PREFACE

This mission training plan (MTP) provides the Active (AC) and Reserve Component (RC) training manager with a descriptive, mission-oriented training program to train the unit to perform its critical wartime operations. While general defense plan missions and deployment assignments impact on the priorities, the operations described here are the principal ones that the Headquarters, Headquarters Company, Engineer Brigade (Theater Army) is expected to execute with a high level of proficiency. Each unit is expected to train, as a minimum, to the standards of the training and evaluation outlines (T&EOs) in the MTP. Standards for training may be more difficult but may not be lowered. This document is in alignment with and part of the United States (US) Army's training and tactical doctrine.

This MTP applies to the Headquarters, Headquarters Company, Engineer Brigade (Theater Army) table of organization and equipment (TOE) 05602L000.

The proponent of this publication is Headquarters (HQ), US Army Training and Doctrine Command (TRADOC). Send comments and recommendations on Department of Army (DA) Form 2028 directly to Commandant, US Army Maneuver Support Center, ATTN: ATZT-DT-WF-E, Directorate of Training Development, 320 MANSCEN Loop, Suite 220, Fort Leonard Wood, Missouri 65473-8929.

CHAPTER 1

Unit Training

1-1. General. This MTP provides the commander and leaders with guidance on how to train the key missions of the unit. The specific details of the unit's training program will depend on the--

- Unit's mission-essential tasks list (METL).
- Chain-of-command's training directives and guidance.
- Unit's training priorities.
- Availability of training resources and areas.

1-2. Supporting Material. This MTP describes a critical wartime mission-oriented training program. The unit's training program consists of the following publications:

- a. Army Training and Evaluation Program (ARTEP) 5-602-68-MTP for the Headquarters, Headquarters Company, Engineer Brigade (Theater Army).
- b. Soldier training publications (STPs) for the appropriate military occupational specialties (MOSs) and skill levels.

1-3. Contents. This MTP is organized into six chapters and three appendixes.

- a. Chapter 1, Unit Training, provides the explanation and organization of this MTP. This chapter explains how to use this MTP in establishing an effective training program.

- b. Chapter 2, Training Matrixes, shows the relationship between the mission and the collective tasks.

- c. Chapter 3, Mission Outlines/Training Plans, presents a sample graphic portrayal of the relationship between missions and their subordinate tasks.

- d. Chapter 4, Training Exercises, consists of a field training exercise (FTX). This exercise provides training information and a sample preconstructed scenario. It can serve as a part of an internal or external evaluation. This exercise may be modified to suit the training needs of the unit.

- e. Chapter 5, Training and Evaluation Outlines (T&EOs), provides the training and evaluation criteria for all the tasks that the unit must master to effectively perform its mission. Each task is a T&EO that identifies task steps, performance measures, individual and leader tasks, and opposing forces (OPFOR) counter tasks. Each T&EO is part of a mission and, in various combinations, composes the training exercise in Chapter 4.

- f. Chapter 6, External Evaluation, provides instructions for the planning, preparation, and execution of an external evaluation.

- g. Appendix A, Sample Operation Order (OPORD), contains a sample OPORD to be used with the exercise in Chapter 4.

- h. Appendix B, Threat Analysis, describes the local, regional, and global threats, as well as special situations that impact operations.

- i. Appendix C, Metric Conversion Chart, shows how to convert US and metric measurements.

1-4. Missions and Tasks.

a. This MTP concerns specific missions found in the TOE and an implied mission that the unit must perform in order to accomplish the specified missions. The critical missions are the focus for the unit. The commander may supplement these missions with his own. The following is a listing of the missions for the unit:

- Command and Control.
- Control operations.
- Plan engineer operations.
- Sustain engineer operations.
- Unit defense.
- Unit survivability.

b. Each of these tasks may be trained individually or jointly with other tasks. Training is based on the criteria described in the T&EOs. Several T&EOs can be trained as a situational training exercise (STX). Various combinations of STXs can be used to develop an FTX for the unit to practice its entire mission responsibility. Several STXs can be developed into an external evaluation that is designed by the next higher echelon to evaluate the unit's ability to perform multiple missions under stress in a realistic environment.

c. Squad tasks are trained in much the same way as described above. However, the squad leader must also train the drills provided in the drill book.

d. Leader tasks that support the unit's missions are trained through STP training, battle simulations, and execution of the unit's missions.

e. Individual tasks that support unit tasks are mastered by training to standards outlined in the appropriate STPs. The T&EOs in Chapter 5 show the individual tasks that support collective-task training.

1-5. Principles of Training. This MTP is based on the training principles explained in Field Manual (FM) 25-100.

