## PREFACE

The purpose of this mission training plan (MTP) is to provide a descriptive, performance-oriented training guide to assist leaders in training their units. This MTP aligns with and is part of the United States (US) Army training and tactical doctrine program. It contains tasks that support military police (MP) functions outlined in proponent doctrinal manuals. Unit leaders use their mission essential task list (METL) to identify which collective tasks in this MTP that must be trained. Each unit is expected to train, as a minimum, to the standards of the training and evaluation outlines (T&EOs) in this MTP. Standards for training may be made more difficult, but may not be lowered.

This MTP applies to the Digital MP Company (Heavy Division) table of organization and equipment (TOE) 19333F000.

The proponent of this publication is Headquarters (HQ), US Army Training and Doctrine Command (TRADOC). Submit changes for improving this publication on Department of the Army (DA) Form 2028 (Recommended Changes to Publications and Blank Forms) and forward it to Commander, United States (US) Army Maneuver Support Center, ATTN: ATZT-DT-WF-M, Building 3200, Directorate of Training Development, 320 MANSCEN Loop, Suite 210, Fort Leonard Wood, Missouri 65473-8929.

Unless this publication states otherwise, masculine nouns and pronouns do not refer exclusively to men.

## CHAPTER 1

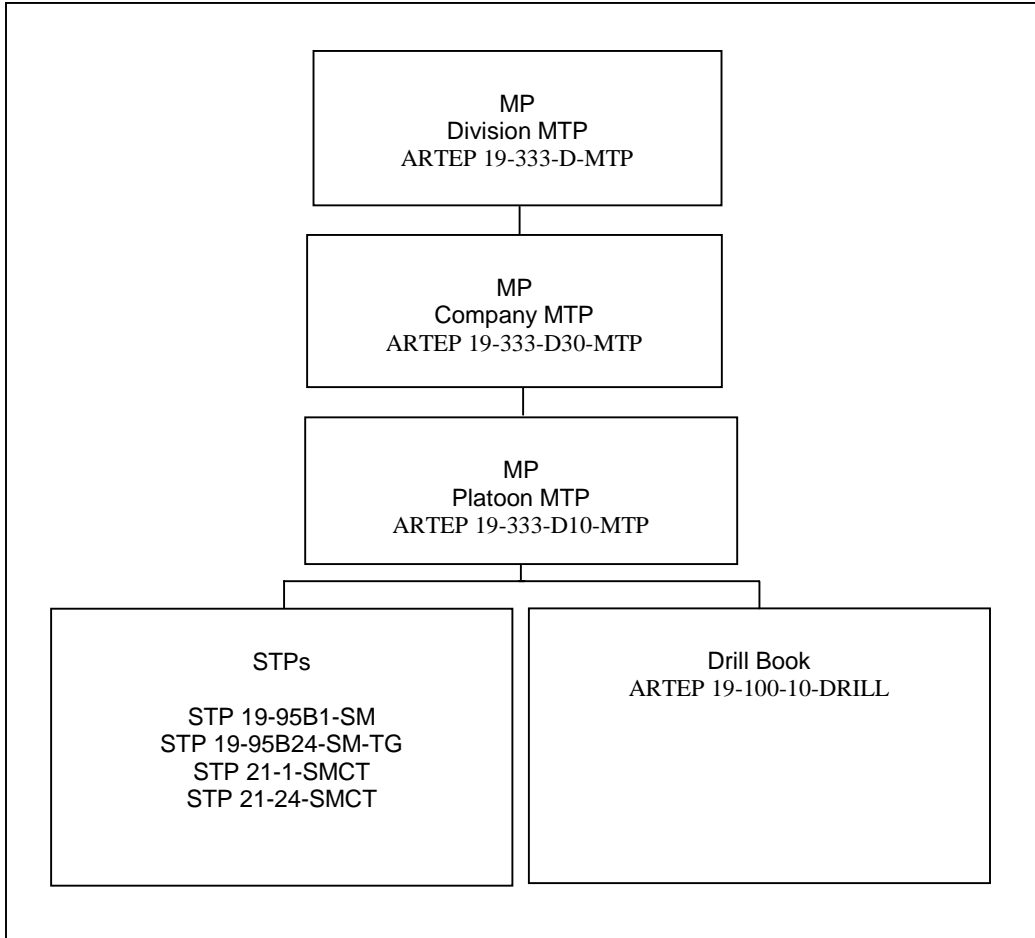

### Unit Training

1-1. General. This MTP is designed to provide you with a tactical training and evaluation program for your company. It provides guidance on how to train and the key missions on which to train. The specific details of your training program will depend on many factors, including the following:

- a. Unit METL.
- b. Training directives and guidance established by the chain of command.
- c. Training priorities of your unit.
- d. Training resources and areas available.

1-2. Supporting Material. This MTP describes a mission-oriented company training program. The unit training program includes the following:

- a. Army Training and Evaluation Program (ARTEP) 19-333-D-MTP. This manual describes the mission and tasks for the digital-division provost marshal (PM) section.
- b. ARTEP 19-333-D10-MTP. This manual describes the mission and tasks for the division and echelons above corps (EAC) combat support (CS) digital MP platoon.
- c. ARTEP 19-333-D30-MTP. This manual describes the mission and tasks for the division and EAC CS digital MP company.
- d. ARTEP 19-100-10-Drill. These drills are used by company commanders and platoon leaders to train skills that must be sustained by the unit.
- e. Soldier training publications (STPs) for the appropriate military occupational specialty (MOS) and skill levels.
- f. Officer education system (OES) task list for company commanders and platoon leaders. This relationship is illustrated in Figure 1-1.

**Figure 1-1. MTP Echelon Relationship Diagram**

1-3. Contents. This MTP is organized into six chapters.

a. Chapter 1, Unit Training, provides the explanation and organization of this MTP. It explains how to use this MTP in establishing an effective training program.

b. Chapter 2, Training Matrix, shows the relationship between missions and collective tasks.

c. Chapter 3, Mission Outline, presents a graphic portrayal of the relationship between the unit's critical mission and the subordinate tasks inherent to that mission.

d. Chapter 4, Training Exercises, consists of one field training exercise (FTX) and three situational training exercises (STXs). These exercises provide training information and a scenario to give you a preconstructed, flexible vehicle for sustaining the training of the key mission. They may also serve as part of an internal or external evaluation designed to have the company execute the mission in a tactical setting. These exercises may be modified to suit the needs of the unit.

e. Chapter 5, Training and Evaluation Outlines, provides the training criteria for tasks that the section must master to perform its critical missions. Each task is a T&EO that identifies tasks, steps, performance measures, individual and leader tasks, and opposing forces (OPFOR) countertasks. Each T&EO constitutes a part of one or more critical missions and, in various combinations, makes up larger training vehicles such as the FTX/STXs in Chapter 4.

f. Chapter 6, External Evaluation, provides instructions for planning, preparing, and executing an external evaluation.

g. Appendix A, shows a sample OPORD.

h. Appendix B, the Army's Combined Arms Training Strategy (CATS), provides the tools that enable the Army to focus and manage training in an integrated manner.

i. Appendix C, Metric Conversion Chart, shows how to convert US and metric measurements.

#### 1-4. Mission and Tasks.

a. The company has one critical mission--provide MP support during peace, conflict, and war. This MTP is composed of major activities that the company must execute to accomplish the mission. The following is a list of the functions for this unit:

- (1) Maneuver and mobility.
- (2) Area security.
- (3) Internment/resettlement.
- (4) Law and order.
- (5) Police intelligence.

b. Each of the tasks may be trained individually or jointly. They must be oriented on the training criteria provided in the T&EOs. Collective task T&EOs can be linked through a logical, tactical scenario to form an STX. Although an STX is mission-oriented, it will not by itself, result in training to mission proficiency. Various combinations of STXs can be used in developing an FTX for the company to practice its entire mission responsibility. Several STXs can be developed into an external evaluation designed by the next higher echelon to evaluate the company's ability to perform multiple missions under stress in a realistic environment.

c. Platoon tasks are trained in the same way as described above.

d. Leader tasks are individual tasks trained through STP and OES task lists, battle simulations, and execution of unit missions.

e. Individual tasks are mastered through training to the standards outlined in STPs. The T&EOs in Chapter 5 show the individual tasks that support collective task training.

#### 1-5. Training Principles. This MTP is based on the training principles in Field Manual (FM) 25-100.

a. Train as combined arms and services teams. Today's Army doctrine requires combined arms and services teamwork. When committed to battle, each unit must be prepared to execute combined arms and services operations without additional training or lengthy adjustment periods. Combined arms proficiency develops when teams train together. Leaders must regularly practice cross attachment of the full operational spectrum of combat, CS, and combat service support (CSS) units.

b. Train as you fight. The goal of combat level training is to achieve combat level standards. Every effort must be made to attain this difficult goal. Within the confines of safety and common sense, leaders must be willing to accept less than perfect results initially and demand realism in training. They must integrate such realistic conditions as smoke; noise; simulated nuclear, biological, and chemical (NBC) attacks; battlefield debris; loss of key leaders; and cold weather.

c. Use appropriate doctrine. Training must conform to Army doctrine. In units, new soldiers will have little time to learn nonstandard procedures. Therefore, units must train tasks to the Army standards contained in MTPs, drill books, soldier's manuals (SMs), regulations, and other training and doctrinal publications.

d. Use performance-oriented training. Units become proficient in the performance of critical tasks and missions by practicing the tasks and mission. Soldiers learn best by using a hands-on approach. Leaders are responsible for developing and executing a training strategy that will provide these opportunities. All training assets and resources, to include simulators, simulations, and training devices, must be included in the strategy.

e. Train to challenge. Tough, realistic, and intellectually and physically challenging training both excites and motivates soldiers and leaders. It builds competence and confidence by developing and honing skills. Challenging training inspires excellence by fostering initiative, enthusiasm, and eagerness to learn.

f. Train to sustain proficiency. Once individuals and units have trained to a required level of proficiency, leaders must structure collective and individual training plans to repeat critical task training at the minimum frequency necessary for sustainment. MTPs and individual training evaluation programs (ITEPs) are tools to help achieve and sustain collective and individual proficiency.

g. Train using multiechelon techniques. To use available time and resources most effectively, commanders must simultaneously train individuals, leaders, and units at each echelon in the organization during training events.

h. Train to maintain. Maintenance is a vital part of every training program. Maintenance training designed to keep equipment in the fight is as equally important to soldiers as being expert in its use. Soldiers and leaders are responsible for maintaining all assigned equipment in a high state of readiness in support of training or combat employment.

i. Make commanders the primary trainer. The leaders in the chain of command are responsible for the training and performance of their soldiers and units. They are the primary training managers and trainers for their organization.

1-6. Training Strategy. The training program developed and executed by a unit to train its critical mission to standards is a component of CATS. The purpose of the CATS is to provide direction and guidance on how the total Army will train and to identify the resources required to support that training. Central to the CATS is a series of proponent-generated unit and institutional strategies that describe the training and training resources required to train to standard. CATS is available via download from the Standard Army Training System (SATS) version 4.2 or higher. Other sources include the Reimer Digital Library (<http://www.adtdl.army.mil/atdls.htm>) and the Training and Doctrine Command (TRADOC) CATS website (<http://www.leavenworth.army.mil/ctd/CATS/>).

a. The unit training strategies central to CATS provide the commander with a descriptive "menu" for training, reflecting that while there is an optimal way to train to standard, it is unlikely that all units in the Army will have the exact mix of resources required to execute an optimal training strategy.

b. The unit's training strategy consists of three separate training strategies. When integrated with the training tasks found in the MTP, they form a comprehensive, focused training strategy that allows the unit to train to standard. The elements of the unit training strategy are--

(1) Maneuver strategy. The maneuver strategy is intended to provide a set of recommended training frequencies for key training events in a unit and depict the resources that are required to support the training events.

(2) Gunnery strategy. The gunnery strategy is built around weapons systems found in the unit. It is intended to provide an annual training plan and to depict resources required to support weapons training. Data for the gunnery strategy comes from the Standards in Training Commission (STRAC) manual or DA PAM 350-38. As a subset of the gunnery strategy, a training strategy is developed for each individual and crew-served weapon in the Army inventory. The website for information on firing tables can be found at <http://www.atsc.army.mil/atmd/strac/>.

(3) Soldier strategy. The soldier strategy provides an annual plan for training and maintaining skills at the individual level and lists the resources required to train a soldier.

c. A critical element in the unit training strategy is the identification of critical training gates. Critical training gates are defined as training events that must be conducted to standard before moving on to a more difficult or resource-intensive training event or task. Training gates follow the crawl-walk-run training methodology. For instance, if the unit training strategy calls for conducting an FTX, and an STX has been identified as a critical training gate for the FTX, the tasks contained in the STX must be trained to standard before conducting the FTX. Standards for all tasks must be clearly defined so that trainers can assess the preparedness of their soldiers or units to move on to more complex training events. The provision for critical training gates recognizes that the unit METL and the commander's assessment of the unit training status will determine the selection and timing of the collective training exercises in a specific unit training strategy.

d. When developing the company training plan, the commander identifies the training tasks from the MTP that are required to train the METL. Then, using the training strategies found in the MTP, the leader develops a battle-focused training plan by integrating and linking METL-derived MTP training tasks with CATS training events.

1-7. Conducting Training. This MTP is designed to facilitate planning, preparing, and conducting unit training as explained in the FM 25-series.

a. The commanders assign the mission and/or supporting tasks for which they intend to develop training based on the METL and the training guidance from higher headquarters (HQ). Trainers must plan and execute unit training in support of this guidance.

b. The commander reviews the mission outline in Chapter 3 to determine whether the FTX/STXs provided will support or can be modified to support his guidance. If they do not support the guidance or need to be modified, see the matrix in Chapter 2. This matrix provides a listing of all critical collective tasks that must be mastered to perform the mission.

c. Prioritize the tasks that need training. You will never have time to train everything. You must orient on the greatest challenges and the most difficult sustainment skills.

d. Integrate training tasks into the training schedule. Use the following procedures to do this:

- (1) List the tasks in the priority and frequency that they need to be trained.
- (2) Determine the amount of time required and how you can use multiechelon training to the best effect.
- (3) Determine where the training can take place.
- (4) Determine who will be responsible for what. The leader of the element being trained must always be involved.
- (5) Organize your needs into blocks of time and training vehicles.

e. Provide the task list to your commander. Once approved, the tasks selected are then scheduled on the unit training schedule.

f. Determine the things you need to conduct the training, such as ammunition, Multiple-Integrated Laser Engagement System (MILES) equipment, or a suitable training area. Coordinate for these requirements in sufficient time to ensure adequate acquisition and coordination.

g. Keep subordinate leaders informed, and oversee the training they are conducting. Ensure that standards are rigidly enforced. If they are not, your unit and soldiers will suffer.

1-8. Force Protection (Safety).

a. Safety is a component of force protection. Commanders, leaders, and soldiers use risk assessment and management to tie force protection into the military around the mission. Risk management assigns responsibility, institutionalizes the commander's review of operational safety, and leads to decision making at a level of command appropriate to the risk. The objective of safety is to help units protect combat power through accident prevention, which enables units to win fast and decisively with minimum losses. Safety is an integral part of all combat operations. Safety begins with readiness, which determines a unit's ability to perform its METL to standard. Readiness standards addressed during METL assessment are--

- (1) Soldiers with the self-discipline to consistently perform tasks to standard.
- (2) Leaders who are ready, willing, and able to enforce standards.
- (3) Training that provides skills needed for performance to standard.
- (4) Standards and procedures for tasks preference that are clear and practical.
- (5) Support for task preference, including equipment, personnel, maintenance, facilities, and services.

b. Risk management is a tool that addresses the causes (readiness shortcomings) of accidents. It assists commanders and leaders in not only identifying what the next accident is going to be, but it also helps identify who will have the next accident. Risk management is a way to put more realism into training without paying the price in deaths, injuries, or damaged equipment.

c. Safety demands total chain of command involvement in planning, preparing, executing, and evaluating training. The chain of command and their responsibilities are as follows:

- (1) Commanders.
  - (a) Seek optimum, not adequate, performance.
  - (b) Specify the risk they will accept to accomplish the mission.
  - (c) Select risk reductions provided by the staff.
  - (d) Accept or reject residual risk, based on the benefit to be derived.
  - (e) Train and motivate leaders at all levels to effectively use risk management concepts.

(2) Staff.

(a) Assist the commander in assessing risks and developing risk reduction options for training.

- (b) Integrate risk controls in plans, orders, METL standards, and performance measures.
- (c) Eliminate unnecessary safety restrictions that diminish training effectiveness.
- (d) Assess safety performance during training.
- (e) Evaluate safety performance during after-action reviews (AARs).

(3) Subordinate leaders.

they lead.

- (a) Apply consistently effective risk management concepts and methods to operations
- (b) Report risk issues beyond their control or authority to superiors.

(4) Individual soldiers.

- (a) Report unsafe conditions and acts and correct the situation when possible.
- (b) Establish a buddy system to keep a safety watch on one another.
- (c) Take responsibility for personal safety.
- (d) Work as team members.
- (e) Modify their own risk behavior.

d. Risk management is a five-step, cyclic process that is easily integrated into the decision-making process outlined in FM 101-5. The five steps are--

- (1) Identify hazards. Identify the most probable hazards for the missions.
- (2) Assess hazards. Analyze each hazard to determine the probability of its causing an accident and the probable effect of the accident. Identify control options to eliminate or reduce the hazard. The Army standard risk assessment matrix (Figure 1-2) is a tool for assessing hazards.
- (3) Make risk decisions. Weigh the risk against the benefits of performing the operations, accept no unnecessary risks, and make any residual risk decisions at the proper level of command.
- (4) Implement controls. Integrate specific controls into operations plans (OPLANS), operation orders (OPORDs), standing operating procedures (SOPs), and rehearsals. Communicate controls to the individual soldier.
- (5) Supervise. Determine the effectiveness of controls in reducing the probability and effect of identified hazards, to include follow-up reviews and AARs. Develop the lessons learned.

e. Fratricide is a component of force protection and is closely related to safety. Fratricide is the employment of weapons, with the intent to kill the enemy or destroy his equipment, that results in unforeseen and unintentional death, injury, or damage to friendly personnel or equipment. Fratricide is, by definition, an accident. Risk assessment and management are the mechanisms with which the incidence of fratricide can be controlled.

			HAZARD PROBABILITY				
			FREQUENT	PROBABLE	OCCASIONAL	REMOTE	IMPROBABLE
			A	B	C	D	E
E F F E C T	CATASTROPHIC	I	<b>EXTREMELY HIGH</b>		<b>HIGH</b>		
	CRITICAL	II		<b>HIGH</b>			
	MARGINAL	III		<b>MEDIUM</b>			<b>LOW</b>
	NEGLIGIBLE	IV		<b>LOW</b>			

<b>Effect</b>	
Catastrophic	Death or permanent total disability, system loss, and major property damage.
Critical	Permanent partial disability, temporary total disability in excess of 3 months, major system damage, significant property damage.
Marginal	Minor injury, lost workday accident, compensable injury or illness, minor system/property damage.
Negligible	First aid or minor supportive medical treatment, minor system impairment.
<b>Probability</b>	
Frequent	Individual soldier/item. All soldiers exposed or item inventory
Probable	Individual soldier/item All soldiers exposed or item inventory
Occasional	Individual soldier/item. All soldiers exposed or item inventory
Remote	Individual soldier/item All soldiers exposed or item inventory
Improbable	Individual soldier/item All soldiers exposed or item inventory
<b>Risk Levels</b>	
Extremely High	Loss of ability to accomplish mission.
High	Significantly degrades mission capabilities in terms of required mission standards.
Medium	Degrades mission capabilities in terms of required mission.
Low	Little or no impact on mission accomplishment.

**Figure 1-2. Army Standard Risk Assessment Matrix**

f. The primary causes of fratricide are--

(1) Direct-fire control plan failures. These occur when units fail to develop defensive and, particularly, offensive fire control plans.

(2) Land navigation failures. These result when units stray out of sector, report wrong locations, and become disoriented.

(3) Combat identification failures. These failures include gunners or pilots being unable to distinguish thermal and optical signatures near the maximum range of their sighting systems and units in proximity mistaking each other for the enemy under limited visibility conditions.

(4) Inadequate control measures. Units fail to disseminate the minimum maneuver and fire support control measures necessary to tie control measures to recognizable terrain or events. Paragraph 1 of an OPORD is the commander's opportunity to "paint the picture" of the battlefield, indicating the location and activities of adjacent friendly units.

(5) Reporting communication failures. Units at all levels face problems in generating timely, accurate, and complete reports as locations and tactical situations change.

(6) Weapons error. Lapses in individual discipline lead to charge errors, accidental discharges, mistakes with explosives and hand grenades, and similar incidents.

(7) Battlefield hazards. Unexploded ordnance, unmarked or unrecorded minefields, scatterable mines (SCATMINES), and booby traps litter the battlefield. Failure to mark, remove, record, or anticipate these hazards increases the risk of friendly casualties.

h. Fratricide results in unacceptable losses and increases the risk of mission failure. Fratricide undermines the unit's ability to survive and function. Units experiencing fratricide observe the following consequences:

- (1) Loss of confidence in unit leadership.
- (2) Increasing self-doubt among leaders.
- (3) Hesitation to use supporting combat systems.
- (4) Oversupervision of units.
- (5) Hesitation to conduct night operations.
- (6) Loss of aggressiveness during fire and maneuver.
- (7) Loss of initiative.
- (8) Disrupted operations.
- (9) General degradation of cohesiveness, morale, and combat power.

1-9. Environmental Protection. Protection of natural resources has continued to become an ever-increasing concern to the Army. The responsibility of all unit leaders is to decrease and, if possible, eliminate damage to the environment when conducting training. Environmental risk management parallels safety risk management and is based on the same philosophy as safety risk management. Environmental risk management consists of the following steps:

a. Identify hazards. Identify potential sources for environmental degradation during the analysis of mission, enemy, terrain, troops, time available, and civilian consideration (METT-TC) factors. This requires identification of environmental hazards. An environmental hazard is a condition with the potential for polluting air, soil, or water and/or destroying cultural and historical artifacts.

b. Assess the hazard. Analyze potential severity of environmental degradation using the environmental risk assessment matrix (Figure 1-3). Severity of environmental degradation is considered when determining the potential effect an operation will have on the environment. The risk impact value is defined as an indicator of the severity of environmental degradation. Quantify the risk to the environment resulting from the operation as extremely high, medium, or low, using the environmental risk assessment matrices.

- c. Make environmental risk decisions. Make decisions and develop measures to reduce high environmental risks.
- d. Brief the chain of command. Brief the chain of command, to include the installation environmental office if applicable, on proposed plans and pertinent high-risk environmental matrixes. Risk decisions are made at a level of command that corresponds to the degree of risk.
- e. Implement controls. Implement environmental protection measures by integrating them into plans, orders, SOPs, training performance standards, and rehearsals.
- f. Supervise. Supervise and enforce environmental protection standards.

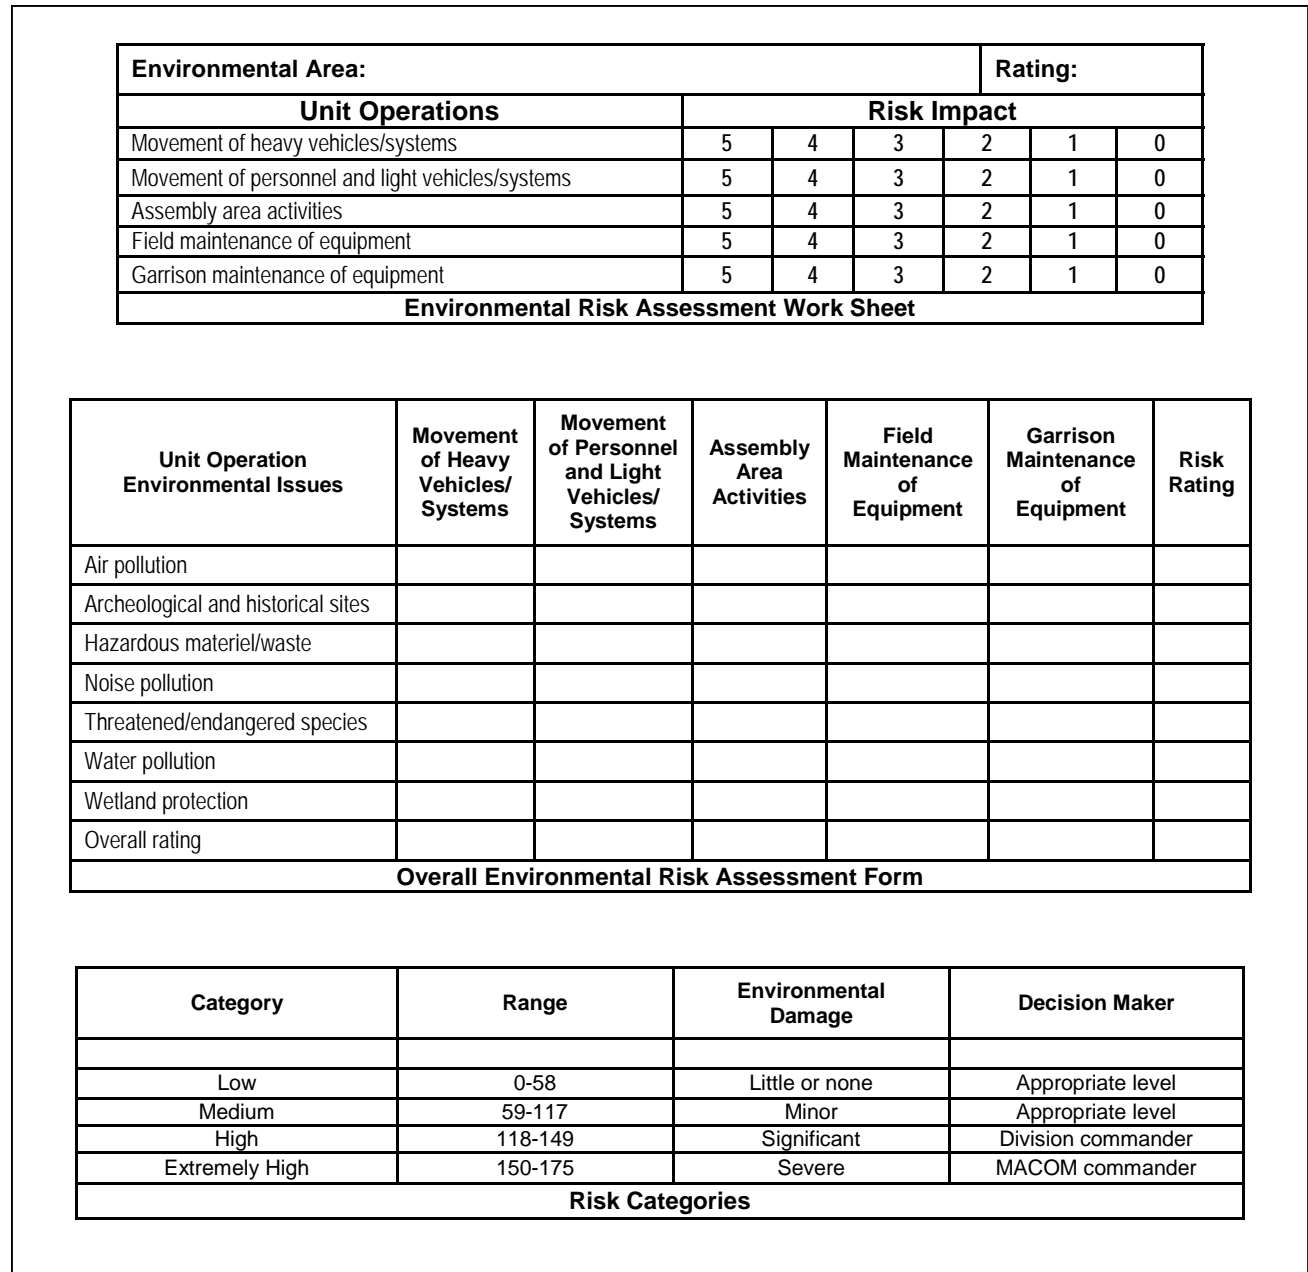

Figure 1-3. Environmental Risk Assessment Matrix

1-10. Evaluation. The T&EOs in Chapter 5 list the standards that you must meet for each task.

a. Evaluations can be internal or external. Internal evaluations are conducted at all levels and must be inherent in all training. External evaluations are usually more formal and are conducted by the HQ two levels above. (See Chapter 6 for more information on external evaluations.)

b. A critical weakness in training is the failure to evaluate each task every time it is executed. The ARTEP concept is based on simultaneous training and evaluation. Every training exercise provides the potential for evaluation feedback. Every evaluation is a training session. For this program to work, trainers and leaders must continually evaluate training as it is executed.

c. Leaders should emphasize direct, on-the-spot evaluations. Correcting poor performance during individual or small group training is easy to do. In higher-level exercises, it is usually feasible to do this with outside evaluators. Plan AARs at frequent, logical intervals during exercises (usually after the completion of a major event). This is a proven technique that will allow you to correct performance shortcomings while they are still fresh in everyone's mind. Also, it gets everyone involved and prevents the reinforcement of bad habits.

d. FM 25-101 provides detailed instructions for conducting an AAR. It also provides detailed guidance on coaching and critiquing during training.

