lowest maintenance level capable of complete repair of the support item is the Aviation Intermediate Maintenance (AVIM) level.
D	The lowest maintenance level capable of complete repair of the support item is the depot level, performed by depot, mobile depot or specialized repair activity.
L	Repair restricted to designated specialized repair activity.
Z	Nonreparable. No repair is authorized.

(3) Recoverability Code. Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Code	Application/Explanation
Z	Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.
O	Reparable item. When uneconomically repairable, condemn and dispose at Aviation Unit Maintenance (AVUM) level.
F	Reparable item. When uneconomically repairable, condemn and dispose at Aviation Intermediate Maintenance (AVIM) level.
D	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
L	Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
A	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. National Stock Number. Indicates the national stock number assigned to the item and will be used for requisitioning purposes.

d. Commercial and Government Entity (CAGE). The CAGE is a 5-digit numeric code listed in SB 708-48 which is used to identify the manufacturer, distributor, or Government agency, etc.

e. Part Number. Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements, to identify an item or range of items.

NOTE

When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.

f. Description. Indicates the Federal item name and any additional description required to identify the item. This column will also contain the Basis of Issue (BOI) for Special Tools, Ground Support, and Flyaway Equipment.

g. Unit of Measure (U/M). Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., EA, IN, PR, etc.). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. Quantity Incorporated in Unit. Indicates the quantity of the item required for one assembly only, including instances when similar assemblies are broken down together. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable, (e.g., shims, spacers, etc.). When parts are shown as attaching two or more items, the quantity of these parts are those necessary to attach only one of the items.

4. Special Information.

a. Usable on codes are shown in the description column. Uncoded items are applicable to all models.

b. Detailed manufacturing instructions for items source coded to be manufactured or fabricated (MO, MF, MD) are found in the applicable maintenance manuals. Bulk materials required to manufacture items are listed in the Bulk Material Group of this manual.

NOTE

Manufacture of repair parts assigned source codes other than MO, MF, or MD is prohibited.

- c. The following publications pertain to OH-58D helicopter and its components.

TM 11-1520-248-23 - Organizational, Intermediate and Depot Maintenance Manual: Electronic Configuration, Army Model OH-58D Helicopter.

TM 11-1520-248-23P - Organizational, Intermediate and Depot Maintenance Repair Parts and Special Tools List: Installation Items For Electronic Equipment in OH-58D Helicopter.

TM 55-1520-248-10 - Operator's Manual: Army Model OH-58D Helicopter.

TM 55-1520-248-23 - Aviation Unit and Aviation Intermediate Maintenance Manual: Army Model OH-58D Helicopter.

TM 55-2840-256-23P - Aviation Unit and Aviation Intermediate Maintenance Repair Parts and Special Tools List (including Depot Maintenance Repair Parts and Special Tools): Engine, Aircraft, Turbine (Allison) T703-AD-700.

TM 9-1240-778-23P - Aviation Unit and Aviation Intermediate Maintenance Repair Parts and Special Tools List for Mast Mounted Sight (MMS) (McDonnell-Douglas).

TM 1-1427-779-23P - Aviation Unit and Aviation Intermediate Maintenance Repair Parts and Special Tools List for Control Display System (CDS) (Sperry).

TM 9-4395-780-23P - Aviation Unit and Aviation Intermediate Maintenance Repair Parts and Special Tools List for Test Support System (TSS) (McDonnell-Douglas).

d. Oversize and undersize parts, such as studs, bushings, etc., are listed immediately after the standard size part and in the same indent. The degree of oversize or undersize is stated in the description. These parts will not have a required quantity shown.

e. When details of an assembly are shown on another text page, the description of that assembly is followed by a notation stating where these details can be located. Example: "400-040-050-101 Case Assembly. See figure 76 for breakdown." The parts that make up the Case Assembly will be found on the text listing for figure 76.

f. When a Source Control Number is requisitioned, several vendor items can be stocked under this number, allowing the most economical item on hand to be shipped.

g. Peculiar parts are designated by the use of usable on codes in the description column. The absence of a code in the description of a part indicates that the part is used on all configurations.

h. Directional references left and right are determined by standing at the rear of the aircraft or engine and looking forward.

i. Flyaway items are delivered with the aircraft from the contractor and will not be removed when the aircraft is transferred. The listing of "Flyaway Items" in the manual does not constitute a mandatory requirement for these items as inventoried property, unless such items are listed in Appendix C, Aircraft Inventory MasterGuide, TM55-1520-248-23.

j. The notation “WHEN EXH USE _____” in the description column of a part indicates that the part or assembly is authorized for continued use until supply is exhausted; then it is replaced by the new part or assembly as indicated in the notation.

k. The notation “USE _____ UNTIL EXH” in the description column of a part indicates that the part or assembly can be used interchangeably with an old part or assembly. When the supply of the old item is exhausted, the new item is used in its place.

l. The notation “REPLACED BY _____” in the description of a part indicates that the part is no longer authorized or has been discontinued. It is replaced by the new part or assembly as indicated in the notation.

m. The notation “REPLACES _____” in the description of a part indicates that the part is to be used in place of the part indicated in the notation.

5. How to Locate Repair Parts.

a. When National Stock Number or Part Number is Unknown:

(1) **First.** Using the table of contents, determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) **Second.** Find the illustration covering the assembly group to which the repair part belongs.

(3) **Third.** Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) **Fourth.** Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When National Stock Number or Part Number is Known:

(1) **First.** Using the Index of National Stock Numbers and Part Numbers, find the pertinent national stock number or part number. This index is in ascending National Item Identification Number (NIIN) sequence followed by a list of part numbers in ascending alphanumeric sequence, cross-referenced to the illustration figure number and item number.

(2) **Second.** After finding the figure and item number, locate the figure and item number in the repair parts list.

(3) **Supplementary Listing.** In the event of a supplemental index, reference should be made first to the supplemental indices for the latest changes in part numbers, national stock numbers and changes in figure and item numbers before referencing the basic index.

6. Abbreviations.

Abbreviations are in accordance with MIL-STD-12.

Index Number	Title	Figure Number
1.	Electrical Installation Mast Mounted Sight	160
2.	Hub and Blade Installation	78
3.	Hub Assembly	80
4.	Pylon Mount Installation	54
5.	Transmission and Mast Assembly	86
6.	Engine To Transmission Driveshaft Assembly	85
7.	Power Plant Installation	69
8.	Fairing Assembly, Forward	47
9.	Fuselage Assembly	3
10.	Wire Cutter Installation	40
11.	Landing Gear Assembly	67
12.	Drive System Installation	84
13.	Stabilizer Installation, Horizontal	46
14.	Tailboom Installation	41
15.	Tail Rotor Installation	82
16.	Fin Installation	45

2-1
a

In line 6 of paragraph 2-1a the manual states the engine has 6 cylinders. The engine on my set only has 4 cylinders. Change the manual to show 4 cylinders.

B1

4-3

Callout 16 on figure 4-3 is pointed at a bolt. In key to figure 4-3, item 16 is called a shim. Please correct one or the other