1-6. Training Strategy. The training program developed and executed by the engineer battalion to train to standards in its critical wartime missions will be a component of the Army's Combined-Arms Training Strategy (CATS). The purpose of CATS is to provide direction and guidance on how the total Army will train and identify the resources required to support that training. The CATS will provide the tools that enable the Army to focus and manage training in an integrated manner. Central to the CATS is a series of proponent-generated unit and institutional strategies that describe the training events and resources required to facilitate training to standard. The CATS will be embedded in the Standard Army Training System (SATS) version 4.1 and higher. The Web site for this information is <http://www.atsc.army.mil/atmd/strac>.

a. The unit training strategies central to the CATS provide the commander with a descriptive "menu" for training reflecting that while there is an optimal way to train to standard, it is unlikely that all units in the Army will have the exact mix of resources required to execute an optimal training strategy.

b. The unit's training strategy is a descriptive training strategy that provides a means for training the battalion to standard by listing required training events, critical training gates, training event frequencies, and training resources. The commander selects from this MTP those tasks required to train his METL. The training strategies to be provided in the SATS 4.1 will provide the means whereby those tasks that can be trained through a focused and integrated training plan.

c. The unit's training strategy will be comprised of three separate training strategies. When integrated with the training tasks found in this MTP, they form a comprehensive and focused training strategy that allows the unit to train to standard. The elements of the unit's training strategy are--

(1) Maneuver- and collective-training strategy. The maneuver strategy is intended to provide a set of recommended training frequencies for key training events in a unit and depicts those resources that are required to support the training events.

(2) Gunnery strategy. The gunnery strategy is based on weapons systems found in the unit and is intended to provide an annual training plan and to depict resources required to support weapons training. Data for the gunnery strategy comes from the Standards in Training Commission (STRAC) manual or the appropriate FM publications.

(3) Soldier strategy. The soldier strategy provides an annual plan for training and maintaining skills at the individual level and lists the resources required to train a soldier.

d. A vital element in the unit's training strategy is the identification of critical training gates. Critical training gates are defined as training events that must be conducted to standard before moving on to a more difficult or resource-intensive training event or task. Training gates follow the crawl, walk, run training methodology. For instance, if the unit training strategy calls for conducting an FTX, and an STX has been identified as a critical training gate for the FTX, the training tasks in the STX must be trained to standard before conducting the FTX. Standards for all tasks must be clearly defined so that the trainer can assess the preparedness of the soldiers, or units, to move on to more complex training events. The provision for critical training gates is made recognizing that the unit's METL and the commander's assessment of his unit's training status will determine the selection and timing of the collective-training exercises in a specific unit's training strategy.

e. When developing the unit's training plan, the commander identifies from the MTP the training tasks required to train his METL.

1-7. Conducting Training. This MTP is designed to facilitate planning, preparing, and conducting unit training as explained in FMs 25-100 and 25-101. The commander--

a. Assigns the missions and supporting tasks for training based on his METL and guidance from the next higher HQ. Trainers must plan and execute training to support this guidance.

b. Reviews the mission outline in Chapter 3 to determine whether STXs and FTXs provided will support, or can be modified to support, command guidance. If they do not support the guidance, or if they need to be modified, refer to the matrixes in Chapter 2. These matrixes provide a list of all critical collective tasks, drills, and individual tasks that must be mastered to perform the mission.

c. Prioritizes the tasks that need training. There is never time to train everything. You must orient on the greatest challenges and the most difficult sustainment skills.

d. Integrates training tasks into the training schedule, using the following procedures:

(1) List the tasks in the priority and frequency that they need to be trained.

(2) Determine the amount of time required and how you can use multiechelon training for the best results.

(3) Determine where the training can take place.

(4) Determine who will be responsible for what. The leader of the element being trained must always be involved.

(5) Organize needs into blocks of time and training vehicles.

e. Approves the list of tasks to be trained and schedules them on the unit's training schedule.

f. Determines the equipment and supplies needed to conduct the training.

g. Keeps subordinate leaders informed and oversees their training. The standards must be rigidly enforced.

1-8. Force Protection.

a. **Safety.** Safety is a component of force protection. Commanders, leaders, and soldiers use risk assessment and risk management to tie force protection into the military around the mission. Risk management assigns responsibility, institutionalizes the commander's review of operational safety, and leads to decision-making at a level of command appropriate to the risk. The objective of safety is to help units protect combat power through accident prevention, which enables units to win fast and decisively, with minimum losses. Safety is an integral part of all combat operations. Safety begins with readiness that determines a unit's ability to perform its METL to standard. Readiness standards addressed during METL assessment are--

(1) Soldiers with the self-discipline to consistently perform tasks to standard.

(2) Leaders who are ready, willing, and able to enforce standards.

(3) Training that provides skills needed for performance to standard.

(4) Standards and procedures for task preferences that are clear and practical.