1-11. Feedback. Recommendations for improvements of this ARTEP MTP are requested. Feedback will help ensure that this MTP answers the training needs of units in the field. Please send DA Form 2028 comments to the address reflected in paragraph 3 of the preface.

## CHAPTER 2

### Training Matrixes

2-1. General. The training Matrix assists the commander in planning the training of his unit's personnel.

2-2. Mission to Collective Tasks Matrix. This matrix (Figure 2-2) identifies the missions and their supporting collective tasks. The tasks are listed under the appropriate BOS, which are indicated by an X in the matrix. The BOS used in this matrix are defined in TRADOC Pam 11-9. A specific mission is trained by identifying collective tasks in the vertical column for the mission. Based on the proficiency of the unit, training is focused on operational weaknesses.

The mission identification table listed below (Figure 2-1) provides mission identification for the unit.

<b>Mission Identification Table</b>
<b><u>Mission Title</u></b>
<ul style="list-style-type: none"> <li>• AREA SECURITY OPERATIONS</li> <li>• INTERNMENT / RESETTLEMENT OPERATIONS</li> <li>• LAW &amp; ORDER OPERATIONS</li> <li>• MANEUVER &amp; MOBILITY SUPPORT OPERATIONS</li> <li>• POLICE INTELLIGENCE OPERATIONS</li> </ul>

**Figure 2-1. Mission Identification Table**

Collective Tasks	AREA SECURITY	INTERNMENT / RESETTLEMENT	LAW & ORDER	MANEUVER & MOBILITY SUPPORT
<b>Develop Intelligence</b>				
19-2-D112    Supervise Route Reconnaissance and Surveillance (Digital Military Police [MP] Company)	<b>X</b>			
19-2-D202    Supervise Area Reconnaissance Operations (Digital Military Police [MP] Company)	<b>X</b>			<b>X</b>
19-2-D203    Supervise Zone Reconnaissance Operations (Digital Military Police [MP] Company)	<b>X</b>			<b>X</b>

**Figure 2-2. Collective Task to Missions**

## CHAPTER 3

### Mission Outlines / Training Plans

3-1. General. The mission outline illustrates the relationship between the missions and their supporting tasks. The outline provides the trainer a diagram of the unit mission and sample STXs and the collective tasks that comprise them.

3-2. Mission Outline. Since unit training is mission-oriented training, the mission outline shows how training a task contributes to the unit's ability to perform its mission. The mission, Table 3-1, provides the leader with a visual outline of his unit's missions in a format that facilitates the planning and management of training.

## CHAPTER 4

### Training Exercise

4-1. General. Training exercises are used to train and practice the performance of collective tasks. This MTP contains one sample FTX and five sample STXs. They are designed to help develop, sustain, and evaluate the unit's mission proficiency. Table 4-1 lists the exercises.

**Table 4-1. Training Exercises**

Exercise Number	Exercise Title
FTX 19-2-E0001	Provide Military Police Support
STX 19-2-E0002	Route Regulation and Enforcement
STX 19-2-E0003	Security of Designated Assets
STX 19-2-E0004	Internment/Resettlement Operations
STX 19-2-E0005	MP Support to Combat Operations
STX 19-2-E0006	MP Support to Battlefield Movement

4-2. Field Training Exercise. The FTX is designed to provide a training method for the unit to train an entire mission. It provides a logical sequence for the performance of the tasks previously trained in the STXs. Missions provide FTX orientation for unit training.

4-3. Situational Training Exercises. STXs are short, scenario-driven, mission-oriented tactical exercises used to train a group of closely related collective tasks. The STX provides the information for training the missions that make up the critical wartime mission. The STX--

- a. Provides repetitive training on the mission.
- b. Allows training to focus on identified weaknesses.
- c. Allows the unit to practice the missions before conducting a critical wartime mission.
- d. Saves time by providing most of the information needed to develop a vehicle for training.

**DIGITAL MILITARY POLICE COMPANY (HEAVY)**  
**FTX 19-2-E0001**  
**PROVIDE MILITARY POLICE SUPPORT**

1. Objective. This FTX trains the collective, leader, and individual tasks in the company provide military police support.

2. Interface. This FTX supports the higher HQ FTX on MP support operations. The following STXs support this FTX:

- a. STX 19-2-E0002, Route Regulation and Enforcement.
- b. STX 19-2-E0003, Security of Designated Assets.
- c. STX 19-2-E0004, Internment/Resettlement Operations.
- d. STX 19-2-E0005, MP Support to Combat Operations.
- e. STX 19-2-E0006, MP Support to Battlefield Movement.

3. Training Enhancers.

a. The training matrix in Chapter 2 shows the collective tasks that must be mastered to perform the company mission. Training that will improve the company's ability to perform its mission are--

(1) Plan, control, and coordinate MP support operations. Training may be conducted in garrison and local training areas by one of the following methods:

(a) Classroom instruction on how to plan the exercise and how to implement unit standing operating procedures (SOPs). (See FM 25-4.)

(b) Map reconnaissance that assists in terrain analysis and war-gaming. (Use a map of the area where the STX is to be conducted.)

(c) Terrain board or sand table exercises that permit simulations or miniatures to be used to gain three-dimensional perspectives in war-gaming and/or rehearsing the exercise. (Model the terrain board or sand table to match the terrain where the exercise will be conducted.)

(d) CPX that is designed to train leaders and staff in the planning and execution of tactical operations without requiring the presence and participation of soldiers in the unit.

(e) Command field exercise (CFX) with fewer troops and vehicles, but with full command and control (C2), and CSS elements. It involves the commander, the staff, key elements of participating units, and communication between HQ.

(f) Tactical exercise without troops (TEWT) that allows leaders to train on the ground and practice land navigation, movement, reporting, and other leader actions. (See FM 25-4.)

(g) Communications exercise (COMEX) that gives leaders an opportunity to set up and test communications and to review procedures.

(h) Simulations and games that teach leaders as part of a continuing officer and noncommissioned officer (NCO) development program.

(2) Establish an aggressive spirit. An aggressive spirit can be established in a unit and its leaders by engaging in the following activities:

- (a) Aggressive unit sports and physical fitness programs.
- (b) Leader and individual confidence courses.
- (c) Appropriate training films that have a positive, aggressive effect on soldiers.
- (d) Awareness of the unit's heritage.

b. The exercise begins with the receipt of a warning order (WO) from higher HQ and ends upon the completion of the area damage control activities. Table 4-2 is a suggested scenario.

4. General Situation. An intermediate after-action review (AAR) should be held after completing each major operation in the FTX. The final AAR should be conducted once all evaluation notes are compiled. If necessary, run portions of the exercise again until you are satisfied with your company's performance. Table 4-2 provides a recommended sequence of events and time for each portion of the FTX.

**Table 4-2. Scenario for FTX 19-2-E0001**

Sequence	Event	Estimated Time
1	Administrative preparations	PreFTX
2	Receive WO	1 hr
3	Conduct mission analysis	1 hr
4	Supervise route reconnaissance	2 hrs
5	Supervise route signing and special circulation control measures	5 hrs
6	Supervise straggler and dislocated civilian control operations	3 hrs
7	Collect and report intelligence	*
8	Intermediate AAR	0.5 hr
9	Establish and maintain security for critical site	3.0 hrs
10	Supervise security of designated personnel	2 hrs
11	Supervise convoy security	2 hrs
12	Defend unit position	*
13	Secure CP or TOC	*
14	Intermediate AAR	0.5 hr
15	Support river crossing operations	5 hrs
16	Coordinate for passage of lines	0.5 hr
17	Supervise passage of lines	2 hrs
18	Cross contaminated area	*
19	Move tactically	*
20	Supervise unit passive air defense	*

21	Intermediate AAR	0.5 hr
22	Supervise a denial	2 hrs
23	Supervise a delay/withdrawal	2 hrs
24	Supervise screen for TCF and handoff battle to TCF	3 hrs
25	Intermediate AAR	0.5 hr
26	Construct prisoner holding area	2 hrs
27	Collect and process prisoners	3 hrs
28	Recon prisoner evacuation route	201 hr
29	Supervise prisoner evacuation via road march	1.5 hrs
30	Process captured documents and equipment	*
31	Collect and report intelligence	*
32	Supervise area damage control operations	3 hrs
33	Final AAR	3 hrs
Total time		49 hrs
<p>NOTES:</p> <ol style="list-style-type: none"> <li>* These tasks are integrated and evaluated throughout the exercise.</li> <li>Events will be trained to standard, not time. The time required to train an event will vary based on METT-TC and the training proficiency of the unit.</li> <li>Additional time will be required if great portions of the exercise are conducted at night or during other limited visibility.</li> </ol>		

5. Special Situation.

a. Your company is operational control (OPCON) to and in direct support of a corps, which has arrived in a new AO. The company receives the following fragmentary order (FRAGO) (Figure 4-1) to provide military police support operations.

b. There are substantial numbers of stragglers and dislocated civilians passing through the AO, which is causing congestion on the MSRs. A number of critical sites in the AO and EPW holding area need to be established. Your company is directed to provide military police support in the AO.

<p><b>FRAGMENTARY ORDER</b></p> <p>1. SITUATION.</p> <p>a. Enemy Forces. The enemy threat consists of company-size partisan guerrilla forces or reinforced squad-size special operations teams. They are expected to attempt to disrupt main supply route (MSR) movement within the next 48 hours and try to sabotage critical asset sites. Enemy artillery is capable of delivering nuclear, biological, chemical (NBC) munitions.</p> <p>b. Friendly Forces. Following a successful attack, the corps is currently in a defensive posture while preparing for future offensive operations.</p>
--

2. MISSION. (\_\_\_\_\_) Company supports MSR operations to allow rapid movement of military traffic in support of corps operations.

3. EXECUTION:

a. Concept of the operation. (See Overlay.)

(1) Intent. Maintain freedom of movement for authorized traffic on all MSRs within the area of operations (AOs) and secure critical asset sites.

(2) Fire support. Priority of fire goes to base/base cluster defense, then MSR security.

b. (Evaluated) company.

(1) Conduct route reconnaissance and surveillance along MSR(s).

(2) Upon approval of traffic control plan, conduct circulation control in the AO.

c. Coordinating instructions.

(1) Priority of movement on the MSRs—combat units, followed by support to combat units in contact (Class III, Class V, and Class VIII).

(2) MOPP Level 1 in effect.

(3) Forward all route reconnaissance overlays to this headquarters (HQ) not later than (date/time).

(4) Submit situation reports (SITREPs) to this HQ daily at 0600 hrs and 1800 hrs.

(5) Priority intelligence requirements (PIR).

- Landing zone (LZ)/drop zone (DZ) locations.
- Any information on possible enemy locations, size, and activity.
- Any reportable restrictions to the route.
- Any changes along MSR that may disrupt the movement of traffic.

**Figure 4-1. Example FRAGO for FTX 19-2-E0001**

- |   |
|---|
| <p>4. SERVICE SUPPORT. No change.</p> <p>5. COMMAND AND SIGNAL.</p> <p>a. Command.</p> <p>(1) The platoon CP will be located at (grid).</p> <p>(2) The higher HQ CP will be located at (grid).</p> <p>(3) Chain of command per standing operating procedure (SOP).</p> <p>b. Signal.</p> <p>(1) Signal operating instructions (SOI) in effect: KTV 1600C, time period 01.</p> <p>(2) Cipher/authentication system in effect: KTC 1400D.</p> |
|---|

**Figure 4-1. Example FRAGO for FTX 19-2-E0001 (continued)**

6. Support Requirements.

a. Minimum trainers and observers/controllers (O/Cs). The company commander, who is the trainer and primary evaluator, will conduct this exercise. If possible, there should be at least one other O/Cs for the unit. At least one other O/C is required with the OPFOR.

b. Vehicles and communication. All vehicles and radios organic to the company will be used. The OPFOR requires various vehicles to portray friendly military and dislocated civilian traffic on the MSR.

c. OPFOR/stragglers: These support personnel should be used in this exercise after the company demonstrates basic proficiency. The use of an OPFOR acting as stragglers will add realism, gauging the company's effectiveness in exercising the proper straggler control measures and indicating their ability to operate in a potentially stressful environment. One squad of OPFOR personnel acting as stragglers and dislocated civilians is sufficient for a company exercise. OPFOR can be mixed in with the dislocated civilians in this exercise after the unit has demonstrated basic proficiency.

d. Training area. An area of at least 4 by 15 kilometers is needed for route reconnaissance, MSR regulation and enforcement, and circulation control operations. The terrain should offer multiple sites and approaches to key areas. Using terrain that limits the leader to a geographical or school solution does not allow evaluation of the unit's ability to conduct a terrain analysis and select sites and routes best suited for the operation.

e. Additional equipment: This exercise requires the items listed in Table 4-3. Experience dictates that the training will also require additional 5-gallon water cans, fuel, flashlights with BA-30 batteries, basic-issue items (BII) for vehicles, and concertina wire. These items are intended as suggestions only. Local policy may not allow for the provision of all items.

**Table 4-3. Example Support Requirements for FTX 19-2-E0001**

<b>Ammunition</b>	<b>Quantity</b>		
5.56 mm, blank	240 rounds per M16 rifle		
5.56 mm, blank	240 rounds per M4 carbine		
5.56 mm, blank linked	400 rounds per M249 SAW		
Simulator, projectile, ground burst	20 for each exercise		
Simulator, hand grenade	20 for each exercise		
<b>Other Items</b>	<b>Quantity</b>		
Batteries, BA 200 (6 volt)	48 each		
Batteries, BA 3090 (9 volt)	560 each		
<b>MILES Equipment</b>	<b>Company</b>	<b>Evaluators</b>	<b>OPFOR</b>
M16/M4 system	182		1 platoon
Controller guns		2	
Small-arms alignment fixture		1	

f. Commanders should consult local regulations and range control requirements to ensure compliance with restrictions such as constraints on pyrotechnics.

7. T&EO Sequence. Table 4-4 lists the T&EOs from Chapter 5 used to evaluate this FTX.

**Table 4-4. Example T&EOs for FTX 19-2-E0001**

<b>Task</b>	<b>Numbers</b>
Supervise Route Reconnaissance and Surveillance	19-2-D112
Supervise Route Regulation and Enforcement	19-2-D122
Supervise Straggler Control Operations	19-2-D132
Supervise Dislocated Civilian Control Operations	19-2-D131
Coordinate Intelligence Collecting and Reporting	19-2-D521
Supervise Security of Critical Sites	19-2-D224
Supervise Security of Designated Persons	19-2-D213
Supervise Convoy Security	19-2-D204
Defend Unit Position	07-3-C212.19-D307
Supervise Security of Command Post	19-2-D225
Supervise MP Response to Base/Base Cluster Defense	19-2-D222
Coordinate MP Support to River Crossing	19-2-D111
Coordinate MP Support to Passage of Lines	19-2-D124
Supervise Screening Operations	19-2-D232
brdrSupervise Movement to Contact	19-2-D229

Cross a Chemically Contaminated Area	03-3-C226.19-D315
Use Unit Passive Air Defense Measures	44-1-C220.19-D442
Direct a Delay	19-2-D207
Supervise a Battle Handoff to a Tactical Combat Force (TCF)	19-2-D228
Supervise EPW Holding Area	19-2-D313
Supervise EPW/CI Collecting Processing and Evacuating	19-2-D314
Supervise Evacuation of US Military Prisoners	19-2-D322
Process Captured Documents and Equipment	19-2-D315
Supervise Area Damage Control Operations	19-2-D212

**DIGITAL MILITARY POLICE COMPANY (HEAVY)**  
**STX 19-2-E0002**  
**ROUTE REGULATION AND ENFORCEMENT**

1. Objective. This STX trains the collective, leader, and individual tasks in the company's operation of route regulation and enforcement.

2. Interface. This STX supports the training in the company FTX. This STX is supported by STX 19-3-E0001 in MTP 19-333-D10.

3. Training.

a. Guidance. The trainer should review the individual, leader, and collective tasks that are performed during the STX. He should also determine which tasks may require initial or refresher training.

(1) Individual training. Individual training should be on the SM tasks required to support this STX. Use the individual task to the collective task matrix in Chapter 2 as a source for the individual tasks. Individual training is based on the tasks, conditions, and standards in the 95B SMs. Training should be hands-on and performance-oriented. During training, leaders assess soldier proficiency by evaluating task performance against the SM standards and provide feedback to the soldiers. The individual training and evaluation program includes common task tests and the commander's evaluations.

(2) Collective training. Collective training should be on the collective tasks required for the STX. As with individual tasks, drills should be trained to standard with feedback provided as required. Collective tasks that could support this STX and mission, as well as other missions, are shown in the mission outline in Chapter 3.

(3) Leader training. Leader training should be on the leader tasks required for the exercise and on the individual tasks. Leader tasks are trained in the same manner as stated above or by one or all of the following methods. When materials and facilities are not available, innovation is the answer. Do not limit training to the methods listed.

(a) Classroom discussion on how to plan the exercise and how to implement unit SOPs. (See FM 25-4.)

(b) Map reconnaissance that assists in terrain analysis and war-gaming. (Use a map of the area where the STX is to be conducted.)

(c) Terrain board or sand table exercises that permit simulations or miniatures to be used to gain three-dimensional perspectives in war-gaming and/or rehearsing the exercise. (Model the terrain board or sand table to match the terrain where the exercise will be conducted.)

(d) TEWTs that allow leaders to train on the ground and practice land navigation, reporting, and other leader actions. (See FM 25-4.)

(e) Simulations and games that teach leaders as part of a continuing officer and NCO development program.

(f) Training extension courses that present information and demonstrate how tasks are performed to standard using audiovisual equipment. (See DA Pamphlet [Pam] 350-100.)

b. Training tips. Tips for training and general instructions on how to prepare for and accomplish the STX are as follows:

(1) Know the requirements for circulation control. (See FMs 3-19.1 and 3-19.4.)

(2) Conduct a leader's reconnaissance of the training area to ensure that you do not make time-consuming mistakes.

(3) Review the standards for the T&EOs that support this exercise.

(4) Remember that this STX may be conducted--

(a) With ammunition, without ammunition, or with live fire. The use of ammunition is encouraged to add more realism to the exercise.

(b) With or without MILES. MILES provides better feedback and should be used if available.

(c) Under all environmental conditions, both day and night, with or without NBC.

(5) Adhere to the following Instructions for this STX:

(a) This STX should be initially trained and rehearsed slowly, on open terrain, during good visibility, and with frequent explanations and critiques by leaders. This simple execution, combined with a thorough prebrief and "chalk talks," constitutes the "crawl" stage of STX training. The "walk" phase of the STX entails conducting the training at closer to normal rates, on more difficult terrain, and with stops for explanation and critique only when problems occur (except for planned AARs). This STX is executed under conditions as close to those expected in combat as possible for the "run" phase. This exercise is conducted at full speed after conducting building block training to reach the run level of execution.

(b) The T&EO standards for this exercise are in Chapter 5. These standards must be met to obtain the maximum benefits from the training.

(c) This exercise should be conducted on a recurring basis to sustain proficiency; however, since many of the T&EOs in this STX will be trained in other STXs, practice may occur through integration rather than retraining the STX.

(d) The OPFOR should closely replicate enemy forces in size and strength to realistically portray threat activities. (See Chapter 6.)

(e) At least one evaluator should be assigned to control OPFOR activities. The evaluator evaluates OPFOR actions, ensures realism, stresses safety, and assesses losses and damages. If the OPFOR is in groups for several simultaneous actions, additional OPFOR evaluators or controllers are necessary. (See Chapter 6.)

(f) OPFOR units should look and fight like potential enemy to help soldiers understand threat tactics, doctrine, and weapon systems. (See Chapter 6.)

(g) OPFOR should be trained prior to the exercise to ensure the synchronization of events.

c. Training enhancers. This STX requires the company to perform route regulation and enforcement. This STX--

(1) May be conducted under limited visibility conditions, both with and without night vision devices (NVDs), when basic proficiency is attained for the tasks.

(2) May be conducted under increasing MOPP levels as proficiency increases.

(3) Should also be conducted in a military operations on urbanized terrain (MOUT) environment.

(4) Can be expanded or altered as proficiency increases. The following T&EOs may be added as time becomes available or the training emphasis changes:

- 19-2-D401, Conduct Law and Order Operations.
- 19-2-D411, Coordinate Law Enforcement Patrol Operations.
- 19-2-D412, Provide MP Investigative Support.

4. General Situation. This exercise begins with the receipt of a FRAGO by the company. The final AAR should be conducted after completing the MSR regulation and enforcement control and straggler and dislocated civilian control operations. The final AAR should be conducted after all evaluation notes are compiled. If necessary, run portions of the exercise again until you are satisfied with your company's performance. Table 4-5 provides a recommended sequence of events and time for each portion of the STX.

**Table 4-5. Scenario for STX 19-2-E0002**

Sequence	Event	Estimated Time
1	Receive the mission and begin troop-leading procedures	2 hrs
2	Supervise route reconnaissance	3 hrs
3	Supervise route signing and route regulation enforcement	3 hrs
4	Intermediate AAR	.5 hr
5	Planning step	.5 hr
6	Supervise straggler and dislocated civilian control operations	2 hr
7	Final AAR	1 hr
8	Conduct and report intelligence final AAR	*
Total time		12 hrs
NOTES: 1. * These tasks are integrated and evaluated throughout the exercise. 2. Events will be trained to standard, not time. The time required to train an event will vary based on METT-TC and the training proficiency of the unit. 3. Additional time will be required if great portions of the exercise are conducted at night or during other limited visibility.		

5. Special Situation.

a. The company receives a FRAGO (Figure 4-2) to provide support to maneuver and mobility support (MMS) operations.

b. There are a substantial number of stragglers and dislocated civilians passing through the AO, which is causing congestion on the MSRs. Your company is directed to control the stragglers and dislocated civilians in the AO.

**FRAGMENTARY ORDER**

1. SITUATION.

a. Enemy Forces. The enemy threat consists of company-size partisan guerrilla forces or reinforced squad-size special operations teams. They are expected to attempt to disrupt main supply route (MSR) movement within the next 48 hours. Enemy artillery is capable of delivering nuclear, biological, chemical (NBC) munitions into the corps rear area

b. Friendly forces. Following a successful attack, the division is currently in a defensive posture while preparing for future offensive operations.

2. MISSION. (\_\_\_\_\_) Company supports MSR operations to allow rapid movement of military traffic in support of brigade operations.

3. EXECUTION:

a. Concept of the operation. (See overlay.)

(1) Intent. The purpose of the operation is to ensure freedom of movement for all authorized traffic on all MSRs within the area of operations (AOs). We will do so by enforcing MSR regulations and placement of route signs. The end state will be defined as unimpeded movement of military traffic along MSRs to include clearance of MSRs from stragglers and refugees.

(2) Fire Support. Priority of fire goes to base/base cluster defense, then MSR security.

b. (Evaluated) Company.

(1) Supervise route reconnaissance and surveillance along MSR(s).

(2) Upon approval of traffic control plan, conduct circulation control in AO.

c. Coordinating Instructions.

(1) Priority of movement on the MSRs--combat units, followed by support to combat units in contact (Class III, Class V, Class VIII).

(2) MOPP Level 1 in effect.

(3) Forward all route reconnaissance overlays to this headquarters(HQ) not later than (date/time).

(4) Submit situation reports (SITREPs) to this HQ daily at 0600 hrs and 1800 hrs.

(5) Priority intelligence requirements (PIR).

- Landing zone (LZ)/drop zone (DZ) locations.
- Any information on possible enemy locations, size, and activity.
- Any reportable restrictions to the route.
- Any changes along MSR that may disrupt the movement of traffic.

**Figure 4-2. Example FRAGO for STX 19-2-E0002**

4. SERVICE SUPPORT. No change.
5. COMMAND AND SIGNAL.
  - a. Command.
    - (1) The platoon command post (CP) will be located at (grid).
    - (2) The higher HQ CP will be located at (grid).
    - (3) Chain of command per the standing operating procedure (SOP).
  - b. Signal.
    - (1) Signal operating instructions (SOI) in effect: KTV 1600C, time period 01.
    - (2) Cipher/authentication system in effect: KTC 1400D.

**Figure 4-2. Example FRAGO for STX 19-2-E0002 (continued)**

6. Support Requirements.

a. Minimum trainers and O/Cs. The company commander, who will be the trainer and primary evaluator, will conduct this exercise. If possible, there should be at least two O/Cs for the unit. At least one other O/C is required with the OPFOR.

b. Vehicles and communications. Vehicles and communications equipment organic to the unit are used. The OPFOR requires various vehicles to portray friendly military and dislocated civilian traffic on the MSR.

c. OPFOR, stragglers, and dislocated civilians. These support personnel should be used in this exercise after the company demonstrates basic proficiency. The use of OPFOR personnel acting as stragglers or dislocated civilians adds realism, gauging the company's effectiveness in exercising the proper straggler control measures and indicating their ability to operate in a potentially stressful environment. One squad of OPFOR personnel acting as stragglers and dislocated civilians is sufficient for a company exercise.

d. Training area. An area of at least 4 by 15 kilometers is needed for route reconnaissance, MSR regulation and enforcement, and circulation control operations. The terrain should offer multiple sites and approaches to key areas. Using terrain that limits the leader to a geographical or school solution does not allow evaluation of the unit's ability to conduct a terrain analysis and select sites and routes best suited for the operation.

e. Additional equipment: This exercise requires the equipment listed in Table 4-6. Experience dictates that the training will also require additional 5-gallon water cans, fuel, flashlights with BA-30 batteries, BII for vehicles, and concertina wire. These items are intended as suggestions only. Local policy may not allow for the provision of all items. Commanders should consult local regulations and range control requirements during coordination to ensure compliance with restrictions such as constraints on pyrotechnics.

