- **A1.2.** All siting requests must be approved by the quarterly 15 AW Facilities Board (FB). Requests are necessary for planned construction and placement of both installed and organizational property remaining at any location for an extended period of time. Items such as structures, buildings, antennas, satellite dishes, fuel tanks, trailers, fences, barriers, storage units, parking lots...etc., must be located and conform with fire, safety, health, security (force protection) and environmental rules as well as the aesthetics of the surrounding area, structures, and facilities.
- **A1.3.** The following guidelines will be used whenever siting approval is requested by organizations in support of their requirements. Organizations are responsible for adhering to these guidelines.
 - A1.3.1. A BCE Work Request (AF Form 332) will accompany and initiate any request, which involves work such as the construction of a facility, additions or extensions to a facility, regardless of funding source. If a site request does not require an AF Form 332 the requestor will need to contact 15 CES/CECD Base Development.
 - A1.3.2. A Request for Environmental Impact Analysis (AF Form 813) will be completed prior to construction. The cost associated with an Environmental Impact Analysis for new facility construction is the requesting agency's responsibility.
 - A1.3.3. Projects supporting communications facilities must have a Program Support Letter
 - (PSL) outlining civil engineering support requirements as approved by the 15 AW Communications Systems Requirements Board (CSRB).
 - A1.3.4. Projects must, through use of a sketch, rendering or photograph, represent the completed project appearance and how it associates with the neighboring facilities.
 - A1.3.5. Every project must consider maintenance, landscaping, and interface with infrastructure such as utilities.
 - A1.3.6. Projects at Hickam AFB and Bellows AFS should take into account additional time and funding that may be needed for possible archaeological monitoring during construction.
 - A1.3.7. A representative from the requesting organization must be present at the 15 AW FB and Facilities Board Working Group (FBWG) to provide additional information if needed.
- **A1.4.** In some instances, particularly when the requesting agency is not within the 15 AW, siting approval will be contingent upon issuance of a lease and/or real estate agreement as well as a supporting Interser-

vice or Host-Tenant Support Agreement and may require HQ PACAF/XP approval prior to occupancy. In such cases, coordination must be accomplished with 15 CES/CERR and 15 LG/LGX, respectively. This coordination should be done with the request for siting approval. Facilitating this agreement may require preparation of an Environmental Baseline Survey; see AFI 32-7066 for additional information procedures. Funding for this survey is the responsibility of the requesting agency.

- **A1.5.** Siting requests must be submitted at least one month prior to the meeting date in order to be processed in time for the next scheduled meeting. A schedule of upcoming FB and FBWGs can be found at the 15 CES/CECD Base Development Webpage. Early input will ensure prompt review and processing.
- **A1.6.** If your organization requires assistance in the processing of a siting request, please contact the Base Comprehensive Planner at 448-3321.