(5) Support for task preference, including equipment, personnel, maintenance, facilities, and services.

b. **Risk management.** Risk management is a tool that addresses the root causes (readiness shortcomings) of accidents. It assists commanders and leaders in not only identifying what the next accident is going to be, but also helps identify who will have the next accident. Risk management is a way to put more realism into training without paying the price in deaths, injuries, or damaged equipment.

c. **Chain of command.** Safety demands total chain-of-command involvement in planning, preparing, executing and evaluating training. Responsibilities of the chain of command include--

(1) Commanders.

(a) Seek optimum, not adequate, performance.

(b) Specify the risk you will accept to accomplish the mission.

(c) Select risk reductions provided by the staff.

(d) Accept or reject residual risk, based on the benefit to be derived.

(e) Train and motivate leaders at all levels to effectively use risk-management concepts.

- (2) Staff.
 - (a) Assist the commander in assessing risks and developing risk-reduction options for training.
 - (b) Integrate risk controls in plans, orders, METL standards, and performance measures.
 - (c) Eliminate unnecessary safety restrictions that diminish training effectiveness.
 - (d) Assess safety performance during training.
 - (e) Evaluate safety performance during after-action reviews (AARs).
 - (3) Subordinate leaders.
 - (a) Apply consistently effective risk-management concepts and methods to the operations they lead.
 - (b) Report risk issues beyond your control or authority to your superiors.
 - (4) Individual soldiers.
 - (a) Report unsafe conditions and acts; correct the situation when possible.
 - (b) Establish a buddy system to keep a safety watch on one another.
 - (c) Take responsibility for personal safety
 - (d) Work as a team member.
 - (e) Modify your own risk behavior.
- d. Steps. Risk management is a five-step cyclic process that is easily integrated into the decision-making process outlined in FM 101-5. The risk management process consists of the following five steps:
- (1) Identify hazards. Identify the most probable hazards for the mission.
 - (2) Assess hazards. Analyze each hazard to determine the probability of it causing an accident and the probable effect of the accident. Identify control options to eliminate or reduce the hazard. The Army standard risk assessment matrix in Figure 1-1 is a tool to be used for assessing hazards.
 - (3) Make risk decisions. Weigh the risk against the benefits of performing the operations. Accept no unnecessary risks, and make any remaining risk decisions at the proper level of command.
 - (4) Implement controls. Integrate specific controls into operation plans (OPLANs), OPORDs, standing operating procedures (SOPs), and rehearsals. Communicate controls to the individual soldier.
 - (5) Supervise. Determine the effectiveness of controls in reducing the probability and effect of identified hazards, to include follow-up and AAR. Develop lessons learned.

e. Fratricide. Fratricide prevention is a component of force protection and is closely related to safety. Fratricide is the employment of weapons, with the intent to kill the enemy or destroy his equipment, that results in unforeseen and unintentional death, injury, or damage to friendly personnel or equipment. Fratricide is by definition an accident. Risk assessment and risk management are mechanisms used to control the incidence of fratricide.

f. Causes of fratricide. The primary causes of fratricide are--

(1) Direct fire control plan failures. These failures result when units fail to develop defensive and, particularly, offensive fire control plans.

(2) Land navigation failures. These failures result when units stray out of sector, report incorrect locations, and become disoriented.

(3) Combat identification failures. These failures include gunners or pilots being unable to distinguish thermal and optical signatures near the maximum range of their sighting systems and units in proximity mistaking each other for the enemy under limited-visibility conditions.

(4) Inadequate control measures. These occur when units fail to disseminate the minimum maneuver and fire support control measures that are necessary to tie control measures to recognizable terrain or events.

(5) Reporting communication failures. Units at all levels face problems in generating timely, accurate, and complete reports as locations and tactical situations change.

(6) Weapons errors. Lapses in individual discipline lead to charge errors, accidental discharges, mistakes with explosives or hand grenades, and similar incidents.

(7) Battlefield hazards. Unexploded ordnance (UXO), unmarked or unrecorded minefields, scatterable mines (SCATMINES), and booby traps litter the battlefield. Failure to mark, record, remove, or anticipate these hazards increases the risk of friendly casualties.

g. Results. Fratricide results in unacceptable losses and increases the risk of mission failure. Fratricide undermines the unit's ability to survive and function. Units experiencing fratricide observe these consequences:

- (1) Loss of confidence in unit leadership.
- (2) Increase of self-doubt among leaders.
- (3) Hesitation to use supporting combat systems.
- (4) Oversupervision of units.
- (5) Hesitation to conduct night operations.
- (6) Loss of aggressiveness during fire and maneuver.
- (7) Loss of initiative.
- (8) Disrupted operations.
- (9) General degradation of cohesiveness, morale, and combat power.