**Table 4-6. Example Support Requirements for FTX 19-2-E0002**

<b>Ammunition</b>	<b>Quantity</b>		
5.56 mm, blank	240 rounds per M16 rifle		
5.56 mm, blank	240 rounds per M4 carbine		
5.56 mm, blank linked	400 rounds per M249 SAW		
Simulator, projectile, ground burst	20 for each exercise		
Simulator, hand grenade	20 for each exercise		
<b>Other Items</b>	<b>Quantity</b>		
Batteries, BA 200 (6 volt)	48 each		
Batteries, BA 3090 (9 volt)	560 each		
<b>MILES Equipment</b>	<b>Company</b>	<b>Evaluators</b>	<b>OPFOR</b>
M16/M4 system	182		1 platoon
Controller guns		2	
Small-arms alignment fixture		1	

7. T&EO Sequence. Table 4-7 lists the T&EOs from Chapter 5 used to evaluate this STX.

**Table 4-7. T&EOs Used in Evaluating STX 19-2-E0002**

<b>Task</b>	<b>Number</b>
Supervise Route Reconnaissance and Surveillance	19-2-D112
Supervise Route Regulation and Enforcement	19-2-D122
Supervise Straggler Control Operations	19-2-D132
Supervise Dislocated Civilian Control Operations	19-2-D131
Coordinate Intelligence Collecting and Reporting	19-2-D521

**DIGITAL MP COMPANY (HEAVY)**  
**STX 19-2-E0003**  
**SECURITY OF DESIGNATED ASSETS**

1. Objective. This STX trains the collective, leader, and individual tasks in the company's operation of providing security to designated assets.

2. Interface. This STX supports the training in the company FTX. This STX is supported by STX 19-3-E0002 in MTP 19-333-D10.

3. Training.

a. Guidance. The trainer should review the individual, leader, and collective tasks that are performed during the STX. He should also determine which tasks may require initial or refresher training.

(1) Individual training. Individual training should be on the SM tasks required to support this STX. Use the individual task to the collective task matrix in Chapter 2 as a source for the individual tasks. Individual training is based on the tasks, conditions, and standards in the 95B SMs. Training should be hands-on and performance-oriented. During training, leaders assess soldier proficiency by evaluating task performance against the SM standards and provide feedback to the soldiers. The individual training and evaluation program includes common task tests and the commander's evaluations.

(2) Collective training. Collective training should be on the collective tasks required for the STX. As with individual tasks, drills should be trained to standard with feedback provided as required. Collective tasks that could support this STX and mission, as well as other missions, are shown in the mission outline in Chapter 3.

(3) Leader training. Leader training should be on the leader tasks required for the exercise and on the individual tasks. Leader tasks are trained in the same manner as stated in above or by one or all of the following methods. When materials and facilities are not available, innovation is the answer. Do not limit training to the methods listed.

(a) Classroom discussion on how to plan the exercise and how to implement unit SOPs. (See FM 25-4.)

(b) Map reconnaissance that assists in terrain analysis and war gaming. (Use a map of the area where the STX is to be conducted.)

(c) Terrain board or sand table exercises that permit simulations or miniatures to be used to gain three-dimensional perspectives in war-gaming and/or rehearsing the exercise. (Model the terrain board or sand table to match the terrain where the exercise will be conducted.)

(d) TEWTs that allow leaders to train on the ground and practice land navigation, movement, reporting, and other leader actions. (See FM 25-4.)

(e) Simulations and games that teach leaders as part of a continuing officer and NCO development program.

(f) Training extension courses that present information and demonstrate how tasks are performed to standard using audiovisual equipment. (See DA Pam 350-100.)

b. Training tips. Tips for training and general instructions on how to prepare for and accomplish the STX are as follows:

(1) Know the requirements for area security operations. (See FMs 3-19.1 and 3-19.4.)

(2) Conduct a leader's reconnaissance of the training area to ensure that you do not make time-consuming mistakes.

(3) Review the standards for the T&EOs that support this exercise.

(4) Remember that this STX may be conducted--

(a) With or without blank ammunition. The use of blank ammunition is encouraged to add more realism to the exercise.

(b) With or without MILES. MILES provides better feedback and should be used if available.

(c) Under all environmental conditions, both day and night, with or without NBC.

(5) Adhere to the following instructions for this STX:

(a) This STX should be initially trained and rehearsed slowly, on open terrain, during good visibility, and with frequent explanations and critiques by leaders. This simple execution, combined with a thorough prebrief and "chalk talks," constitutes the "crawl" stage of STX training. The "walk" phase of this STX entails conducting the training at closer to normal rates, on more difficult terrain, and with stops for explanation and critique only when problems occur (except for planned AARs). This STX is executed under conditions as close to those expected in combat as possible for the "run" phase. This exercise is conducted at full speed after conducting building block training to reach the run level of execution.

(b) The T&EO standards for this exercise are in Chapter 5. These standards must be met to obtain the maximum benefits from the training.

(c) This exercise should be conducted on a recurring basis to sustain proficiency; however, since many of the T&EOs in this STX will be trained in other STXs, practice may occur through integration rather than retraining the STX.

(d) The OPFOR should closely replicate enemy forces in size and strength to realistically portray threat activities. (See Chapter 6.)

(e) At least one evaluator should be assigned to control OPFOR activities. The evaluator evaluates OPFOR actions, ensures realism, stresses safety, and assesses losses and damages. If the OPFOR is in groups for several simultaneous actions, additional OPFOR evaluators or controllers are necessary. (See Chapter 6.)

(f) OPFOR units should look and fight like potential enemy to help soldiers understand threat tactics, doctrine, and weapon systems. (See Chapter 6.)

(g) OPFOR training should occur prior to the exercise to ensure the synchronization of events.

c. Training enhancers. This STX requires the company to perform area security operations. This STX--

(1) May be conducted under limited visibility conditions, both with and without NVDs, when basic proficiency is attained for the tasks.

(2) May be conducted under increasing MOPP levels as proficiency increases.

(3) Should also be conducted in a MOUT environment.

(4) Can be expanded or altered as proficiency increases. The following T&EOs may be added as time becomes available or the training emphasis changes:

- 19-2-D208, Supervise Security of a Conventional Ammunition Supply Point
- 19-2-D210, Supervise Pipeline Security
- 19-2-D211, Coordinate Railway Security
- 19-2-D209, Conduct Security for Deep Water Port

4. General Situation. This exercise begins with the receipt of a FRAGO by the company. The final AAR should be conducted once all evaluation notes are compiled. If necessary, run portions of the exercise again until you are satisfied with your company's performance. Table 4-8 provides a recommended sequence of events and time for each portion of the STX.

**Table 4-8. Scenario for STX 19-2-E0003**

Sequence	Event	Estimated Time
1	Receive the mission and begin troop-leading procedures	1 hr
2	Establish and maintain security for a critical site	2 hrs
3	Conduct an intermediate AAR	.5 hr
4	Conduct security of a designated person	2 hrs
5	Conduct convoy security	2 hrs
6	Conduct final AAR	1 hr
7	Defend unit position	*
8	Secure CP or TOC	*
Total time:		8.5 hrs
NOTES: 1. * These tasks are integrated and evaluated throughout the exercise. 2. Events will be trained to standard, not time. The time required to train an event will vary based on METT-TC and the training proficiency of the unit. 3. Additional time will be required if great portions of the exercise are conducted at night or during other limited visibility.		

5. Special Situation.

a. The commander has designated a facility within the AOs as critical. The company receives a FRAGO directing it to provide security for the facility (Figure 4-3).

b. A senior official will be entering the AO for a tour, to include a visit to the facility secured by the company. The company is directed to provide security for the person while he is in the AO.

c. A convoy of critical supplies will be leaving the facility. The company is directed to provide the convoy security from the facility to the point where the convoy will be assumed by another MP escort element.

**FRAGMENTARY ORDER**

**1. SITUATION.**

a. **Enemy Forces.** The enemy threat consists of company-size guerrilla forces or reinforced squad-size special operations teams. They are expected to sabotage and disrupt critical logistical and command and control (C<sup>2</sup>) facilities within the next 48 hours. The enemy is capable of inserting battalion-sized airborne or air assault teams into the area of operation (AO). Enemy artillery is capable of delivering nuclear, biological, chemical (NBC) munitions within the corps rear area.

b. **Friendly forces.** The corps is currently preparing to launch a major defensive operation. Combat units and critical supplies will be moving through the AO toward assembly areas.

**2. MISSION.** (\_\_\_\_\_) Company provides security for the critical facility, designated convoys, and designated persons. The company allows the undisrupted buildup of troops and supplies in support of corps operations.

**3. EXECUTION:**

a. **Concept of the Operation.** (See overlay.)

(1) **Intent.** The purpose of the mission is to prevent critical operations and facilities from being delayed, disrupted, or destroyed by enemy activity. The method will be through detailed planning and implementation of security measures to ensure corps operations are not hindered.

(2) **Fire support.** Priority of fire goes to base/base cluster defense, then area security.

b. **(Evaluated) Company.**

(1) Establish and maintain security of the designated facility.

(2) Provide security escort for convoys and persons within the AO.

c. **Coordinating Instructions.**

(1) MOPP Level 1 in effect.

(2) Priority intelligence requirements (PIR).

- Enemy sightings and locations.
- Type and number of enemy weapons.
- Identification of enemy units.

**4. SERVICE SUPPORT.** No change.

**Figure 4-3. Example FRAGO for STX 19-2-E0003**

5. COMMAND AND SIGNAL.

a. Command.

- (1) The platoon command post (CP) will be located at (grid).
- (2) The higher HQ CP will be located at (grid).
- (3) Chain of command per standing operating procedure (SOP).

b. Signal.

- (1) Signal operation instructions (SOI) in effect: KTV 1600C, time period 01.
- (2) Cipher/authentication system in effect: KTC 1400D.

**Figure 4-3. Example FRAGO for STX 19-2-E0003 (continued)**

6. Support Requirements.

a. Minimum trainers and O/Cs. The company commander, who will be the senior internal trainer and O/C, will conduct this exercise. If possible, there should be at least two O/Cs for the unit. At least one other O/C is required with the OPFOR.

b. Vehicles and communication. All vehicles and radios organic to the company will be used.

c. OPFOR. The OPFOR ground force should be at least one reinforced squad or platoon.

d. Training area. An area of at least 4 by 15 kilometers is needed. The terrain should offer multiple sites and approaches to key areas. Using terrain that limits the leader to a geographical or school solution does not allow for evaluation of the unit's ability to conduct a terrain analysis and select sites and routes best suited for the operation. A structure or collection of structures to be used as the critical facility is preferred for training realism but may be simulated if necessary.

e. Additional equipment: This exercise requires the items listed in Table 4-9. Experience dictates that the training will also require additional 5-gallon water cans, fuel, flashlights with BA-30 batteries, Blls for vehicles, and concertina wire. These items are intended as suggestions only. Local policy may not allow for the provision of all items.

**Table 4-9. Example Support Requirements for FTX 19-2-E0003**

<b>Ammunition</b>	<b>Quantity</b>		
5.56 mm, blank	240 rounds per M16 rifle		
5.56 mm, blank	240 rounds per M4 carbine		
5.56 mm, blank linked	400 rounds per M249 SAW		
Simulator, projectile, ground burst	20 for each exercise		
Simulator, hand grenade	20 for each exercise		
<b>Other Items</b>	<b>Quantity</b>		
Batteries, BA 200 (6 volt)	48 each		
Batteries, BA 3090 (9 volt)	560 each		
<b>MILES Equipment</b>	<b>Company</b>	<b>Evaluators</b>	<b>OPFOR</b>
M16/M4 system	182		1 platoon
Controller guns		2	
Small-arms alignment fixture		1	

7. T&EO Sequence. Table 4-10 lists the T&EOs from Chapter 5 used to evaluate this STX.

**Table 4-10. T&EOs Used in Evaluating STX 19-2-E0003**

<b>Task</b>	<b>Number</b>
Supervise Security of a Critical Site	19-2-D224
Supervise Security for Designated Persons	19-2-D211
Supervise Convoy Security	19-2-D204
Supervise Security of a Command Post	19-2-D225
Supervise Base/Base Cluster Coordination/Defense	19-2-D222

**DIGITAL MILITARY POLICE COMPANY (HEAVY)**  
**STX 19-2-E0004**  
**INTERNMENT/RESETTLEMENT OPERATIONS**

1. Objective. This STX trains the collective, leader, and individual tasks for the company's operation of internment and resettlement operations.

2. Interface. This STX supports the company FTX. This STX is supported by STX 19-3-E0003 in MTP 19-333-D10.

3. Training.

a. Guidance. The trainer should review the individual, leader, and collective tasks that are performed during the STX. He should also determine which tasks may require initial or refresher training.

(1) Individual training. Individual training should be on the SM tasks required to support this STX. Use the individual task to the collective task matrix in Chapter 2 as a source for the individual tasks. Individual training is based on the tasks, conditions, and standards in the 95B SMs. Training should be hands-on and performance-oriented. During training, leaders assess soldier proficiency by evaluating task performance against the SM standards and provide feedback to the soldiers. The individual training and evaluation program includes common tasks test and the commander's evaluations.

(2) Collective training. Collective training should be on the collective tasks required for the STX. As with individual tasks, drills should be trained to standard with feedback provided as required. Collective tasks that could support this STX and mission, as well as other missions, are shown in the mission outline in Chapter 3.

(3) Leader training. Leader training should be on the leader tasks required for the exercise and on the individual tasks. Leader tasks are trained in the same manner as stated above or by one or all of the following methods. When materials and facilities are not available, innovation is the answer. Do not limit training to the methods listed.

(a) Classroom discussion on how to plan the exercise and how to implement unit SOPs. (See FM 25-4.)

(b) Map reconnaissance that assists in terrain analysis and war gaming. (Use a map of the area where the STX is to be conducted.)

(c) Terrain board or sand table exercises that permit simulations or miniatures to be used to gain three-dimensional perspectives in war-gaming and/or rehearsing the exercise. (Model the terrain board or sand table to match the terrain where the exercise will be conducted.)

(d) TEWTs that allow leaders to train on the ground and practice land navigation, movement, reporting, and other leader actions. (See FM 25-4.)

(e) Simulations and games that teach leaders as part of a continuing officer and NCO development program.

(f) Training extension courses that present information and demonstrate how tasks are performed to standard using audiovisual equipment. (See DA Pam 350-100.)

b. Training tips. Tips for training and general instructions on how to prepare for and accomplish the STX are as follows:

(1) Know the requirements for resettlement/resettlement (IR) operations. (See FMs 3-19.1 and 3-19.4.)

(2) Conduct a leader's reconnaissance of the training area to ensure that you do not make time-consuming mistakes.

(3) Review the standards for the T&EOs that support this exercise.

(4) Remember that this STX may be conducted--

(a) With or without blank ammunition. The use of blank ammunition is encouraged to add more realism to the exercise.

(b) With or without MILES. MILES provides better feedback and should be used if available.

(c) Under all environmental conditions, both day and night, with or without NBC.

(5) Adhere to the following instructions for this STX:

(a) This STX should be initially trained and rehearsed slowly, on open terrain, during good visibility, and with frequent explanations and critiques by leaders. This simple execution, combined with a thorough prebrief and "chalk talks," constitutes the "crawl" stage of STX training. The "walk" phase of this STX entails conducting the training at closer to normal rates, on more difficult terrain, and with stops for explanation and critique only when problems occur (except for planned AARs). This STX is executed under conditions as close to those expected in combat as possible for the "run" phase. This exercise is conducted at full speed after conducting building block training to reach the run level of execution.

(b) The T&EO standards for this exercise are in Chapter 5. These standards must be met to obtain the maximum benefits from the training.

(c) This exercise should be conducted on a recurring basis to sustain proficiency; however, since many of the T&EOs in this STX will be trained in other STXs, practice may occur through integration rather than retraining the STX.

(d) The OPFOR should closely replicate enemy forces in size and strength to realistically portray threat activities. (See Chapter 6.)

(e) At least one evaluator should be assigned to control OPFOR activities. The evaluator evaluates OPFOR actions, ensures realism, stresses safety, and assesses losses and damages. If the OPFOR is in groups for several simultaneous actions, additional OPFOR evaluators or controllers are necessary. (See Chapter 6.)

(f) OPFOR units should look and fight like potential enemy to help soldiers understand threat tactics, doctrine, and weapon systems. (See Chapter 6.)

(g) OPFOR personnel should be trained prior to the exercise to ensure the synchronization of events.

c. Training enhancers. This STX requires the company to perform IR operations. The STX--

(1) May be conducted under limited visibility conditions, both with and without NVDs, when basic proficiency is attained for the tasks.

(2) May be conducted under increasing MOPP levels as proficiency increases.

(3) Should be conducted in a MOUT environment.

4. General Situation. This exercise begins with the receipt of a FRAGO by the company and ends after the prisoners have been evacuated from the AO. The final AAR should be conducted once all evaluation notes are compiled. If necessary, run portions of the exercise again until you are satisfied with your company's performance. Table 4-11 provides a recommended sequence of events and time for each portion of the STX.

**Table 4-11. Scenario for STX 19-2-E0004**

Sequence	Event	Estimated Time
1	Receive the mission and begin troop-leading procedures	1 hr
2	Construct prisoner collecting point	2 hrs
3	Process prisoners	03 hrs
4	Perform intermediate AAR	.5 hrs
5	Reconnoiter the prisoner evacuation route	1 hr
6	Conduct prisoner evacuation via road march	1.5 hrs
7	Perform final AAR	1 hr
8	Process captured documents and equipment	*
9	Collect and report intelligence	*
Total time		10
NOTES: 1. * These tasks are integrated and evaluated throughout the exercise. 2. Events will be trained to standard, not time. The time required to train an event will vary based on METT-TC and the training proficiency of the unit. 3. Additional time will be required if great portions of the exercise are conducted at night or during other limited visibility.		

5. Special Situation.

a. The company has captured enemy soldiers and interned civilians in its AO. The company receives a FRAGO (Figure 4-4) to conduct IR operations.

b. Concurrently with the I/R mission, the company receives US military prisoners to be kept in custody and evacuated for trial.

c. The company captures enemy documents and equipment while conducting operations.

### FRAGMENTARY ORDER

#### 1. SITUATION.

a. Enemy Forces. The enemy force is currently withdrawing after suffering heavy losses. Their current strength is estimated to be at 50 percent. Intelligence estimates indicate that the enemy is not prepared to counterattack at this time. Their morale is low and many soldiers are beginning to surrender to friendly forces.

b. Friendly Forces. Following a successful attack, the corps continues its pursuit of the enemy force.

2. MISSION. (\_\_\_\_\_) Company conducts internment operations. Commencing not later than (date/time) for the purpose of securing enemy prisoners of war/civilian internees (EPWs/CIs) and freeing combat units to continue their pursuit.

#### 3. EXECUTION:

a. Concept of the Operation. (See overlay.)

(1) Intent. The purpose of this operation is to collect, process, and evacuate EPW/CI. We will use the STRESS techniques during this operation. The end state will be proper collecting, processing and evacuating of EPWs/CIs without injury to friendly or enemy forces.

(2) Fire Support. Priority of fire goes to base/base cluster defense.

b. (Evaluated) Company

(1) Establish and operate collection point in the vicinity (grid) commencing (date/time).

(2) Coordinate transportation to and from maneuver units.

(3) Coordinate for evacuation.

c. Coordinating Instructions.

(1) All EPWs/CIs will be handled according to the Geneva Convention.

(2) MOPP Level 1 in effect.

(3) All coordination for transportation will go through the headquarters (HQ).

(4) Priority intelligence requirements (PIR)

- Number and type of weapons confiscated.
- Unit designation of captured soldiers.

4. SERVICE SUPPORT. No change.

**Figure 4-4. Example FRAGO for STX 19-2-E0004**

5. COMMAND AND SIGNAL.

a. Command.

- (1) The platoon command post (CP) will be located at (grid).
- (2) The higher HQ CP will be located at (grid).
- (3) Chain of command per the standing operating procedure (SOP).

b. Signal.

- (1) Signal operation instructions (SOI) in effect: KTV 1600C, time period 01.
- (2) Cipher/authentication system in effect: KTC 1400D

**Figure 4-4. Example FRAGO for STX 19-2-E0004 (continued)**

6. Support Requirements.

a. Minimum trainers and O/Cs. The company commander, who will be the senior internal trainer and O/C, will conduct this exercise. If possible, there should be at least two O/Cs for the unit. At least one other O/C is required with the OPFOR.

b. Vehicles and communications. Vehicles and communications equipment organic to the unit are used.

c. OPFOR. The OPFOR should be at least a reinforced squad or platoon, capable of disrupting company IR operations. OPFOR will also portray EPW, CI, and U.S. military prisoners.

d. Training area. An area of at least 4 by 15 kilometers is needed for prisoner collection and evacuation operations. The terrain should offer multiple sites and approaches to key areas. Using terrain that limits the leader to a geographical or school solution does not allow evaluation of the unit's ability to conduct a terrain analysis and select sites and routes best suited for the operation.

e. Additional equipment: This exercise requires the items listed in Table 4-12. Experience dictates that the training will also require additional 5-gallon water cans, fuel, flashlights with BA-30 batteries, BILs for vehicles, and concertina wire. These items are intended as suggestions only. Local policy may not allow for the provision of all items.

f. Commanders should refer to location regulation and range control requirements during coordination procedures to ensure compliance with restrictions such as constraints and pyrotechnics.

**Table 4-12. Example Support Requirements for FTX 19-2-E0004**

<b>Ammunition</b>	<b>Quantity</b>		
5.56 mm, blank	240 rounds per M16 rifle		
5.56 mm, blank	240 rounds per M4 carbine		
5.56 mm, blank linked	400 rounds per M249 SAW		
Simulator, projectile, ground burst	20 for each exercise		
Simulator, hand grenade	20 for each exercise		
<b>Other Items</b>	<b>Quantity</b>		
Batteries, BA 200 (6 volt)	48 each		
Batteries, BA 3090 (9 volt)	560 each		
<b>MILES Equipment</b>	<b>Company</b>	<b>Evaluators</b>	<b>OPFOR</b>
M16/M4 system	182		1 platoon
Controller guns		2	
Small-arms alignment fixture		1	

7. T&EO Sequence. Table 4-13 lists the T&EOs from Chapter 5 used to evaluate this STX.

**Table 4-13. T&EOs Used in Evaluating STX 19-2-E0004**

<b>Task</b>	<b>Number</b>
Supervise Field Detention Facility (FDF) for US Military Prisoners (EAC/EAD)	19-2-D323
Supervise EPW Holding Area	19-2-D313
Supervise Dislocated Civilian Control Operations	19-2-D131
Supervise Route Reconnaissance and Surveillance	19-2-D112
Supervise Evacuation of US Military Prisoners	19-2-D322
Process Captured Documents and Equipment	19-2-D315
Coordinate Intelligence Collecting and Reporting	19-2-D521

**DIGITAL MILITARY POLICE COMPANY (HEAVY)**  
**STX 19-2-E0005**  
**MILITARY POLICE SUPPORT TO COMBAT OPERATIONS**

1. Objective. This STX trains the collective, leader, and individual tasks for the company's support to combat operations.

2. Interface. This STX supports the company FTX. This STX is supported by STX 19-3-E0004 in MTP 19-333-D10.

3. Training.

a. Guidance. The trainer should review the individual, leader, and collective tasks that are performed during the STX. He should also determine which tasks may require initial or refresher training.

(1) Individual training. Individual training should be on the SM tasks required to support this STX. Use the individual task to the collective task matrix in Chapter 2 as a source for the individual tasks. Individual training is based on the tasks, conditions, and standards in the 95B SMs. Training should be hands-on and performance-oriented. During training, leaders assess soldier proficiency by evaluating task performance against the SM standards and provide feedback to the soldiers. The individual training and evaluation program includes common tasks test and the commander's evaluations.

(2) Collective training. Collective training should be on the collective tasks required for the STX. As with individual tasks, drills should be trained to standard with feedback provided as required. Collective tasks that could support this STX and mission, as well as other missions, are shown in the mission outline in Chapter 3.

(3) Leader training. Leader training should be on the leader tasks required for the exercise and on the individual tasks. Leader tasks are trained in the same manner as stated above or by one or all of the following methods. When materials and facilities are not available, innovation is the answer. Do not limit training to the methods listed.

(a) Classroom discussion on how to plan the exercise and how to implement unit SOPs. (See FM 25-4.)

(b) Map reconnaissance that assists in terrain analysis and war gaming. (Use a map of the area where the STX is to be conducted.)

(c) Terrain board or sand table exercises that permit simulations or miniatures to be used to gain three-dimensional perspectives in war-gaming and/or rehearsing the exercise. (Model the terrain board or sand table to match the terrain where the exercise will be conducted.)

(d) TEWTs that allow leaders to train on the ground and practice land navigation, movement, reporting, and other leader actions. (See FM 25-4.)

(e) Simulations and games that teach leaders as part of a continuing officer and NCO development program.

(f) Training extension courses that present information and demonstrate how tasks are performed to standard using audiovisual equipment. (See DA Pam 350-100.)

b. Training tips. Tips for training and general instructions on how to prepare for and accomplish the STX are as follows:

(1) Know the requirements for battle handover, delay, withdrawal, screening, and denial. (See FMs 3-19.1 and 3-19.4.)

(2) Conduct a leader's reconnaissance of the training area to ensure that you do not make time-consuming mistakes.

(3) Review the standards for the T&EOs that support this exercise.

(4) Remember that this STX may be conducted--

(a) With or without blank ammunition. The use of blank ammunition is encouraged to add more realism to the exercise.

(b) With or without MILES. MILES provides better feedback and should be used if available.

(c) Under all environmental conditions, both day and night, with or without NBC.

(5) Adhere to the following instructions for this STX:

(a) This STX should be initially trained and rehearsed slowly, on open terrain, during good visibility, and with frequent explanations and critiques by leaders. This simple execution, combined with a thorough prebrief and "chalk talks," constitutes the "crawl" stage of STX training. The "walk" phase of this STX entails conducting the training at closer to normal rates, on more difficult terrain, and with stops for explanation and critique only when problems occur (except for planned AARs). This STX is executed under conditions as close to those expected in combat as possible for the "run" phase. This exercise is conducted at full speed after conducting building block training to reach the run level of execution.

(b) The T&EO standards for this exercise are in Chapter 5. These standards must be met to obtain the maximum benefits from the training.

(c) This exercise should be conducted on a recurring basis to sustain proficiency; however, since many of the T&EOs in this STX will be trained in other STXs, practice may occur through integration rather than retraining the STX.

(d) The OPFOR should closely replicate enemy forces in size and strength to realistically portray threat activities. (See Chapter 6.)

(e) At least one evaluator should be assigned to control OPFOR activities. The evaluator evaluates OPFOR actions, ensures realism, stresses safety, and assesses losses and damages. If the OPFOR is in groups for several simultaneous actions, additional OPFOR evaluators or controllers are necessary. (See Chapter 6.)

(f) OPFOR units should look and fight like potential enemy to help soldiers understand threat tactics, doctrine, and weapon systems. (See Chapter 6.)

(g) OPFOR personnel should be trained prior to the exercise to ensure the synchronization of events.

c. Training enhancers. This STX requires the company to perform battle handover, delay, withdrawal, denial, and screening operations. The STX--

(1) May be conducted under limited visibility conditions, both with and without NVDs, when basic proficiency is attained for the tasks.

(2) May be conducted under increasing MOPP levels as proficiency increases.

(3) Should be conducted in a MOUT environment.

4. General Situation. This exercise begins with the receipt of a FRAGO by the company and ends when battle handover procedures to the TCF are complete. The final AAR should be conducted once all evaluation notes are compiled. If necessary, run portions of the exercise again until you are satisfied with your company's performance. Table 4-14 provides a recommended sequence of events and time for each portion of the STX.

**Table 4-14. Scenario for STX 19-2-E0005**

Sequence	Event	Estimated Time
1	Receive the mission and begin troop-leading procedures	1 hr
2	Conduct a delay	1.5 hrs
3	Conduct an intermediate AAR	.5 hr
4	Conduct screen for TCF and handover the battle to a TCF	3 hrs
5	Conduct final AAR	.5 hrs
Total time		6.5
<p>NOTES:</p> <p>1. Events will be trained to standard, not time. The time required to train an event will vary based on METT-TC and the training proficiency of the unit.</p> <p>2. Additional time will be required if great portions of the exercise are conducted at night or during other limited visibility.</p>		

5. Special Situation. The company has received a FRAGO (Figure 4-5) to provide support for combat operations.

### FRAGMENTARY ORDER

#### 1. SITUATION.

a. Enemy Forces. A Level III threat has penetrated the corps rear area. They are expected to attempt to disrupt rear operations.

b. Friendly Forces. The corps is currently in a defensive posture while preparing for future offensive operations.

