## PREFACE

The Mission Training Plan (MTP) provides the active and Reserve Component training manager with a descriptive, performance-oriented training program to assist leaders in training their units. Standards for training may be made more difficult, but may not be lowered. In accordance with the United States (U.S.) Army training and tactical doctrine, this ARTEP contains those tasks that support the military intelligence (MI) unit missions outlined in emerging doctrinal manuals. Unit leaders must use their higher headquarters mission essential task list (METL) and training guidance to identify which tasks in this ARTEP must be emphasized. Task standards in the ARTEP are the Army standards for executing those tasks.

FM 3-0 is the Army keystone fighting doctrine. Army operations doctrine builds on the collective knowledge and wisdom gained through recent combat operations, stability operations, support operations, numerous exercises, and the deliberate process of informed reasoning throughout the Army. It is rooted in time-tested principles and fundamentals, while accommodating new technologies and diverse threats to national security.

FM 34-1 is the Army's capstone manual for MI doctrine. As the Army moved to incorporate new technologies for diverse threats, the MI Branch conducted a detailed assessment that resulted in an approved MI Force Design Update. This update resulted in major changes in MI, which are addressed in FM 34-1 and incorporated in this MTP.

This MTP is designed specifically for the MI Company of a Separate Infantry Brigade (ARCTIC) equipped with emerging digitized technology and systems. This MTP replaces the collective tasks found in ARTEP 34-113-11 and ARTEP 34-113-12 for this type of unit.

Although the collective tasks contained in this manual are generic, the MI branch concept and all new emerging systems and organizations are reflected in the appropriate places. As tactics, techniques, and procedures are developed for emerging systems, they will be included in future editions of this MTP and additional ARTEPs.

MI commanders are encouraged to use this MTP as a guide to develop their training programs. Units affected by this publication may not be exactly alike in composition or in the way they carry out their missions. Each commander must modify the training and evaluation outlines (T&EOs) to fit the training requirements of his unit.

Unless this publication states otherwise, masculine nouns and pronouns do not refer exclusively to men.

The proponent for this publication is the U. S. Army Intelligence Center & Fort Huachuca (USAIC&FH). # Chapter 1

## Unit Training

### 1-1. General.

This mission training plan (MTP) provides the commander and leaders with guidance on how to train the key missions of the unit. The specific details of the unit's training program depend on the following factors:

- a. Unit's mission essential task list (METL).
- b. Chain of command training directives and guidance.
- c. Training priorities of the unit.
- d. Availability of training resources and areas.

### 1-2. Supporting Material.

This MTP describes a critical mission-oriented training program that is part of the next higher echelon's training program. This relationship is illustrated in figure 1-1. The unit's training program consists of:

- a. This Army training and evaluation program (ARTEP), which indicates the relationship of the company's training program to the brigade-training program.
- b. Soldier training publications (STPs) for the appropriate military occupational specialty (MOS) and skill levels (SLs).
- c. Officer foundation standards (OFS) manual for platoon leaders.

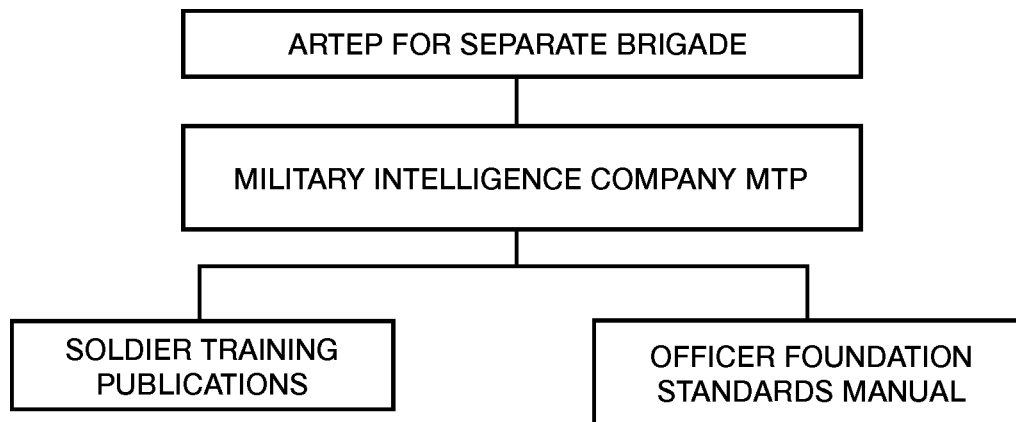

Figure 1-1. MTP echelon relationship.

### 1-3. Contents.

This MTP is organized into six chapters and two appendices:

- a. Chapter 1, *Unit Training*, provides the explanation and organization of this MTP. This chapter explains how to use this MTP in establishing an effective training program.
- b. Chapter 2, *Training Matrix*, shows the relationship between missions and collective tasks.
- c. Chapter 3, *Mission Outline*, presents a graphic portrayal of the relationship between missions and their subordinate tasks.
- d. Chapter 4, *Training Exercises*, consists of a field training exercise (FTX) and supporting situational training exercises (STXs). They provide training information and a preconstructed scenario and

can serve as part of an internal or external evaluation. These exercises may be modified to suit the training needs of the unit.

e. Chapter 5, *Training and Evaluation Outlines (T&EO)*, provides the training and evaluation criteria for all the tasks the unit must master to perform its mission effectively. Each T&EO identifies task steps, performance measures, and individual and leader tasks. Each T&EO is part of a mission and, in various combinations, comprises the training exercises in chapter 4.

f. Chapter 6, *External Evaluation*, provides instructions for the planning, preparation, and execution of an external evaluation.

g. Appendix A, *Combined Arms Training Strategy (CATS)*, provides user information, a description of the training strategy, and a task template.

h. Appendix B, *Battlefield Operating Systems (BOS)*, provides a description of each of the Army's BOS systems.

#### **1-4. Mission and Tasks**

a. This MTP concerns specified missions found in the table of organization and equipment (TOE) and implied missions that the unit must perform to accomplish the specified missions. The critical missions are the focus for the unit. The commander may supplement these missions with his own. The following is a list of the missions for the unit:

- (1) Provide intelligence support.
- (2) Deploy/redeploy.
- (3) Protect the force.
- (4) Sustain/maintain/resupply.
- (5) Move.
- (6) Communicate.
- (7) Command and control.
- (8) Provide security.

b. Each of these missions may be trained individually or jointly with other missions. Training is based on the criteria described in the T&EOs. Several T&EOs can be trained as a STX. Various combinations of STXs can be used to develop a FTX for the unit to practice its entire mission responsibility. Several STXs can be developed into an external evaluation designed by the next higher echelon to evaluate the unit's ability to perform multiple missions under stress in a realistic environment.

c. Section tasks are trained in much the same way as described above. Leader tasks that support the unit's missions are trained through STP and OFS training, battle simulations, and execution of the unit's missions.

d. Individual tasks that support unit tasks are mastered by training to standards in the appropriate STP.

#### **1-5. Principles of Training.**

This MTP is based on the training principles found in FM 7-0 (FM 25-100). For further information, see Paragraph 1-7.

#### **1-6. Training Strategy.**

The training program developed and executed by a unit to train to standards in its critical missions is a component of the Army's CATS. The purpose of the CATS is to provide direction and guidance on how The Army trains and identifies the resources required to support that training. CATS provides the tools that enable the Army to focus and manage training in an integrated manner. Central to the CATS is a series of proponent generated unit and institutional strategies that describe the training and training resources required to train to standard.

**a.** The unit training strategies central to CATS provide the commander with a descriptive "menu" for training. This menu reflects that, while there is an optimal way to train to standard, it is unlikely that all units in the Army have the exact mix of resources required to execute an optimal training strategy.

**b.** The unit's training strategy is composed of two separate training strategies. When integrated with the training tasks found in this MTP, they form a comprehensive and focused training strategy that allows the unit to train to standard. The elements of this unit's training strategy are—

**(1)** Combined Arms Training Strategy. CATS is intended to provide a set of recommended training frequencies for key training events in a unit. It depicts those resources that are required to support the training events.

**(2)** Soldier Strategy. The soldier strategy provides an annual plan for training and maintaining skills at the individual level and lists the resources required to train a soldier.

**c.** A critical element in the unit training strategy is the identification of critical training gates. Critical training gates are defined as training events that must be conducted to standard before moving on to a more difficult or resource intensive training event or task. Training gates follow the crawl, walk, run training methodology. For instance, if the unit training strategy calls for conducting a FTX and a STX has been identified as a critical training gate for the FTX, the training tasks contained in the STX must be trained to standard prior to conducting the FTX. Standards for all tasks must be clearly defined so the trainer can assess the preparedness of his soldiers, or unit(s), to move on to more complex training events. The provision for critical training gates recognizes that the unit's METL and the commander's assessment of his unit's training status will determine the selection and timing of the collective training exercises in a specific unit's training strategy.

**d.** When developing the unit's training plan, the commander identifies the training tasks from the MTP required to train his METL.

### **1-7. Conducting Training.**

This MTP is designed to facilitate the planning, preparation, and conduct of unit training as explained in FM 7-0 and FM 25-101.

**a.** The commander assigns the missions and tasks for training based on his METL and the training guidance from the next higher headquarters. Trainers must plan and execute training in support of this guidance.

**b.** The commander reviews the mission outline in chapter 3 to determine whether the FTX and STXs provided will support or can be modified to support the senior commander's guidance. If they do not support the guidance or need to be modified, refer to the matrix in chapter 2. The matrix provides a list of collective tasks that must be mastered to perform the mission.

**c.** The commander prioritizes the tasks that need training. He never has time to train everything. He must orient on the greatest challenges and most difficult sustainment skills.

**d.** The commander integrates training tasks into the training schedule by—

**(1)** Listing the tasks in the priority and frequency they need to be trained.

**(2)** Determining the amount of time required and how multi-echelon training can be used for the best results.

**(3)** Determining where the training can take place.

**(4)** Determining who is responsible for what. The leader of the element being trained must always be involved.

**(5)** Organizing his requirements into blocks of time and training vehicles.

**e.** The commander must approve the list of tasks to be trained and schedule them on the unit training schedule.

**f.** The commander must determine the equipment and supplies needed to conduct the training.

**g.** The commander must keep subordinate leaders informed and oversee their training. The standards must be rigidly enforced.

**1-8. Force Protection (Safety)**

**a.** Safety is a component of force protection. Commanders, leaders, and soldiers use risk assessment and management to tie force protection into the mission. Risk management assigns responsibility, institutionalizes the commander's review of operational safety, and leads to decisionmaking at a level of command appropriate to the risk. The objective of safety is to help units protect combat power through accident prevention, which enables units to win fast and decisively with minimum losses. Safety is an integral part of all combat operations and begins with readiness. Readiness determines a unit's ability to perform its METL to standard. Readiness standards addressed during METL assessment are—

- (1) Soldiers with the self-discipline to perform tasks to standard consistently.
- (2) Leaders who are ready, willing, and able to enforce standards.
- (3) Training that provides skills needed for performance to standard.
- (4) Standards and procedures for task preference that are clear and practical.
- (5) Support for task preference, including equipment, personnel, maintenance, facilities, and service.

**b.** Risk management is a tool that addresses the root causes (readiness shortcomings) of accidents. It assists commanders and leaders to not only identify what the next accident will be, but also helps to identify who will have the next accident. Risk management is a way to put more realism into training without paying the price in deaths, injuries, or damaged equipment.

**c.** Safety demands total chain of command involvement in planning, preparing, executing, and evaluating training. The chain of command responsibilities include—

- (1) Commanders, who must—
  - (a) Seek optimum, not adequate, performance.
  - (b) Specify the risk acceptable to accomplish the mission.
  - (c) Select risk reductions provided by staff.
  - (d) Accept or reject residual risk, based on the benefit to be derived.
  - (e) Train and motivate leaders at all levels to use risk management concepts effectively.

- (2) Staff, who must —
  - (a) Assist the commander in assessing risks and develop risk reduction options for training.
  - (b) Integrate risk controls in plans, orders, METL standards, and performance measures.
  - (c) Eliminate unnecessary safety restrictions that diminish training effectiveness.
  - (d) Assess safety performance during training; evaluate safety performance during after action reviews (AARs).