1-9. Environmental Protection. Protection of natural resources has continued to become an ever-increasing concern to the Army. It is the responsibility of all unit leaders to decrease and, if possible, eliminate damage to the environment when conducting training. Environmental risk management parallels safety risk management and is based on the same philosophy. Environmental risk management consists of the following steps:

a. Identify hazards. Identify potential sources for environmental degradation during analysis of mission, enemy, terrain, troops, time available, and civilian considerations (METT-TC) factors. This requires identification of environmental hazards. An environmental hazard is a condition with the potential for polluting air, soil, or water and/or destroying cultural and historical artifacts.

b. Assess the hazard. Analyze the potential severity of environmental degradation using the environmental risk assessment matrix (Figure 1-2). Consider the severity of environmental degradation when determining the potential effect an operation will have on the environment. The risk impact value is defined as an indicator of the severity of environmental degradation. Quantify the risk to the environment

resulting from the operation as extremely high, high, medium, or low, using the environmental risk assessment matrix.

Figure 1-2. Environmental Risk-Assessment Matrix

c. Make environmental risk decisions. Make decisions and develop measures to reduce high environmental risks.

d. Brief the chain of command. Brief the chain of command (to include the installation environmental office, if applicable) on proposed plans and pertinent high-risk environmental matrixes. Risk decisions are made at a level of command that corresponds to the degree of risk.

e. Implement controls. Implement environmental protection measures by integrating them into plans, orders, SOPs, training-performance standards, and rehearsals.

f. Supervise. Supervise and enforce environmental-protection standards.

1-10. Evaluation. The T&EOs in Chapter 5 describe standards that must be met for each task.

a. Evaluations can be either internal or external. Internal evaluations are conducted at all levels, and they must be inherent in all training. External evaluations are usually more formal and are normally conducted by a HQ two levels above the evaluated unit. See Chapter 6 for more information on external evaluations.

b. A critical weakness in training is the failure to evaluate each task every time it is executed. The ARTEP concept is based on simultaneous training and evaluation. Too often, leaders do not practice continuous evaluation. Soldiers or small units are trained to perform a task to standard, and then later, when they execute that task as part of a training exercise, they execute it poorly or incorrectly and are not corrected. For this program to work, trainers and leaders must continually evaluate training as it is being executed.

c. Leaders should emphasize direct, on-the-spot evaluations. Correcting poor performance during individual or small-group training is easy to do. In higher-level exercises, it is usually not feasible to do this with outside evaluators, but should not be totally eliminated. Plan AARs at frequent logical intervals during the exercises (usually after the completion of a major subordinate task). This is a proven technique that will allow you to correct performance shortcomings while they are still fresh in everyone's mind. Also, it gets everyone involved and prevents the reinforcement of bad habits.

d. FM 25-101 provides detailed instructions for conducting an AAR. It also provides detailed guidance on coaching and critiquing during training.

1-11. Feedback. Recommendations for improvement of this ARTEP MTP are requested. Feedback will help to ensure that this MTP answers the training needs of units in the field. Please send DA Form 2028 comments to the address reflected in the preface, or use the questionnaire provided at the end of this MTP.

CHAPTER 2

Training Matrixes

2-1. General. The training Matrix assists the commander in planning the training of his unit's personnel.

2-2. Mission to Collective Tasks Matrix. This matrix (Figure 2-2), identifies the missions and their supporting collective tasks. The tasks are listed under the appropriate BOS which are indicated by an **X** in the matrix. The BOS used in this matrix are defined in TRADOC Pam 11-9. A specific mission is trained by identifying collective tasks in the vertical column for the mission. Based on the proficiency of the unit, training is focused on operational weaknesses.

The mission identification table listed below (Figure 2-1) provides mission identification for the unit.

CHAPTER 3

Mission Outlines/Training Plans

3-1. General. This chapter provides a mission outline and describes the use of the MTP for developing brigade training plans. It is designed to assist commanders in preparing training plans for wartime missions. FMs 25-100 and 25-101 provide detailed information on training management. They should be used with the MTP to develop battalion training plans.

3-2. Long-Range Planning. Long-range planning allows commanders to provide timely input to the Army's various training resource systems and to provide a general direction for the training programs. The long-range plan consists of a calendar covering the planning period and the commander's formal guidance. To develop a long-range plan, the commander must first develop the unit's METL and conduct a training assessment. These two actions are the two principal inputs at the beginning of the planning process. FM 25-100 and other FM 25-series manuals provide guidance on developing a unit's METL.

a. Develop the unit METL. An analysis of all specified and implied missions and other guidance is the first step in developing a METL. The next step is restating the unit's wartime mission. After analyzing the unit's missions and external directives, identify a list of tasks that must be accomplished if the unit is to accomplish its wartime mission successfully. Subordinate commanders and key noncommissioned officers (NCOs) participate in selecting the tasks. Develop a task list using the missions contained in Chapter 2 of this MTP, the missions assigned to the battalion by contingency plans, and the missions directed by higher HQ guidance. The commander reviews the task list and selects tasks that are essential to the unit's wartime mission. Selected tasks are forwarded to the next higher HQ for approval. The tasks selected are the unit's METL. Refer to Figure 3-1.