2. MISSION. (\_\_\_\_\_) Company provides military police support to rear operations.

#### 3. EXECUTION:

a. Concept of the Operation. (See overlay.)

(1) Intent. The purpose of the mission is to conduct operations in the corps rear area to disrupt enemy activity. We will conduct delaying operations to a battle handover line where we will transition with the TCF. The end state is defined as a smooth handoff with the tactical combat force (TCF) to ensure unimpeded operations within the corps rear area.

(2) Fire Support.

b. (Evaluated) Company.

(1) Provide early and accurate warning when screening.

(2) Provide reaction time and maneuver space when screening.

(3) Establish initial and subsequent screen lines.

c. Coordinating Instructions.

(1) Priority of movement on the main supply routes (MSRs)—combat units, followed by support to combat units in contact (Class III, Class V, Class VIII).

(2) MOPP Level 1 in effect.

(3) Priority intelligence requirements (PIR):

- Potential enemy landing zones (LZs)/drop zones (DZs).
- Likely avenues of approach (AAs).

4. SERVICE SUPPORT. No change.

**Figure 4-5. Example FRAGO for STX 19-2-E0005**

5. COMMAND AND SIGNAL.

a. Command.

- (1) The platoon command post (CP) will be located at (grid).
- (2) The higher HQ CP will be located at (grid).
- (3) Chain of command per the standing operating procedures (SOP).

b. Signal.

- (1) Signal operation instructions (SOI) in effect: KTV 1600C, time period 01.
- (2) Cipher/authentication system in effect: KTC 1400D.

**Figure 4-5. Example FRAGO for STX 19-2-E0005 (continued)**

6. Support Requirements.

a. Minimum trainers and O/Cs. The company commander, who will be the senior internal trainer and O/C, will conduct this exercise. If possible, there should be at least two O/Cs for the unit. At least one other O/C is required with the OPFOR.

b. Vehicles and communications. Vehicles and communications equipment organic to the unit are used.

c. OPFOR. The support personnel should be used in this exercise after the company demonstrates basic proficiency. One platoon of OPFOR personnel is sufficient for a company exercise.

d. Training Area: An area of at least 3 by 3 kilometers is needed for adequate training of this exercise. The selected area should include all five basic military terrain features, as well as buildings, roadways, and streams. Vegetation and terrain should allow for cover and concealment of patrols and OPFOR. Using terrain that limits the leader to a geographical or school solution does not allow evaluation of the unit's ability to conduct a terrain analysis and select sites and routes best suited for operations.

e. Additional equipment: This exercise requires the items listed in Table 4-15. Experience dictates that the training will also require additional 5-gallon water cans, fuel, flashlights with BA-30 batteries, BIs for vehicles, and concertina wire. These items are intended as suggestions only. Local policy may not allow for the provision of all items.

f. Commanders should refer to location regulation and range control requirements during coordination procedures to ensure compliance with restrictions such as constraints and pyrotechnics.

**Table 4-15. Example Support Requirements for FTX 19-2-E0005**

<b>Ammunition</b>	<b>Quantity</b>		
5.56 mm, blank	240 rounds per M16 rifle		
5.56 mm, blank	240 rounds per M4 carbine		
5.56 mm, blank linked	400 rounds per M249 SAW		
Simulator, projectile, ground burst	20 for each exercise		
Simulator, hand grenade	20 for each exercise		
<b>Other Items</b>	<b>Quantity</b>		
Batteries, BA 200 (6 volt)	48 each		
Batteries, BA 3090 (9 volt)	560 each		
<b>MILES Equipment</b>	<b>Company</b>	<b>Evaluators</b>	<b>OPFOR</b>
M16/M4 system	182		1 platoon
Controller guns		2	
Small-arms alignment fixture		1	

7. T&EO Sequence. Table 4-16 lists the T&EOs from Chapter 5 used to evaluate this STX.

**Table 4-16. T&EOs Used in Evaluating STX 19-2-E0005**

<b>Task</b>	<b>Number</b>
Direct a Delay	19-2-D207
Supervise Screening	19-2-D232
Supervise a Battle Handoff to a Tactical Combat Force (TCF)	19-2-D228

**DIGITAL MILITARY POLICE COMPANY (HEAVY)**  
**STX 19-2-E0006**  
**MILITARY POLICE SUPPORT TO BATTLEFIELD MOVEMENT**

1. Objective. This STX trains the collective, leader, and individual tasks for the company's operation of maneuver and mobility support.

2. Interface. This STX supports the company FTX. This STX is supported by STX 19-3-E0005 in MTP 19-333-D10.

3. Training.

a. Guidance. The trainer should review the individual, leader, and collective tasks that are performed during the STX. He should also determine which tasks may require initial or refresher training.

(1) Individual training. Individual training should be on the SM tasks required to support this STX. Use the individual task to the collective task matrix in Chapter 2 as a source for the individual tasks. Individual training is based on the tasks, conditions, and standards in the 95B SMs. Training should be hands-on and performance-oriented. During training, leaders assess soldier proficiency by evaluating task performance against the SM standards and provide feedback to the soldiers. The individual training and evaluation program includes common tasks test and the commander's evaluations.

(2) Collective training. Collective training should be on the collective tasks required for the STX. As with individual tasks, drills should be trained to standard with feedback provided as required. Collective tasks that could support this STX and mission, as well as other missions, are shown in the mission outline in Chapter 3.

(3) Leader training. Leader training should be on the leader tasks required for the exercise and on the individual tasks. Leader tasks are trained in the same manner as stated above or by one or all of the following methods. When materials and facilities are not available, innovation is the answer. Do not limit training to the methods listed.

(a) Classroom discussion on how to plan the exercise and how to implement unit SOPs. (See FM 25-4.)

(b) Map reconnaissance that assists in terrain analysis and war gaming. (Use a map of the area where the STX is to be conducted.)

(c) Terrain board or sand table exercises that permit simulations or miniatures to be used to gain three-dimensional perspectives in war-gaming and/or rehearsing the exercise. (Model the terrain board or sand table to match the terrain where the exercise will be conducted.)

(d) TEWTs that allow leaders to train on the ground and practice land navigation, movement, reporting, and other leader actions. (See FM 25-4.)

(e) Simulations and games that teach leaders as part of a continuing officer and NCO development program.

(f) Training extension courses that present information and demonstrate how tasks are performed to standard using audiovisual equipment. (See DA Pam 350-100.)

b. Training tips. Tips for training and general instructions on how to prepare for and accomplish the STX are as follows:

(1) Know the requirements for river crossing and passage of lines. (See FMs 3-19.1 and 3-19.4.)

(2) Conduct a leader's reconnaissance of the training area to ensure that you do not make time-consuming mistakes.

(3) Review the standards for the T&EOs that support this exercise.

(4) Coordinate for passage lanes, attack positions, supporting fires, and exchange of information with the passing unit, to include the--

- Enemy situation.
- Passing unit's rearward positions.
- Contact points.
- LPs, OPs, and patrol routes.
- Passage points.
- Passage lanes.
- Obstacles/contaminated areas.
- Main battle area (MBA) initial positions.
- Command post for passing units during passage.
- Assembly area for the passing unit.
- CS/CSS locations for emergency support.
- Traffic control points.
- SOI information.

(5) Conduct traffic control measures.

- Forward: Emphasize MP functions at the contact points, passage points, passage lanes, and the assembly areas in the corps.
- Rearward: Support the rearward passage of lines once the passing units have the passage lane and enter the route to the assembly area.

(6) Coordinate communications, especially the exchange of SOI and the frequencies of the passing and stationary units. Challenge and password the direct support platoon. All MPs involved in the passage of lines need to know what recognition signals the passing unit will display, the exact locations where elements of the passing unit will appear in front of them, and the number and types of vehicles that will need to be escorted or assisted from their assembly areas along the routes to the contact points/passage lanes.

(7) Remember that this STX may be conducted--

(a) With or without blank ammunition. The use of blank ammunition is encouraged to add more realism to the exercise.

(b) With or without MILES. MILES provides better feedback and should be used if available.

(c) Under all environmental conditions, both day and night, with or without NBC.

(8) Adhere to the following instructions for this STX:

(a) This STX should be initially trained and rehearsed slowly, on open terrain, during good visibility, and with frequent explanations and critiques by leaders. This simple execution, combined with a thorough prebrief and "chalk talks," constitutes the "crawl" stage of STX training. The "walk" phase of this STX entails conducting the training at closer to normal rates, on more difficult terrain, and with stops for explanation and critique only when problems occur (except for planned AARs). This STX is executed under conditions as close to those expected in combat as possible for the "run" phase. This exercise is conducted at full speed after conducting building block training to reach the run level of execution.

(b) The T&EO standards for this exercise are in Chapter 5. These standards must be met to obtain the maximum benefits from the training.

(c) This exercise should be conducted on a recurring basis to sustain proficiency; however, since many of the T&EOs in this STX will be trained in other STXs, practice may occur through integration rather than retraining the STX.

(d) The OPFOR should closely replicate enemy forces in size and strength to realistically portray threat activities. (See Chapter 6.)

(e) At least one evaluator should be assigned to control OPFOR activities. The evaluator evaluates OPFOR actions, ensures realism, stresses safety, and assesses losses and damages. If the OPFOR is in groups for several simultaneous actions, additional OPFOR evaluators or controllers are necessary. (See Chapter 6.)

(f) OPFOR units should look and fight like potential enemy to help soldiers understand threat tactics, doctrine, and weapon systems. (See Chapter 6.)

(g) OPFOR personnel should be trained prior to the exercise to ensure the synchronization of events.

c. Training enhancers. This STX requires the company to perform river crossing and passage of lines to move tactically. The STX--

(1) May be conducted under limited visibility conditions, both with and without NVDs, when basic proficiency is attained for the tasks.

(2) May be conducted under increasing MOPP levels as proficiency increases.

(3) Should be conducted in a MOUT environment.

4. General Situation. This exercise begins with the receipt of a FRAGO by the company and ends when the passage of lines is complete. The final AAR should be conducted once all evaluation notes are compiled. If necessary, run portions of the exercise again until you are satisfied with your company's performance. Table 4-17 provides a recommended sequence of events and time for each portion of the STX.

**Table 4-17. Scenario for STX 19-2-E0006**

<b>Sequence</b>	<b>Event</b>	<b>Estimated Time</b>
1	Receive the mission and begin troop-leading procedures	1 hr
2	Prepare for a river crossing	3 hrs
3	Cross river	1 hr
4	Intermediate AAR	.5 hr
5	Coordinate for passage of lines	.5 hr
6	Conduct passage of lines	2 hrs
7	Final AAR	.5
8	Move tactically	*
Total time		8
NOTES:		
1. * This task is integrated and evaluated throughout the exercise.		
2. Events will be trained to standard, not time. The time required to train an event will vary based on METT-TC and the training proficiency of the unit.		
3. Additional time will be required if great portions of the exercise are conducted at night or during other limited visibility.		

5. Special Situation. The company has received a FRAGO (Figure 4-6) to provide support for a major battlefield movement, to include a river crossing and passage of lines.

**FRAGMENTARY ORDER**

1. SITUATION.

a. Enemy Forces. The enemy threat consists of Level I and Level II activity in the corps.

b. Friendly Forces. The corps is currently in a defensive posture while preparing for future offensive operations. Heavy military traffic will occur on the main supply routes (MSRs) within the next 48 hours to resupply the forward elements.

2. MISSION. (\_\_\_\_\_) Company supports battlefield movement to allow for rapid movement of military traffic in support of corps operations.

3. EXECUTION:

a. Concept of the Operation. (See overlay.)

(1) Intent. The purpose of the mission is to maintain freedom of movement for authorized traffic. The method to be used supports a river crossing and petroleum, oils, and lubricants (POL) within the area of operation (AO). The end state is defined as unimpeded movement of supplies to the forward combat elements.

(2) Fire Support. Priority of fire goes to base/base cluster defense.

b. (Evaluated) Company.

(1) Conduct river crossing operations.

(2) Conduct passage of lines.

c. Coordinating Instructions.

(1) Priority of movement on the MSRs--combat units, followed by support to combat units in contact (Class III, Class V, Class VIII).

(2) MOPP Level 1 in effect.

(3) Submit situation reports (SITREPs) to this HQ daily at 0600 and 1800 hrs.

(4) Priority intelligence requirements (PIR).

- Information on possible enemy locations, size, and activity.
- Reportable restrictions to the route.
- Changes along the MSR that may disrupt traffic movement.

4. SERVICE SUPPORT. No change.

**Figure 4-6. Example FRAGO for STX 19-2-E0006**

5. COMMAND AND SIGNAL.

a. Command.

- (1) The platoon command post (CP) will be located at (grid).
- (2) The higher HQ CP will be located at (grid).
- (3) Chain of command per standing operating procedure (SOP).

b. Signal.

- (1) Signal operation instructions (SOI) in effect: KTV 1600C, time period 01.
- (2) Cipher/authentication system in effect: KTC 1400D.

**Figure 4-6. Example FRAGO for STX 19-2-E0006 (continued)**

6. Support Requirements.

a. Minimum trainers and O/Cs. The company commander, who will be the senior internal trainer and O/C, will conduct this exercise. If possible, there should be at least two O/Cs for the unit. At least one other O/C is required with the OPFOR.

b. Vehicles and communications. Vehicles and communications equipment organic to the unit are used. If a crossing area commander's HQ is used, additional radios will be required. Use of an OPFOR will require a radio for the OPFOR evaluator.

c. OPFOR. The support personnel should be used in this exercise after the company demonstrates basic proficiency. One platoon of OPFOR personnel is sufficient for a company exercise.

d. Training Area: An area of at least 2 by 3 kilometers is needed for adequate training of this exercise. The selected area should include a river or stream with suitable bridge and fording sites. It should also include a road net on each side and multiple covered and concealed approaches.

e. Additional equipment: This exercise requires the items listed in Table 4-18. Experience dictates that the training will also require additional 5-gallon water cans, fuel, flashlights with BA-30 batteries, BILs for vehicles, and concertina wire. These items are intended as suggestions only. Local policy may not allow for the provision of all items.

f. Commanders should refer to location regulation and range control requirements during coordination procedures to ensure compliance with restrictions such as constraints and pyrotechnics.

**Table 4-18. Example Support Requirements for FTX 19-2-E0006**

<b>Ammunition</b>	<b>Quantity</b>		
5.56 mm, blank	240 rounds per M16 rifle		
5.56 mm, blank	240 rounds per M4 carbine		
5.56 mm, blank linked	400 rounds per M249 SAW		
Simulator, projectile, ground burst	20 for each exercise		
Simulator, hand grenade	20 for each exercise		
<b>Other Items</b>	<b>Quantity</b>		
Batteries, BA 200 (6 volt)	48 each		
Batteries, BA 3090 (9 volt)	560 each		
<b>MILES Equipment</b>	<b>Company</b>	<b>Evaluators</b>	<b>OPFOR</b>
M16/M4 system	182		1 platoon
Controller guns		2	
Small-arms alignment fixture		1	

7. T&EO Sequence. Table 4-19 lists the T&EOs from Chapter 5 used to evaluate this STX.

**Table 4-19. T&EOs Used in Evaluating STX 19-2-E0006**

<b>Task</b>	<b>Number</b>
Coordinate MP Support to a River Crossing	19-2-D111
Coordinate MP Support to a Passage of Lines Operation	19-2-D124
Supervise Movement to Contact	19-2-D229

## CHAPTER 5

### Training and Evaluation Outlines

5-1. Introduction. This chapter contains the training and evaluation outlines for the unit. T&EOs are the foundation of the MTP and the collective training of the units. T&EOs are training objectives (task, conditions, and standards) for the collective tasks that support critical wartime operations. The unit must master designated collective tasks to perform its critical wartime operations. T&EOs may be trained separately, in an STX, in an FTX, or in live-fire exercises. For collective live-fire standards, the trainer needs to refer to the applicable gunnery manual for the appropriate course of fire. Those standards and courses of fire need to be integrated into the training exercise.

5-2. Structure. The T&EOs in this chapter are listed in Table 5-1. The Mission-to-Collective Task Matrix in Chapter 2 lists the T&EOs required to train the critical wartime missions according to their specific BOS.

5-3. Format. The T&EOs are prepared for every collective task that supports critical wartime operation accomplishment. Each T&EO contains the following items:

- a. Element. This identifies the unit or unit element(s) that performs the task.
- b. Task. This is a description of the action to be performed by the unit, and provides the task number.
- c. References. These are in parenthesis following the task number. The reference that contains the most information (primary reference) about the task is listed first and underlined. If there is only one reference do not underline the reference.
- d. Iteration. Used to identify how many times the task is performed and evaluated during training. The "M" identifies when the task is performed in MOPP4.
- e. Commander/Leader Assessment. This is used by the unit leadership to assess the proficiency of the unit in performing the task to standard. Assessments are subjective in nature and use all available evaluation data and submit leader input to develop an assessment of the organization's overall capability to accomplish the task. Use the following ratings:
  - (1) T - Trained. The unit is trained and has demonstrated its proficiency in accomplishing the task to wartime standards.
  - (2) P - Needs practice. The unit needs to practice the task. Performance has demonstrated that the unit does not achieve standard without some difficulty or has failed to perform some task steps to standard.
  - (3) U - Untrained. The unit can not demonstrate an ability to achieve wartime proficiency.
- f. Condition. A statement of the situation or environment in which the unit is to do the collective task.
- g. Task Standard.
  - (1) The task standard states the performance criteria that a unit must achieve to successfully execute the task. This overall standard should be the focus of training. It should be understood by every soldier.
  - (2) The trainer or evaluator determines the unit's training status using performance observation measurements (where applicable) and his judgment. The unit must be evaluated in the context of the

METT-TC conditions. These conditions should be as similar as possible for all evaluated elements. This will establish a common base line for unit performance.

h. Task Steps and Performance Measures. This is a listing of actions that is required to complete the task. These actions are stated in terms of observable performance for evaluating training proficiency. The task steps are arranged sequentially along with supporting individual tasks and their reference. Leader tasks within each T&EO are indicated by an asterisk (\*). Under each task step are listed the performance measures that must be accomplished to correctly perform the task step. If the unit fails to correctly perform one of these task steps to standard, it has failed to achieve the overall task standard.

i. GO/NO-GO Column. This column is provided for annotating the platoon's performance of the task steps. Evaluate each performance measure for a task step and place an "X" in the appropriate column. A major portion of the performance measures must be marked a "GO" for the task step to be successfully performed.

j. Task Performance/Evaluation Summary Block. This block provides the trainer a means of recording the total number of task steps and performance measures evaluated and those evaluated as "GO". It also provides the evaluator a means to rate the units demonstrated performance as a "GO" or "NO-GO". It also provides the leader with a historical record for five training iterations.

k. Supporting Individual Tasks. This is a listing of all supporting individual tasks required to correctly perform the task. Listed are the reference, tasks number, and task title.

l. OPFOR Standards. These standards specify overall OPFOR performance for each collective task. These standards ensure that OPFOR soldiers accomplish meaningful training and force the training unit to perform its task to standard or "lose" to the OPFOR. The OPFOR standards specify what must be accomplished -- not how it must be accomplished. The OPFOR must always attain its task standards, using tactics consistent with the type of enemy they are portraying.

5-4. Use. The T&EOs can be used to train or evaluate a single task. Several T&EOs can be used to train or evaluate a group of tasks such as an STX or FTX.

**Develop Intelligence**

Supervise Route Reconnaissance and Surveillance (Digital Military Police [MP] Company) (19-2-D112)..... 5-5

Supervise Area Reconnaissance Operations (Digital Military Police [MP] Company) (19-2-D202) ..... 5-8

Supervise Zone Reconnaissance Operations (Digital Military Police [MP] Company) (19-2-D203) ..... 5-10

Coordinate Intelligence Collecting and Reporting (Digital Military Police [MP] Company) (19-2-D521) ..... 5-13

Process Captured Documents and Equipment (Digital Military Police [MP] Platoon) (19-3-D315) ..... 5-15

**Deploy/Conduct Maneuver**

Cross A Chemically Contaminated Area (Digital Military Police [MP] Platoon) (03-3-C226.19-D503) ..... 5-17

Defend a Unit Position (Digital Military Police [MP] Platoon) (07-3-C212.19-D307) ..... 5-19

Conduct Unit Deployment (Digital Military Police [MP] Company) (19-2-D101)..... 5-22

Coordinate Military Police (MP) Support to a River Crossing (Digital MP Company) (19-2-D111) ..... 5-24

Supervise Route Regulation Enforcement (Digital Military Police [MP] Company) (19-2-D122) ..... 5-27

Supervise Route Signing (Digital Military Police (MP) Company) (19-2-D123)..... 5-29

Coordinate Military Police Support to Passage of Lines (Digital Military Police [MP] Company) (19-2-D124)..... 5-31

Supervise Dislocated Civilian Control Operations (Digital Military Police [MP] Company) (19-2-D131).....	5-34
Supervise Straggler Control Operations (Digital Military Police [MP] Company) (19-2-D132).....	5-36
Direct Response Force Operations (Digital Military Police [MP] Company) (19-2-D221).....	5-39
Direct a Deliberate Attack (Digital Military Police [MP] Company) (19-2-D223).....	5-41
Direct A Delay (Digital Military Police [MP] Company) (19-2-D227).....	5-43
Supervise a Battle Handover to a Tactical Combat Force (TCF) (Digital Military Police [MP] Company) (19-2-D228).....	5-47
Supervise Movement to Contact (Digital Military Police [MP] Company) (19-2-D229).....	5-49
Monitor a Hasty Attack (Digital Military Police [MP] Company) (19-2-D231).....	5-51

Monitor Interaction with the Media (19-2-D618) .....	5-146
<b>Exercise Command and Control</b>	
Prepare an Operation Order (OPORD) (19-2-D617).....	5-148

**Figure 5-1. List of T&EOs**

**ELEMENT:** Company Headquarters

**TASK:** Supervise Route Reconnaissance and Surveillance (Digital Military Police [MP] Company) (19-2-D112)

(FM 5-170)

(FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division military police company is directed by Provost Marshal Office (PMO) to supervise route reconnaissance and surveillance operations on routes within the area of responsibility. Digital systems are operational and functionality checks have been conducted. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The company verifies that current detailed information about specific routes and the nearby terrain is consolidated into the company digital overlay. The updated information is submitted to the provost marshal office through digital means. The time required to perform this task is increased when conducting it in mission-oriented protection posture (MOPP) 4.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>* 1. The company commander analyzes the mission received from Provost Marshal Office (PMO).                             <ul style="list-style-type: none"> <li>a. Issued a warning order (WO) via Force XXI Battle Command Brigade and Below (FBCB2)..</li> <li>b. Conducted a map reconnaissance using FBCB2.</li> <li>c. Identified the available time and resources.</li> <li>d. Back briefed the HQ.</li> <li>e. Issued orders via FBCB2.</li> </ul> </li> <li>* 2. The first sergeant (1SG) ensures support requirements.                             <ul style="list-style-type: none"> <li>a. Coordinated with the platoon(s) for support requirements.</li> <li>b. Coordinated for Class I, III, IV, V, VIII, and IX items.</li> <li>c. Coordinated for morale support.</li> <li>d. Ensured that the platoon(s) had a plan for medical evacuation.</li> </ul> </li> <li>3. The company commander coordinates with the platoon(s) to implement route reconnaissance and surveillance operations.                             <ul style="list-style-type: none"> <li>a. Specified routes and terrain to be reconnoitered and surveyed.</li> <li>b. Established timelines for the completion of digital overlays to the company HQ.</li> <li>c. Coordinated with higher HQ communication section.</li> </ul> </li> <li>4. The company commander monitors the platoon's execution of the operation.                             <ul style="list-style-type: none"> <li>a. Received the overlay or reconnaissance mission using Force XXI Battle Command Brigade and Below (FBCB2).</li> <li>b. Ensured correct military symbols were used.</li> <li>c. Processes information into the company digital overlay.</li> </ul> </li> <li>5. The company commander forwards information through the FBCB2 system to PMO.                             <ul style="list-style-type: none"> <li>a. Consolidated information onto the company digital situation map.</li> <li>b. Forwarded situation reports (SITREPs) and spot reports (SPOTREPs).</li> <li>c. Forwarded updated overlay/route reconnaissance reports.</li> </ul> </li> </ul>

**SUPPORTING INDIVIDUAL TASKS**

Task Number	Task Title
052-196-3065	Prepare a Route Reconnaissance Overlay
071-326-0515	Select a Movement Route Using a Map
071-326-5805	Conduct a Route Reconnaissance Mission
071-331-0820	Analyze Terrain
081-831-0101	Request Medical Evacuation
113-573-8006	Use an Automated Signal Operation Instruction (SOI)
191-400-0014	Direct Route Surveillance and Security
191-400-0016	Direct a Hasty Route Reconnaissance

**SUPPORTING COLLECTIVE TASKS: NONE**

**OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Hasty Ambush (19-OPFOR-1003)

**CONDITION:** An opposing forces (OPFOR) element is moving in a wooded area when an enemy march element is seen moving along a nearby route.

**STANDARD:** The OPFOR element prepares the ambush site before arrival of the enemy element. 1. Surprises enemy forces. 2. Inflicts casualties within the designated kill zone. 3. Inflicts damage to vehicles and equipment within the designated kill zone. 4. Delays the enemy march element from reaching its destination for a specified period. 5. Withdraws, on order, within two minutes of the ambush initiation. 6. Sustains minimum casualties. 7. Reports actions to superiors.

**TASK:** Conduct a Deliberate Ambush (19-OPFOR-1004)

**CONDITION:** An opposing forces (OPFOR) element is operating along an enemy main supply route (MSR). OPFOR intelligence has reported that an enemy element is conducting a road march along the route. The OPFOR has set up an ambush. The march element is about 15 minutes from the ambush point. The OPFOR element possesses automatic weapons, antiarmor weapons, and command detonated mines. OPFOR headquarters (HQ) has ordered complete destruction of the march element.

**STANDARD:** The OPFOR element prepares an ambush site before the arrival of the enemy element. 1. Surprises enemy forces. 2. Forces the enemy march element to halt in the kill zone. 3. Initiates the ambush on order of the OPFOR leader. 4. Kills, wounds, or captures all enemy personnel, and destroys all specified vehicles and equipment in the kill zone. 5. Engages all enemy reinforcement and security elements. 6. Sustains minimum casualties from the enemy forces. 7. Consolidates and withdraws from the area on order. 7. Reports all specified priority intelligence requirements and other intelligence requirements.

**TASK:** Conduct Sniper Operations (19-OPFOR-1005)

**CONDITION:** The opposing forces (OPFOR) have assigned snipers and regular and/or irregular elements in the enemy rear area along the main supply routes (MSR) and near the support sites.

**STANDARD:** The OPFOR has set up well-concealed locations. 1. Engages vehicle drivers or personnel on foot with short bursts of semiautomatic fire. 2. Kills or wounds selected targets. 3. Prevents the position from being discovered by enemy forces. 4. Evacuates the area without being detected. 5. Reports all specified priority intelligence requirements and other intelligence requirements to OPFOR headquarters (HQ).