- (3) Subordinate leaders, who must —
  - (a) Apply consistently effective risk management concepts and methods to operations they lead.
  - (b) Report risk issues beyond their control or authority to their superiors.
- (4) Individual soldiers, who must —

- (a) Report unsafe conditions, act, and correct the situation, when possible.
- (b) Establish a buddy system to keep a safety watch on one another.
- (c) Take responsibility for personal safety.
- (d) Work as a team member.
- (e) Modify own risk behavior.

**d.** Risk management is a five-step cyclic process that is easily integrated into the decision making process outlined in FM 101-5. The five steps are —

- (1) Identify Hazards. Identify the most probable hazards for the missions.

(2) Assess Hazards. Analyze each hazard to determine the probability of its causing an accident and the probable effect of the accident. Identify control options to eliminate or reduce the hazard. The Army Standard Risk Assessment Matrix (figure 1-2) is a tool for assessing hazards.

Figure 1-2. Risk Assessment Matrix.

(3) Make Risk Decisions. Weigh the risk against the benefits of performing the operations. Accept no unnecessary risks and make any residual decisions at the proper level of command.

(4) Implement Controls. Integrate specific controls into operational plans (OPLANs), operation orders (OPORDs), standing operating procedures (SOPs) and rehearsals. Communicate controls to the individual soldier.

(5) Supervise. Determine the effectiveness of controls in reducing the probability and effect of identified hazards to include follow up and after action review. Develop the lessons learned.

e. Fratricide is a component of force protection and is closely related to safety. Fratricide is the employment of weapons, with the intent to kill the enemy or destroy his equipment, that results in unforeseen and unintentional death, injury, or damage to friendly personnel or equipment. Fratricide is by definition an accident. Risk assessment and management is the mechanism with which incidence of fratricide can be controlled.

f. The primary causes of fratricide are —

(1) Direct Fire Control Plan Failures. These occur when units fail to develop defensive and, particularly, offensive fire control plans.

(2) Land Navigation Failures. These result when units stray out of sector, report wrong locations, and become disoriented.

(3) Combat Identification Failures. These failures include gunners or pilots being unable to distinguish thermal and optical signatures near the maximum range of their sighting systems and units in proximity mistaking each other for the enemy under limited visibility conditions.

(4) Inadequate Control Measures. Units fail to disseminate the minimum maneuver and fire support control measures necessary to tie control measures to recognizable terrain or events.

(5) Reporting Communication Failures. Units at all levels face problems in generating timely, accurate, and complete reports as locations and tactical situations change.

(6) Weapons Error. Lapses in individual discipline lead to gunnery errors, accidental discharges, mistakes with explosives and hand grenades, and similar incidents.

(7) Battlefield Hazards. Unexploded ordnance, unmarked or unrecorded minefields, family of scatterable mines (FASCAM), and booby traps litter the battlefield. Failure to mark, remove, record or anticipate these hazards increases the risk of friendly casualties.

g. Fratricide results in unacceptable losses and increases the risk of mission failure. Fratricide undermines the unit's ability to survive and function. Units experiencing fratricide observe the following consequences:

- (1) Loss of confidence in the unit leadership.
- (2) Increasing self-doubt among leaders.
- (3) Hesitation to use supporting combat systems.
- (4) Over supervision of units.
- (5) Hesitation to conduct night operations.
- (6) Loss of aggressiveness during fire and maneuver.
- (7) Loss of initiative.
- (8) Disrupted operations.
- (9) General degradation of cohesiveness, morale, and combat power.

### **1-9 Environmental Protection.**

Protection of natural resources has continued to become an ever-increasing concern to the Army. It is the responsibility of all unit leaders to decrease and, if possible, eliminate damage to the environment when conducting training. Environmental risk management parallels safety risk management and is based on the same philosophy as safety risk management. Environmental risk management consists of the following steps:

a. Identify Hazards. Identify potential sources for environmental degradation during analysis of mission, enemy, terrain and weather, troops, time available and civilian considerations (METT-TC) factors. This requires identification of environmental hazards. An environmental hazard is a condition with the potential for polluting air, soil, or water and/or destroying cultural and historical artifacts.

b. Assess the Hazard. Analyze potential severity of environmental degradation using environmental risk assessment matrixes (figure 1-3). Severity of environmental degradation is considered when determining the potential effect an operation will have on the environment. The risk impact value is defined as an indicator of the severity of environmental degradation. Using the environmental risk assessment matrixes quantify the risk to the environment resulting from the operation as extremely high, high, medium, or low.

c. Make Environmental Risk Decisions. Make decisions and develop measures to reduce high environmental risks.

d. Brief Chain of Command. Brief chain of command (to include installation environmental office, if applicable) on proposed plans and pertinent high-risk environmental matrixes. Risk decisions are made at a level of command that corresponds to the degree of risk.

e. Implement Controls. Implement environmental protection measures by integrating them into plans, orders, SOPs, training performance standards, and rehearsals.

f. Supervise. Supervise and enforce environmental protection standards.

**1-10. Evaluation.**

The T&EOs in chapter 5 describe standards that must be met for each task.

**a.** Evaluations can be internal or external. Internal evaluations are conducted at all levels, and must be inherent in all training. External evaluations are usually more formal and are normally conducted by a headquarters two levels above the unit being evaluated. (See chapter 6)

**b.** A critical weakness in training is the failure to evaluate each task every time it is executed. The ARTEP concept is based on simultaneous training and evaluation. Too often, leaders do not practice continuous evaluation. Often, soldiers or small units are trained to perform a task to standard; later, when they execute that task as part of a training exercise, they execute it poorly or incorrectly and are not corrected. For this program to work, trainers and leaders must continually evaluate training as it is executed.

**c.** Leaders should emphasize direct, on-the-spot evaluations. Correcting poor performance during individual or small group training is easy to do. In higher-level exercises, it is usually not feasible to do this with outside evaluators, but the opportunity for correction should not be overlooked. Plan AARs at frequent logical intervals during the exercises (usually after the completion of a major subordinate task). This is a proven technique that allows you to correct performance shortcomings while they are still fresh in everyone's mind and prevents reinforcement of bad habits.

**d.** FM 25-101 provides detailed instructions for conducting an AAR and detailed guidance on coaching and critiquing during training.

**1-11. Feedback.**

Recommendations for improvement of this MTP are requested. Feedback will help to ensure that this MTP answers the training needs of units in the field. There is a questionnaire at the end of this MTP to make it easier to send recommendations and comments.

# Training Matrixes

### 2-1. General.

The mission, collective tasks and individual task matrixes in this chapter assist the commander in planning training. Figure 2-1 provides mission identification for the unit.

### 2-2. Mission to Collective Tasks Listing.

This matrix lists the missions and their supporting collective tasks. The tasks are listed under the appropriate BOS, in the list. The BOS used in this list are defined in a local publication. A specific mission is trained by identifying collective tasks in the vertical column for the mission. Based on the proficiency of the unit, training is focused on operational weaknesses.

## Chapter 3

# Mission Outlines / Training Plans

### **3-1. General.**

The mission outline illustrates the relationships between the missions and their supporting tasks. The outline provides the trainer a diagram of the unit mission, example FTX and STXs, and the collective tasks that comprise them.

### **3-2. Long-range planning.**

Long-range planning allows commanders to provide timely input to the Army's various training resource systems and to provide a general direction for the training programs. The long-range plan consists of a calendar covering the planning period and the commander's formal guidance. To develop a long-range plan, the commander must first develop the unit's METL and conduct a training assessment. These two actions are the two principal inputs at the beginning of the planning process. FM 7-0 (FM 25-100) and other FM 25-series manuals provide guidance on developing a unit's METL.

**a. Develop Unit METL.** The first step in developing a METL is analyzing all specified and implied missions and other guidance. Next, the unit's wartime mission is restated. After analyzing the unit's missions and external directives, a list of tasks is identified that must be accomplished if the unit is to accomplish its wartime mission successfully. Subordinate commanders and key NCOs participate in selecting the tasks. The task list is developed using the missions contained in chapter 2 of the MTP; missions assigned to the company by contingency plans; and missions directed by higher headquarters' guidance. The commander reviews the task list and selects tasks essential to the unit's wartime mission. The selected tasks are forwarded to the next higher headquarters for approval. The tasks selected are the unit's METL, figure 3-1.

**b. Establish Training Objectives.** After the METL is identified, the commander establishes training objectives. The training objectives are conditions and standards, that describe the situation or environment and ultimate outcome criteria the unit must meet to perform the tasks successfully. Training objectives and standards for METL can be obtained from the MTP, STP, higher headquarters command guidance and, local SOP.

**c. Conduct Training Assessment.** The training assessment is the commander's continuous comparison of the unit's current proficiency with the proficiency required to fight and win on the battlefield. The commander, his staff, and subordinate commanders assess the organization's current proficiency on mission essential tasks against the required standard. The commander then indicates the current proficiency by rating each task as "T" (Trained), "P" (Practice Needed), "U" (Untrained), or "?" (Unknown). The outcome of the training assessment identifies the unit's training requirements, figure 3-2.

**Figure 3-2. Sample Commander's Training Assessment.**

**d. Develop Training Strategy and Commander's Guidance.** The training strategy is developed using the outcome from the training assessment. With the training strategy, the commander and his staff establish training priorities by determining the minimum frequency each mission essential task will be trained during the upcoming planning period. It includes the commander's guidance, which incorporates the commander's training vision. To develop unit goals, the commander must—

- (1) Review higher commander's goals.
- (2) Spell out in real-world terms what his unit will do to comply with the goals of higher commanders.
- (3) List in broad terms his own goals for the unit. Figure 3-3 provides a sample of company goals.

**Figure 3-3. Example Company Goals.**

**e. Establish Training Priorities.** Priorities are established for training METL tasks by basing the priorities on training status, the criticality of the task and the relative training emphasis the task should receive. Figure 3-4 provides a sample training priority list.

| TASK                                 | SOURCE | TRAINING PRIORITY |

**Figure 3-4. Example Training Priority.**

**f.** Prepare Long-Range Planning Calendar. The long-range planning calendar is the coordinating tool for long-range planning. It is structured by long-range training events to identify time periods available for training mission essential tasks. The long-range planning calendar projects training events and activities of the unit for the upcoming 12 to 18 months. To prepare a long-range calendar, follow the steps outlined below:

(1) Select training events and activities to train the missions. At company level, the commander must project events that will enable him to achieve his goals.

(2) Assign time for subordinate platoons to train. Platoon leaders must be allowed to develop their training programs in support of the company-training program.

(3) Examine various training alternatives to make optimum use of the training support available to the unit. Available training resources must be compared against higher headquarters directed training, battalion directed training events, and subordinate level projected training events.

(4) Obtain approval of long-range plans from petroleum group.

(5) Issue guidance. Training guidance is issued to the staff and subordinate units with the long-range training calendar. This training guidance supplements the long-range training calendar and generally includes:

(a) Training policies.

(b) Types of mandatory training.

(c) Training resource guidance.

(d) Quotas for centralized training (schools).

(e) Training goals.

### **3-3. Short-range planning.**

A short-range plan is prepared to address the immediate future (3 months). Short-range planning develops specific training objectives based on the goals and guidance prepared during long-range planning. The short-range plan adds more detail and may modify the long-range plan based on current assessments. Prepare the short-range plan as described below:

**a.** Review the training program, current unit proficiency, resources, and training environment.

(1) Review the training program described in the long-range planning process. This review determines if assessments made during long-range planning are still valid.

(2) Review previous short-range planning calendars for training accomplished, training preempted, and lessons learned.

(3) Review current unit proficiency to update priorities.

(4) Review resources to determine if it is still possible to execute the program described on the long-range planning calendar.

(5) Review training environment again in this phase of planning; it takes on added importance as training events and activities approach. Factors that affect the training environment and collectively impact on the training program are—

(a) Personnel assigned.

(b) Personnel turbulence.

(c) Morale.

(d) Education programs.

(e) Mandatory training.

(f) Visits, inspections, and tests.

(g) Supplies and equipment.

(h) Non-mission related activities.

(i) Other programs.