b. Establish the training objectives. After the METL is identified, the commander establishes the training objectives. The training objectives are the conditions and standards that describe the situation or the environment and the ultimate outcome criteria the unit must meet to perform the tasks successfully. Training objectives and standards for the METL can be obtained from this MTP, the STP, higher HQ command guidance, and the local SOP.

c. Conduct the training assessment. The training assessment is the commander’s continuous comparison of the unit’s current proficiency with the proficiency required to fight and win on the battlefield. The commander, his staff, and the subordinate commanders assess the organization’s current proficiency on mission-essential tasks against the required standard. The commander then indicates the current proficiency by rating each task as “T” (trained), “P” (needs practice), “U” (untrained), or “?” (unknown). The outcome of the training assessment identifies the unit’s training requirements. Refer to Figure 3-2.

	Training Strategy

Conduct Logistic Operations	T	P	T	T	U	T	T
Report Casualties	U	?	P	P	T	T	U

Figure 3-2. Sample Commander’s Training Assessment

d. Develop the training strategy and the commander’s guidance. The training strategy is developed from the outcome of the training assessment. With the training strategy, the commander and his staff establish training priorities by determining the minimum frequency each mission-essential task will be trained during the upcoming planning period. It includes the commander’s guidance and his training vision. To develop unit goals, the commander must--

- (1) Review the higher commander’s goals.
- (2) Spell out in real-world terms what his unit will do to comply with the goals of the higher commanders.
- (3) List in broad terms his own goals for the unit. For example,--
 - Attain and sustain proficiency in all the MTP missions.
 - Maintain a 90 percent operational-readiness (OR) rate.
 - Attain and sustain a 100 percent crew gunnery qualification.

e. Establish training priorities. Priorities are established for training METL tasks by basing the priorities on the training status, task criticality, and the relative training emphasis the task should receive. Figure 3-3 provides a sample training-priority list.

Task	Source	Training Priority
Control Combined-Arms Breaching	MTP	4
Control Combat Operations	MTP	2
Disseminate Intelligence Information	MTP	3
Prepare an Engineer Estimate	MTP	5
Command and Control	MTP	1

Figure 3-3. Sample Battalion Training Priority List

f. Prepare a long-range planning calendar. The long-range planning calendar is the coordinating tool for long-range planning. It is structured by long-range training events to identify the time periods available for training mission-essential tasks. The long-range planning calendar projects the units training events and activities for the upcoming 12 to 18 months. To prepare a long-range calendar, follow the steps outlined below:

- (1) Select the training events and activities to train the mission. At battalion-level, the commander must project the events that will enable him to achieve his goals.
- (2) Assign a time for subordinate units to train. Subordinate leaders must be allowed to develop their training programs in support of the battalion training program.
- (3) Examine various alternatives to make optimum use of the support available to train the unit. Available training resources must be compared against higher HQ-directed training, battalion-directed training events, and subordinate-level projected training events. Resourcing tools available to the battalion commander are the battalion-level training model (BLTM), operating tempo (OPTEMPO), and STRAC.
- (4) Obtain approval of long-range plans from higher HQ.
- (5) Issue guidance. Training guidance is issued to the staff and subordinate units with the long-range training calendar. This training guidance supplements the long-range training calendar and generally includes the--
 - (a) Training policies.
 - (b) Types of mandatory training.
 - (c) Training resource guidance.
 - (d) Quotas for centralized training (schools).
 - (e) Training goals.

3-3. Short-Range Planning. A short-range plan is prepared to address the immediate future (3 months). Short-range planning develops specific training objectives based on the goals and guidance prepared during long-range planning. The short-range plan adds more detail and may modify the long-range plan based on current assessments. Prepare the short-range plan as described below:

a. Review the training program, the current unit proficiency, resources, and the training environment.

(1) Review the training program described in the long-range planning process. This review determines if the assessments made during long-range planning are still valid.

(2) Review previous short-range planning calendars for training accomplished, training preempted, and lessons learned.

(3) Review the current unit proficiency to update priorities.

(4) Review resources to determine if it is still possible to execute the program described on the long-range planning calendar.

(5) Review the training environment again in this phase of planning because it takes on added importance as training events and activities approach. Factors that affect the training environment and collectively impact the training programs are--

- (a) Personnel assigned.
- (b) Personnel turbulence.
- (c) Morale.
- (d) Education programs.
- (e) Mandatory training.
- (f) Visits, inspections, and tests.
- (g) Supplies and equipment.
- (h) Nonmission-related activities.
- (i) Other programs.

b. Develop a detailed plan of action for short-range plans. Prepare the detailed plan of action as described below:

(1) Examine the events that are scheduled on the long-range training plan to determine if they are still valid.