**ELEMENT:** Company Headquarters

**TASK:** Supervise Area Reconnaissance Operations (Digital Military Police [MP] Company) (19-2-D202)  
(FM 7-8) (FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division MP company is directed by Provost Marshal Office (PMO) to conduct an area reconnaissance within its area of responsibility. Digital systems are operational and functionality checks have been performed. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The company operations center ensures platoons conduct area reconnaissance patrols as ordered and forwards updated information by digital means to PMO as required.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>* 1. Task Number	Task Title
19-3-2003	Conduct a Zone Reconnaissance
19-3-D203	Conduct a Zone Reconnaissance (Digital Military Police [MP] Platoon)

**OPFOR TASKS AND STANDARDS**

**TASK:** CONDUCT DELIBERATE AMBUSH (19-OPFOR-0004)

**CONDITION:** OPFOR element is operating along a friendly MSR. OPFOR intelligence has reported that a friendly element is conducting a tactical road march along the route. The OPFOR element possesses automatic weapons and command detonated mines. OPFOR headquarters has ordered complete destruction of the march element.

**STANDARD:** 1. Prepare ambush site before arrival of friendly element. 2. Surprise friendly forces. 3. Force friendly march element to halt in kill zone. 4. Initiate ambush on order of the OPFOR leader. 5. Kill, wound, or capture all friendly personnel, and destroy all specified vehicles and equipment in the kill zone. 6. Sustain no casualties from friendly forces. 7. Consolidate and withdraw from ambush site on order. 8. Report actions to superiors. **NOTE:** Use with any tasks if OPFOR has enough time.

**TASK:** Conduct Sniper Operations (19-OPFOR-0005)

**CONDITION:** The opposing forces (OPFOR) assigned snipers, regular or paramilitary elements, in the friendly rear area along a main supply route (MSR) and near support sites.

**STANDARD:** 1. Set up well concealed locations. 2. Engage vehicle drivers or personnel on foot. 3. Kill or wound selected targets. 4. Prevent your position from being discovered by friendly forces. 5. Exit the area without being spotted. 6. Report all specified priority intelligence requirements (PIR) and other intelligence requirements to the OPFOR headquarters (HQ). **NOTE:** Use with the defend a march element. May be used with setup and operational tasks.

**TASK:** Gather Intelligence (19-OPFOR-0006)

**CONDITION:** Small opposing forces(OPFOR) elements are operating in the rear area and are planning attacks on friendly bases. Information is needed to complete the mission plan.

**STANDARD:** 1. Identify all priority intelligence requirements (PIR) and other intelligence requirements. 2. Pass through any outpost, defensive wire, or warning devices undetected. 3. Move to an observation point that offers cover and concealment and is close enough to gather PIR and other intelligence requirements. 4. Gather all PIR and other intelligence requirements. 5. Withdraw from the area undetected. 6. Report all information to OPFOR headquarters. **NOTE:** Employ operations security (OPSEC) measures with this task and operational tasks.

**TASK:** Conduct Hasty Ambush (19-OPFOR-1003)

**CONDITION:** An opposing forces (OPFOR) element is moving in a wooded area when an enemy march element is seen moving along a nearby route.

**STANDARD:** The OPFOR element prepares the ambush site before arrival of the enemy element. 1. Surprises enemy forces. 2. Inflicts casualties within the designated kill zone. 3. Inflicts damage to vehicles and equipment within the designated kill zone. 4. Delays the enemy march element from reaching its destination for a specified period. 5. Withdraws, on order, within two minutes of the ambush initiation. 6. Sustains minimum casualties. 7. Reports actions to superiors.

**ELEMENT:** Company Headquarters

**TASK:** Coordinate Intelligence Collecting and Reporting (Digital Military Police [MP] Company) (19-2-D521)  
(FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division heavy MP company is conducting area security, maneuver and mobility, internment and resettlement, and law and order operations in their area of responsibility. The company commander directs the operations center to coordinate intelligence collecting and reporting with the platoons. Digital systems are operational and functionality checks have been conducted. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The operations center ensures that the platoons collect and report intelligence information according to the priorities established by PMO. The company reports all vital information by digital means to the provost marshal office (PMO).

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>* 1. The company commander analyzes the mission received from the provost marshal office (PMO).               <ul style="list-style-type: none"> <li>a. 071-326-5626	Prepare an Oral Operation Order
071-332-5022	Prepare a Battalion Situation Report (SITREP)
113-573-0002	Conduct Operations Security (OPSEC) Procedures
191-400-0025	Direct Intelligence Collecting and Reporting

**SUPPORTING COLLECTIVE TASKS**

Task Number	Task Title
19-3-D521	Conduct Intelligence Collecting and Reporting (Digital Military Police (MP) Platoon)

**OPFOR TASKS AND STANDARDS**

**TASK:** Gather Intelligence (19-OPFOR-1008)

**CONDITION:** Small opposing forces (OPFOR) elements, operating in the rear area, are planning attacks on enemy bases. Information is needed to complete plans.

**STANDARD:** 1. Identify all priority intelligence requirements and other intelligence requirements. 2. Pass through outposts, defensive wires, or warning devices undetected. 3. Move to an observation post (OP) that offers cover and concealment and is close enough to gather priority intelligence requirements and other intelligence requirements. 4. Gather all priority intelligence requirements and other intelligence requirements. 5. Withdraw from the area undetected. 6. Reported all information to the OPFOR headquarters (HQ).

**ELEMENTS:** Company Headquarters  
 Military Police Platoon Headquarters (Division Support)  
 Military Police Squad (Division Support)  
 Military Police Platoon Headquarters (Forward Support)  
 Military Police Squad (Forward Support)

**TASK:** Process Captured Documents and Equipment (Digital Military Police [MP] Platoon) (19-3-D315)  
 (FM 3-19.4) (FM 3-19.40)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The enemy's equipment and documents have been captured. Digital systems are operational and functionality checks have been conducted. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The element processes all the captured documents and equipment based on disposition instructions and within the time standards established by the provost marshal office (PMO). The element reports all vital and updated information to the PMO by digital means.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. The element members tag all captured documents and equipment. <ul style="list-style-type: none"> <li>a. Annotated the type of document or equipment; for example, maps, photos, rifles, or radios.</li> <li>b. Annotated the date and time of the capture.</li> <li>c. Annotated the place of the capture (grid coordinates).</li> <li>d. Annotated the capturing unit.</li> <li>e. Annotated the circumstances of the capture.</li> <li>f. Annotated the prisoner's name, if taken from enemy prisoners of war (EPWs).</li> </ul> * 2. The Commander receives information of the captured documents and equipment from the platoon via the Force XXI Battle Command Brigade and Below (FBCB2). <ul style="list-style-type: none"> <li>a. Consolidates the type of document or equipment.</li> <li>b. Consolidates the dates and times of capture.</li> <li>c. Consolidates the capturing units.</li> <li>d. Consolidates the places of capture (grid coordinates).</li> </ul> 3. CDR forwards the information of the captured documents and equipments the PMO via FBCB2.

031-503-1030	Prepare the Chemical Agent Monitor (CAM) for Operation

**SUPPORTING COLLECTIVE TASKS: NONE**

**OPFOR TASKS AND STANDARDS**

**TASK:** DISRUPT friendly movement and operations using persistent and nonpersistent chemical weapons (19-OPFOR-0001)

**CONDITION:** Threat units deliver chemical agents by means of conventional artillery weapons, guided missiles, or aircraft along selected supply routes and key bases in the rear.

**STANDARD:** 1. Deliver chemical agents in low and/or dense wooded areas. 2. Delay movement of friendly supplies and equipment to forward areas. 3. Restrict friendly units movements in rear area. 4. Channel movement into predesignated ambush area. 5. Contaminate friendly supplies and equipment. 6. Inflict a high loss of combat effectiveness on friendly forces. NOTE: Use with tasks, Cross a Chemically Contaminated Area and Respond to a Chemical attack.

**TASK:** Disrupt Enemy Movement and Operations Using Persistent and Nonpersistent Chemical Weapons (19-OPFOR-1001)

**CONDITION:** The opposing forces (OPFOR) units deliver chemical agents by means of conventional artillery weapons or aircraft along selected routes of key bases in the rear area.

**STANDARD:** 1. Deliver chemical agents in lowly or densely wooded areas. 2. Delay movement of enemy supplies and equipment to forward areas by disrupting the command-and-control (C2) system. 3. Restrict enemy units' movement in the rear area. 4. Channel movement to predesignated ambush areas. 5. Contaminate enemy supplies and equipment. 6. Inflict a high rate of casualties on enemy forces.

- ELEMENTS:** Division PM Section  
 Company Headquarters  
 Military Police Platoon Headquarters (Division Support)  
 Military Police Squad (Division Support)  
 Military Police Platoon Headquarters (Forward Support)  
 Military Police Squad (Forward Support)  
 Combat Medics

**TASK:** Defend a Unit Position (Digital Military Police [MP] Platoon) (07-3-C212.19-D307)  
 (FM 7-8)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The unit is occupying prepared defensive positions. Intelligence reports indicate that small enemy elements have been sighted in the operational area. Enemy patrols have increased in the sector. The enemy attacks the unit. Digital systems are operational, and functionality checks have been conducted. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The main defensive positions are not surprised by the enemy. The unit denies enemy penetration of the defensive positions and engages attacking units, forcing enemy withdrawal. All vital and updated information will be sent to the provost marshal office (PMO) by digital means. The time required to perform this task is increased when conducting it in mission-oriented protection posture (MOPP) 4.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ol style="list-style-type: none"> <li>1. The observation posts (OPs) detect and correctly identify the enemy.                             <ol style="list-style-type: none"> <li>a. Reported enemy activity before the main body was engaged.</li> <li>b. Provided the information using the size, activity, location, unit, time, and equipment (SALUTE) format.</li> </ol> </li> <li>2. Unit personnel are alerted and occupy fighting positions.                             <ol style="list-style-type: none"> <li>a. Actuated the alert plan according to the unit standing operating procedure (SOP).</li> <li>b. Occupied fighting positions within 1 minute of the initial warning.</li> </ol> </li> <li>3. Unit personnel report enemy contact.                             <ol style="list-style-type: none"> <li>a. 061-283-6003	ADJUST INDIRECT FIRE
081-831-0101	Request Medical Evacuation
113-573-0002	Conduct Operations Security (OPSEC) Procedures
113-573-8006	Use an Automated Signal Operation Instruction (SOI)
191-400-0010	Coordinate Base Cluster Area Defense Planning
191-400-0021	Provide Security to Designated Critical Area

### SUPPORTING COLLECTIVE TASKS: NONE

### OPFOR TASKS AND STANDARDS

**TASK:** Conduct Hasty Ambush (19-OPFOR-1003)

**CONDITION:** An opposing forces (OPFOR) element is moving in a wooded area when an enemy march element is seen moving along a nearby route.

**STANDARD:** The OPFOR element prepares the ambush site before arrival of the enemy element. 1. Surprises enemy forces. 2. Inflicts casualties within the designated kill zone. 3. Inflicts damage to vehicles and equipment within the designated kill zone. 4. Delays the enemy march element from reaching its destination for a specified period. 5. Withdraws, on order, within two minutes of the ambush initiation. 6. Sustains minimum casualties. 7. Reports actions to superiors.

**TASK:** Conduct a Deliberate Ambush (19-OPFOR-1004)

**CONDITION:** An opposing forces (OPFOR) element is operating along an enemy main supply route (MSR). OPFOR intelligence has reported that an enemy element is conducting a road march along the route. The OPFOR has set up an ambush. The march element is about 15 minutes from the ambush point. The OPFOR element possesses automatic weapons, antiarmor weapons, and command detonated mines. OPFOR headquarters (HQ) has ordered complete destruction of the march element.

**STANDARD:** The OPFOR element prepares an ambush site before the arrival of the enemy element. 1. Surprises enemy forces. 2. Forces the enemy march element to halt in the kill zone. 3. Initiates the ambush on order of the OPFOR leader. 4. Kills, wounds, or captures all enemy personnel, and destroys all specified vehicles and equipment in the kill zone. 5. Engages all enemy reinforcement and security elements. 6. Sustains minimum casualties from the enemy forces. 7. Consolidates and withdraws from the area on order. 7. Reports all specified priority intelligence requirements and other intelligence requirements.

**TASK:** Attack (19-OPFOR-1010)

**CONDITION:** The enemy rear area combat service support (CSS) base has been located by an element of opposing forces (OPFOR). Priority intelligence requirements and other intelligence requirements have been obtained by OPFOR patrols. The OPFOR element has automatic and antiarmor weapons and light mortars. The OPFOR element is approximately the size of two platoons.

**STANDARD:** Develop and initiate an attack plan using a scheme of maneuver that exploits enemy flanks, gaps, and weaknesses. 1. Use covered and concealed routes to approach enemy units' flanks, gaps, or weakly held areas. 2. Employ indirect fire to support attacks. 3. Penetrate enemy defenses. 4. Destroy equipment and supplies. 5. Inflict heavy casualties. 6. Isolate the combat service support base by blocking reinforcements. 7. Force enemy units to displace. 8. Withdraw before the combat service support base is reinforced with tactical combat forces.

**ELEMENT:** Company Headquarters

**TASK:** Supervise Route Regulation Enforcement (Digital Military Police [MP] Company) (19-2-D122)  
(FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division heavy MP company is directed by the provost marshal office (PMO) to conduct route regulation enforcement. The company commander directs the operations center to supervise route regulation enforcement operations. Digital systems are operational and functionality checks have been conducted. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The operations center monitors traffic to ensure unimpeded traffic flow throughout the company area of operations. All updated and vital information will be sent to the PMO by digital means. The time required to perform this task is increased when conducting it in mission-oriented protection posture (MOPP) 4.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>* 1. The company commander analyzes the mission received from the Provost Marshal Office (PMO).                             <ul style="list-style-type: none"> <li>a. Issued a warning order (WO) to the platoon(s) using Force XXI Battle Command Brigade and Below (FBCB2).</li> <li>b. Conducted a map reconnaissance of the area using FBCB2.</li> <li>c. 091-309-0711	DIRECT VEHICLE AND EQUIPMENT RECOVERY OPERATIONS
113-573-8006	Use an Automated Signal Operation Instruction (SOI)
191-377-4203	Supervise the Establishment and Operation of a Roadblock/Checkpoint
191-377-4204	Supervise the Establishment and Operation of a Defile and Holding Areas

**SUPPORTING COLLECTIVE TASKS: NONE**

### OPFOR TASKS AND STANDARDS

**TASK:** Conduct Sniper Operations (19-OPFOR-1005)

**CONDITION:** The opposing forces (OPFOR) have assigned snipers and regular and/or irregular elements in the enemy rear area along the main supply routes (MSR) and near the support sites.

**STANDARD:** The OPFOR has set up well-concealed locations. 1. Engages vehicle drivers or personnel on foot with short bursts of semiautomatic fire. 2. Kills or wounds selected targets. 3. Prevents the position from being discovered by enemy forces. 4. Evacuates the area without being detected. 5. Reports all specified priority intelligence requirements and other intelligence requirements to OPFOR headquarters (HQ).

**ELEMENT:** Company Headquarters

**TASK:** Supervise Route Signing (Digital Military Police (MP) Company) (19-2-D123)  
(FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division heavy MP company is directed by the provost marshal office (PMO) to conduct route signing operations of specified routes through the company's area of operation (AO) while mounted. Digital systems are operational and functionality checks have been conducted. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The operations center confirms routes are signed and an updated overlay is provided to the PMO using Force XXI Battle Command Brigade and Below (FBCB2). The time required to perform this task is increased when conducting it in mission-oriented protection posture (MOPP) 4.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>* 1. **SUPPORTING COLLECTIVE TASKS: NONE**

**OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Hasty Ambush (19-OPFOR-1003)

**CONDITION:** An opposing forces (OPFOR) element is moving in a wooded area when an enemy march element is seen moving along a nearby route.

**STANDARD:** The OPFOR element prepares the ambush site before arrival of the enemy element. 1. Surprises enemy forces. 2. Inflicts casualties within the designated kill zone. 3. Inflicts damage to vehicles and equipment within the designated kill zone. 4. Delays the enemy march element from reaching its destination for a specified period. 5. Withdraws, on order, within two minutes of the ambush initiation. 6. Sustains minimum casualties. 7. Reports actions to superiors.

**TASK:** Conduct a Deliberate Ambush (19-OPFOR-1004)

**CONDITION:** An opposing forces (OPFOR) element is operating along an enemy main supply route (MSR). OPFOR intelligence has reported that an enemy element is conducting a road march along the route. The OPFOR has set up an ambush. The march element is about 15 minutes from the ambush point. The OPFOR element possesses automatic weapons, antiarmor weapons, and command detonated mines. OPFOR headquarters (HQ) has ordered complete destruction of the march element.

**STANDARD:** The OPFOR element prepares an ambush site before the arrival of the enemy element. 1. Surprises enemy forces. 2. Forces the enemy march element to halt in the kill zone. 3. Initiates the ambush on order of the OPFOR leader. 4. Kills, wounds, or captures all enemy personnel, and destroys all specified vehicles and equipment in the kill zone. 5. Engages all enemy reinforcement and security elements. 6. Sustains minimum casualties from the enemy forces. 7. Consolidates and withdraws from the area on order. 7. Reports all specified priority intelligence requirements and other intelligence requirements.

**TASK:** Maintain Contact (19-OPFOR-1011)

**CONDITION:** The opposing forces (OPFOR) element is tactically engaged with enemy base defense forces. Enemy forces are withdrawing under pressure.

**STANDARD:** 1. Engage enemy forces decisively. 2. Advance unit or forces as the enemy withdraws. 3. Inflict maximum casualties.

**ELEMENTS:** Company Headquarters  
 Combat Medics

**TASK:** Supervise Dislocated Civilian Control Operations (Digital Military Police [MP] Company) (19-2-D131)  
 (FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division heavy MP company in support of combat operations or stability and support operations (SASO) is directed by the provost marshal office (PMO) to provide dislocated civilian control operations. The company commander directs the platoon(s) to conduct operations. Digital systems are operational and functionality checks have been performed. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The operations center coordinates platoon activities and provides updated information to Provost Marshal Office (PMO). Dislocated civilians are treated according to the Geneva Convention and agreements between the United States (US) and host nations. Dislocated civilians are diverted from routes and areas where they might interfere with US or allied military operations. The time required to perform this task is increased when conducting it in mission-oriented protection posture (MOPP) 4.

**SUPPORTING COLLECTIVE TASKS**

Task Number	Task Title
19-3-D227	Delay the Enemy (Digital Military Police [MP] Platoon)

**OPFOR TASKS AND STANDARDS**

**TASK:** Maintain Contact (19-OPFOR-1011)

**CONDITION:** The opposing forces (OPFOR) element is tactically engaged with enemy base defense forces. Enemy forces are withdrawing under pressure.

**STANDARD:** 1. Engage enemy forces decisively. 2. Advance unit or forces as the enemy withdraws. 3. Inflict maximum casualties.

**ELEMENT:** Company Headquarters

**TASK:** Supervise a Battle Handover to a Tactical Combat Force (TCF) (Digital Military Police [MP] Company) (19-2-D228)  
(FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital division heavy military police company has responded to a base/base cluster under attack from a level II threat . The platoon-sized response force has been unable to counter the threat and has requested additional support. The rear operations commander, as a result of the larger threat force and the danger it poses to critical base/base clusters in the vicinity, commits a TCF to the battle. The MP response force has been directed to conduct a battle handover to the TCF. The company commander coordinates for the battle handoff with higher headquarters, and the rear area operations center coordinates with the TCF and monitors the response force conducting a battle handoff. Digital units have conducted functionality checks and systems are operational. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The company commander ensures battle handoff has been accomplished and provides updated information via digital means to the PMO.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>* 1. The company commander analyzes the mission received from the provost marshal office (PMO). Conducts estimates of the situation.                             <ul style="list-style-type: none"> <li>a. Issued a warning order (WO) to the platoons using Force XXI Battle Command Brigade and Below (FBCB2).</li> <li>b. Determined current friendly and enemy situations and courses of action (COAs).</li> <li>c. Analyzed COAs through the war-gaming process.</li> <li>d. Compared COAs.</li> <li>e. Made a decision.</li> <li>f. Determined personnel and equipment requirements for the mission.</li> <li>g. Coordinated with the PMO on the rules of engagement (ROE) , use of force criteria, and Geneva Convention requirements.</li> <li>h. Coordinated with the PMO for host nation support and requirements regarding the execution of the mission.</li> <li>i. Conducted a map reconnaissance, at a minimum, of the area of responsibility using the FBCB2 system.</li> <li>j. Issued an operation order (OPORD) to the platoons using FBCB2.</li> </ul> </li> <li>* 2. The first sergeant (1SG) provides support requirements.                             <ul style="list-style-type: none"> <li>a. Ensured coordination for Class I, III, IV, V, VIII, and IX items.</li> <li>b. Ensured coordination for morale support.</li> <li>c. Ensured that a plan was in place for medical evacuations.</li> </ul> </li> <li>* 3. The company commander coordinates TCF preparations with the platoons to conduct a battle handoff.                             <ul style="list-style-type: none"> <li>a. Provided current battle intelligence.</li> <li>b. Specified the battle handover time.</li> <li>c. Specified the battle handover line (BHL).</li> <li>d. Established security and fire support for an MP withdrawal.</li> <li>e. Conducted a signal operating instructions (SOI) data exchange.</li> <li>f. Monitored the conduct of the battle handover.</li> </ul> </li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
g. Established communication. h. Established recognition signals. i. Determined the status of obstacles and routes. j. Provided updated information on friendly and enemy forces to the platoons. k. Coordinated passages. l. Coordinated command and control (C2) data. m. Dispatched representatives to the contact points. n. Determined combat support (CS) and combat service support (CSS) requirements (forward passage of lines).  4. The company commander monitors the operation. a. Received situation reports (SITREPs) and spot reports (SPOTREPs). b. Updated the company digital situation map. c. Coordinated with the PMO for the arrival of the TCF on the battlefield.  5. The company commander forwards current information to the PMO using FBCB2. a. Forwarded the SITREPs/SPOTREPs. b. Forwarded the updated overlay.

Task Number	Task Title
19-3-D232	Conduct a Screen (Digital Military Police (MP) Platoon)

**OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Sniper Operations (19-OPFOR-0005)

**CONDITION:** The opposing forces (OPFOR) assigned snipers, regular or paramilitary elements, in the friendly rear area along a main supply route (MSR) and near support sites.

**STANDARD:** 1. Set up well concealed locations. 2. Engage vehicle drivers or personnel on foot. 3. Kill or wound selected targets. 4. Prevent your position from being discovered by friendly forces. 5. Exit the area without being spotted. 6. Report all specified priority intelligence requirements (PIR) and other intelligence requirements to the OPFOR headquarters (HQ).NOTE: Use with the defend a march element. May be used with setup and operational tasks.

**TASK:** Gather Intelligence (19-OPFOR-0006)

**CONDITION:** Small opposing forces(OPFOR) elements are operating in the rear area and are planning attacks on friendly bases. Information is needed to complete the mission plan.

**STANDARD:** 1. Identify all priority intelligence requirements (PIR) and other intelligence requirements. 2. Pass through any outpost, defensive wire, or warning devices undetected. 3. Move to an observation point that offers cover and concealment and is close enough to gather PIR and other intelligence requirements. 4. Gather all PIR and other intelligence requirements. 5. Withdraw from the area undetected. 6. Report all information to OPFOR headquarters. NOTE: Employ operations security (OPSEC) measures with this task and operational tasks.

**ELEMENTS:** Company  
Company Headquarters

**TASK:** Supervise the Establishment of Roadblocks and Checkpoints (19-2-D241)  
(FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division military police (MP) company is tasked by the provost marshal office (PMO) to supervise the establishment of roadblocks and checkpoints in their areas of responsibility. Functionality checks have been performed and digital systems are operational. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The company commander supervises the platoons to ensure they support the establishment of roadblocks and checkpoints in their area. Report all updated information to the provost marshal office (PMO) by digital means.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ol style="list-style-type: none"> <li>1. #### SUPPORTING INDIVIDUAL TASKS

Task Number	Task Title
031-503-1030	Prepare the Chemical Agent Monitor (CAM) for Operation
031-503-3008	IMPLEMENT MISSION-ORIENTED PROTECTIVE POSTURE
031-503-4002	Supervise Unit Preparation for a Nuclear Biological, Chemical (NBC) Attack
031-504-3001	SUPERVISE POSITIONING OF THE CHEMICAL AGENT ALARM

**SUPPORTING COLLECTIVE TASKS: NONE**

**OPFOR TASKS AND STANDARDS: NONE**

- ELEMENTS:** Division PM Section  
 Company Headquarters  
 Military Police Platoon Headquarters (Division Support)  
 Military Police Squad (Division Support)  
 Military Police Platoon Headquarters (Forward Support)  
 Military Police Squad (Forward Support)

**TASK:** Respond to a Chemical Attack (Digital Military Police [MP] Platoon) (03-3-C203.19-D703)  
 (FM 3-3) (FM 3-4)

**ITERATION:** 1M 2M 3M 4M 5M (Circle)  
**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The unit is tactically deployed in mission-oriented protection posture (MOPP) 2. Intelligence reports received through the unit's digital systems reveal that opposing forces (OPFOR) have initiated chemical warfare. The automatic alarm sounds or detector paper changes color, causing the unit to react. Digital systems are operational and functionality checks have been conducted. This task is always performed in MOPP4.

**TASK STANDARDS:** Soldiers give vocal or nonvocal commands to sound the alarm, immediately assume the MOPP4 position, and use available shelter to prevent any further exposure to contamination. The unit must react to the chemical alarm within 9 seconds. All vital and updated information is sent to the PMO by digital means. The time required to perform this task is increased when conducting it in MOPP 4.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>* 1. Unit leaders ensure that soldiers react to the sound of the chemical-agent alarm or recognize the indicators for a chemical or biological attack.                             <ul style="list-style-type: none"> <li>a. Put on protective masks with hoods within 9 seconds.</li> <li>b. Used vocal or nonvocal commands to sound the alarm.</li> <li>c. Assumed MOPP4 as soon as possible.</li> <li>d. Sought additional shelter, if available.</li> <li>e. Used the buddy-aid method to administer a nerve agent antidote to other soldiers who had symptoms of nerve agent poisoning.</li> <li>f. Administered nerve agent antidotes to themselves, if applicable.</li> <li>g. Checked soldiers to ensure that protective measures were followed.</li> </ul> </li> <li>2. Soldiers take additional protective measures.                             <ul style="list-style-type: none"> <li>a. Protected exposed equipment and supplies.</li> <li>b. Monitored the area by testing it with detector kits.</li> <li>c. Used prevention procedures, such as marking contaminated areas.</li> </ul> </li> <li>3. Soldiers conduct immediate decontamination.                             <ul style="list-style-type: none"> <li>a. Conducted skin decontamination.</li> <li>b. Conducted a wipe down of personal equipment with M291 or M280 decontamination kits.</li> <li>c. Conducted a spray down of the operator's equipment.</li> </ul> </li> <li>* 4. Leaders initiate unmasking procedures and reports by digital means to higher headquarters (HQ).                             <ul style="list-style-type: none"> <li>a. Ensured that medical care was provided to casualties.</li> <li>b. Reported casualties.</li> <li>c. Immediately submitted a nuclear, biological, chemical (NBC) 1 report to the PMO.</li> </ul> </li> </ul>

#### **SUPPORTING INDIVIDUAL TASKS**

<b>Task Number</b>	<b>Task Title</b>
S3-9001.18-0001	Manage Organizational Stress
S3-9001.18-0002	Minimize Combat Stress

**SUPPORTING COLLECTIVE TASKS: NONE**

**OPFOR TASKS AND STANDARDS: NONE**

- ELEMENTS:** Division PM Section  
 Company Headquarters  
 Military Police Platoon Headquarters (Division Support)  
 Military Police Squad (Division Support)  
 Military Police Platoon Headquarters (Forward Support)  
 Military Police Squad (Forward Support)

**TASK:** Conduct Operational Decontamination (Digital Military Police [MP] Platoon) (03-3-C224.19-D303)  
 (FM 3-5)

**ITERATION:** 1M 2M 3M 4M 5M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The unit has been contaminated or is operating in a contaminated environment. Performance degradation from mission-oriented protection posture (MOPP) 4 is increasing, and protective gear is in danger of penetration by contamination. The time and the tactical situation permit the unit to conduct operational decontamination. Replacement protective gear is available for each soldier. For a nonsupported decontamination, unit decontamination equipment and supplies are available and operational. For a supported decontamination, a decontamination unit is available, operational, and tasked to provide decontamination support. Digital systems are operational and functionality checks have been performed. This task is always performed in MOPP4.