**b.** Develop a detailed plan of action for short-range training plans. Prepare the detailed plan of action as follows:

- (1) Examine events scheduled on the long-range training plan to determine if they are still valid.
- (2) Transfer valid events to a short-range training/planning calendar.
- (3) Determine desired outcomes for scheduled events.
- (4) Analyze missions to determine related individual, leader, and collective tasks.
- (5) Determine if there are any weaknesses. Select tasks to correct these identified weaknesses and to sustain selected individual, leader, and unit strengths, as necessary.
- (6) Select the specific training objectives for missions and tasks to be trained. The T&EOs in chapter 5 provide the commander with the training objectives.
- (7) Prepare a short-range training planning calendar or 3 monthly schedules. The short-range training-planning calendar provides a detailed plan of action for the specified period.
- (8) Review short-range plans with higher headquarters.
- (9) Issue guidance. This guidance specifically addresses how training will be accomplished.

### **3-4. Near-term planning**

The final phase of planning is the execution of training. Using the short-range plan, prepare weekly training schedules.

- a.** Review the training program, unit proficiency, resources, and training environment. As in long-range and short-range planning, this review determines if previous assessments are still valid.
- b.** Finalize plans based on the review of the training program. Determine the best sequence for training tasks, and complete the final coordination of the training events and activities.
- c.** Prepare trainers, O/Cs, OPFOR, and support personnel. They should know what is being trained, why it is being trained, and what their role in the training will be.

### **3-5. Developing training exercises.**

This section provides general procedures for the company leadership to use for FTX preparation and for the company supporting STXs. Exercise plans are normally prepared during preparation of the short-range plan. Prepare the exercises as described below:

- a.** Selection of Missions and Tasks for Training. Complete this during the development of the long-range plan and refine it during the development of the short-range plan.
- b.** Site Selection. Confirm selection of a training area.
- c.** Scenario Development. After missions and tasks are selected, prepare a detailed scenario for the exercise.
  - (1) List the missions, tasks, and events in the preferred sequence.
  - (2) Identify events necessary for the control of the exercise. These events would normally include issuance of orders, AARs, and any other administrative or logistics action necessary to conduct the exercise.
  - (3) Prepare the exercise overlays, which show the sequence of actions and terrain to be used for each event.
  - (4) Determine the estimated time for each event using the overlay and scenario. The total time is determined to ensure that the scenario can be completed in the time allocated for the exercise.
- d.** Selection of O/Cs and OPFOR. O/Cs and OPFOR are normally required for every FTX and STX when MILES is used. It is difficult for a company to provide these from its own resources. When O/Cs and OPFOR must be provided from within the company, unit leaders may have to serve as the O/Cs for their units and the OPFOR may be selected from personnel (non essential) within the unit. Ideally, higher headquarters should provide O/Cs and OPFOR.

e. Preparation of the Control Plan. Control plans are developed to coordinate the actions of the training units, OPFOR, and O/Cs. The scenario is used and a detailed control plan is prepared. The control plan consists of—

- (1) Detailed schedules of OPFOR actions.
- (2) Detailed instructions for the OPFOR.
- (3) Detailed schedule of unit activities.

(4) OPORDs and FRAGOs for friendly units. Normally, friendly unit actions are controlled through the issuance of OPORDs and FRAGOs.

f. Preparation of the Evaluation Plan. All training is evaluated, either internally or externally. The evaluation plan identifies the tasks to be evaluated, by whom, and at what time. The evaluation will consist of—

- (1) Specific instructions for the O/Cs.
- (2) A sequential list of T&EOs to be evaluated by each O/C.
- (3) Detailed time schedules for evaluation and AARs.

**3-6. Mission Outline.**

Since unit training is mission oriented, the mission outline shows how task training contributes to the ability of the unit to perform its missions. The mission outline, figure 3-5, provides the commander with a visual outline of a unit mission in the format that facilitates the planning and management of training.

## Chapter 4

# Training Exercise

### 4-1. General.

Training exercises are used to train and practice the performance of collective tasks. This MTP contains a sample situational training exercise (STX). It is designed to assist in developing, sustaining, and evaluating the unit's mission proficiency. Table 4-1 lists an example STX by title, exercise number, and page number.

| <b>Table 4-1. Situational Training Exercise</b> |                        |             |
|---|------------------------|-------------|
| <i>TITLE</i>                                    | <i>EXERCISE NUMBER</i> | <i>PAGE</i> |
| Move  | STX 34-3-E0013         | 4-1         |

### 4-2. Situational Training Exercise.

STXs are short, scenario driven, mission-oriented, tactical exercises that train a group of closely related collective tasks. The STX provides the information for training the tasks that make up the critical wartime mission. The STX does the following important functions:

- a. Provides repetitive training on the missions.
- b. Allows training to focus on identified weaknesses.
- c. Allows the unit to practice the collective tasks before conducting a higher echelon FTX.
- d. Saves time by providing a majority of the information needed to develop a vehicle for training.

### **Military Intelligence Platoon**

#### **STX: 34-3-E0013—Move**

1. Objective. This example STX trains individual, collective, and leader tasks in the unit. It is used for internal and external evaluations.
2. Interface. This STX supports the company FTX 34-2-E0001, Conduct Company Operations
3. Training.
  - a. Guidance. The trainer should review the individual, collective, and leader tasks performed during the STX, then determine which tasks may require initial or refresher training.
    - (1) Individual training. Individual training should be soldier's manual tasks required to support this STX. The Individual-to-Collective Task Matrix in chapter 2 should be used as a source for these individual tasks. Training should be hands-on and performance-oriented. During training, leaders assess soldiers' proficiency by evaluating task performance against the soldiers' manual standards, and provide feedback to the soldier. The individual training and evaluation program includes things such as common task tests and commander's evaluations.
    - (2) Collective training. Collective training should be on the collective tasks required for the STX. Battle/crew drills and STXs are key tools for squad and platoon collective training. As with individual tasks, drills should be trained to standard with feedback provided as required. Collective tasks that could support this STX and mission, as well as other missions, are in the Mission-to-Collective Tasks Matrix in chapter 2 and the Mission outline in chapter 3.
    - (3) Leader training. Leader training should be on the leader tasks required for the exercise as well as the individual tasks. Leader tasks are trained in the same manner as stated in para-

graph 3(1) or by one or all of the following methods:

- (a) Classroom discussion on how to plan the exercise and implement unit SOPs. (FM 25-4, chapter 2)
  - (b) Map reconnaissance that assists in terrain analysis and wargaming. (Use map of the area where the STX will be conducted.)
  - (c) Terrain board or sand table exercises that permit simulations or miniatures to be used to gain three-dimensional perspective in wargaming and/or rehearsing the exercise. (Model the terrain board or sand table to match the terrain where the exercise will be conducted).
  - (d) Tactical exercises without troops allow leaders to train on the ground, practicing land navigation movement, reporting, and other leader actions. (FM 25-4, pages 40 through 44).
  - (e) Simulations and wargaming teach leaders as part of a continuing officer and noncommissioned officer development program.
  - (f) Training extension courses present information and demonstrate how tasks are performed to standard using audiovisual equipment. (DA Pam 350-100)
- b. Training tips. Tips for training and general instructions on how to prepare and accomplish the STX are:
- (1) Know the requirements for infiltration (FM 7-8), tactical movement (FM 7-8), and consolidation and reorganization (FM 7-8).
  - (2) Conduct a leader's reconnaissance of the training area with squad leaders to ensure that you do not make time-consuming mistakes.
  - (3) Review the standards for the T&EOs that support this exercise.
  - (4) The exercise may be conducted with blank ammunition, without ammunition, or live fire. The use of ammunition is encouraged to add more realism to the exercise.
  - (5) The exercise may be conducted with or without MILES. MILES provides better feedback and should be used if available.
  - (6) The exercise can be conducted under all environmental conditions, both day and night, with or without NBC. This scenario involves an active NBC environment.

#### 4. General Situation.

- a. Contact with the enemy has been reestablished. Initial reports indicate that he is at 65 to 70 percent strength and has not been reinforced. His defensive positions are not well established. He has the capability for indirect fire and close air support (CAS). The enemy has used chemicals and will probably do so again. A move is ordered to assist elsewhere. The unit is acting as part of a larger force and has indirect fire available. Figure 4-1 illustrates the graphic scenario of task performance in this exercise.
- b. This exercise begins with the receipt of a company FRAGO and ends after consolidation and reorganization. An AAR should be held after completing the reorganization. A final AAR should be conducted once all evaluation notes are compiled. If necessary, run portions of the exercise again until you are satisfied with your unit's performance. Table 4-2 provides a recommended sequence of T&EOs and time for each portion of the STX.

**Notes:** Events are trained to standards, not time limitations. The time required to train an event varies based on METT-TC factors and the proficiency of the platoon. Additional time is required if large portions of the exercise are conducted at night, under limited visibility, or under MOPP conditions.

5. Instructions for this STX are:

- a. This STX should be initially trained and rehearsed slowly, on open terrain, during good visibility, and with frequent explanations and critiques by leaders. This simple execution, combined with a thorough pre brief and chalk talks, constitutes the "crawl" stage of STX training. The "walk" phase of this STX entails conducting the training at closer to normal rates, on more difficult terrain, and with stops for explanation and critiques only when problems occur (except for planned AARs). The STX is executed under conditions as close to those expected in combat as possible for the "run" phase. The run phase used should be full operational security, camouflage, realistic time frames, distances, challenging terrain, an aggressive OPFOR, NBC environment, and movement distances. This exercise is conducted at full speed after conducting building-block training (individual training, drills) to reach the run level of execution.
- b. The T&EO standards for this exercise are in chapter 5. These standards must be met to obtain the maximum benefits from the training.
- c. This exercise should be conducted on a recurring basis to sustain proficiency. However, since many of the T&EOs in this STX will be trained in other STXs, practice may occur through integration rather than retraining the STX.

6. Support Requirements.

- a. Ideally, the OPFOR replicates enemy forces in size and strength to realistically portray threat activities. (See chapter 6)
- b. At least one evaluator should be assigned to control OPFOR activities. The evaluator evaluates OPFOR actions, ensures realism, stresses safety, and assesses loss and damage.
- c. OPFOR units should look and fight like the potential enemy. This assists soldiers in understanding threat tactics, doctrine, and weapons systems. (See chapter 6)
- d. Minimum trainers/observer controllers: The company commander or platoon leader, who will be the trainer and primary evaluator, can conduct this exercise. At least one other observer controller is required with the OPFOR. Another platoon being trained or evaluated should be used as the platoon making the main attacks. This platoon will need an additional trainer or observer controller.

## Chapter 5

# Training and Evaluation Outlines

### **5-1. Introduction.**

This chapter contains the training and evaluation outlines for the unit. T&EOs are the foundation of the MTP and the collective training of the units. T&EOs are training objectives (task, conditions, and standards) for the collective tasks, that support critical wartime operations. The unit must master designated collective tasks to perform its critical wartime operations. T&EOs may be trained separately, in an STX, in an FTX, or in live-fire exercises. For collective live-fire standards, the trainer needs to refer to the applicable gunnery manual for the appropriate course of fire. Those standards and courses of fire need to be integrated into the training exercise.

### **5-2. Structure.**

The T&EOs in this chapter are listed in table 5-1. The Mission-to-Collective Task Matrix in chapter 2 lists the T&EOs required to train the critical wartime missions according to their specific BOS.

### **5-3. Format.**

The T&EOs are prepared for every collective task that supports critical wartime operation accomplishment. Each T&EO contains the following items:

- a. Element.** This identifies the unit or unit element(s) that performs the task.
- b. Task.** This is a description of the action to be performed by the unit, and provides the task number.
- c. References.** These are in parenthesis following the task number. The reference, which contains the most information (primary reference) about the task is listed first and underlined. If there is only one reference do not underline the reference.
- d. Iteration.** Used to identify how many times the task is performed and evaluated during training. The "M" identifies when the task is performed in mission-oriented protective posture (MOPP) 4.
- e. Commander/Leader Assessment.** This is used by the unit leadership to assess the proficiency of the unit in performing the task to standard. Assessments are subjective in nature and use all available evaluation data and submit leader input to develop an assessment of the organization's overall capability to accomplish the task. Use the following ratings:
  - (1) T - Trained.** The unit is trained and has demonstrated its proficiency in accomplishing the task to wartime standards.
  - (2) P - Practice needed.** The unit needs to practice the task. Performance has demonstrated that the unit does not achieve standard without some difficulty or has failed to perform some task steps to standard.
  - (3) U - Untrained.** The unit cannot demonstrate an ability to achieve wartime proficiency.
- f. Condition.** A statement of the situation or environment in which the unit is to do the collective task.
- g. Task standard.**
  - (1)** The task standard states the performance criteria that a unit must achieve to successfully execute the task. This overall standard should be the focus of training. It should be understood by every soldier.
  - (2)** The trainer or evaluator determines the unit's training status using performance observation measurements (where applicable) and his judgment. The unit must be evaluated in the context of the METT-TC conditions. These conditions should be as similar as possible for all evaluated elements. This will establish a common baseline for unit performance.