(2) Transfer valid events to a short-range planning calendar.

(3) Determine the desired outcomes for the scheduled events.

(4) Analyze the missions to determine the related individual, leader, and collective tasks.

(5) Determine if there are any weaknesses. Select tasks to correct these weaknesses and to sustain selected individual, leader, and unit strengths (as necessary).

(6) Select the specific training objective for the mission and the tasks to be trained. The T&EOs in Chapter 5 provide the commander with the training objectives.

(7) Prepare a short-range planning calendar or 3 monthly schedules. The short-range-training planning calendar provides a detailed plan of action for the specified period.

(8) Review short-range plans with higher HQ.

(9) Issue guidance. This guidance specifically addresses how training will be accomplished.

3-4. Near-Term Planning. The final phase of planning is the execution of training. Use the short-range plan to prepare weekly training schedules.

a. Review the unit's training program, proficiency, resources, and training environment. As in long- and short-range planning, this review determines if previous assessments are still valid.

b. Finalize the plans based on the review of the training program. Determine the best sequence for training tasks, and complete the final coordination of the training events and activities.

c. Prepare trainers, observers/controllers (Os/Cs), OPFOR, and support personnel to know what is being trained, why it is being trained, and what their role in the training will be.

3-5. Training the Headquarters and Headquarters Company (HHC). Planning training for the HHC provides the commander with unique challenges. The most severe challenges are those that deal with time and availability of personnel. The staff and HQ sections are involved in day-to-day operations and the support of subordinate unit training. It is difficult to find the time to address the training needs of these elements adequately. These elements must be capable of fulfilling their roles in order for the battalion to perform its wartime missions. The strategy selected by the commander for training these elements must include an effective method of training individuals, staffs, leaders, and units.

a. Training the battalion (staff training).

(1) Training the staff presents the greatest challenge within a constrained training environment. This MTP identifies the staff's training objectives. The staff has numerous tasks to master to be effective. Examples of tasks that any staff must be able to perform include--

- (a) Analyzing the terrain.
- (b) Functioning as an effective team.
- (c) Exchanging information.
- (d) Preparing estimates.
- (e) Giving appraisals.
- (f) Making recommendations and decisions.
- (g) Preparing plans.
- (h) Issuing orders.
- (i) Coordinating and controlling unit operations.
- (j) Supervising subordinate units.

(2) The strategy used to train the staff will vary based on the considerations used to plan training (such as the level of proficiency and the training support available). FM 25-101 contains detailed information for conducting the exercises. Some methods of staff training include the following exercises:

(a) Tactical exercise without troops (TEWT). TEWTs are low-cost, low-overhead exercises conducted in the field on actual terrain suitable for training units for specific missions. TEWTs are used by commanders to train subordinate leaders and staffs to analyze terrain and to conduct unit missions.

(b) Map exercise (MAPEX). MAPEXs are low-cost, low-overhead training exercises that allow commanders to train their staffs to perform essential integrating and control functions to support their decision under wartime conditions. MAPEXs may be used to train the staff to exchange information, prepare estimates, give appraisals, make recommendations and decisions, prepare plans, and issue orders.

(c) Command-post exercise (CPX). CPXs are medium-cost, medium-overhead training exercises that may be conducted in garrison or a field location. CPXs normally use a battle simulation to drive the staff actions.

(d) FTX. FTXs are high-cost, high-overhead exercises conducted in the field under simulated combat conditions. Unit-conducted FTXs drill the staff in coordination, control, and supervision of unit operations. Normally, the staff completes the staff planning tasks before the exercise begins. Brigade-conducted FTXs provide the best opportunity for the staff to combine all of its skills and perform as they would in wartime, responding to both higher and lower levels.

(3) At battalion level, a method to optimize staff and unit training is to integrate TEWTs; MAPEXs; CPXs; command field exercises (CFXs); and combined-arms, live-fire exercises (CALFEXs) to prepare the orders and plans for upcoming battalion FTXs. This exercises the entire spectrum of the staff effectively and makes optimum use of unit field training time. Each unit is different and only the commander can determine the best method of training his staff.

b. Training the battalion. Training the battalion is a complex task requiring both unit and staff training programs. Normal day-to-day operations place a unique burden on the battalion commander to accomplish training. Elements cross staff lines and responsibilities. The battalion executive officer (XO) coordinates with the battalion commander to ensure that the soldiers are mastering the individual tasks.