**TASK STANDARDS:** The unit decontaminates its individual gear and conducts MOPP gear exchange (using the buddy system) without sustaining additional casualties from nuclear, biological, chemical (NBC) contamination. The unit limits the contamination transfer hazard by removing gross chemical contamination from the equipment and minimizing the contamination on soldiers according to Field Manual (FM) 3-5. The unit reduces radiological contamination to negligible risk levels according to FM 3-5 and reduces chemical and biological contamination to accelerate the weathering process and eventually provide temporary relief from MOPP4. All vital and updated information will be forwarded to the PMO by digital means. The time required to perform this task is increased when conducting it in mission-oriented protection posture (MOPP) 4.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
* 1. The unit leader determines the extent of the contamination and establishes decontamination priorities. <ul style="list-style-type: none"> <li>a. Received input from the staff and subordinate leaders.</li> <li>b. Established priorities of decontamination.</li> </ul> 2. The contaminated unit submits a request for decontamination to higher headquarters (HQ). Ensure that the request, at a minimum, includes the-- <ul style="list-style-type: none"> <li>a. Designation of the contaminated unit.</li> <li>b. Location of the contaminated unit.</li> <li>c. Frequency and call sign of the contaminated unit.</li> <li>d. Time that the unit became contaminated.</li> <li>e. Number of vehicles and equipment, by type, that were contaminated.</li> <li>f. Type of contamination.</li> <li>g. Special requirements (a patient decontamination station, recovery assets, and a unit decontamination team).</li> </ul> 3. The contaminated unit coordinates with higher HQ. <ul style="list-style-type: none"> <li>a. Obtained permission to conduct decontamination procedures and obtained the necessary support.</li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>b. Selected a linkup point to meet the supporting units (a company supply section, a company or battalion power-driven decontaminating equipment [PDDE] crew, or a decontamination squad or platoon).</p> <p>c. Coordinated with supporting elements.</p> <p>d. Requested replacement MOPP gear.</p> <p>e. Coordinated with the supporting units for a MOPP gear exchange.</p> <p>* 4. The unit leader and nuclear, biological, chemical (NBC) specialists select a site to conduct the operation. Ensure that the selected site provides--</p> <p>a. Adequate overhead concealment.</p> <p>b. Good drainage.</p> <p>c. Easy access and exit routes (off the main routes).</p> <p>d. Proximity to a water source large enough to support vehicle wash down operations.</p> <p>e. An area large enough to accommodate the units involved in the operational decontamination (100 square meters for vehicle wash down operations and MOPP gear exchange sites).</p> <p>5. The contaminated unit coordinates for operational decontamination support (a company or battalion PDDE crew or a decontamination unit).</p> <p>a. Requested operational decontamination support.</p> <p>b. Notified higher HQ of the area for the operational decontamination.</p> <p>c. Established communications with the decontamination element.</p> <p>d. Ensured that the decontamination unit knew the location of the linkup and the selected decontamination site.</p> <p>6. The contaminated unit and supporting units move to the decontamination site.</p> <p>a. Met at the linkup point as coordinated.</p> <p>b. Provided security at both the linkup point and the decontamination site (contaminated unit).</p> <p>7. The units prepare for operational decontamination.</p> <p>a. Set up the decontamination site.</p> <p>(1) The supporting decontamination unit crew set up the vehicle wash down site.</p> <p>(2) The contaminated unit set up the MOPP gear exchange site not less than 50 meters upwind of the vehicle wash down site.</p> <p>(3) The remainder of the unit prepared the equipment for decontamination.</p> <p>b. Conducted preparatory actions in the predecontamination area.</p> <p>(1) The vehicle crews (except for the operators) dismounted unless they had an operational overpressure system and uncontaminated interior.</p> <p>(2) The dismounted crews removed mud and camouflage from the vehicles.</p> <p>NOTE: The contaminated unit should provide personnel to conduct preparatory actions if crews do not dismount.</p> <p>(3) Separated vehicles and dismounted crews.</p> <p>(a) Ensured that vehicle operators were briefed, to include the use of overhead cover and concealment and the proper vehicle interval.</p> <p>(b) Ensured that vehicles were buttoned up (all doors, hatches, and other openings were closed or covered).</p> <p>(4) Moved vehicles, with operators, to the vehicle wash down site.</p> <p>(5) Moved dismounted crews and all other soldiers in the contaminated unit to the MOPP gear exchange site.</p>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 8. The noncommissioned officer in charge (NCOIC) of the decontamination unit supervises the operation of the vehicle wash down site. Ensure that the vehicle operators--</p> <ul style="list-style-type: none"> <li>a. Maintained the proper interval between vehicles while processing through the wash down station.</li> <li>b. Washed vehicles properly.                             <ul style="list-style-type: none"> <li>(1) Started at the top and worked down.</li> <li>(2) Sprayed hot soapy water for 2 to 3 minutes per vehicle.</li> <li>(3) Monitored water consumption.</li> </ul> </li> <li>c. Moved vehicles to the assembly area (AA) after vehicle wash down.</li> <li>d. Moved to the MOPP gear exchange site and conducted their MOPP gear exchange.</li> </ul> <p>9. The contaminated unit conducts a MOPP gear exchange.</p> <ul style="list-style-type: none"> <li>a. Prepared the equipment decontamination station (with supertropical bleach [STB] dry mix).</li> <li>b. Briefed MOPP gear exchange participants on procedures to be followed.</li> <li>c. Placed the decontaminated individual equipment on a clean surface, such as plastics, ponchos, or other similar material.</li> <li>d. Exchanged MOPP gear using the buddy system.</li> <li>e. Moved soldiers to the AA after they completed their MOPP gear exchange.</li> </ul> <p>NOTE:</p> <ul style="list-style-type: none"> <li>1. The supporting elements must have the opportunity to use the MOPP gear exchange before proceeding.</li> <li>2. The supporting decontamination unit cleans and marks the site and reports the area of contamination (using an NBC 4 report) to higher HQ.</li> </ul> <p>*10. The units' leaders account for all personnel and equipment after completing the operational decontamination.</p> <p>*11. The contaminated unit's leader reports to higher HQ.</p> <ul style="list-style-type: none"> <li>a. Reported the completion of the decontamination and the location of the decontamination vehicle wash down and MOPP gear exchange sites.</li> <li>b. Requested permission to perform unmasking procedures if, through testing, no hazard was detected.</li> <li>c. Determined the adequacy of decontamination and adjusted the MOPP level as required, after obtaining approval from higher HQ.</li> </ul> <p>12. The unit continues the mission.</p>

- ELEMENTS:** Division PM Section  
 Company Headquarters  
 Military Police Platoon Headquarters (Division Support)  
 Military Police Squad (Division Support)  
 Military Police Platoon Headquarters (Forward Support)  
 Military Police Squad (Forward Support)

**TASK:** Camouflage Vehicles and Equipment (Digital Military Police [MP] Platoon) (05-2-0301.19-D105)  
 (FM 20-3)

**ITERATION:** 1 2 3 4 5 M (Circle)  
**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The unit is tactically deployed. The enemy has air and ground surveillance capability to include infrared sensors. Camouflage resources are available. Digital systems are operational and functionality checks have been conducted. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** Vehicles, equipment, and individual fighting positions cannot be detected by ground forces within small-arms range. The element's location or identity cannot be determined through aerial photographs or ground surveillance radar (GSR). All updated and vital information will be forwarded to the provost marshal office (PMO) by digital means. The time required to perform this task is increased when conducting it in mission-oriented protection posture (MOPP) 4.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The element leader selects concealed vehicle positions and traffic routes.</p> <ul style="list-style-type: none"> <li>a. Ensured that the vehicle operators used concealed routes whenever possible, following and paralleling hedges, woods, fences, cultivated fields, and other natural terrain features.</li> <li>b. Ensured that the vehicle's track signature continued past the parked location to another logical spot.</li> </ul> <p>2. The operators maneuver vehicles along concealed routes.</p> <ul style="list-style-type: none"> <li>a. Used existing tracks.</li> <li>b. Avoided movement near terrain features, such as hilltops and road intersections, which may have been used as a reference point by the enemy's ground and aerial fires.</li> <li>c. Obliterated vehicle tracks where they turned, concealing vehicle positions.</li> </ul> <p>3. The element conceals vehicles and equipment.</p> <ul style="list-style-type: none"> <li>a. Positioned vehicles under natural cover or in shadows.</li> <li>b. Positioned vehicles so that their shapes blended with the surroundings.</li> <li>c. Used natural materials to break up and combine with the shapes or shadows of the vehicles.</li> <li>d. Blended natural materials with the surrounding area.</li> <li>e. Replaced cut vegetation when it withered or changed color.</li> <li>f. Used nets to create shadows.</li> <li>g. Used camouflage screening systems to enhance natural materials.</li> <li>h. Kept heat sources (such as generators, engines, and mess areas) under screening systems, even when natural concealment was used.</li> <li>i. Covered shiny objects such as windshields, headlights, cab windows, and wet vehicle bodies.</li> <li>j. Dug in (if in the desert or open terrain) when the situation permitted.</li> <li>k. Concealed vehicles' track signatures in snow-covered terrain.</li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
l. Disguised vehicles and equipment to change their appearance or to resemble something of a lesser or greater threat to the enemy.  * 4. The leaders enforce camouflage discipline. a. Ensured that unit activities did not change the area's appearance or reveal the presence of military equipment. b. Enforced measures to maintain blackout conditions at night. c. Ensured that measures were taken to eliminate or reduce noise by muffling or masking it with the terrain, defilade positions, or shields. d. Ensured the prompt and complete policing of debris or spoil from the area.  * 5. The leaders know when opposing forces' (OPFOR) surveillance is overhead. a. Received satellite transmission (SATRAN) information from higher headquarters (HQ). b. Disseminated the pertinent SATRAN information to subordinates. c. Incorporated SATRAN information into the tactical plan.

19-3-D204	Conduct Convoy Security (Digital Military Police (MP) Platoon)

#### OPFOR TASKS AND STANDARDS

**TASK:** Conduct Hasty Ambush (19-OPFOR-1003)

**CONDITION:** An opposing forces (OPFOR) element is moving in a wooded area when an enemy march element is seen moving along a nearby route.

**STANDARD:** The OPFOR element prepares the ambush site before arrival of the enemy element. 1. Surprises enemy forces. 2. Inflicts casualties within the designated kill zone. 3. Inflicts damage to vehicles and equipment within the designated kill zone. 4. Delays the enemy march element from reaching its destination for a specified period. 5. Withdraws, on order, within two minutes of the ambush initiation. 6. Sustains minimum casualties. 7. Reports actions to superiors.

**TASK:** Conduct Sniper Operations (19-OPFOR-0005)

**CONDITION:** The opposing forces (OPFOR) assigned snipers, regular or paramilitary elements, in the friendly rear area along a main supply route (MSR) and near support sites.

**STANDARD:** 1. Set up well concealed locations. 2. Engage vehicle drivers or personnel on foot. 3. Kill or wound selected targets. 4. Prevent your position from being discovered by friendly forces. 5. Exit the area without being spotted. 6. Report all specified priority intelligence requirements (PIR) and other intelligence requirements to the OPFOR headquarters (HQ).NOTE: Use with the defend a march element. May be used with setup and operational tasks.

**TASK:** Conduct Guerilla and Saboteur Attacks (19-OPFOR-0009)

**CONDITION:** The opposing forces (OPFOR) have dispatched small teams into friendly rear areas to disrupt operations.

**STANDARD:** 1. Locate rear-support bases and command-and-control (C2) facilities. 2. Delay and disrupt operations through guerilla activities. 3. Infiltrate bases to conduct sabotage activities. 4. Inflict casualties. 5. Destroy supplies and equipment. NOTE: Use with any task.

**TASK:** Conduct a Deliberate Ambush (19-OPFOR-1004)

**CONDITION:** An opposing forces (OPFOR) element is operating along an enemy main supply route (MSR). OPFOR intelligence has reported that an enemy element is conducting a road march along the route. The OPFOR has set up an ambush. The march element is about 15 minutes from the ambush point. The OPFOR element possesses automatic weapons, antiarmor weapons, and command detonated mines. OPFOR headquarters (HQ) has ordered complete destruction of the march element.

**STANDARD:** The OPFOR element prepares an ambush site before the arrival of the enemy element. 1. Surprises enemy forces. 2. Forces the enemy march element to halt in the kill zone. 3. Initiates the ambush on order of the OPFOR leader. 4. Kills, wounds, or captures all enemy personnel, and destroys all specified vehicles and equipment in the kill zone. 5. Engages all enemy reinforcement and security elements. 6. Sustains minimum casualties from the enemy forces. 7. Consolidates and withdraws from the area on order. 7. Reports all specified priority intelligence requirements and other intelligence requirements.

**ELEMENT:** Company Headquarters

**TASK:** Supervise the Security of Designated Personnel (Digital Military Police [MP] Company) (19-2-D213)

(FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division heavy MP company has been directed by the provost marshal office (PMO) to provide security for designated personnel who will be traveling to various locations within the company area of operation. The company supervises the performance of the platoons. Digital units have conducted functionality checks and systems are operational. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The operations center coordinates and monitors the platoon activities and provides updated information through digital means to PMO.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The company commander analyzes the mission received from the provost marshal office (PMO).</p> <ul style="list-style-type: none"> <li>a. Task Number	Task Title
19-3-D222	Provide Military Police (MP) Response to Base/Base Cluster Defense (Digital MP Platoon)

**OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Sniper Operations (19-OPFOR-0005)

**CONDITION:** The opposing forces (OPFOR) assigned snipers, regular or paramilitary elements, in the friendly rear area along a main supply route (MSR) and near support sites.

**STANDARD:** 1. Set up well concealed locations. 2. Engage vehicle drivers or personnel on foot. 3. Kill or wound selected targets. 4. Prevent your position from being discovered by friendly forces. 5. Exit the area without being spotted. 6. Report all specified priority intelligence requirements (PIR) and other intelligence requirements to the OPFOR headquarters (HQ).NOTE: Use with the defend a march element. May be used with setup and operational tasks.

**TASK:** CONDUCT RAID (19-OPFOR-0007)

**CONDITION:** Small OPFOR elements are operating in the rear area and are planning attacks on friendly bases.

**STANDARD:** 1. Surprise friendly forces. 2. Assault support base and accomplish assigned tasks. 3. Destroy specified equipment and supplies. 4. Avoid being decisively engaged. 5. Withdraw all personnel from area(s) within prescribed time. 6. Obtain all PIR from raid site. 7. Sustain only light casualties from friendly fire. NOTE: Use with task, Defend Against Level I Attack. May be used with other operational tasks.

**TASK:** Conduct Guerilla and Saboteur Attacks (19-OPFOR-0009)

**CONDITION:** The opposing forces (OPFOR) have dispatched small teams into friendly rear areas to disrupt operations.

**STANDARD:** 1. Locate rear-support bases and command-and-control (C2) facilities. 2. Delay and disrupt operations through guerilla activities. 3. Infiltrate bases to conduct sabotage activities. 4. Inflict casualties. 5. Destroy supplies and equipment. NOTE: Use with any task.

**TASK:** Conceal or Destroy Items of Tactical Value (19-OPFOR-1015)

**CONDITION:** OPFOR soldiers surrender documents and equipment of no tactical use to the enemy and attempt to conceal/destroy items of tactical value.

**STANDARD:** OPFOR soldiers retain/destroy documents and equipment.1. Prevent successful capture of documents and equipment.2. Destroy documents and equipment.3. Remove identifying markings from equipment.4. Remove unit identifying insignia.5. Provide misleading information.

**ELEMENT:** Company Headquarters

**TASK:** Supervise Security of Critical Sites (Digital Military Police [MP] Company) (19-2-D224)  
(FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The provost marshal office (PMO) has tasked a digital-division heavy MP company to provide security for one or more critical sites. Functionality checks were conducted and all digital systems are operational. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** Security plans for critical sites have been developed and approved. Platoons are conducting security procedures according to those plans. Report all vital and updated information to the PMO through digital means.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The company commander analyzes the mission received from the provost marshal office (PMO).</p> <ul style="list-style-type: none"> <li>a. Issued a warning order (WO) to the platoons using Force XXI Battle Command Brigade and Below (FBCB2).</li> <li>b. Identified the essential specified and implied tasks.</li> <li>c. Reviewed constraints such as the rules of engagement, rules of interaction, legal issues, and political issues.</li> <li>d. Reviewed the limitations such as time, environment, budget, supplies, equipment, and personnel.</li> </ul> <p>2. The company commander coordinates with the Assistant Chief of Staff, Intelligence (G2) and determines the situation and threat.</p> <p>3. The company commander supervises the development of the security plan.</p> <ul style="list-style-type: none"> <li>a. Directed the platoons to conduct vulnerability assessments on sites.</li> <li>b. Directed platoons to develop recommendations for the security plan.</li> <li>c. Reviewed the security plan.</li> <li>d. Developed a response plan.</li> <li>e. Designated personnel and equipment, through the PMO, for additional support requirements. Designated--               <ul style="list-style-type: none"> <li>(1) Additional MP support or augmentation forces.</li> <li>(2) Host nation support.</li> <li>(3) Engineer support.</li> <li>(4) Close air and artillery support.</li> </ul> </li> <li>f. Submitted a security plan to the PMO via FBCB2.</li> </ul> <p>* 4. The company commander will brief the critical site OIC on the security plan.</p> <p>5. 191-400-0040	Supervise the Preparation of a Physical Security Plan
191-400-0041	Establish Liaison with other Military/Civilian Law Enforcement Agencies

### SUPPORTING COLLECTIVE TASKS

Task Number	Task Title
19-3-2204	Conduct Security of a Critical Site
19-3-D224	Conduct Security of a Critical Site (Digital Military Police [MP] Platoon)

### OPFOR TASKS AND STANDARDS

**TASK:** Conduct Air Attacks (19-OPFOR-1006)

**CONDITION:** The opposing forces (OPFOR) elements in the rear area have forwarded the positions of enemy support sites and/or the locations of road march elements. The OPFOR aircraft have been dispatched to attack enemy installations or convoys.

**STANDARD:** The OPFOR locates command and control (C2) sites or convoys. 1. Conducts attack runs on the designated targets. 2. Destroys enemy equipment, supplies, vehicles, and personnel. 3. Sustains minimum aircraft losses.

**TASK:** Conduct Raid (19-OPFOR-1009)

**CONDITION:** An opposing forces (OPFOR) element has occupied an objective rally point. The element has orders to conduct a raid on a combat service support (CSS) base.

**STANDARD:** The OPFOR element surprises enemy forces. 1. Assaults the enemy support base and accomplishes the assigned tasks. 2. Destroys specified equipment and supplies. 3. Avoids decisive engagement. 4. Withdraws all personnel from the objective areas within the time prescribed. 5. Obtains all priority intelligence requirements from the raid site. 6. Sustains only light casualties from enemy fire.

**TASK:** Conduct Terrorist and Saboteur Attacks (19-OPFOR-1013)

**CONDITION:** The opposing forces (OPFOR) have dispatched small teams into the enemy rear area to disrupt combat service support (CSS) operations.

**STANDARD:** The OPFOR locates rear-support bases and command and control (C2) facilities. 1. Delays and disrupts CSS operations through probes. 2. Infiltrates CSS bases to conduct sabotage and terrorist activities. 3. Inflicts light casualties. 4. Destroys supplies and equipment.

**ELEMENT:** Company Headquarters

**TASK:** Supervise Security of Command Post (Digital Military Police [MP] Company) (19-2-D225)  
 (FM 100-15) (FM 3-19.4) (FM 71-100)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** Level I and Level II threat forces are operating in the company's area of operation (AO). The digital-division MP company is ordered to provide command post security. Digital units have performed functionality checks and systems are operational. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The company ensures the command post is secured and provides updated information to the provost marshal office (PMO) through digital means.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The company commander analyzes the mission received receives the order from the PMO using Force XXI Battle Command Brigade and Below (FBCB2).</p> <ul style="list-style-type: none"> <li>a. Issued a warning order (WO) to platoon(s) via FBCB2.</li> <li>b. Determined the mission requirements.</li> <li>c. Evaluated the threat based on information from the Assistant Chief of Staff, (Intelligence) (G2).</li> <li>d. Conducted a reconnaissance or map reconnaissance of the area.</li> <li>e. Identified available items and resources.</li> <li>f. Ensured that traffic control posts (TCP) were located properly.</li> <li>g. Ensured that methods for screening authorized personnel were used.</li> <li>h. Ensured that vehicle parking and dispersion procedures were used.</li> <li>i. Ensured that access rosters (provided by G2) were used.</li> <li>j. Ensured that methods to provide personal security for the commander were used.</li> <li>k. Directed operations center personnel to coordinate and monitor the security of the command post (CP).                             <ul style="list-style-type: none"> <li>l. Issued an operation order (OPORD) to the platoons via FBCB2.</li> </ul> </li> <li>m. Received the plan from the platoons via FBCB2.</li> <li>n. Made final changes to the plan.</li> <li>o. Briefed the provost marshal on the final plan.</li> </ul> <p>* 2. The first sergeant provides support requirements.</p> <ul style="list-style-type: none"> <li>a. Ensured coordination for Class I, III, IV, V, VIII, and IX items.</li> <li>b. Ensured coordination for morale support activities.</li> <li>c. Ensured a plan for medical evacuation was in place.</li> <li>d. Provided communication support.</li> <li>e. Coordinated special equipment requirements.</li> </ul> <p>3. The operations center personnel monitors command post security.</p> <ul style="list-style-type: none"> <li>a. Ensured communication was established (digital and frequency modulated [FM]).</li> <li>b. Maintained updated digital overlays and changes to the plan.</li> <li>c. Received situation reports (SITREPs)/spot reports (SPOTREPs) from the platoons.</li> <li>d. Consolidate information into a company digital situation map.</li> <li>e. Forward situation/spot reports through the FBCB2 system to PMO.</li> <li>f. Forward updated overlays via the FBCB2 system to PMO.</li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO

**SUPPORTING INDIVIDUAL TASKS**

Task Number	Task Title
061-283-6003	ADJUST INDIRECT FIRE
071-326-5626	Prepare an Oral Operation Order
081-831-0101	Request Medical Evacuation
113-573-8006	Use an Automated Signal Operation Instruction (SOI)
191-400-0021	Provide Security to Designated Critical Area
191-400-0026	Direct the Security of a Tactical Operations Center (TOC)

**SUPPORTING COLLECTIVE TASKS**

Task Number	Task Title
19-3-2205	Conduct Security of a Command Post
19-3-9004	Provide Assistance in Securing a Division Main Command Post
19-3-D225	Conduct Security of a Command Post (Digital Military Police [MP] Platoon)

**OPFOR TASKS AND STANDARDS**

**TASK:** Attack (19-OPFOR-1010)

**CONDITION:** The enemy rear area combat service support (CSS) base has been located by an element of opposing forces (OPFOR). Priority intelligence requirements and other intelligence requirements have been obtained by OPFOR patrols. The OPFOR element has automatic and antiarmor weapons and light mortars. The OPFOR element is approximately the size of two platoons.

**STANDARD:** Develop and initiate an attack plan using a scheme of maneuver that exploits enemy flanks, gaps, and weaknesses. 1. Use covered and concealed routes to approach enemy units' flanks, gaps, or weakly held areas. 2. Employ indirect fire to support attacks. 3. Penetrate enemy defenses. 4. Destroy equipment and supplies. 5. Inflict heavy casualties. 6. Isolate the combat service support base by blocking reinforcements. 7. Force enemy units to displace. 8. Withdraw before the combat service support base is reinforced with tactical combat forces.

**TASK:** Conduct Electronic Warfare (19-OPFOR-1012)

**CONDITION:** The opposing forces (OPFOR) employs a large number of radio direction finder sets and monitors enemy forces for loose-communication security practices.

**STANDARD:** 1. Locate the enemy command positions, intelligence, and logistics radio nets. 2. Forward locations to the OPFOR headquarters (HQ). 3. Use jamming signals against enemy radio receivers. 4. Monitor enemy radio nets for intelligence information.

**TASK:** Conduct Terrorist and Saboteur Attacks (19-OPFOR-1013)

**CONDITION:** The opposing forces (OPFOR) have dispatched small teams into the enemy rear area to disrupt combat service support (CSS) operations.

**STANDARD:** The OPFOR locates rear-support bases and command and control (C2) facilities. 1. Delays and disrupts CSS operations through probes. 2. Infiltrates CSS bases to conduct sabotage and terrorist activities. 3. Inflicts light casualties. 4. Destroys supplies and equipment.

**ELEMENT:** Company Headquarters

**TASK:** Supervise Security for a Downed Aircraft (19-2-D245)  
(FM 3-19.4)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division heavy military police (MP) company is ordered by the provost marshal office (PMO) to provide security for a downed aircraft in their rear area of operation (AO). Functionality checks have been conducted and digital systems are operational. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The company commander supervises the platoons to ensure that they provide the proper security for a downed aircraft in their area of operation AO. All vital and updated information will be sent to the PMO by digital means.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ol style="list-style-type: none"> <li>1. The company commander analyzes the mission received from the provost marshal office (PMO).                             <ol style="list-style-type: none"> <li>a. Issued a warning order (WO) to the platoons using Force XII Battle Command Brigade and Below (FBCB2).</li> <li>b. Determined special requirement and equipment needs.</li> <li>c. Requested a threat analysis from the Movement Control Station (MCS) via FBCB2.</li> <li>d. Determined the commander's critical information requirements (CCIR).</li> <li>e. - ELEMENTS:** Company Headquarters  
 Military Police Platoon Headquarters (Division Support)  
 Military Police Squad (Division Support)  
 Military Police Platoon Headquarters (Forward Support)  
 Military Police Squad (Forward Support)

**TASK:** Conduct a Cordon and Search (Digital Military Police [MP] Platoon) (19-3-D226)  
 (FM 3-19.4)

**ITERATION:** 1 2 3 4 5 (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The company is operating in an urban environment and is ordered by the provost marshal office (PMO) to conduct a search of a built-up area for insurgents and sympathizers. The company is provided an interpreter but no local police support. Civilians, government organizations, nongovernment organizations, private voluntary organizations, and the international press are present in the area. Digital systems are operational and functionality checks have been performed. This task should not be trained in MOPP4.