**h. Task Steps and Performance Measures.** This is a listing of actions that is required to complete the task. These actions are stated in terms of observable performance for evaluating training proficiency. The task steps are arranged sequentially along with supporting individual tasks and their reference. Leader tasks within each T&EO are indicated by an asterisk (\*). Under each task step are listed the performance measures that must be accomplished to correctly perform the task step. If the unit fails to correctly perform one of these task steps to standard, it has failed to achieve the overall task standard.

**i. GO/NO-GO column.** This column is provided for annotating the platoon's performance of the task steps. Evaluate each performance measure for a task step and place an "X" in the appropriate column. A major portion of the performance measures must be marked a "GO" for the task step to be successfully performed.

**j. Task performance/evaluation summary block.** This block provides the trainer a means of recording the total number of task steps and performance measures evaluated and those evaluated as "GO". It also provides the evaluator a means to rate the unit's demonstrated performance as a "GO" or "NO-GO". It also provides the leader with a historical record for five training iterations.

**k. Supporting Individual Tasks.** This is a listing of all supporting individual tasks required to correctly perform the task. Listed are the reference, tasks number, and task title.

**l. OPFOR standards.** These standards specify overall OPFOR performance for each collective task. These standards ensure that OPFOR soldiers accomplish meaningful training and force the training unit to perform its task to standard or "lose" to the OPFOR. The OPFOR standards specify what must be accomplished -- not how it must be accomplished. The OPFOR must always attain its task standards, using tactics consistent with the type of enemy it portrays.

#### **5-4. Use.**

The T&EOs can be used to train or evaluate a single task. Several T&EOs can be used to train or evaluate a group of tasks such as an STX or FTX.

**CONDITION:** OPFOR HQ requires intelligence on the location and identification of enemy elements. Aircraft is dispatched to take photographs and conduct a visual inspection of enemy area.

**STANDARD:** Located and photographed enemy positions in assigned sectors, to include: support and storage bases and command and control facilities. Visual checks were conducted when possible. The enemy was not engaged. Priority intelligence requests and other information requirements were reported to OPFOR HQ.

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**TASK:** Conduct Deliberate Ambush (34-OPFOR-1004)

**CONDITION:** OPFOR element is operating along an enemy major supply route. Intelligence has reported an enemy convoy approaching the element. Headquarters has ordered complete destruction of the march element. The march element is approximately 15 minutes from the ambush point. OPFOR element possesses automatic weapons, anti-armor weapons, and command detonated mines.

**STANDARD:** Prepared ambush site before arrival of enemy convoy. Surprised enemy forces. Forced enemy march element to halt in kill zone. (REMBASS) (STP 34-96R14-SM-TG)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The repeater is emplaced and armed during the time of implant. The remotely monitored battlefield sensor system team has reviewed the supported unit mission plan. A terrain profile determined that radio line of sight could not be established from the sensor string or field to the sensor monitoring set or portable monitoring set monitor site, and a repeater is required. The repeater is preprogrammed and loaded. Certain soil or other environmental conditions may preclude effective use of the sensors or cause the enemy to easily locate sensor positions, requiring leaders to use alternative means of employment. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** Emplaced and armed the repeater for surveillance operations.

**SUPPORTING COLLECTIVE TASKS: NONE****OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Raid (34-OPFOR-1009)

**CONDITION:** OPFOR element has occupied an objective rally point and has orders to conduct a raid on a rear area base.

**STANDARD:** Enemy forces were surprised. Assaulted enemy support base and accomplished assigned tasks. Specified equipment and supplies were destroyed. Decisive engagement was avoided. All personnel were withdrawn from the area within the prescribed time. The collected intelligence data satisfied the priority intelligence requirements.

**TASK:** Attack (34-OPFOR-1010)

**CONDITION:** Enemy rear area support base has been located. PIRs and other intelligence requirements have been obtained by OPFOR patrols. Element has automatic and anti-armor weapons, and light mortars. Element is approximately the size of two platoons.

**STANDARD:** An attack plan was developed. An attack was initiated using a scheme of maneuver that exploited enemy flanks, gaps, and weaknesses. Covered and concealed routes were used to approach enemy areas. Employed indirect fire to support attack. Penetrated enemy defenses. Destroyed equipment and supplies, inflicted casualties, isolated the support base, and blocked reinforcements. The enemy unit was forced to displace.

**TASK:** Disrupt Enemy Movement and Operations Using Persistent and Non-Persistent Chemical Weapons (34-OPFOR-1001)

**CONDITION:** Conventional artillery weapons or aircraft are available to deliver chemical weapons. Routes and key bases in the rear area have been selected.

**STANDARD:** Chemical agents were delivered into targeted areas. The movement of enemy supplies and equipment to forward areas was delayed by disrupting command and control systems. Enemy movement was successfully channeled into predesignated ambush areas. Enemy supplies and equipment were contaminated. A high rate of casualties was inflicted on enemy forces.

**TASK:** Disrupt Enemy Movement and Operations Using Tactical Nuclear Weapons (34-OPFOR-1002)

**CONDITION:** Orders have been received to use tactical nuclear weapons in the enemy's rear area. Key locations have been identified.

**STANDARD:** Tactical nuclear missiles were delivered on target. Movement of equipment and supplies was disrupted or delayed to forward areas. Enemy equipment and supplies were destroyed. A high rate of nuclear casualties was inflicted among enemy troops.

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**TASK:** Maintain Contact (34-OPFOR-1011)

**CONDITION:** OPFOR element is tactically engaged with enemy base defense forces. Enemy forces are withdrawing under pressure.

**STANDARD:** The enemy forces were engaged decisively. As the enemy withdrew, the unit or force advanced maintaining contact.

**TASK:** Conduct Deliberate Ambush (34-OPFOR-1004)

**CONDITION:** OPFOR element is operating along an enemy major supply route. Intelligence has reported an enemy convoy approaching the element. Headquarters has ordered complete destruction of the march element. The march element is approximately 15 minutes from the ambush point. OPFOR element possesses automatic weapons, anti-armor weapons, and command detonated mines.

**STANDARD:** Prepared ambush site before arrival of enemy convoy. Surprised enemy forces. Forced enemy march element to halt in kill zone. Killed, wounded, or captured enemy personnel and destroyed all vehicles and equipment. Consolidated and withdrew from the area on order. Results of the mission were reported to headquarters.

**CONDITION:** Orders have been received to use tactical nuclear weapons in the enemy's rear area. Key locations have been identified.

**STANDARD:** Tactical nuclear missiles were delivered on target. Movement of equipment and supplies was disrupted or delayed to forward areas. Enemy equipment and supplies were destroyed. A high rate of nuclear casualties was inflicted among enemy troops.

**TASK:** Conduct Aerial Reconnaissance (34-OPFOR-1007)

**CONDITION:** OPFOR HQ requires intelligence on the location and identification of enemy elements. Aircraft is dispatched to take photographs and conduct a visual inspection of enemy area.

**STANDARD:** Located and photographed enemy positions in assigned sectors, to include: support and storage bases and command and control facilities. Visual checks were conducted when possible. The enemy was not engaged. Priority intelligence requests and other information requirements were reported to OPFOR HQ.

**TASK:** Gather Intelligence (34-OPFOR-1008)

**CONDITION:** OPFOR elements, operating in the rear area, are planning attacks on enemy bases. Information is needed before plans are finalized.

**STANDARD:** All priority intelligence requests and other intelligence requirements were identified. Passed through any outpost, defensive wire, or warning device undetected. Moved to an observation point that offered cover and concealment and was close enough to gather required information. Gathered data, which answered intelligence requirements. Withdrew from area undetected. All information of value was reported to OPFOR headquarters.

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**TASK:** Conduct Deliberate Ambush (34-OPFOR-1004)

**CONDITION:** OPFOR element is operating along an enemy major supply route. Intelligence has reported an enemy convoy approaching the element. Headquarters has ordered complete destruction of the march element. The march element is approximately 15 minutes from the ambush point. OPFOR element possesses automatic weapons, anti-armor weapons, and command detonated mines.

**STANDARD:** Prepared ambush site before arrival of enemy convoy. Surprised enemy forces. Forced enemy march element to halt in kill zone. **CONDITION:** OPFOR elements in the rear area have forwarded the coordinates of enemy facilities/elements. OPFOR aircraft have been dispatched to attack enemy installations or convoys.

**STANDARD:** Support sites, command and control facilities, and/or convoys were located. Attack runs on designated targets were conducted. Enemy equipment, supplies, and vehicles were destroyed and enemy personnel were killed.

**TASK:** Counter Passage of Lines (34-OPFOR-1016)

**CONDITION:** Friendly units are in defense positions but are expected to attempt a passage of lines. Friendly forces have close air support and NBC capabilities. The OPFOR element receives orders to disrupt the friendly passage of lines.

**STANDARD:** The friendly force passage of lines was delayed by the OPFOR element for a minimum of two hours.

**TASK:** Maintain Contact (34-OPFOR-1011)

**CONDITION:** OPFOR element is tactically engaged with enemy base defense forces. Enemy forces are withdrawing under pressure.

**OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**TASK:** Conduct Deliberate Ambush (34-OPFOR-1004)

**CONDITION:** OPFOR element is operating along an enemy major supply route. Intelligence has reported an enemy convoy approaching the element. Headquarters has ordered complete destruction of the march element. The march element is approximately 15 minutes from the ambush point. OPFOR element possesses automatic weapons, anti-armor weapons, and command detonated mines.

**STANDARD:** Prepared ambush site before arrival of enemy convoy. Surprised enemy forces. Forced enemy march element to halt in kill zone. Killed, wounded, or captured enemy personnel and destroyed all vehicles and equipment. Consolidated and withdrew from the area on order. Results of the mission were reported to headquarters.

**TASK:** Conduct Sniper Operations (34-OPFOR-1005)

**CONDITION:** OPFOR element has received a sniper mission from headquarters. Snipers are assigned missions in the enemy rear area along major supply routes and near support sites.

**STANDARD:** Infiltrated enemy area of operations and set up a well-concealed location. Vehicle drivers or personnel on foot were engaged with short bursts of semiautomatic fire. Selected targets were killed or wounded. Prevented position from being discovered and evacuated the area without being detected. Results of the operation were reported to OPFOR headquarters.

**TASK:** Attack (34-OPFOR-1010)

**CONDITION:** Enemy rear area support base has been located. PIRs and other intelligence requirements have been obtained by OPFOR patrols. Element has automatic and anti-armor weapons, and light mortars. Element is approximately the size of two platoons.

**STANDARD:** An attack plan was developed. An attack was initiated using a scheme of maneuver that exploited enemy flanks, gaps, and weaknesses. Covered and concealed routes were used to approach enemy areas. Employed indirect fire to support attack. Penetrated enemy defenses. Destroyed equipment and supplies, inflicted casualties, isolated the support base, and blocked reinforcements. The enemy unit was forced to displace.

**TASK:** Maintain Contact (34-OPFOR-1011)

**CONDITION:** OPFOR element is tactically engaged with enemy base defense forces. Enemy forces are withdrawing under pressure.

**STANDARD:** The enemy forces were engaged decisively. As the enemy withdrew, the unit or force advanced maintaining contact.

**TASK:** Engage with Indirect Fires (34-OPFOR-1033)

**CONDITION:** OPFOR unit or observation post is deployed observing a likely avenue of approach. Threat forces are conducting tactical movement along the avenue of approach. OPFOR has communications with supporting indirect fire assets.

**STANDARD:** Threat forces are detected without giving away OPFOR locations. Detected threat forces are engaged with indirect fires resulting in threat losses, suppression, or neutralization.

**ELEMENT:** VOICE COLL TEAM (3 TEAMS)

**TASK:** Establish a Low-Level Voice Intercept Collection Site (34-5-0802)  
 (FM 34-10) (FM 34-13) (FM 34-40-3)  
 (FM 34-40-9)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The low level voice intercept team has received a warning order to prepare/and deploy to support the intelligence requirements outlined in the OPORD's intelligence annex. The platoon headquarters has provided for the logistical support of the deploying team. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** Prepared the site, enabling the low-level voice intercept team to conduct collection mission over the assigned area according to the platoon operations order or fragmentary order.

**OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Aerial Reconnaissance (34-OPFOR-1007)

**CONDITION:** OPFOR HQ requires intelligence on the location and identification of enemy elements. Aircraft is dispatched to take photographs and conduct a visual inspection of enemy area.

**STANDARD:** Located and photographed enemy positions in assigned sectors, to include: support and storage bases and command and control facilities. Visual checks were conducted when possible. The enemy was not engaged. Priority intelligence requests and other information requirements were reported to OPFOR HQ.

**TASK:** Disrupt Enemy Movement and Operations Using Persistent and Non-Persistent Chemical Weapons (34-OPFOR-1001)

**CONDITION:** Conventional artillery weapons or aircraft are available to deliver chemical weapons. Routes and key bases in the rear area have been selected.

**STANDARD:** Chemical agents were delivered into targeted areas. The movement of enemy supplies and equipment to forward areas was delayed by disrupting command and control systems. Enemy movement was successfully channeled into predesignated ambush areas. Enemy supplies and equipment were contaminated. A high rate of casualties was inflicted on enemy forces.

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**TASK:** Conduct Deliberate Ambush (34-OPFOR-1004)

**CONDITION:** OPFOR element is operating along an enemy major supply route. Intelligence has reported an enemy convoy approaching the element. Headquarters has ordered complete destruction of the march element. The march element is approximately 15 minutes from the ambush point. OPFOR element possesses automatic weapons, anti-armor weapons, and command detonated mines.

**STANDARD:** Prepared ambush site before arrival of enemy convoy. Surprised enemy forces. Forced enemy march element to halt in kill zone. Killed, wounded, or captured enemy personnel and destroyed all vehicles and equipment. Consolidated and withdrew from the area on order. Results of the mission were reported to headquarters.

**TASK:** Conduct Air Attacks (34-OPFOR-1006)

**CONDITION:** OPFOR elements in the rear area have forwarded the coordinates of enemy facilities/elements. OPFOR aircraft have been dispatched to attack enemy installations or convoys.

**STANDARD:** Support sites, command and control facilities, and/or convoys were located. Attack runs on designated targets were conducted. Enemy equipment, supplies, and vehicles were destroyed and enemy personnel were killed.

**TASK:** Maintain Contact (34-OPFOR-1011)

**CONDITION:** OPFOR element is tactically engaged with enemy base defense forces. Enemy forces are withdrawing under pressure.

**STANDARD:** The enemy forces were engaged decisively. As the enemy withdrew, the unit or force advanced maintaining contact.

**TASK:** Conduct Sniper Operations (34-OPFOR-1005)

**CONDITION:** OPFOR element has received a sniper mission from headquarters. Snipers are assigned missions in the enemy rear area along major supply routes and near support sites.

**STANDARD:** Infiltrated enemy area of operations and set up a well-concealed location. Vehicle drivers or personnel on foot were engaged with short bursts of semiautomatic fire. Selected targets were killed or wounded. Prevented position from being discovered and evacuated the area without being detected. Results of the operation were reported to OPFOR headquarters.

**TASK:** Attack (34-OPFOR-1010)

**CONDITION:** Enemy rear area support base has been located. PIRs and other intelligence requirements have been obtained by OPFOR patrols. Element has automatic and anti-armor weapons, and light mortars. Element is approximately the size of two platoons.

**STANDARD:** An attack plan was developed. An attack was initiated using a scheme of maneuver that exploited enemy flanks, gaps, and weaknesses. Covered and concealed routes were used to approach enemy areas. Employed indirect fire to support attack. Penetrated enemy defenses. Destroyed equipment and supplies, inflicted casualties, isolated the support base, and blocked reinforcements. The enemy unit was forced to displace.

**TASK:** Conduct Raid (34-OPFOR-1009)

**CONDITION:** OPFOR element has occupied an objective rally point and has orders to conduct a raid on a rear area base.

**STANDARD:** Enemy forces were surprised. Assaulted enemy support base and accomplished assigned tasks. Specified equipment and supplies were destroyed. Decisive engagement was avoided. All personnel were withdrawn from the area within the prescribed time. The collected intelligence data satisfied the priority intelligence requirements.

**TASK:** Gather Intelligence (34-OPFOR-1008)

**CONDITION:** OPFOR elements, operating in the rear area, are planning attacks on enemy bases. Information is needed before plans are finalized.

**STANDARD:** All priority intelligence requests and other intelligence requirements were identified. Passed through any outpost, defensive wire, or warning device undetected. Moved to an observation point that offered cover and concealment and was close enough to gather required information. Gathered data, which answered intelligence requirements. Withdrew from area undetected. All information of value was reported to OPFOR headquarters.

**TASK:** Disrupt Enemy Movement and Operations Using Tactical Nuclear Weapons (34-OPFOR-1002)

**CONDITION:** Orders have been received to use tactical nuclear weapons in the enemy's rear area. Key locations have been identified.

**STANDARD:** Tactical nuclear missiles were delivered on target. Movement of equipment and supplies was disrupted or delayed to forward areas. Enemy equipment and supplies were destroyed. A high rate of nuclear casualties was inflicted among enemy troops.

**TASK:** Conduct Aerial Reconnaissance (34-OPFOR-1007)

**CONDITION:** OPFOR HQ requires intelligence on the location and identification of enemy elements. Aircraft is dispatched to take photographs and conduct a visual inspection of enemy area.

The enemy was not engaged. Priority intelligence requests and other information requirements were reported to OPFOR HQ.

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**TASK:** Breach an Obstacle (34-OPFOR-1015)

**CONDITION:** OPFOR lead element encounters an obstacle blocking its avenue of approach as it advances toward friendly forces.

**STANDARD:** OPFOR lead element breached the obstacle before the OPFOR main body reached the site.

**TASK:** Disrupt Enemy Movement and Operations Using Persistent and Non-Persistent Chemical Weapons (34-OPFOR-1001)

**CONDITION:** Conventional artillery weapons or aircraft are available to deliver chemical weapons. Routes and key bases in the rear area have been selected.

**STANDARD:** Chemical agents were delivered into targeted areas. The movement of enemy supplies and equipment to forward areas was delayed by disrupting command and control systems. Enemy movement was successfully channeled into predesignated ambush areas. Enemy supplies and equipment were contaminated. A high rate of casualties was inflicted on enemy forces.

**TASK:** Conduct Air Attacks (34-OPFOR-1006)

**CONDITION:** OPFOR elements in the rear area have forwarded the coordinates of enemy facilities/elements. OPFOR aircraft have been dispatched to attack enemy installations or convoys.

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The platoon is conducting defensive or assembly area operations in a tactical environment and is stationary. There is a need to construct a protective obstacle across or along a probable threat avenue of approach. The company commander has authorized the construction of the obstacle. Sufficient time, manpower, and materials are available. Threat contact is not expected until after the "Defend No Later Than" time specified in the operations order or operations plan. Some iterations of this task should be performed in MOPP4.

## OPFOR TASKS AND STANDARDS

**TASK:** Conduct Air Attacks (34-OPFOR-1006)

**CONDITION:** OPFOR elements in the rear area have forwarded the coordinates of enemy facilities/elements. OPFOR aircraft have been dispatched to attack enemy installations or convoys.

**STANDARD:** Support sites, command and control facilities, and/or convoys were located. Attack runs on designated targets were conducted. Enemy equipment, supplies, and vehicles were destroyed and enemy personnel were killed.

**TASK:** Conduct Aerial Reconnaissance (34-OPFOR-1007)

**CONDITION:** OPFOR HQ requires intelligence on the location and identification of enemy elements. Aircraft is dispatched to take photographs and conduct a visual inspection of enemy area.

**STANDARD:** Located and photographed enemy positions in assigned sectors, to include: support and storage bases and command and control facilities. Visual checks were conducted when possible. The enemy was not engaged. Priority intelligence requests and other information requirements were reported to OPFOR HQ.

**TASK:** Disrupt Enemy Movement and Operations Using Tactical Nuclear Weapons (34-OPFOR-1002)

**CONDITION:** Orders have been received to use tactical nuclear weapons in the enemy's rear area. Key locations have been identified.

**STANDARD:** Tactical nuclear missiles were delivered on target. Movement of equipment and supplies was disrupted or delayed to forward areas. Enemy equipment and supplies were destroyed. A high rate of nuclear casualties was inflicted among enemy troops.

**TASK:** Attack (34-OPFOR-1010)

**CONDITION:** Enemy rear area support base has been located. PIRs and other intelligence requirements have been obtained by OPFOR patrols. Element has automatic and anti-armor weapons, and light mortars. Element is approximately the size of two platoons.

**STANDARD:** An attack plan was developed. An attack was initiated using a scheme of maneuver that exploited enemy flanks, gaps, and weaknesses. Covered and concealed routes were used to approach enemy areas. Employed indirect fire to support attack. Penetrated enemy defenses. Destroyed equipment and supplies, inflicted casualties, isolated the support base, and blocked reinforcements. The enemy unit was forced to displace.

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**TASK:** Maintain Contact (34-OPFOR-1011)

**CONDITION:** OPFOR element is tactically engaged with enemy base defense forces. Enemy forces are withdrawing under pressure.

**STANDARD:** The enemy forces were engaged decisively. As the enemy withdrew, the unit or force advanced maintaining contact.

**TASK:** Disrupt Enemy Movement and Operations Using Persistent and Non-Persistent Chemical Weapons (34-OPFOR-1001)

**CONDITION:** Conventional artillery weapons or aircraft are available to deliver chemical weapons. Routes and key bases in the rear area have been selected.

**STANDARD:** Chemical agents were delivered into targeted areas. The movement of enemy supplies and equipment to forward areas was delayed by disrupting command and control systems. Enemy movement was successfully channeled into predesignated ambush areas. Enemy supplies and equipment were contaminated. A high rate of casualties was inflicted on enemy forces.

**TASK:** Take Active Combined Arms Air Defense Measures Against Hostile Aerial Platforms (44-3-C221.34-0001)  
 (FM 44-8) (FM 44-80)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** Unit receives early warning of aerial platforms (rotary-wing, fixed-wing, unmanned aerial vehicles) in the area. Unit personnel detect unknown or hostile aerial platforms (rotary-wing, fixed-wing, unmanned aerial vehicles). Unit is in a tactical environment at weapons control status of "Weapons Tight." Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** Unit destroyed or forced the attacking aerial platforms (rotary-wing, fixed-wing, unmanned aerial vehicles) away from friendly positions.

**OPFOR TASKS AND STANDARDS**

**TASK:** Disrupt Enemy Movement and Operations Using Persistent and Non-Persistent Chemical Weapons (34-OPFOR-1001)

**CONDITION:** Conventional artillery weapons or aircraft are available to deliver chemical weapons. Routes and key bases in the rear area have been selected.

**STANDARD:** Chemical agents were delivered into targeted areas. The movement of enemy supplies and equipment to forward areas was delayed by disrupting command and control systems. Enemy movement was successfully channeled into predesignated ambush areas. Enemy supplies and equipment were contaminated. A high rate of casualties was inflicted on enemy forces.

**TASK:** Conduct Sniper Operations (34-OPFOR-1005)

**CONDITION:** OPFOR element has received a sniper mission from headquarters. Snipers are assigned missions in the enemy rear area along major supply routes and near support sites.

**STANDARD:** Infiltrated enemy area of operations and set up a well-concealed location. Vehicle drivers or personnel on foot were engaged with short bursts of semiautomatic fire. Selected targets were killed or wounded. Prevented position from being discovered and evacuated the area without being detected. Results of the operation were reported to OPFOR headquarters.

**TASK:** Conduct Air Attacks (34-OPFOR-1006)

**CONDITION:** OPFOR elements in the rear area have forwarded the coordinates of enemy facilities/elements. OPFOR aircraft have been dispatched to attack enemy installations or convoys.

**STANDARD:** Support sites, command and control facilities, and/or convoys were located. Attack runs on designated targets were conducted. Enemy equipment, supplies, and vehicles were destroyed and enemy personnel were killed.

**TASK:** Conduct Aerial Reconnaissance (34-OPFOR-1007)

**CONDITION:** OPFOR HQ requires intelligence on the location and identification of enemy elements. Aircraft is dispatched to take photographs and conduct a visual inspection of enemy area.