3-6. Developing Training Exercises. Chapter 4 provides a sample exercise for the battalion to use or modify to meet specific training needs. Since only a sample FTX is contained in the MTP, it is necessary for the battalion to develop exercises for its own use. This section provides general procedures for the battalion staff to use for FTX preparation and for the battalion supporting STXs. Exercise plans are normally prepared during preparation of the short-range plan. Prepare the exercises as described below:

a. Mission and task selection for training. This was accomplished during the development of the long-range plan and refined during the development of the short-range plan.

b. Site selection. Confirm the selection of a training area.

c. Scenario development. After the missions and the tasks are selected, prepare a detailed scenario for the exercise.

(1) List the mission, tasks, and events in the preferred sequence of occurrence.

(2) Identify events necessary for the control of the exercises. These events would normally include the issuance of orders, AARs, and any other administrative or logistical action necessary to conduct the exercise.

(3) Prepare the exercise overlays that show the sequence of actions and the terrain to be used for each event.

(4) Determine the established time for each event using the overlay and scenario. The total time is determined to ensure that the scenario can be completed in the time allocated for the exercise.

d. Os/Cs and OPFOR selection. Os/Cs and OPFOR are normally required for every FTX and STX when the Multiple Integrated Laser-Engagement System (MILES) is used. It is difficult for a battalion to provide Os/Cs and OPFOR from its own resources. When Os/Cs and OPFOR must be provided from within the battalion, unit leaders may have to serve as the Os/Cs for their units and the OPFOR may be selected from personnel or units not essential for attaining the exercise objectives. Ideally, the higher HQ should provide Os/Cs and OPFOR.

e. Control-plan preparation. Develop control plans to coordinate the actions of the training units, OPFOR, and Os/Cs. The scenario is used and a detailed control plan is prepared. The control plan consists of--

- (1) Detailed schedules of OPFOR actions.
- (2) Detailed instructions for the OPFOR.
- (3) Detailed schedules of activities for units.

(4) OPFORs and fragmentary orders (FRAGOs) for friendly units. Normally, friendly-unit actions are controlled through the issuance of OPORDs and FRAGOs.

f. Evaluation-plan preparation. All training is evaluated, either internally or externally. The evaluation plan identifies the tasks to be evaluated, the evaluator, and the evaluation time. The evaluation will consist of--

- (1) Specific instructions for the Os/Cs.
- (2) A sequential list of T&EOs to be evaluated by each O/C.
- (3) Detailed time schedules for the evaluation and the AARs.

3-7. Mission Outline. The mission outline is designed to provide a graphic portrayal of the relationship of the critical wartime mission to FTXs and STXs. This outline should assist the commander and his staff in the preparation of the training plans. Figure 3-4 is a sample mission outline for the battalion.

CHAPTER 4

Training Exercise

4-1. General. Training exercises are used to train and practice the performance of collective tasks. This MTP contains a sample FTX. It is designed to assist in developing, sustaining, and evaluating the unit's mission proficiency. Table 4-1 lists the FTX by exercise number, title, and page number.

Table 4-1. FTX Exercises

Exercise Number	Exercise Title	Page
FTX 5-1-E0001	Conduct Mobility Operations	4-1

4-2. Field Training Exercise. The FTX is designed to provide a training method for the unit to train its critical wartime missions. It provides a logical sequence for the performance of the tasks previously trained in the STXs.

4-3. Situational Training Exercise. STXs are short, scenario-driven, mission-oriented tactical exercises used to train a group of closely related collective tasks. The STX provides the information for training the missions that make up the critical wartime mission. The STX--

- a. Provides repetitive training on the mission.
- b. Allows training to focus on identified weaknesses.
- c. Allows the unit to practice the mission STX before conducting a higher-echelon FTX.
- d. Saves time by providing most of the information needed to develop a vehicle for training.

ENGINEER BATTALION FTX 5-1-E0001 CONDUCT MOBILITY OPERATIONS

1. Objective. This sample exercise trains collective, leader, and individual tasks in the battalion operation, Conduct Mobility Operations.

2. Interface. This exercise supports the task force's (TF) requirement to conduct combat operations.

3. Training Enhancers.

a. The training matrix in Chapter 2 shows the collective tasks that must be mastered to perform the battalion mission. Training that will improve its ability to perform its mission are--

(1) Planning, controlling, and coordinating mobility operations. Training may be conducted in garrison and local training areas by one of the following methods:

- (a) Classroom instruction.
- (b) A MAPEX combined with a sand-table exercise.
- (c) A CPX conducted in garrison.
- (d) A CFX conducted in a field environment.

- (e) A TEWT.
- (f) A communications exercise (COMEX).
- (g) Simulations and games.

(2) Establishing an aggressive spirit. An aggressive spirit can be established in a unit and its leaders by engaging in the following activities:

- (a) Aggressive unit sports and physical fitness programs.
- (b) Leader and individual confidence courses.
- (c) Appropriate training films that have a positive, aggressive effect on the soldiers.
- (d) Awareness of the unit's heritage.

b. This exercise begins with the receipt of a warning order (WO) and ends with the compilations of the area-damage-control (ADC) activities. Figure 4-1 illustrates the general scenario of the exercise. Table 4-2 is a suggested scenario and Figure 4-2 is the movement order for the scenario.