**TASK STANDARDS:** The company establishes a cordon of the area and captures all insurgents and enemy material within the cordon. The company minimizes the inconvenience to the local populace, complies with the rules of engagement (ROE), and minimizes collateral damage. Reports all vital and updated information to the provost marshal office (PMO) by digital means.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>* 1. The company commander analyzes the mission received from the provost marshal office (PMO).                             <ul style="list-style-type: none"> <li>a. Identified personnel and equipment requirements, including special equipment (such as night vision devices).</li> <li>b. Designed the cordon to prevent the escape of individuals to be searched.</li> <li>c. Divided the platoon into a search element, cordon element, and a reserve element.</li> <li>d. Coordinated for the protection of the forces conducting the operation.</li> <li>e. Requested information from the PMO on the ROE and rules of integration.</li> <li>f. Conducted an map reconnaissance of the area before the search using Force XXI Battle Command Brigade and Below (FBCB2).</li> <li>g. Avoided a physical reconnaissance.</li> </ul> </li> <li>* 2. The first sergeant (1SG) provide for the support requirements.                             <ul style="list-style-type: none"> <li>a. Ensured Class I, III, V, VII, and VIII supplies were on hand for the mission.</li> <li>b. Coordinated for a medical evacuation plan with the PMO.</li> </ul> </li> <li>* 3. The company commander makes a tentative plan and begins initial movement.                             <ul style="list-style-type: none"> <li>a. Organized the element into special teams based on mission, enemy, terrain, troops, time available, and civilian consideration (METT-TC).                                     <ul style="list-style-type: none"> <li>(1) Included teams to handle prisoners.</li> <li>(2) Included interrogation teams.</li> <li>(3) Included documentation teams (using a recorder with a camera).</li> <li>(4) Included demolition teams.</li> <li>(5) Included psychological operations (PSYOP) and civil affairs teams.</li> <li>(6) Included mine detection teams.</li> <li>(7) Included fire support teams.</li> <li>(8) Included military working dog (MWD) teams.</li> <li>(9) Included tunnel reconnaissance teams.</li> </ul> </li> </ul> </li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>b. Back briefed the PMO on the plan using the Force XXI Battle Command Brigade and Below (FBCB2).</p> <p>c. Reconfirmed the plan based on the reconnaissance.</p> <p>d. Directed the platoon to start initial movement towards the objective and area to be searched.</p> <p>e. Finalized the reconnaissance with the squad or team leaders.</p> <p>f. Completed the plan and issued it to subordinate leaders using a terrain model or sketches.</p> <p>* 4. The company commander and first sergeant supervise precombat checks and rehearsals.</p> <p>a. Inspected weapons, night vision devices, water, food, and ammunition.</p> <p>b. Supervised rehearsals. Rehearsals included--</p> <p>(1) Entering and clearing of a building.</p> <p>(2) Entering and clearing of a room.</p> <p>(3) Using buddy teams to cross an area.</p> <p>(4) Moving through a hallway.</p> <p>(5) Searching procedures.</p> <p>5. The cordon element moves to the area to be searched and cordoned.</p> <p>a. Moved into the position rapidly.</p> <p>b. Surrounded the area at once to prevent escape of insurgents and to block any enemy reinforcements.</p> <p>c. Established checkpoints and roadblocks.</p> <p>6. The search element conducts the search.</p> <p>a. Avoided unnecessary inconvenience to the local populace.</p> <p>b. Searched all underground and underwater areas.</p> <p>c. Used observer fire to cover any gaps in the cordon.</p> <p>d. Used mine detectors to locate mines underground and underwater.</p> <p>7. The search teams use one of three methods to search the population area based on the situation. Search methods include--</p> <p>a. Assembling inhabitants in a central location if they appear to be hostile.</p> <p>NOTE: This method provides the most control and simplifies the search and interrogations. However, taking inhabitants away from their dwellings encourages looting and ill feelings.</p> <p>b. Restricting inhabitants to their homes.</p> <p>NOTE: This prohibits civilian movement and discourages looting, but makes control and interrogation difficult.</p> <p>c. Controlling the heads of households.</p> <p>NOTE: This reduces looting and minimizes claims that the search teams stole anything. This is the best method of searching because it is less disruptive to the populace.</p> <p>8. The reserve element remains ready to respond.</p> <p>a. Monitored communications.</p> <p>b. Prepared to move on order.</p> <p>9. The company processes captured insurgents and material.</p> <p>a. Used the least force necessary to detain the insurgents.</p> <p>b. Turned the insurgents over to the appropriate authorities as soon as the situation allowed.</p> <p>c. Handled material properly. Maintained accountability, provided storage, or released the property.</p>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
*10. The company commander controls the rate of search. a. Employed the reserve to assist the other two elements (as the situation required). b. Reported progress to the PMO using the FBCB2. c. Consolidated the company. d. Directed reorganization as needed. e. Continued the mission or prepared for a new mission.

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** Health hazards exist which require field-sanitation measures. The unit is in the field without permanent sanitation or water facilities. The commander has selected and trained the unit's field-sanitation team (FST). The combat health support (CHS) plan, the tactical standing operating procedure (TSOP), and an operation order (OPORD) from the provost marshal office (PMO) are available. All required sanitation equipment is available. Field-sanitation measures are continuous and performed simultaneously with other operational tasks. Simplified collective-protection equipment (SCPE) is on hand and/or field-expedient and natural shelters are available. Digital systems are operational and functionality checks have been performed. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** Field-sanitation measures are accomplished according to the TSOP, the OPORD, and Field Manual (FM) 21-10. The FST performs field-sanitation measures according to the TSOP, FM 21-10, and the commander's guidance. Only minimum and essential field-sanitation activities are performed at mission-oriented protection posture (MOPP) 4. All updated and vital information will be sent to the provost marshal office (PMO) by digital means. The time required to perform this task is increased when conducting it in mission-oriented protection posture (MOPP) 4.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The commander directs field-sanitation measures.</p> <ul style="list-style-type: none"> <li>a. Directed field-sanitation activities to counter the medical threat.</li> <li>b. Monitored field-sanitation activities for compliance with FM 21-10 and the TSOP.</li> <li>c. Enforced individual field-sanitation measures.</li> <li>d. Requested assistance from preventive-medicine (PVNTMED) elements for sanitation problems that were beyond the expertise of the unit FST (according to the TSOP and the OPORD).</li> <li>e. Corrected field-sanitation deficiencies.</li> <li>f. Reported, to the FST, field-sanitation deficiencies which could not be corrected by unit personnel.</li> <li>g. Enforced safety procedures according to Army Regulation (AR) 385-10 and the TSOP.</li> <li>h. Enforced environmental-protection procedures according to AR 200-1 and the TSOP.</li> </ul> <p>2. The FST supervises unit field-sanitation measures.</p> <ul style="list-style-type: none"> <li>a. Maintained the field-sanitation basic load according to AR 40-5 and FM 21-10-1.</li> <li>b. Supervised the distribution of field-sanitation basic-load items according to AR 40-5 and FM 4-25.12.</li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>c. Tested the unit water supply for the chlorine-residual level according to FM 4-25.12 and the TSOP.</li> <li>d. Monitored personnel to ensure that personal protective measures against arthropods (skin, clothing, and bed net repellent) and rodents were used according to applicable directives and the commander's guidance.</li> <li>e. Conducted rodent surveys, as required.</li> <li>f. Monitored personnel for employment of correct hygiene measures.</li> <li>g. Monitored waste facilities and procedures for compliance with AR 40-5, FM 4-25.12, and the TSOP, as required.</li> <li>h. Inspected latrines and urinals according to the TSOP.</li> <li>i. Inspected liquid- and solid-waste disposal facilities to ensure compliance with AR 40-5, FM 4-25.12, and the TSOP.</li> <li>j. Inspected hand-washing devices according to FM 4-25.12 and the TSOP.</li> <li>k. Inspected the transport, storage, preparation, and serving of food for compliance with FM 4-25.12 and the TSOP.</li> <li>l. Provided advice, recommendations, and training requirements to the commander.</li> <li>m. Enforced safety procedures according to the TSOP and the commander's guidance.</li> <li>n. Enforced environmental-protection procedures according to AR 200-1 and the TSOP.</li> <li>o. Inspected water containers and trailers according to FM 4-25.12 and the TSOP.</li> </ul> <p>3. Unit personnel employ field-sanitation measures.</p> <ul style="list-style-type: none"> <li>a. Maintained the prescribed load of water-purification materials according to FM 21-10 and the TSOP.</li> <li>b. **ITERATION:** 1 2 3 4 5 (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The unit has sustained casualties. The unit has no organic medical personnel. Threat force contact has been broken. Soldiers have been wounded and some may have chemical contamination or nonbattle injuries. Some unit members have been assigned lifesaving duties. Unit members are performing first aid (self-aid and buddy aid) treatment and combat lifesavers are providing enhanced first aid treatment until medical treatment personnel arrive. This task is performed simultaneously with other reorganization tasks. The Provost Marshal Office (PMO) tactical standing operating procedures (TSOP) and operation orders (OPORDs) are available. Simplified collective-protection equipment (SCPE) is on hand and/or field-expedient and natural shelters are available. Digital systems are operational and functionality checks have been conducted.

**NOTE:** This task should not be trained in mission-oriented protection posture (MOPP) 4 unless treating nuclear, biological, chemical (NBC) casualties. This task should not be trained in MOPP4.

**TASK STANDARDS:** Unit members provide treatment for casualties according to Field Manual (FM) 21-11, FM 8-285, and combat lifesaver certification standards. Forwards all vital and updated information to the provost marshal office (PMO) via digital means. At MOPP 4, performance degradation factors increase the time required to provide treatment and limits the type of treatment provided.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. Commander and leaders supervise first aid treatment of casualties.</p> <ul style="list-style-type: none"> <li>a. Developed a treatment plan.</li> <li>b. Monitored treatment for compliance with FM 21-11. Ensured that all casualties were treated.</li> <li>c. Directed the employment of combat lifesavers to treat casualties.</li> <li>d. Reported casualties, as required.</li> <li>e. Coordinated with higher HQ logistics elements for the replenishment of Class VIII supplies (according to the TSOP).</li> <li>f. Directed the distribution of class VIII supplies and equipment according to the TSOP.</li> <li>g. Enforced QC procedures for class VIII items issued to unit elements.</li> </ul> <p>2. Unit personnel survey casualties.</p> <ul style="list-style-type: none"> <li>a. Checked for responsiveness.</li> <li>b. Checked for breathing.</li> <li>c. Checked for bleeding.</li> <li>d. Checked for head injuries.</li> <li>e. Checked for shock.</li> <li>f. Checked for fractures, to include cervical spine and back fractures.</li> <li>g. Checked for burns.</li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>3. Unit personnel administer lifesaving treatment.</p> <ul style="list-style-type: none"> <li>a. Cleared all objects from the casualty's throat.</li> <li>b. Used the jaw thrust method to open the airway if cervical spine injury was suspected.</li> <li>c. Performed mouth-to-mouth resuscitation according to cardiopulmonary resuscitation (CPR) procedures until the casualty began breathing.</li> </ul> <p>4. Unit personnel control hemorrhages.</p> <ul style="list-style-type: none"> <li>a. Applied dressings and bandages.</li> <li>b. Applied manual direct pressure to wounds.</li> <li>c. Elevated extremities.</li> <li>d. Applied pressure dressing to wounds.</li> <li>e. Apply tourniquets as a last resort.</li> </ul> <p>5. Unit personnel dress wounds.</p> <ul style="list-style-type: none"> <li>a. Applied dressings to open chest wounds, if possible.</li> <li>b. Applied dressings to open abdominal wounds.</li> <li>c. Applied dressings to open head wounds.</li> </ul> <p>6. Unit personnel splint suspected fractures.</p> <ul style="list-style-type: none"> <li>a. Employed available materials to splint injury.</li> <li>b. Splinted fractures in the position they were found.</li> <li>c. Restricted the movement of extremities.</li> <li>d. Checked circulation for impairment.</li> </ul> <p>7. Unit personnel provide first aid treatment to casualties with burns.</p> <ul style="list-style-type: none"> <li>a. Extinguished thermal burn agents.</li> <li>b. Removed chemical burn agents.</li> <li>c. Eliminated electrical burn sources.</li> <li>d. Uncovered burns, unless they are stuck to clothes or a chemical environment exists.</li> <li>e. Applied field dressings, if appropriate.</li> </ul> <p>8. Unit personnel treat environmental injuries.</p> <ul style="list-style-type: none"> <li>a. Administered treatment for heat injuries.</li> <li>b. Administered first aid for cold weather injuries.</li> </ul> <p>9. Unit personnel provide first aid treatment for chemical casualties.</p> <ul style="list-style-type: none"> <li>a. Took immediate protective steps to protect self and warn others according to FM 8-285.</li> <li>b. Protected casualties from further contamination.</li> <li>c. Administered nerve agent antidote according to FM 8-285.</li> <li>d. Administered convulsant antidote for nerve agents (CANAs), if required.</li> <li>e. Decontaminated casualties according to FM 8-285, if necessary.</li> </ul> <p>10. Unit personnel prevent shock.</p> <ul style="list-style-type: none"> <li>a. Positioned casualties in the correct antishock position according to FM 21-11.</li> <li>b. Loosened clothing and equipment.</li> <li>c. Prevented casualties from chilling or overheating.</li> <li>d. Calmed casualties by reassuring them.</li> </ul> <p>11. Company combat lifesavers perform advanced treatment, as required.</p> <ul style="list-style-type: none"> <li>a. Evaluated casualties for the condition and type of treatment needed.</li> <li>b. Measured casualty's vital signs.</li> <li>c. Inserted an oropharyngeal airway in unconscious casualties.</li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
d. Applied splints to fractured limbs. e. Administered first aid to chemical-agent casualties. f. Initiated an intravenous infusion for hypovolemic shock. g. Identified environmental injuries. h. Treated environmental injuries. i. Managed battle fatigue (BF) casualties.

19-3-D212	Support Area Damage Control Operations (Digital Military Police [MP] Platoon)

**OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Sniper Operations (19-OPFOR-0005)

**CONDITION:** The opposing forces (OPFOR) assigned snipers, regular or paramilitary elements, in the friendly rear area along a main supply route (MSR) and near support sites.

**STANDARD:** 1. Set up well concealed locations. 2. Engage vehicle drivers or personnel on foot. 3. Kill or wound selected targets. 4. Prevent your position from being discovered by friendly forces. 5. Exit the area without being spotted. 6. Report all specified priority intelligence requirements (PIR) and other intelligence requirements to the OPFOR headquarters (HQ).NOTE: Use with the defend a march element. May be used with setup and operational tasks.

**TASK:** Gather Intelligence (19-OPFOR-0006)

**CONDITION:** Small opposing forces(OPFOR) elements are operating in the rear area and are planning attacks on friendly bases. Information is needed to complete the mission plan.

**STANDARD:** 1. Identify all priority intelligence requirements (PIR) and other intelligence requirements. 2. Pass through any outpost, defensive wire, or warning devices undetected. 3. Move to an observation point that offers cover and concealment and is close enough to gather PIR and other intelligence requirements. 4. Gather all PIR and other intelligence requirements. 5. Withdraw from the area undetected. 6. Report all information to OPFOR headquarters. NOTE: Employ operations security (OPSEC) measures with this task and operational tasks.

**TASK:** CONDUCT RAID (19-OPFOR-0007)

**CONDITION:** Small OPFOR elements are operating in the rear area and are planning attacks on friendly bases.

**STANDARD:** 1. Surprise friendly forces. 2. Assault support base and accomplish assigned tasks. 3. Destroy specified equipment and supplies. 4. Avoid being decisively engaged. 5. Withdraw all personnel from area(s) within prescribed time. 6. Obtain all PIR from raid site. 7. Sustain only light casualties from friendly fire. NOTE: Use with task, Defend Against Level I Attack. May be used with other operational tasks.

**ELEMENTS:** Company Headquarters

#### OPFOR TASKS AND STANDARDS

**TASK:** Gather Intelligence (19-OPFOR-0006)

**CONDITION:** Small opposing forces(OPFOR) elements are operating in the rear area and are planning attacks on friendly bases. Information is needed to complete the mission plan.

**STANDARD:** 1. Identify all priority intelligence requirements (PIR) and other intelligence requirements. 2. Pass through any outpost, defensive wire, or warning devices undetected. 3. Move to an observation point that offers cover and concealment and is close enough to gather PIR and other intelligence requirements. 4. Gather all PIR and other intelligence requirements. 5. Withdraw from the area undetected. 6. Report all information to OPFOR headquarters. NOTE: Employ operations security (OPSEC) measures with this task and operational tasks.

**TASK:** Disrupt Enemy Prisoner of War (EPW) and Civilian Internee (CI) Operations (19-OPFOR-1014)

**CONDITION:** The opposing forces (OPFOR) soldiers are captured.

**STANDARD:** The OPFOR soldiers escape or retain weapons and documents of military intelligence (MI) value. 1. Prevents successful search. 2. Maintains unit integrity. 3. Plans an escape. 4. Delays movement to the nearest collecting point. 5. Prevents safeguarding of the EPWs in order to cause embarrassment to the United States (U.S.).

**ELEMENT:** Company Headquarters

**TASK:** Perform Company Level Law and Order Operations (Digital Military Police [MP] Company) (19-2-D401)

(FM 3-19.4)

(DA FORM 3997)

(DA FORM 3998)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** A digital-division heavy MP company has been directed by the provost marshal office (PMO) to conduct law and order operations. The company is established in an area of operations and has been given a specific mission. Functionality checks have been performed and digital systems are operational. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The company coordinates with other agencies and host nation authorities. The company operations cell develops the plan to distribute MP support based on the tactical environment and other missions. The company performs operations, to include traffic enforcement, crime prevention, physical security, antiterrorism measures, and investigations. Major incidents are reported to the United States Army Criminal Investigation Command (USACIDC) for investigation. All vital and updated information will be sent to the provost marshal office (PMO) by digital means.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The company commander analyzes the mission received from the provost marshal office (PMO).</p> <ul style="list-style-type: none"> <li>a. Issued a warning order (WO) using Force XXI Battle Command Brigade and Below (FBCB2).</li> <li>b. Determined the current friendly and enemy situation and courses of action (COAs).</li> <li>c. **ELEMENTS:** Company Headquarters  
 Military Police Platoon Headquarters (Division Support)  
 Military Police Squad (Division Support)  
 Military Police Platoon Headquarters (Forward Support)  
 Military Police Squad (Forward Support)

**TASK:** Prepare an Operation Order (OPORD) (19-2-D617)  
 (FM 101-5) (FM 3-0) (FM 63-3)

**ITERATION:** 1 2 3 4 5 (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** An OPORD has been received from the provost marshal office (PMO). The combat support element (CSE) or tactical support element (TSE) is deployed. Hostilities have commenced or are imminent. Subordinate elements are deployed. A mission analysis has been completed. The CSE/TSE commander directs the preparation of an OPORD. Digital systems are operational and functionality checks have been conducted. This task should not be trained in MOPP4.

**TASK STANDARDS:** The OPORD contains all required information and is approved by the CSE/TSE commander. The OPORD is transmitted digitally. All reports of vital and updated information are sent to the PMO by digital means.

## CHAPTER 6

### External Evaluation

6-1. General. An external evaluation assesses the company's ability to perform its mission. This chapter is a guide for preparing an external evaluation. Units using this information may modify the evaluation based on METT-TC and other considerations, as deemed appropriate by the commander. The company will be evaluated using the standards of selected T&EOs contained in Chapter 5 of this MTP. The evaluation will evaluate the company and each platoon of the company. At the completion of the evaluation, the commander can identify the strengths and weaknesses of his section. These strengths and weakness are the basis for future training and resource allocations.

6-2. Preparing the Evaluation. The commander must standardize evaluation procedures to accurately measure the platoon's capabilities. Table 6-1 is a sample evaluation scenario that contains the mission as well as the appropriate tasks necessary to develop the scenario and execute the evaluation. Selective tailoring is required because it is not possible to evaluate every task. The following procedures are suggested for developing the evaluation:

**Table 6-1. Sample Evaluation Scenario**

Sequence	Event	Max Time Allotted	Proposed Time Frame
1	Conduct administrative preparations	8 hrs	Before start time
<b>Day 1</b>			
2	Issue order	1 hr	1900
3	Conduct vehicle tactical road march (day and/or night)	1 hr	2000
4	Occupy assembly area (night)	1 hr	2100
5	Receive warning order	1 hr	2200
6	Supervise MP support to rear operations	6 hrs	2300
<b>Day 2</b>			
7	Supervise route reconnaissance/surveillance	3 hrs	0500
8	Supervise area and zone reconnaissance	3 hrs	0800
9	Conduct sustaining operations	1 hr	0900
10	Supervise MP operations in an NBC Environment	5 hrs	1400
11	Conduct sustaining operations	1 hr	1500
12	Supervise route regulation, enforcement, and signing	1 hr	1600
13	Supervise dislocated civilian and straggler control operations	3 hrs	1900
14	Supervise area security operations	8 hrs	0300
15	Conduct sustaining operations	1 hr	0400
<b>Day 3</b>			
16	Supervise movement to contact	2 hrs	2400
17	Monitor a hasty attack	1 hr	0200
18	Supervise collecting point and holding area operations	1 hr	0300
19	Conduct sustaining operations	1 hr	0400

c. Select the tasks for the evaluation of every mission. List the selected tasks on the task summary sheet, which is used for recording the results of the evaluation.

d. Compile the selected missions and tasks in the order that they logically occur in the detailed scenario (Table 6-1). Divide the scenario into parts that can be interrupted at logical points to assess the MILES casualties and to conduct in-progress AARs.

6-3. Resource Requirements and Forecasting. Adequate training ammunition, equipment, and supplies must be forecasted and requisitioned. Table 6-2 is a consolidated list of the support requirements for this evaluation.

**Table 6-2. Sample Consolidated Support Requirements**

<b>ESTIMATED SUPPORT REQUIREMENTS</b>	
<b>Ammunition and Pyrotechnics</b>	<b>Quantity</b>
5.56 mm, blank, M16	240 rounds per M16 rifle
5.56 mm, blank, M249	240 rounds per M4 carbine
5.56 mm, blank, M-4	400 rounds per M249 SAW
Smoke grenades	2 per soldier
Hand grenades, inert	2 per soldier
Simulator, artillery	32 per company
Simulator, booby trap	24 per company
CS grenades	24 per company
Simulator projectile, ground burst	3 per exercise
Signal, illumination, while parachute	1 per exercise
<b>NBC Equipment</b>	<b>Quantity</b>
M9 chemical detection paper	1 each
Chemlight	1 box
XM22 chemical alarm	18 per company
AN/VDR-2 RADIAC set	44 per company
<b>Other Equipment</b>	<b>Quantity</b>
Blank adapter	1 set per weapon
BA 200, 6-volt batteries	48
BA 3090, 9-volt batteries	560
MILES	1 set per soldier/OPFOR
Controller gun	1 per evaluator
Small-arms alignment fixture	1 per company
Electronic system test set	1 per company

6-4. Selection and Preparation of the Field Evaluation Site. The bases for site selection are the required size, the type of terrain, OPFOR requirements, and administrative requirements. The OPFOR is

positioned according to threat doctrine. The site must provide space for the administrative area required to support the evaluation.

6-5. Planning an Indirect Fire Simulation. Because it greatly influences the outcome of battles, the reaction to indirect fire is an important consideration of the evaluation. Indirect fire simulation requires considerable planning to achieve realism.

a. The fire marker control system outlined in TC 25-6 is a recommended method of simulating indirect fire. Because of the amount of required resources, this method may be difficult to support.

b. The commander may use the evaluation control HQ method or the simulation without OPFOR method to evaluate the unit's ability to react to indirect fire. If the evaluation control headquarters method is used, the OPFOR will initiate a call for fire to the evaluation control HQ, which will simulate the tactical fire direction center (FDC). The control HQ would then relay the delivery data to the O/Cs, who would mark the impact of the round with artillery simulators and assess appropriate casualties. If an OPFOR is not used, the O/C may ignite artillery simulators and observe the unit's reactions. The FM 25 series provides assessment and computation tables which may be used to determine casualties. Table 6-3 provides the burst radius and sheaf size of various indirect fire weapons. Indirect fire simulation must be realistic and limited to what the unit could reasonably expect under combat conditions.

**Table 6-3. Bursting Radius**

<b>BURSTING RADIUS AND SHEAF SIZES OF INDIRECT FIRE WEAPONS</b>		
<b>Weapon</b>	<b>Burst Radius</b>	<b>Sheaf Size</b>
81-mm mortar	25 m	100 x 50 m
107-mm mortar	50 m	200 x 150 m
105-mm howitzer	30 m	200 x 150 m
155-mm howitzer	50 m	300 x 200 m

6-6. Selecting the Observers/Controllers

a. The O/Cs must know the unit's missions, organization, equipment, and employment. The senior O/C should be at least equal in rank to the unit commander and have successfully performed in that specific or similar TOE position.

b. The following are desired minimum rank and experience requirements for the O/Cs:

(1) The commander O/C will be an officer with company commander experience.

(2) The platoon or section O/Cs will be lieutenants or NCOs with platoon or section experience.

(3) The recorder will be an officer or NCO at the evaluation control HQ who receives "kill" information or results and time data from the O/Cs.

6-7. Training the Observers/Controllers. The O/Cs standardize administration of the evaluation by understanding the following three functional areas:

a. Evaluation design. Each part is designed to evaluate specific missions or tasks within the overall scenario. The O/Cs must thoroughly understand the evaluation and correctly implement it.

b. MILES. Each O/C, regardless of position, must have full knowledge of the unit's weapons and vehicles and must also thoroughly understand the MILES system being used. The unit commander is responsible for ensuring that all MILES equipment is functional before each part of the scenario.

c. Evaluation Control System. This system ensures that the evaluation is administered in a consistent and standardized manner and that correct data is collected for the final evaluation. It includes the following elements:

- (1) The ROC of engagement.
- (2) The O/C duties and responsibilities.
- (3) The communication systems.
- (4) The evaluation data collection plan.

6-8. Recording External Evaluation Information.

a. The evaluating HQ develops the data recording instruments for the O/Cs. The unit data sheet at Figure 6-3 presents demographic information that may reflect on a unit's performance. The environmental data sheet at Figure 6-4 documents weather information in order to compare missions conducted under differing environmental conditions. The personnel and equipment loss report at Figure 6-5 documents information that may affect the unit's degree of success during engagements with the OPFOR.

b. The senior O/C has overall responsibility for preparation of the external evaluation. This evaluation is based on senior O/C's findings and input from the subordinate O/Cs. Subordinate O/Cs use the task evaluation criteria (T&EOs from Chapter 5 and Task Summary Sheets) to determine overall proficiency in their particular areas. The senior O/C compiles the external evaluation results as prescribed by the evaluating commander. Deviations from the task standard assessed by the platoon O/C may be addressed in the senior O/C comments portion of the Unit Proficiency Worksheet.

<b>UNIT DATA SHEET</b>						
1. Unit designation:				Date:		
2. Unit leaders: (Circle the most correct answer.)						
Position	Rank	Time in unit (months)

Figure 6-5. Sample Personnel and Equipment Loss Report

6-9. Selecting and Training Opposing Forces. The selection and training of OPFOR are crucial to the success of a standardized evaluation. The OPFOR provides one of the control measures that influences the conditions under which the evaluation is administered. Each company should face an opponent that realistically resembles the threat in strength, weapons, and skill.

a. Selection. Any group of qualified skill level 1 or 2 soldiers can serve as OPFOR. Ideally, they should be a small, cohesive unit under the control of their leader or commander.

b. Training. The OPFOR must understand the following six major areas:

(1) Installation and operation of the MILES devices.

(2) ROEs.

(3) Threat small unit tactics.

(4) Training scenarios.

(5) OPFOR weapons and equipment, if available.

(6) Safety.

c. OPFOR Strength.

(1) Offense. Using MILES, the unit should outnumber the OPFOR three to one if an attack is to be successful. If the OPFOR is stronger than this ratio, only the most exceptional company will overcome them. They must also be armed with weapons capable of defeating any of the company's assets. As a general rule, the OPFOR should be strong enough to offer the company a realistic challenge, but one that they can defeat when proper tactics are employed.

(2) Defense. The OPFOR, at a minimum, should have a three-to-one ratio of superiority. Anything less will not have sufficient weapons and ammunition to conduct a successful attack. They must be more than merely a series of targets to be destroyed. The OPFOR should be allowed to plan their own attack for each mission and should not be forced into a "canned" attack that the company will quickly defend. Once the OPFOR establishes their plan, they must use the same plan for all other like units for that event in order to maintain the objectivity and standardization of the evaluation.

