Water Resources and Authorities  
INDICES OF  
INTERAGENCY AND INTERNATIONAL AGREEMENTS

1. Purpose. This pamphlet identifies selected interagency and international agreements on matters affecting responsibilities of the U.S. Army Corps of Engineers. This is not a complete list of all agreements that have been executed with others. Rather, it includes national or regional agreements; agreements that are unique or unusual; and/or agreements that have other significant characteristics. The agreements are grouped in four categories as follows: Federal Reimbursable (see Appendix A); Non-Federal Reimbursable (agreements with state and other non-Federal entities that are funding Corps support for services that are not readily available in the private sector) (see Appendix B); Cooperative non-reimbursable (agreements with other entities that identify areas of mutual concern and cooperation to avoid duplication of effort and ensure efficient use of resources) (see Appendix C); and International (reimbursable and cooperative agreements executed with other countries) (see Appendix D). Appendix E is a list of acronyms explained.

2. Applicability. This pamphlet applies to all HQUSACE elements and all USACE Commands.

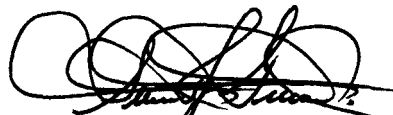

3. Distribution. Approved for public release, distribution is unlimited.

4. Guidance.

a. This pamphlet is used primarily for reference purposes. Most of the agreements listed do not have specific termination date but rather a requirement for notification of all parties to the agreement on intention to terminate. Copies of such notifications or extensions should be provided to CECS-I. Also, as new agreements are executed, copies of such agreements should be provided to CECS-I for the repository.

b. Any suggestions to make this pamphlet information more useful should be addressed to HQUSACE  
Attn: CECS-I.