**STANDARD:** Located and photographed enemy positions in assigned sectors, to include: support and storage bases and command and control facilities. Visual checks were conducted when possible. The enemy was not engaged. Priority intelligence requests and other information requirements were reported to OPFOR HQ.

**TASK:** Conduct Raid (34-OPFOR-1009)

**CONDITION:** OPFOR element has occupied an objective rally point and has orders to conduct a raid on a rear area base.

**STANDARD:** Enemy forces were surprised. Assaulted enemy support base and accomplished assigned tasks. Specified equipment and supplies were destroyed. Decisive engagement was avoided. All personnel were withdrawn from the area within the prescribed time. The collected intelligence data satisfied the priority intelligence requirements.

**TASK:** Attack (34-OPFOR-1010)

**CONDITION:** Enemy rear area support base has been located. PIRs and other intelligence requirements have been obtained by OPFOR patrols. Element has automatic and anti-armor weapons, and light mortars. Element is approximately the size of two platoons.

**STANDARD:** An attack plan was developed. An attack was initiated using a scheme of maneuver that exploited enemy flanks, gaps, and weaknesses. Covered and concealed routes were used to approach enemy areas. Employed indirect fire to support attack. Penetrated enemy defenses. Destroyed equipment and supplies, inflicted casualties, isolated the support base, and blocked reinforcements. The enemy unit was forced to displace.

**TASK:** Conduct Electronic Warfare (34-OPFOR-1012)

**CONDITION:** OPFOR employs collection and direction finding assets (ground and air), to monitor and locate enemy forces.

**STANDARD:** The positions of enemy command, intelligence, and logistics units were located. The locations of the positions were forwarded to OPFOR headquarters. Jamming signals were used against enemy radio receivers. Enemy radio nets were monitored and all information of intelligence value was reported to OPFOR HQ.

**TASK:** Engage with Indirect Fires (34-OPFOR-1033)

**CONDITION:** OPFOR unit or observation post is deployed observing a likely avenue of approach. Threat forces are conducting tactical movement along the avenue of approach. OPFOR has communications with supporting indirect fire assets.

**STANDARD:** Threat forces are detected without giving away OPFOR locations. Detected threat forces are engaged with indirect fires resulting in threat losses, suppression, or neutralization.

**ELEMENTS:** COMPANY  
 COMPANY HQ  
 OPS PLT HQ  
 UAV PLT HQ

**TASK:** Rearm/Resupply (17-3-1030.34-0001)

**ITERATION:** 1 2 3 4 5 M (Circle)  
**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** While conducting tactical operations as part of a company/troop, the platoon has been directed to receive supplies or has determined that resupply operations are necessary. The platoon has received an operation order/fragmentary order (OPORD/FRAGO) and has a standing operating procedure (SOP) with all required report formats. Enemy contact is not expected. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The platoon successfully completes resupply operations to replenish its basic load of critical supplies while maintaining security at a level consistent with mission, enemy, troops, terrain, time available, and civilian considerations (METT-TC) factors.

**TASK:** Conduct Electronic Warfare (34-OPFOR-1012)

**CONDITION:** OPFOR employs collection and direction finding assets (ground and air), to monitor and locate enemy forces.

**STANDARD:** The positions of enemy command, intelligence, and logistics units were located. The locations of the positions were forwarded to OPFOR headquarters. Jamming signals were used against enemy radio receivers. Enemy radio nets were monitored and all information of intelligence value was reported to OPFOR HQ.

**TASK:** Disrupt Enemy Movement and Operations Using Tactical Nuclear Weapons (34-OPFOR-1002)

**CONDITION:** Orders have been received to use tactical nuclear weapons in the enemy's rear area. Key locations have been identified.

**STANDARD:** Tactical nuclear missiles were delivered on target. Movement of equipment and supplies was disrupted or delayed to forward areas. Enemy equipment and supplies were destroyed. A high rate of nuclear casualties was inflicted among enemy troops.

**TASK:** Disrupt Enemy Movement and Operations Using Persistent and Non-Persistent Chemical Weapons (34-OPFOR-1001)

**CONDITION:** Conventional artillery weapons or aircraft are available to deliver chemical weapons. Routes and key bases in the rear area have been selected.

**STANDARD:** Chemical agents were delivered into targeted areas. The movement of enemy supplies and equipment to forward areas was delayed by disrupting command and control systems. Enemy movement was successfully channeled into predesignated ambush areas. Enemy supplies and equipment were contaminated. A high rate of casualties was inflicted on enemy forces.

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**TASK:** Conduct Raid (34-OPFOR-1009)

**CONDITION:** OPFOR element has occupied an objective rally point and has orders to conduct a raid on a rear area base.

**STANDARD:** Enemy forces were surprised. Assaulted enemy support base and accomplished assigned tasks. Specified equipment and supplies were destroyed. Decisive engagement was avoided. **SUPPORTING COLLECTIVE TASKS: NONE****OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Electronic Warfare (34-OPFOR-1012)

**CONDITION:** OPFOR employs collection and direction finding assets (ground and air), to monitor and locate enemy forces.

**STANDARD:** The positions of enemy command, intelligence, and logistics units were located. The locations of the positions were forwarded to OPFOR headquarters. Jamming signals were used against enemy radio receivers. Enemy radio nets were monitored and all information of intelligence value was reported to OPFOR HQ.

**TASK:** Disrupt Enemy Movement and Operations Using Tactical Nuclear Weapons (34-OPFOR-1002)

**CONDITION:** Orders have been received to use tactical nuclear weapons in the enemy's rear area. Key locations have been identified.

**STANDARD:** Tactical nuclear missiles were delivered on target. Movement of equipment and supplies was disrupted or delayed to forward areas. Enemy equipment and supplies were destroyed. A high rate of nuclear casualties was inflicted among enemy troops.

**TASK:** Disrupt Enemy Movement and Operations Using Persistent and Non-Persistent Chemical Weapons (34-OPFOR-1001)

**CONDITION:** Conventional artillery weapons or aircraft are available to deliver chemical weapons. Routes and key bases in the rear area have been selected.

**STANDARD:** Chemical agents were delivered into targeted areas. The movement of enemy supplies and equipment to forward areas was delayed by disrupting command and control systems. Enemy movement was successfully channeled into predesignated ambush areas. Enemy supplies and equipment were contaminated. A high rate of casualties was inflicted on enemy forces.

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**ELEMENTS:** COMPANY  
 OPS PLT HQ  
 UAV PLT HQ

**TASK:** Conduct Troop Leading Procedures (17-2-0065.34-0001)

**ITERATION:** 1 2 3 4 5 M (Circle)  
**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The troop has received an OPORD/FRAGO with operations graphics, directing it to conduct a mission. The OPORD/FRAGO has maps, overlays, graphic control measures, and applicable standing operating procedures. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The troop was prepared to conduct the mission within the time specified in the order and with all elements fully mission capable. All personnel could explain the higher unit mission and higher commander's intent two levels up. All personnel could explain the troop mission, troop commander's intent, and their specific tasks and duties that supported the mission. If available, the troop used digital equipment as necessary or as directed to accomplish the mission. No friendly unit suffered casualties or equipment damage as a result of fratricide.

|---|----|-------|
| <p>NOTE: The format used in this task and evaluation outline-to-outline task steps and performance measures parallels the eight steps of troop leading procedures. Steps are generally conducted concurrently rather than sequentially. Troop leading procedures must also be adapted to mission, enemy, terrain, troops, time available, and civilian considerations (METT-TC) that affect the troop's situation, especially the time available for planning and preparation. The troop commander may have to abbreviate or combine steps as the situation dictates.</p> <p>Although the troop commander holds ultimate responsibility for troop leading procedures, the executive officer and 1SG assist with and/or conduct many activities within the process.</p> <p>* 1. Troop commander receives and analyzes mission.</p> <p>NOTE: As a general rule, the commander uses one-third of the available time for planning, which includes issuing the troop OPORD, and allocates the remaining two-thirds of the time to the platoons and other elements to prepare for the mission.</p> <ul style="list-style-type: none"> <li>a. | <p>NOTE: The format used in this training and evaluation outline (T&amp;EO) to outline task steps and performance measures parallels the eight steps of troop-leading procedures. The platoon leader may have to abbreviate, combine, or even eliminate steps as the situation dictates.</p> <p>Although the platoon leader holds ultimate responsibility for troop-leading procedures, the platoon sergeant (PSG) assists with and/or conducts many activities within the process.</p> <p>* 1. **OPFOR TASKS AND STANDARDS**

**TASK:** Conduct Hasty Ambush (34-OPFOR-1003)

**CONDITION:** OPFOR element is moving in a concealed area when an enemy element is reported moving along an adjacent route.

**STANDARD:** The ambush site was prepared before the arrival of enemy element. The enemy force was surprised and casualties were inflicted within the designated kill zone. Delayed enemy march element from reaching its specified destination. Withdrew, on order, within two minutes of ambush initiation. Reported results of mission to headquarters.

**TASK:** Conduct Deliberate Ambush (34-OPFOR-1004)

**CONDITION:** OPFOR element is operating along an enemy major supply route. Intelligence has reported an enemy convoy approaching the element. Headquarters has ordered complete destruction of the march element. The march element is approximately 15 minutes from the ambush point. OPFOR element possesses automatic weapons, anti-armor weapons, and command detonated mines.

**STANDARD:** Prepared ambush site before arrival of enemy convoy. Surprised enemy forces. Forced enemy march element to halt in kill zone. Killed, wounded, or captured enemy personnel and destroyed all vehicles and equipment. Consolidated and withdrew from the area on order. Results of the mission were reported to headquarters.

**TASK:** Conduct Sniper Operations (34-OPFOR-1005)

**CONDITION:** OPFOR element has received a sniper mission from headquarters. Snipers are assigned missions in the enemy rear area along major supply routes and near support sites.

**STANDARD:** Infiltrated enemy area of operations and set up a well-concealed location. Vehicle drivers or personnel on foot were engaged with short bursts of semiautomatic fire. Selected targets were killed or wounded. Prevented position from being discovered and evacuated the area without being detected. Results of the operation were reported to OPFOR headquarters.

**TASK:** Conduct Air Attacks (34-OPFOR-1006)

**CONDITION:** OPFOR elements in the rear area have forwarded the coordinates of enemy facilities/elements. OPFOR aircraft have been dispatched to attack enemy installations or convoys.

**STANDARD:** Support sites, command and control facilities, and/or convoys were located. Attack runs on designated targets were conducted. Enemy equipment, supplies, and vehicles were destroyed and enemy personnel were killed.

## Chapter 6

# External Evaluation

### 6-1. General.

Evaluations are conducted to evaluate the unit's ability to perform its missions. This chapter is a guide for preparing evaluations. Using units may modify this evaluation, based on METT-TC and other considerations, as deemed appropriate by the commander. Selected T&EOs in chapter 5 are used for evaluation, which involves the total unit and employs a realistic OPFOR and the use of multiple integrated laser engagement system(MILES). At the end of the evaluation, the commander can identify the strengths and weaknesses of his unit. These strengths and weaknesses are the basis for future training and resource allocations.

### 6-2. Preparing the Evaluation.

The commander must standardize evaluation procedures to accurately measure the unit's capabilities.

a. Preparing the Evaluation Instrument. The sample evaluation scenario in table 6-1 contains the missions as well as the appropriate tasks necessary to develop the scenario and execute the evaluation. Figure 6-1 is a graphic representation of the scenario. Selective tailoring is required because it is not possible to evaluate every task. The following procedures are suggested for developing the evaluation.

**Figure 6-4. Support Requirements**

(4) Compile the selected missions and tasks in the order they logically occur in the detailed scenario. Group the selected missions and tasks in parts for continuous operations, table 6-1, Sample Evaluation Scenario. Parts can be interrupted at logical points to assess MILES casualties and conduct in-process AARs.

**b.** Forecasting and Requisitioning Resources. Adequate training ammunition, equipment, and supplies must be forecasted and requisitioned. Figure 6-4 is a list of support requirements for this evaluation. It is based on experiences with the scenario in table 6-1. The evaluating headquarters prepares its own support requirements.

**c.** Selecting and Preparing the Field Evaluation Site. Required size, type of terrain, OPFOR requirements, and administrative requirements are the basis for site selection. For this evaluation an area of 5 kilometers X 10 kilometers was selected. The OPFOR is positioned according to threat doctrine. The site must provide space for the administrative area required to support the evaluation.