6-10. Conducting the Evaluation. The evaluation is divided into three distinct areas. Each requires different degrees of preparation and coordination.

a. Preevaluation.

(1) The senior O/C and all other O/Cs must perform a reconnaissance of the evaluation area. They must know the location of the unit's boundaries, the disposition of the OPFOR, and the most likely avenues of approach throughout the field evaluation site's area of operations.

(2) The unit must prepare an OPORD and FRAGO to be used to control the exercise. These can be prepared by using the skeleton orders contained in the STXs found in Chapter 4.

(3) The company preparatory activities include installing and troubleshooting MILES equipment, loading combat vehicles, conducting inspections, and performing other logistical and administrative actions.

(4) The OPFOR is placed in position and briefed while the company is conducting its preparatory activities.

NOTE: In this evaluation scenario, the platoon is issued a march order to move to an assembly area. When the assembly area becomes occupied, the OPORD is issued. Once the company commander has issued the OPORD and time has been allotted for issuing platoon and squad orders, the O/Cs should make a final functional check of the MILES equipment.

b. Evaluation.

(1) The evaluation team controls the evaluation in two ways: First, it uses measures established in both the movement order and in paragraphs 3 and 5 of the OPORD or the FRAGO. Second, the team controls the evaluation through the company commander on the company net. The team does not control in the traditional sense, but instead accompanies the unit as observers. Only the senior O/C has direct verbal contact with the company commander. All other O/Cs do not speak to, aid, or advise personnel; point out positions; or in any way influence the company's performance, except for a possible or actual safety issue or emergency. O/Cs are neutral throughout the evaluation.

(2) Once the senior O/C has issued the OPORD and movement order, the company commander executes the events and actions prescribed in the first part of the evaluation scenario within the estimated time. From this point on, all successive parts begin with a FRAGO.

(3) The senior O/C terminates a part when the company has completed all the events and actions in a particular area or has suffered so many casualties or so much damage that the part cannot be completed. The O/C must record the reasons for the termination in the margin of the task summary sheet and report the action to the evaluation control HQ. In the sample evaluation scenario, the completion of each event or action is indicated by "conduct sustaining operations." During this period, the senior O/C will direct the company to remain in position while "replacements" (personnel and equipment designated as killed or destroyed) are sent forward to reconstitute the unit. At this time, O/Cs must perform the following actions:

(a) Inspect all MILES equipment, record "kill" codes, and reset equipment. Replace any damaged or inoperative MILES equipment.

(b) Promptly resolve all casualty data to determine the time, place, number, and cause of casualties. Report this information to the recorder in the evaluation control HQ.

(c) Debrief the company to resolve questions. The senior O/C then directs the company to continue its mission.

(4) The following guidelines should be followed by the O/Cs.

(a) Report major "kills" (vehicles, groups).

(b) Report major weapons fired. Together with reporting major kills, this is the best method for determining direct fire effectiveness. Both significant firings and hits are reported to the evaluation control HQ.

(c) Enforce ROEs.

(d) Observe critical tactical events of time. The O/Cs must spot and record any action that might have an effect on later performance or the mission outcome.

(e) Record travel routes and unit locations.

(f) Inform the OPFOR controller of the unit's locations, direction, and intent. This is necessary to enable OPFOR actions to be controlled according to the desired sequence of events.

(g) Enforce safety.

(h) Terminate the mission.

c. Postevaluation. After the evaluation is terminated, the company moves to an assembly area and performs the following actions:

(1) The company O/C debriefs subordinate O/Cs and compiles all data (evaluator packets) for the evaluation.

(2) The company O/C completes the task summary sheets.

(3) The company O/C turns in all completed O/C packets (with the scoring system) to the control HQ for recording and analysis.

(4) The company O/C conducts an AAR of the company's performance.

(5) Each element O/C conducts an AAR of the element's performance.

#### 6-11. Conducting the After-Action Review.

a. General. At the completion of each evaluation part, the AAR leader provides feedback to the company in order to increase and reinforce learning.

b. Feedback. Because all members of the unit participate in an AAR, each member becomes a source of feedback. This provides a richer "data base" for key points. The AAR leader will draw information from each member, which becomes an important part of the discussion. This information is the basis for discussing alternative courses of action.

c. Preparing the AAR. AAR preparation involves five steps:

(1) Review training orders and objectives. Training objectives are the focus of the discussion of the exercise results. The FRAGOs and OPORDs included in the exercise design implement these objectives. The O/Cs should be familiar with the objectives, FRAGOs, and OPORDs so that they can note orders given by leaders of the evaluated unit and its subordinate elements that either implement these objectives or deviate from them.

(2) Observe the exercise. This is an active process, and the emphasis is on noting those actions that make the difference between unit success and failure. The O/C does not need to remain close to the unit leader because more can be seen from high ground near the lead element's location or along the unit's route when moving. Because unit orders identify important activities and checkpoints, the O/C must be present when the command issues the orders. The O/C should take a position where anticipated critical events can be observed. Examples of critical events include--

(a) The loss of major weapon systems or equipment.

(b) A major breach of security.

(c) Major command and control failures.

(d) The acquisition of important intelligence.

(e) A successful deceptive maneuver.

(f) An occupation or control of major terrain features.

(g) The neutralization or destruction of major OPFOR capabilities, elements, or weapons.

(3) Select the site and assemble the participants. After the exercise, select a site for the AAR. If possible, hold the AAR where most of the critical events took place (normally where the OPFOR was positioned) or where the terrain can be observed. Usually, the OPFOR or unit objectives are suitable for assembling the players and conducting AARs.

(4) Debrief the O/Cs. While the units are moving to the selected site, the O/Cs should be debriefed. The senior O/C must have a complete understanding of what happened in the exercise. The fourth step in AAR preparation is to obtain a detailed description of the exercise events in the order in which they occurred.

(5) After the senior O/C has a sound understanding of what happened during the exercise, he or she reviews the events and ranks them in terms of their relevance to exercise training objectives and their contribution to the exercise outcome. The senior O/C selects as many events as can be covered in the time allowed for the AAR and places them in chronological order.

d. Conducting the AAR. The AAR is a five-step process.

(1) Organize the participants. When the senior O/C and AAR leader assemble the participants, they group them according to their organization in the exercise. Subordinate O/Cs remain with the units for which they are responsible.

(2) State the training objectives. The AAR leader makes a brief statement of the training objectives for the exercise. These are described as specifically as possible. The AAR leader states any additional teaching points that will be covered during the AAR. These should be limited to three or four key points to keep the AAR focused and prevent it from becoming excessively long.

(3) Lead the discussion. The AAR leader guides the discussion of the events in their order of occurrence. Diagrams help players visualize the exercise development. The AAR leader starts by sketching the main terrain features. As the AAR proceeds, the participants draw the routes of advance, objectives, and locations of engagements. Each event is discussed in detail to add teaching points about the unit's performance. In an effective AAR, the AAR leader should--

(a) Avoid giving a critique or lecture.

(b) Guide the discussion by asking leading questions.

(c) Suggest the players describe what occurred in their own terms.

(d) Suggest the players discuss not only what happened, but also how it happened and how it could have been done better.

(e) Focus the discussion to ensure that important tactical lessons are made explicit.

(f) Relate tactical events to subsequent results.

(g) Avoid a detailed examination of events not directly related to major training objectives.

(h) Encourage the participants to draw diagrams to illustrate teaching points and to show routes, phase lines, and objectives.

(i) Prohibit players from offering self-serving excuses for inappropriate tactical actions.

(4) Review the sequence of the events associated with the hazards of the risk assessment made prior to the exercise.

- (a) Were effective controls put in place to avoid accidents?
- (b) Was training realism reduced through artificial control measures?
- (c) Were all participants aware of hazards down to the lowest level?
- (d) Did any hazard occur that was not identified? What was done to overcome it?
- (e) Did any incidents of fratricide or near fratricide occur and how can it be avoided in the future.

(5) Summarize key points. The AAR leader briefly summarizes teaching points in terms of training objectives covered in the AAR. After the summary, the AAR leader may have a private conversation with the company commander regarding strengths and weaknesses and what can be done to further improve personal and unit performance. A good AAR leader--

- (a) Maintains order and discipline.
- (b) Reviews training objectives.
- (c) Addresses important events as they occurred and how the company could have done them better. During the discussion, the AAR leader should avoid a detailed examination of events not directly related to the training objective.
- (d) Traces the chain of events so all participants understand the results of mistakes. One mistake is often the partial cause of another.
- (e) Clearly relates tactical events to teaching points.
- (f) Involves participants in the discussion.
- (g) Clearly and concisely gives the summary and new training objectives.
- (h) Reinforces points by using sketches, diagrams, or terrain models in the AAR.

**NOTE: Reference materials for conducting an AAR are TCs 25-6 and 25-20 and FM 25-101.**

1. SITUATION.	
<p>a. Enemy Forces. Corona and Gilesia attacked into and occupied Vanesia with three Operational Strategic Commands (OSC). Four additional OSCs have the capability to commit in the region: OSC-B in Corona, OSC-A Pomesia, OSC-F in Gilesia and OSC-N as a combined joint special operations command. The Corona-Gilesian attack culminated along the Avas-Ebunad Rivers, with CoPoG forces transitioning to a defense to deny with each OSC establishing different, but complimentary, Disruption Zones, Battle Zones, and Support Zones based on OSC mission, task organization and terrain. Pomasia has not completed mobilization and continues to claim neutrality. As the CoPoG Alliance continues to defy the United Nations (UN), the UN authorized US/Armagosan forces to restore the international borders of Armagosan.</p>	
<p>(1) <b>ECOA 1</b> - OSC-N in the 4ID(M) Rear Area interdict to prevent lead BNs from massing in zone, determine ME and identify HVAs. OSC-D delays 4ID(M) forces in the disruption zone (DZ) north of the AVAS River to destroy ISR capabilities. The OSC forms a battle zone (BZ) south of the FRUSKA GORA to HWY 3. BZ forces fix 4ID(M) forces south of the EBUNAD River by; targeting bridge assets with IFC strikes to degrade river crossing ability and defending the FRUSKA GORA in order to separate 4ID(M) forces. 11 DTG (west) and 13 DTG (east) defenses destroy forces north of the EBUNAD River. 114 AR BDE acts as the OSC-D reserve and counterattacks 4ID(M) penetrations of the EBUNAD River. 19 AR BDE and 18 MECH BDE counterattack into Division western flank. 204 AR BDE counterattack into Division eastern flank. Forces of OSC-A, specifically 34 AR DIV, attack south as operational reserve to destroy 4ID(M) north of HWY 3.</p>	
<p>(2) <b>ECOA 2</b> - OSC-N in the 4ID(M) Rear Area interdict to prevent lead BNs from massing in zone, determine ME and identify HVAs. 17 Recon BDE screens as part of a shallow OSC disruption zone (DZ) south of the AVAS River to delay and destroy 4ID(M) ISR capabilities. The OSC forms a battle zone (BZ) north of the AVAS River to HWY 3. The 110 BTG (M) and 111 BTG (M) forces conduct a maneuver defense vicinity the AVAS River to defeat lead battalions and destroy RISTA assets. BZ forces fix 4ID(M) forces south of the EBUNAD River by; targeting bridge assets with IFC strikes to degrade river-crossing ability. A robust defense of the FRUSKA GORA separates 4ID(M) forces in zone. 11 DTG (west) and 13 DTG (east) defenses destroy forces north of the EBUNAD River. 114 AR BDE acts as the OSC-D reserve and counterattacks 4ID(M) penetrations of the EBUNAD River. 19 AR BDE and 18 MECH BDE counterattack into Division western flank. 204 AR BDE counterattack into Division eastern flank. Forces of OSC-A, specifically 34 AR DIV, attack south as operational reserve to destroy 4ID(M) north of HWY 3.</p>	

**Figure A-1. Sample Operation Order**

(3) The threat to the division rear area consists of 48 SPF teams, 17 Commando platoons and Paramilitary Sanesian-Coronan Reunification Front (SCRF) forces known to be operating in 4ID(M) zone. They are expected to conduct attacks against civilian and military targets and to interfere with key logistic operations, MSRs, CPs, Base Clusters, C2 nodes, and Aviation Assembly Areas throughout Armagosan territory adjacent to the Sanesian province. Anticipate SPF or Commando Platoon teams to covertly and overtly attempt to secure and maintain the cooperation of the local populace by using intimidation, leaflets, and the local press.

(4) See the current INTSUM.

b. Friendly Forces.

(1) III (US) Corps Mission: O/O, III(US)Corps attacks in zone to destroy enemy forces in order to restore the ARMAGOSAN international boundaries; O/O conducts stability operations and support operations in order to provide a secure and stable environment that will set the conditions for peaceful coexistence in the region; O/O III(US)Corps redeploys to homestation.

(2) III (US) Corps Commander's Intent:

(a) Purpose: The purpose of this operation is to restore the recognized international borders and set the conditions for a secure and stable environment throughout the region.

(b) End state: III(US)Corps has destroyed the CORONAN and GILESIAN forces in ARMAGOSA, restored the international boundaries, and set the conditions for stability in the region.

(3) 4ID(M) Mission: O/O, 4ID(M) attacks in zone to destroy enemy forces IOT restore the ARMAGOSAN international boundary; O/O guard international boundary IOT set conditions for stability in the region; O/O conduct stability operations and/or support operations IOT provide a secure and stable environment that will set the conditions for peaceful coexistence in the region.

(4) 4ID(M) Commander's Intent:

(a) Method: As the Corps' main effort, 4ID(M) will attack to destroy enemy forces in zone orienting on destroying the enemy's center of gravity, his integrated fire control (IFC) assets, while protecting our strengths—deep attack capabilities, C4ISR, and LOCs.

(b) End state: 4ID(M) has destroyed enemy forces in zone, secured MSRs in zone, restored the international boundary, and set the conditions for stability in the region.

c. Mission of units to flank and rear:

(1) \_\_\_\_\_ Corps MP Company conducts maneuver mobility support (MMS) and internment resettlement (IR) operations ISO 4ID(M) attack in zone in order to ensure the freedom of movement of personnel, supplies, and equipment along 4ID(M) LOCs and relieve BCTs of EPWs as far forward as possible.

(2) TF 2-8 IN (TCF), located vic 4BDE (AV), O/O conducts combat operations in order to defeat level III threats attempting to destroy 4ID(M) HVAs.

d. Attachments/ Detachments: None

2. MISSION. O/O the 4<sup>th</sup> MP Company executes sustained MP combat support operations, IOT facilitate the 4ID(M) attack in zone and restoration of the ARMAGOSAN international boundary. O/O conducts stability support operations IOT provide a secure and stable environment that will set the conditions for a peaceful co-existence in the region.

**Figure A-1. Sample Operation Order (continued)**

### 3. EXECUTION.

a. Concept of the Operation. My intent is to execute sustained MP combat support operations throughout the division's battlespace and all phases of the operation.

(1) Method. We will accomplish this by providing one MP platoon in direct support (DS) to each of the BCTs and have the remaining two general support (GS) MP platoons conduct area security in order to protect identified 4ID(M) HVAs. While the division is conducting offensive operations, our priority must be focused on maneuver and mobility support (MMS) operations and internment resettlement operations. We will aggressively patrol division MSRs and the key terrain that can influence operations on the MSRs and establish division forward collection points with each of the BCTs and coordinate with corps MP operating the division central collection point in order to ensure the rapid evacuation of EPWs out of the division AOR. During the division defense, area security will be the priority with the main focus on protection of critical assets in the division rear. One GS MP platoon will secure the Division Main CP, Division Support Element (DSE) and the key terrain around it and the other GS platoon will secure the Division TAC and the key terrain surrounding it. Police intelligence and law-and-order operations will be conducted throughout the operations to include coordinating with the host nation (HN) and other police agencies on collecting and disseminating intelligence information as necessary. Geneva Conventions and US policies will be followed at all times.

(2) END STATE: Uninterrupted LOCs throughout the Division battlespace, Division HVAs secured, and EPWs collected, processed and expeditiously evacuated to the CRA.

b. Scheme of Maneuver. The MP Company headquarters will collocate in the DSE and provide C3 operations. 1<sup>st</sup>, 2<sup>nd</sup>, and 3<sup>rd</sup> platoons will be DS to 1<sup>st</sup>, 2<sup>nd</sup>, and 3<sup>rd</sup> BCT respectively and support the BCTs by conducting their five MP functions: maneuver mobility support (MS), area security (AS), internment/resettlement operations (IR), law and order operations (L&O) and police intelligence operations (PIO). 4<sup>th</sup> Platoon will provide security for the DTAC and the UAV L/R site that supports it. 5<sup>th</sup> Platoon will provide security for the DMAIN and the UAV L/R that supports it. 4ID(M) conducts operations in 4 Phases: Phase I (S-Hour to PL MIKE), Phase II (PL MIKE to PL SNAKE), Phase III (TRANSITION TO DEFENSE), Phase IV (TRANSITION TO STABILITY/SUPPORT Ops.). The 4<sup>th</sup> MP Company executes sustained MP combat support operations throughout all phases:

(1) **Phases I (S-Hour to PL MIKE).** Priority of MP support will be MMS, in order to assist in the rapid movement of BCTs from the TAA to ATK PSNs and area security in the terrain that can influence the operation of the DMAIN and DTAC in order to detect and destroy SPF, commando platoons, SCRF elements operating in the division AOR.

(2) **Phase II (PL MIKE to PL SNAKE).** Priority of MP support will be MMS, in order to facilitate the rapid movement of BCTs. O/O DS MP Platoons will establish and operate DFCEPs in order to relieve maneuver TFs of EPWs as far forward as possible and evacuate them reward. GS will continue to conduct counter-reconnaissance in order to detect and destroy SPF, commando platoon, and bypassed units.

(3) **Phase III (TRANSITION TO DEFENSE).** Priority of MP support will be area security in order to detect and destroy SPF, commando platoon, and bypassed units and MMS in order to facilitate the rapid movement of personnel, supplies, and equipment in support of division rearm, refit, and refueling operations. DS Platoons will continue to request evacuation of EPWs from their BCTs reward.

(4) **Phase IV (TRANSITION TO STABILITY/SUPPORT OPERATIONS).** Priority of MP Support will be MMS in order to facilitate movement throughout the division AOR. MP will also ensure that routes are clear of all refugees or displaced civilians by directing them reward to dislocated civilian collection points (DCCP), using identified dislocated civilian control routes (DCCR).

(5) **Obstacles, mines, and fortifications.** None.

Figure A-1. Sample Operation Order (continued)

- b. Tasks to Subordinate Units.
- (1) 1<sup>st</sup> Platoon:
    - (a) Execute your 5 MP functions in direct support to 1BCT.
    - (b) O/O establish and operate a DFCP.
    - (c) Request evacuation of EPWs through the company CP.
  - (2) 2<sup>nd</sup> Platoon
    - (a) Execute your 5 MP functions in direct support to 2BCT
    - (b) O/O establish and operate a DFCP
    - (c) Request evacuation of EPWs through the Company CP
  - (3) 3<sup>rd</sup> Platoon
    - (a) Execute your 5 MP functions in direct support to 1BCT
    - (b) O/O establish and operate a DFCP
    - (c) Request evacuation of EPWs through the Company CP
  - (4) 4<sup>th</sup> Platoon
    - (a) Co-locate with and conduct area security for DTAC and UAV L/R site supporting it.
    - (b) Conduct coordination with the G3 on the DTAC base defense plan and your response plan.
    - (c) Conduct coordination with the UAV platoon leader on the L/R site defense plan and your response plan.
    - (d) Coordinate with G2 for NAIs and templated locations of SPF, commando platoon, and SCRF locations.
    - (e) Develop an R&S plan based on NAIs and templated enemy locations and ensure that it is incorporated into the 4ID(M) R&S plan. Submit your R&S overlay to the Company CP via FBCB2 NLT \_\_\_\_.
  - (5) 5<sup>th</sup> Platoon
    - (a) Co-locate with the company and conduct area security for DMAIN/DSE and UAV L/R site supporting it.
    - (b) Conduct coordination with the HQ commandant on the DMAIN/DSE base defense plan and your response plan.
    - (c) Conduct coordination with the UAV platoon leader on the L/R site defense plan and your response plan.
    - (d) Coordinate with G2 for NAIs and templated locations of SPF, commando platoon, and SCRF locations.
    - (e) Develop an R&S plan based on NAIs and templated enemy locations and ensure that it is incorporated into the 4ID(M) R&S plan. Submit your R&S overlay to the Company CP via FBCB2 NLT \_\_\_\_.

**Figure A-1. Sample Operation Order (continued)**

c. Coordinating Instructions.

(1) CCIR: No change.

(2) MOPP Level: In accordance with DCHEM guidance.

(3) Tactical Risk Assessment: With 2 MP platoons in support of the division, we assume risk in the rear area by not having enough MPs to cover the entire area in accordance with MP doctrine. I mitigate this risk by focusing MP efforts around high-value assets using the reverse IPB process.

(4) Safety Risk Assessment: MPs will implement protective measures to minimize the risk of accidental injury and death, in order to preserve combat power in the division rear area. Leaders down to team level will conduct risk assessments prior to each mission and ensure that they are enforced.

(5) Area security focus will be on suspected enemy SPF, CDO and SCRF locations, as determined by the G-2, ROC and DISCOM S-2 during their rear area IPB. The task of rear area reconnaissance is to detect and kill SPF, with the purpose of preventing enemy observation and interdiction of division units.

(6) M/MMS operations enforce Division priority of movement both forward and rearward as identified by DTO.

(7) MP will monitor and report route, terrain and traffic conditions on all MSRs and ASRs to the SOC.

(8) MP will continuously monitor routes for NBC contamination and report any indicators of contamination immediately to the SOC.

(9) 4ID (M) is responsible for transporting EPWs from Brigade Fwd Collection Point to Division central EPW cage. PMO will coordinate with G4/G5 for additional Armagosa and Corps transportation.

(10) Units will request law enforcement support through the PMO.

(11) Request for military working dogs (MWD) will be processed through the PMO.

(12) Division central collection point is located vic \_\_\_\_\_ and operated by \_\_\_\_\_ Corps MP Company.

(13) The CHA is located vic \_\_\_\_\_ and is operated by the 89<sup>th</sup> MP Brigade.

(14) MP platoons will submit sensitive items reports 0600 and 1800 daily, PERSTATs at 0800 and 2000 daily, and LOGSTATs at 1200 and 2400 daily. All reports will be sent via FBCB2.

4. SERVICE SUPPORT. All classes of supply will be coordinated through the 4<sup>th</sup> MP Company CP and provide by the 704<sup>th</sup> DSB.

**Figure A-1. Sample Operation Order (continued)**

5. COMMANDS AND SIGNAL.

a. Command. Company CP is located at \_\_\_\_\_.

b. Signal. Current SOIs are in effect.

ANNEXES:  
A. Operation Overlay (Omitted)  
B. Fire Support (Omitted)  
C. Provost Marshal (PM)

DISTRIBUTION:

**Figure A-1. Sample Operation Order (continued)**

(classification) FOR TRAINING PURPOSES ONLY	Copy ___ of ___ Copies Issuing HQ Place of issue DTG Message reference number
ANNEX C (Provost Marshal) to Operation Order No. _____	
1. SITUATION.	
2. MISSION.	
3. EXECUTION.	
a. Scheme of PM Operations. State the PMs concept to employ MP assets. Focus on the commander's guidance, mission, and intent, and how this supporting effort contributes to the fight and how it is nested.	
(1) Maneuver and mobility support. Outline the circulation control plan. Focus on the maneuver unit's mobility to minimize interference with the movement within and through the rear area forward. Include the items listed below.	
<ul style="list-style-type: none"> <li>• Route reconnaissance and surveillance (R&amp;S).</li> <li>• Main supply route regulation enforcement.</li> <li>• Contamination avoidance.</li> <li>• Straggler control.</li> <li>• Dislocated civilian control.</li> <li>• Tactical- and criminal-intelligence collecting and reporting.</li> </ul>	
(2) Force protection. Develop a rear-area protection plan, to include Levels II and III response actions (base and base-cluster defense). Assist in developing the R&S plan. Include the items listed below in the plan.	
<ul style="list-style-type: none"> <li>• Security of critical assets.</li> <li>• Base response force (Levels I, II, and III).</li> <li>• Counter reconnaissance and response-force activities.</li> <li>• Air-base defense.</li> <li>• Counter terrorism and antiterrorism activities.</li> <li>• Area-damage control.</li> <li>• NBC detection and reporting.</li> <li>• C2 protection activities.</li> </ul>	

**Figure A-2. Sample Annex C**

x6480(3) IR operations. Determine the location of EPW, detainee, or internee holding areas. Coordinate with the appropriate rear-area operations center (RAOC) or staff element on population data (such as number and location). Plan and direct operations (collection, detention, internment, protection measures, sustainment, and evacuation). Coordinate with the G4, S4, and HN as necessary.

(4) Law-and-order operations. Outline a plan to maintain law and order in the rear area; forward to maneuver units. Determine investigative assets, develop MP patrol routes, and establish criteria for apprehension and detention of US military prisoners.

(5) Police-intelligence operations. Outline coordination with the criminal investigation division (CID), the MP, and military intelligence (MI) relative to the collection, integration, and dissemination of police intelligence and information.

b. Task to Subordinate Units. List the tasks to be accomplished by units in general-schedule (GS) and specific units if in a direct-support (DS) role.

c. Coordinating Instructions. Include instructions on MP GS missions that apply to two or more subordinate units. Refer to other supporting appendixes or annexes, such as Annex N, Rear Operations, which include elements this annex does not cover in detail.

(1) State the coordination and cooperation among adjacent and other units, and civilian HN agencies that are required to complete the mission; for example, engineers in building and hardening EPW holding area.

(2) State actions pertaining to rear-area force protection that may expand or differ from established SOP.

**Questionnaire**

MTP NUMBER \_\_\_\_\_ DATE \_\_\_\_\_

MTP TITLE \_\_\_\_\_

Request your recommendations to improve this training publication. To make it easier for you to make recommendations, a standard questionnaire has been provided. Please respond to all questions by circling your answer or providing a written response, where requested. Please make a copy of this questionnaire. Mail to: Commander, Maneuver Support Center, ATTN: ATZT-DT-WF-M, Fort Leonard Wood, MO 65473-8929.

THE FOLLOWING QUESTIONS PERTAIN TO YOU:

1. What is your position (for example, company commander, platoon sergeant [PSG])?  
\_\_\_\_\_
2. How long have you served in this position? \_\_\_\_\_
3. How long have you served in this unit? \_\_\_\_\_
4. What is your component?
  - a. Active Component (AC)
  - b. United States Army Reserve (USAR)
  - c. National Guard (NG)
5. Where is your unit?
  - a. Continental United States (CONUS)
  - b. United States Army, Europe (USAREUR)
  - c. United States Army, Western Command (WESTCOM)
  - d. Eighth United States Army (USA)
  - e. Other (specify) \_\_\_\_\_

THE FOLLOWING QUESTIONS PERTAIN TO THE TRAINING EXERCISES.

6. What STX would you recommend be added or deleted from the MTP?  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_
7. What FTX would you recommend be added or deleted from the MTP?  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_
8. What was the greatest problem you experienced with the exercise?
  - a. Needs more information on how to set up the exercise.
  - b. Needs more information on leader training.

- c. Needs more information on how to conduct the exercise.
- d. Needs more information on support and resources.

9. How many STXs or FTXs have you trained or participated in personally?

---

---

10. How often does your unit train on nonmilitary police tasks during the exercise?

---

---

---

---

THE FOLLOWING QUESTIONS APPLY TO CHAPTER 5.

11. What changes would you make to the T&EOs in this chapter?

---

---

---

12. What T&EOs would you add?

---

---

---

13. What T&EOs would you delete?

---

---

---

14. Additional comments:

---

---
