NET CONTROL

1. Enforce established circuit operating procedures.

3.	Enforce correct use of AUTHENTICATION.		false objectives, lure into ambushes, close communica- tions nets, designate false nuclear radiation areas and		change frequency, etc.
4.	Monitor and know the status of net and stations at all times.		otherwise cause a variety of troubles if a unit and/or operator is susceptible	4.	Operate with minimum power until jammed, then increase power.
5.	Observe the checklist set forth hereon.	3.	Know and stress that following correct authentication practices will prevent a unit operator's being victimized	5.	Shift to alternate frequencies and call signs where applicable and as directed.
6.	Realize that successful ICD attempts will depend largely on your observation and supervision of the net.	4.	Remember that undetected CD takes up valuable circuit time with the same effect as jamming, regardless of other	6.	Require authentication on all radio transmissions.
7.	Expect jamming / intercept / deception; know the means		actions it may cause.	7.	Use dummy antenna, when one is provided to tune up radio and radar transmitters.
l	and plans to negate same	5.	Report all ICD to the commander as soon as possible		

2. Know that ICD, when successful, can change (initiate,

delay, terminate or alter) missions, channelize forces,

confuse fire requests, priorities, allocations, establish

Operate on a random schedule. 10. ALWAYS BE SUSPICIOUS!

Report all compromises of EEFI.

2. Enforce circuit discipline.

SUSPICIOUS.

(ASAP).

6. Always be on guard for ICD attempts and always BE

RADIO / RADAR OPERATIONS

- 10. Expect jamming / deception. When experiencing operating.
 - jamming / deception, keep calm, keep trying, keep

Observe radio / radar discipline at all times.

Know and use the methods to minimize the effects of

jamming, detune, adjust BFO, BW, gain limiter, antenna

trim, adjust antenna direction, height, change location,

Keep oft the air, except when absolutely necessary, then

- - 11. Know that jamming may come in many forms, I.e.,

effectiveness of his jamming.

keep transmission brief.

noise, music, voice, CW, tones~, buzz, nuisance intrusions, bagpipes, etc. 12. Under NO circumstances let the. enemy know of the

- 1. Site radio / radar station and antenna to evade enemy jamming / intercept.
- 2. Learn to recognize enemy jamming / deception and report details to officer In charge (OIC).
- Be aware that ICD attempts are always possible, will appear authentic, and if successful can prove far more to friendly disastrous to friendly operations than jamming.

IMTATIVE COMMUNICATIONS DECEPTION (ICD)

(OPERATIONS)

- 13. Expect Imitative Deception; realize its potential.
- 14. Preplan messages prior to transmission.
- 15. Reduce operator distinguishing characteristics

AUTHENTICATION REQUIREMENTS

- 1. You suspect the enemy is on your net (Deception).
- 2. You tell a station to go to radio silence or ask it to break that silence. (Use the self authentication procedure for this.)
- 3. Someone challenges you to authenticate. (But, don't break radio silence to do this.)
- 4. You talk about enemy contact, give an early warning report or issue a follow-up report. (This rule applies even though you used a brevity list.)
- 5. You transmit directions which affect the tactical situation, such as "Change locations", "Shift fire"," Change frequencies" or "Turn off the radio".
- You cancel a message by radio or visual means, and the other station cannot recognize you
- It is the first transmission, or you resume transmitting after a long period

- 8. You transmit to someone who is under radio listening silence.
- 9. You are authorized to transmit a classified message in the clear.
- 10. You transmit a message without getting a response.