**d.** Planning Indirect Fire Simulation. Because it greatly influences the outcome of battles, reaction to indirect fire is an important consideration of the evaluation. Indirect fire simulation requires considerable planning to achieve realism.

(1) The fire marker control system outlined in TC 25-6 is a recommended method of simulating indirect fire. Due to the amount of required resources, this method may be difficult to support.

(2) The commander may use the evaluation control headquarters method or the simulation without OPFOR method to evaluate the unit's ability to react to indirect fire. If the evaluation control headquarters method is used, the OPFOR initiates a call for fire to the evaluation control headquarters, which simulates the tactical fire direction center (FDC). The control headquarters would then relay the delivery data to the observer/controllers (O/Cs) who would mark the impact of the round with artillery simulators and assess appropriate causalities. If an OPFOR is not used, the O/C may ignite artillery simulators and observe the unit's reactions. The FM 25 series provide assessment and computation tables that may be used to determine casualties. Indirect fire simulation must be realistic and limited to what the unit could reasonably expect under combat conditions.

### **6-3. Selecting the Observer/Controllers**

a. O/Cs must know the unit's missions, organization, equipment, and employment. The senior O/C should be at least equal in rank to the unit commander and have successfully performed in that specific or similar command position.

b. The following are minimum rank and experience requirements for O/Cs:

(1) Company O/C is an officer with company command experience.

(2) Platoon or section O/Cs are lieutenants or NCOs with platoon or section experience.

(3) Recorder is an officer or NCO at the evaluation control headquarters who receives "kill" information or results and time data from the O/Cs.

### **6-4. Training the Observer/Controllers**

O/Cs standardize administration of the evaluation by understanding the following functional areas:

a. Evaluation Design. Each part is designed to evaluate specific missions or tasks within the overall scenario. O/Cs must thoroughly understand the evaluation and correctly implement it.

b. MILES. Each O/C, regardless of position, must have full knowledge of the unit's weapons and vehicles and must also thoroughly understand the MILES system being used. The unit commander is responsible for ensuring that all MILES equipment is functional before each part of the scenario.

c. Evaluation Control System. This system ensures that the evaluation is administered in a consistent and standardized manner and that correct data is collected for the final evaluation. It includes the following elements:

(1) Rules of engagement.

(2) O/C duties and responsibilities.

(3) Communications systems.

(4) Evaluation data collection plan.

### **6-5. Recording External Evaluation Information**

a. The evaluating headquarters develops the data recording instruments for the O/Cs. The Unit Data Sheet, figure 6-5, documents demographic information, which may reflect on a unit's performance. The Environmental Data Sheet, figure 6-6, documents weather information in order to compare missions under differing environmental conditions. The Personnel and Equipment Loss Report, figure 6-7, documents information that may affect the unit's degree of success during engagements with the OPFOR.

b. The senior O/C has the overall responsibility for preparation of the external evaluation. This evaluation is based on his own findings and his subordinate O/C's input. Subordinate O/Cs use the task

evaluation criteria (T&EO from chapter 5 and Task Summary Sheet) to determine overall proficiency in their particular areas. The senior O/C compiles the external evaluation results as prescribed by the evaluating commander. Deviations from the task standard assessed by the battery O/C may be addressed in the senior O/C comments portion of the Unit Proficiency Worksheet (UPW).

#### **6-6. Selecting and Training the Opposing Forces.**

The selection and training of the OPFOR is crucial to the success of a standardized evaluation. The OPFOR provides one of the control measures that influences the conditions under which the evaluation is administered. The unit should face an opponent who realistically resembles the threat in strength, weapons, and skill.

**a.** Selection. Any qualified Skill Level 1 or 2 soldier can serve as a member of the OPFOR. Ideally, the OPFOR should be a small cohesive unit under the control of their leader or commander.

**b.** Training. The OPFOR must understand the following six major areas:

- (1) Installation and operation of the MILES devices.
- (2) Rules of engagement.
- (3) Threat small unit tactics.
- (4) Training scenarios.
- (5) OPFOR weapons and equipment, if available.
- (6) Safety.

**c.** Opposing Forces Strength

(1) Offense. Using MILES, the unit should outnumber the OPFOR three-to-one if an attack is to be successful. If the OPFOR is stronger than this ratio, only the most exceptional unit will be successful. They must be armed with weapons capable of defeating any of the unit's assets. As a general rule, the OPFOR should be strong enough to offer the unit a realistic challenge, but one that the unit can defeat when proper tactics are employed.

(2) Defense. The OPFOR, at a minimum, should have a three-to-one ratio of superiority, because anything less will not have sufficient weapons and ammunition to conduct a successful attack. They must be more than merely a series of targets to be destroyed. The OPFOR should be allowed to plan its own attack for each mission and not be forced into a "canned" attack that all units quickly defeat. Once the OPFOR establishes its plan, it must use the same plan for all other like units for that event in order to maintain the objectivity and standardization of the evaluation.

#### **6-7. Conducting the Evaluation.**

Evaluations are divided into three distinct areas. Each area requires a different degree of preparation and coordination.

**a.** Pre-evaluation

(1) The senior O/C and all other O/Cs must perform reconnaissance of the evaluation area to know the unit's boundaries, disposition of the OPFOR, and the most likely avenues of approach throughout the field evaluation site's area of operation.

(2) The unit must prepare an OPORD and FRAGO to control the exercise. An order is prepared for each mission in the evaluation scenario. These can be prepared by using the skeleton orders contained in the STXs in chapter 4.

(3) Unit preparatory activities include installation and troubleshooting of MILES equipment, loading vehicles, conducting inspections, and performing other logistic and administrative actions, as required.

(4) The OPFOR is placed in position and briefed while the unit is conducting its preparatory activities.

(5) In this evaluation scenario, the unit is issued a movement order to move to an assembly area. When the assembly area has been occupied, the OPORD is issued. The O/Cs should make an

equipment functions check after the unit occupies the assembly area and after the unit leaders have issued instructions.

**b. Evaluation**

(1) The evaluation team controls the evaluation in two ways. First, it uses measures established in both the movement order and in paragraphs 3 and 5 in the OPORD and FRAGO. Second, the team controls the evaluation through the team commander (simulated by the senior O/C for this evaluation) on the team net. The team does not control in the traditional sense, instead it accompanies the unit as observers. Only the senior O/C has direct verbal contact with the unit commander. All other O/Cs do not speak to, aid, advise, point out positions, or in any way influence the unit's performance, except for a possible or actual safety issue or emergency. O/Cs are neutral throughout the evaluation.

(2) Once the senior O/C issues the OPORD and movement order, the unit commander executes the events and actions prescribed in the first part of the evaluation scenario within the estimated time. From this point, all successive parts begin with a FRAGO.

(3) The senior O/C terminates a part when the unit has completed all the events and actions in a particular area or has suffered so many casualties or damage that the part cannot be completed. The O/C must record the reasons for the termination in the margin of the O/C's Task Summary Sheet and report his action to the evaluation control headquarters. In the sample evaluation scenario, the completion of each event or action is indicated by "conducting sustainment operations." During this period, the senior O/C directs the unit to remain in position while "replacements" (personnel and equipment designated as killed or destroyed) are sent forward to reconstitute the unit. At this time, O/Cs must perform the following actions:

(a) Inspect all MILES equipment, record "kill" codes, and reset equipment. Any damage or inoperative MILES equipment is replaced.

(b) Resolve all casualty data to determine the time, place, number, and cause of casualties. This information is reported to the recorder in the evaluation control headquarters.

(c) Debrief the unit to resolve questions. Afterwards, the senior O/C directs the unit to continue its mission after it receives a FRAGO or OPORD for the next part.

(4) These guidelines should be followed by the O/Cs:

(a) Report major "kills" (vehicles, groups).

(b) Report major weapons fired. Together with reporting major kills, this is the best method for determining direct fire effectiveness. Both significant firings and hits are reported to the evaluation control headquarters.

(c) Enforce rules of engagement.

(d) Observe critical tactical events of time. O/Cs must spot and record any action that might have an effect on later performance or mission outcome.

(e) Record travel routes and unit's location.

(f) Inform OPFOR controllers of the unit's location, direction, and intent. This is necessary to enable OPFOR action to be controlled in accordance with the desired sequence of events.

(g) Enforce safety.

(h) Terminate mission.

**c. Post Evaluation.** After the evaluation is terminated, the unit moves to an assembly area and performs the following actions:

(1) The unit O/C debriefs subordinate O/Cs and compiles all data (evaluator packets) for the evaluation.

(2) The unit O/C must complete the Task Summary Sheet.

(3) The unit O/C must turn in all completed O/C packets (with the O/C scoring system) to control headquarters for recording and analysis.

(4) The unit O/C must conduct an AAR of the unit's performance.

- (5) Each element O/C should conduct an AAR of his element's performance.

### **6-8. Conducting the After Action Review**

**a. General.** At the completion of each evaluation part, the AAR leader provides feedback to the unit in order to increase and reinforce learning.

**b. Feedback.** Because all members of the unit participate in an AAR, each member becomes a source of feedback. This provides a richer "database" for key points. The AAR leader draws information from each member that becomes an important part of the discussion. This information is the basis for discussing alternate courses of action.

**c. Preparing the After Action Review.** AAR preparation involves five steps:

(1) Review training orders and objectives. Training objectives are the focus of the discussion of the exercise results. The FRAGOs and OPORDs included in the exercise implement these objectives. The O/C should be familiar with the objectives, FRAGOs, and OPORDs so that he can note orders given by leaders of the evaluated unit and its subordinate elements that either implement these objectives or deviate from them.

(2) Observe the exercise. This is an active process. The emphasis is on noting those actions that make the difference between the unit's success or failure. The O/C does not need to remain close to the unit leader, since more can be seen from high ground near the lead element's location or along the unit's route of march. Because unit orders identify important activities and checkpoints, the O/C must be present when the commander issues the order. The O/C should position himself where he can best observe anticipated critical events. Examples of critical events include:

- (a) Conducting a road march.
- (b) Crossing a radiologically contaminated area.
- (c) Reforming unit supply operations.
- (d) Responding to a NBC attack.

(3) Select the site and assemble the participants. After the exercise, select a site for the AAR. If possible, hold the AAR where the majority of action occurred, where most of the critical events took place (normally where the OPFOR was positioned), or where the terrain can be observed. Usually, the OPFOR or unit objectives are suitable for assembling the players and conducting the AAR.

(4) Debrief the O/Cs. While the units are moving to the selected site, the O/Cs should be debriefed. The senior O/C must have a complete understanding of what happened in the exercise. The fourth step in AAR preparation is to obtain a detailed description of the exercise's events in the order they occurred.

(5) Review the events. After the senior O/C has a sound understanding of what happened during the exercise, he reviews the events that are ranked in terms of their relevance to the training objectives and their contributions to the exercise outcome. He selects as many events as can be covered in detail during the time allowed for the AAR and places them in chronological order.

**d. Conducting the After Action Review.** Conducting the AAR requires five steps:

(1) Organize the participants. When the O/C and AAR leader assemble the participants, they group them according to their organization in the exercise. Each subordinate element's O/C is the element for which he is responsible.

(2) State the training objectives. The AAR leader makes a brief statement of the training objectives for the exercise. These are described as specifically as possible. He states any additional teaching points that he intends to cover during the AAR. These should be limited to three or four key points in order to keep the AAR focused and prevent it from becoming excessively long.

(3) Lead the discussion. The AAR leader guides the discussion of the events in their order of occurrence. Diagrams help players visualize the exercise development. The AAR leader starts by sketching the main terrain features. As the AAR proceeds, the participants draw routes of advance, objectives, and locations of engagements. Each event is discussed in detail to make teaching points about the unit's performance during the event. In an effective AAR, the AAR leader should-

- (a) Avoid giving a critique or lecture.
  - (b) Guide the discussion by asking leading questions.
  - (c) Suggest the players describe what occurred in their own terms.
  - (d) Suggest the players discuss not only what happened, but how it happened, and how it could be done better.
  - (e) Focus the discussion to ensure that important tactical lessons are made explicit.
  - (f) Relate events to subsequent results.
  - (g) Avoid detailed examination of events not directly related to major training objectives.
  - (h) Encourage the participants to use diagrams to illustrate teaching points and to show route, phase lines, and objectives.
  - (i) Prohibit players from offering self-serving excuses for inappropriate tactical actions.
- (4) Review the sequence of the events associated with the hazards of the risk assessment made prior to the exercise. Ask the following questions:
- (a) Were effective controls put in place to avoid accidents?
  - (b) Was training realism reduced through artificial control measures?
  - (c) Were all participants (down to the lowest level) aware of hazards?
  - (d) Did any hazard present itself that was not identified, and what was done to overcome it?
  - (e) Were there incidents of fratricide or near fratricide, and how can they be avoided in the future?
- (5) Summarize key points. The AAR leader briefly summarizes teaching points in terms of training objectives covered in the AAR. After the summary, he can have a private conversation with the unit commander regarding his strengths and weaknesses, and what he can do to improve his performance and that of his unit. A good AAR leader-
- (a) Maintains order and discipline.
  - (b) Reviews the training objectives.
  - (c) Addresses important events as they occurred and how the unit could have done them better. During the discussion, the leader avoids a detailed examination of events not directly related to the training objective.
  - (d) Traces the chain of events so all participants understand the results of mistakes. One mistake is often the partial cause of another.
  - (e) Clearly relates tactical events to teaching points.
  - (f) Involves participants in the discussion.
  - (g) Clearly and concisely gives summary and new training objectives.
  - (h) Reinforces points by using sketches, diagrams, or terrain models in the AAR.
- e. Reference Materials. Reference materials for conducting an AAR are TC 25-6, TC 25-20, and FM 25-101

## Appendix A

# COMBINED ARMS TRAINING STRATEGY

1. Unit Training Strategies. This appendix explains the strategy organization and how to use it. The unit-training portion of the Combined Arms Training Strategy (CATS) is a series of separately generated training strategies. CATS are designed to be descriptive, not prescriptive training strategies for commanders. These strategies describe the events, frequencies, and prerequisite gates recommended to train to standard. As part of the unit training strategy development process, TRADOC established a standard format to depict unit-training strategies. The unit training strategy is a descriptive strategy for training and sustaining soldier and collective task proficiency. The tasks to be trained are based on the unit's METL and commander's assessment. Unit CATS can be found on the Internet at <http://usaic.hua.army.mil/112web/aics/aics%20web/mission4.htm>

2. Using the Combined Arms Training Strategy Matrices. Generally, the leader using the matrices for planning will have a METL (or other list of critical tasks in which his unit must be proficient) and will be looking for guidance about appropriate training methods. The key to using CATS for unit training management is understanding the strategy and its various components. The strategy is organized by functional area and echelon to be trained. It has eight interactive components, expressed as columns in a matrix format. An example matrix for one mission/task is at table A-1.

- **Task:** This is the CATS task selection for the element to train in support of the battlefield mission listed above the table.
- **Supporting Tasks:** This is a list of those MTP collective T&EOs that the element must attain and sustain proficiency in to support the CATS task selection and mission.
- **Frequency:** This indicates the interval and number of times a year that this CATS task selection should be trained in order to attain and sustain T1 combat readiness.
- **Types of Events:** This suggests a training event or events (from classroom training to an exeval FTX) that the unit can use to train the task.
- **Training Audience:** This indicates the unit elements and/or individuals that this CATS task selection is designed for.
- **Means (Event) (TADSS):** This entry further describes this training event by selecting from the Types of Events that this CATS Task Selection is designed for.
- **Title:** This is the title of the training event, as it might be depicted in a unit training schedule, for the CATS task selection.
- **Estimated Duration:** This depicts the suggested duration of the training event in hours (in this case Sergeant's Time training).
- **Replication of Conditions (A-D):** This entry shows a means quality rating, related to the cost and realism of the event/medium. When choosing events and media, you will have to balance the resource costs of different training media against the needs for realism and repetition. Generally, as your unit becomes more proficient, realism should increase.
  - An "A" level means is identified as a CTC deployment and training activity.
  - A "B" level means is described as a well assigned home station training exercise.
  - A "C" level means is described as a partial task training exercise.
  - A "D" level means is described as a subtask training exercise.
- **Multi-echelon Training:** This is the simultaneous conduct of different exercises by the unit, or the training of different tasks by elements of the unit. Multi-echelon training occurs whenever collective training is conducted (FM 25-100). Units should structure events to allow the integration of required task training and proficiency (through gate tasks) by each element of the audience and, to permit vertical linkage of unit training strategies.

- **Critical Training Gates:** These gates facilitate efficient use of training time and other resources during scheduled events. They provide those tasks critical to effective and safe training.
- **Resources:** This identifies to the training and resource manager the Class III, VI, and VII resources expended as a cost of the training event.
- **Comments:** The purpose of this section of CATS is to provide descriptive guidance on the purpose of the task selection, the expected outcome of the training event, and execution guidance.
  - **Purpose Statement:** A description of the rationale for including the event in the overall training strategy for the task. It also provides the basis for describing the event's training objectives.
  - **Outcome Statement:** A description of the event in terms of proficiencies that the unit should achieve by training in the event. The outcome is described by the endstate proficiency in tasks trained.
  - **Execution Guidance:** A description of information and coordinating instructions related to training the task (task selection) in the event.

**Comments: (Includes purpose of event; outcome supported; execution guidance about execution of the event; constraints posed by TADSS/et al)**

**PURPOSE:** Train all team, section, or platoon personnel to a basic level of proficiency in common tactical movement and assembly area tasks.

**OUTCOME:** All team, section, or platoon personnel can perform common tactical movement and assembly area tasks.

**EXECUTION GUIDANCE:** Sergeant's Time is used by NCO leaders, as required, for initial training, refresher training, and/or sustainment training to gain and maintain proficiency in tactical movement and assembly area tasks the leader singles out for concentrated attention. Typically, Sergeant's Time training is conducted at the team, section, or platoon level, 4 hours weekly, on a variety of METL, common, and MOS specific tasks. The NCO identifies specific tasks to be trained, participating personnel, and frequency of training based on personnel turnover and a training assessment. Relevant Army doctrinal and training publications and the unit TSOP provide detailed information on the tasks, conditions, and standards used in organizing this training. Whenever possible, Sergeant's Time should be "hands on" performance-oriented exercises employing the systems, equipment, and communications necessary to accomplish the assigned tasks. NCOs should tailor conditions to the appropriate level of training, adding progressively more difficult conditions to increase the challenge as proficiency increases. The three stages of training (initial training, refresher training and sustainment training) can occur separately or in combination, with soldiers and units progressing to sustainment training as soon as standards are met.

# BATTLEFIELD OPERATING SYSTEMS

A commander uses the BOS to organize battle tasks. The seven BOS are the major functions, which occur on the battlefield. The BOS must be synchronized to ensure total combat power is coordinated and directed toward accomplishing the wartime mission. They can be used to identify operational deficiencies and to focus attention on training.

All BOS are not equal in all operations, nor do they apply for all tasks. BOS are listed in the following sequence as they would appear in a five-paragraph field order:

1. Intelligence. Knowledge of the enemy, weather, and geographical features required by a commander in planning and conducting combat operations. It is derived from an analysis of information on the enemy's capabilities, intentions, vulnerabilities, and the environment.

**a.** Collect information. To obtain information in any manner.

**b.** Process Information. To convert information into intelligence through collation, evaluation, analysis, integration, and interpretation.

**c.** Prepare Intelligence Reports. To develop and produce standard reports and Intelligence Preparation of the Battlefield products for the commander's use to report intelligence or information; to task intelligence assets; or to receive information, intelligence orders, or instructions.

2. Maneuver. The employment of forces on the battlefield through movement and direct fire in combination with fire support or fire potential, to achieve a position of advantage, in order to accomplish the mission. This includes direct fire systems (for example, small arms, tank guns, and attack helicopter fires).

**a.** Move. To position or reposition forces (units and equipment) relative to the enemy to secure or retain positional advantage making full use of terrain and formation. It is the dynamic element of combat—the means of concentrating forces at the critical point to achieve the surprise, psychological shock, physical momentum, and moral dominance, which enables smaller forces to defeat larger ones. Units supporting combat maneuver units are included since they are expected to go wherever the combat units go. NOTE: Movement of cargo, equipment, and personnel is covered under the Combat Service Support BOS.

**b.** Engage Enemy. To enter into conflict or combat on the ground with the enemy using direct fire or close combat. NOTE: Air targets are covered in the Air Defense BOS.

**c.** Control Terrain. To dominate an area to prevent enemy occupation of the position through fire, fire potential, or occupation of the terrain.

3. Fire Support. The collection and coordinated use of target acquisition data, indirect fire weapons, armed aircraft (less attack helicopters), and other lethal and nonlethal means against ground targets in support of maneuver force operations. It includes artillery, mortar, and other non line-of-sight fires, naval gunfire, Combat Aviation Squadron, and electronic countermeasures.

**a.** Process Ground Targets. To select targets and match the appropriate response to them, taking account of operational requirements and capabilities.

**b.** Engage Ground Targets. To enter into conflict with the enemy using fire support systems.

**c.** Integrate Fire Support.

4. Mobility, Countermobility, and Survivability. The capability of the force that permits freedom of movement, relative to the enemy, while retaining the ability to fulfill its primary mission. It also includes those measures the force takes to remain viable and functional by seeking protection from the effects of enemy weapon systems and natural occurrences.

**a.** Provide Mobility. To provide freedom of movement for personnel and equipment on the battlefield without delays due to terrain or obstacles.

**b.** Provide Countermobility. To delay, channel, or stop offensive movement by the enemy in order to destroy his forces directly or indirectly by enhancing the effectiveness of friendly indirect and direct weapon systems.

**c.** Enhance Survivability. To protect personnel, equipment, and supplies from enemy systems and natural occurrences while simultaneously deceiving the enemy.

5. Air Defense. All measures designed to nullify or reduce the effectiveness of attack by hostile aircraft or missiles after they are airborne.

**a.** Processing Air Targets. To select targets and match the appropriate response to them, taking into account operational requirements and capabilities.

**b.** Attack Enemy Air Targets. To intercept, engage, destroy, or neutralize enemy aircraft and missiles in flight.

**c.** Deny Airspace. To prevent enemy use of airspace through fire potential or other means without direct attack of air targets (e.g., deliberate smoke, barrage balloons).

**d.** Integrate Air Defense Fire.

6. Combat Service Support. The support and assistance provided to sustain forces, primarily in the field of logistics, personnel services, and health services.

**a.** Arm. To provide munitions to weapons systems. This encompasses all types of ammunition to include mines and demolition munitions.

**b.** Fuel. To provide fuel and petroleum products (petroleum, oils, and lubricants) to weapons systems and other equipment.

**c.** Fix. To preserve the availability of weapons systems and equipment. It includes the provision of repair parts and end items at the right place and time, and all actions taken before, during, and after the battle to keep equipment operational.

**d.** Man The Force. To provide all support to the individual soldier as well as provide healthy, fit soldiers to units.

**e.** Distribute. To provide the various classes of supply to military units by employing transportation and supply services.

**f.** Provide Sustainment Engineering. To repair and construct facilities and lines of communications.

**g.** Provide MP Support. To provide Enemy Prisoner of War collection, evacuation, internment; and to enforce military law and order.

7. Command and Control (C2). The exercise of authority and direction by a properly designated commander over an assigned force in the accomplishment of the mission. Leaders perform C2 functions through an arrangement of personnel, facilities, and procedures employed by a commander in planning, directing, coordinating, and controlling forces and operations in the accomplishment of the mission.

**a.** Acquire and Communicate Information and Maintain Status. To gain possession of information on the mission, enemy forces, friendly troops, terrain, and weather, by or for the commander or his staff, to translate that information into usable form and to retain and disseminate it.

**b.** Assess Situation. To continuously evaluate information received through reports or the personal observations of the leader or commander to decide whether different actions are required from those that would result from the most recent orders issued.

**c.** Determine Actions. To conduct the continuous process of making estimates and decisions for assigned or projected tasks. This function involves a detailed and systematic examination of all aspects of contemplated operations including deciding to alter planned or ongoing actions. This function also includes the formulation of the commander's concept and intent.

**d.** Direct and Lead Subordinate Forces. To provide direction to subordinate forces so they understand and contribute effectively and efficiently to the attainment of the commander's concept and intent. This function includes the preparation and completion of orders.

**e.** Employ Tactical Command, Control, and Communication Countermeasures (C3CM).