Movement Order

1. SITUATION. Contact with the enemy has been broken. The enemy has withdrawn to vicinity NK403087. He is being reinforced and is preparing to counterattack. The division is moving to occupy an AA in preparation of combat operations.
2. MISSION. The 25th Brigade moves by tactical road march via route Monroe, commencing 011600 hours to AA vicinity NK 243567. The order of march is TF A, TF B, and TF C. The interval between serials is 30 minutes. Close on AA no later than 01900 hours.
3. EXECUTION.
 - a. Concept of Movement. TF A will be the lead element with assistance of the military police (MP) for traffic control. TF B will follow 30 minutes after TF A. Brigade HQ will follow 30 minutes after TF B. TF C will follow 30 minutes after brigade HQ.
 - b. Tasks to Subordinate Units. The MPs will provide traffic control for the brigade movement.
 - c. Detailed Timings. None
 - d. Coordinating Instructions.
 - (1) Start point (SP) NK243567 at 011600 hours.
 - (2) Route Monroe listing command post (CP).
 - (3) Quartering party is the 25th Battalion.
 - (4) Vehicle markings are according to the unit's SOP.
 - (5) Additional information, as required.
4. SERVICE SUPPORT. Per the unit's SOP.
5. COMMAND AND SIGNAL.
 - a. Command.
 - b. Signal.
 - (1) Current signal operation instructions (SOI) are in effect.
 - (2) Visual signals according to the unit's SOP.

Figure 4-2. Sample Movement Order

4. General Situation.

- a. Contact with the enemy has been broken. The enemy has withdrawn deep to the rear, is being reinforced, and is preparing to counterattack within 24 hours. The enemy is expected to use nonpersistent nerve agents. Enemy air is expected to be active in the area. The latest intelligence summary (INTSUM) indicates that the enemy may have a company-size strong point in the brigade

sector. Enemy units occupying the combat outpost are half strength. Counterattacking forces are expected to be full strength.

b. This exercise is conducted under all environments during both day and night operations. The battalion is operating in an arid environment. The battalion will operate under threat of nuclear, biological, and chemical (NBC) attacks, ground or air attacks, indirect fire, and electronic warfare (EW).

c. This exercise is conducted under Threat Level I, II, and/or III attacks.

d. The battalion should be prepared to relocate at least every three to four days.

e. The unit should be prepared to move by echelons while continuing to provide support to the assigned area.

5. Special Situation.

a. The lead TF encounters an unexpected obstacle that prevents bypass. Enemy contact has been made. The brigade commander gives the following FRAGO:

60"TF conduct in-stride breaching operations and continue the attack."

b. After completing the breaches, the TFs receive fire from an enemy position and encounter complex obstacles that prevent bypass. The attack is stalled. The unit is ordered to move in.

6. Support Requirements.

a. Minimum trainers and Os/Cs. The battalion commander or the Operations and Training Officer (US Army) (S3) who will be the trainer and the primary evaluator can conduct this task. At least one other O/C is required for each engineer platoon and OPFOR platoon involved in this FTX.

b. Opposing forces.

(1) OPFOR is required for the exercise to simulate Threat Level II and III activities.

(2) OPFOR should have specific missions and be controlled whenever used.

(3) The MILES can be used, or the trainer and O/C can assess the damage to equipment and personnel casualties.

c. Vehicles and communications. Vehicles and communications equipment organic to the unit are used. Each trainer and O/C needs a vehicle and a radio. Radios are also required for OPFOR vehicles during mounted operations.

d. Maneuver area. Depending on the local training area, an area with a minimum dimension of 15 by 6 kilometers for the hasty attack is desirable. The terrain should offer multiple covered and concealed approaches to the objective area. Using terrain that limits the leader to geographical or "school" solution does not allow an evaluation of the unit's ability to conduct a terrain analysis and to select an appropriate course of action.

e. Consolidated supported requirements. Battalion support requirements can be calculated by adding the sum total of the requirements for each participating subordinate element. See Table 4-3.

Table 4-3. Consolidated Support Requirements for FTX 5-1-E0001

CHAPTER 5

Training and Evaluation Outlines

5-1. General. This chapter contains the T&EOs for the unit. T&EOs are the foundation of the MTP and the collective training of the unit. T&EOs are training objectives (task, conditions, and standards) for the collective tasks that support critical wartime operations. The unit must master designated collective tasks to perform its critical wartime operations. T&EOs may be trained separately, in an STX, in an FTX, or in live-fire exercises. For collective live-fire standards, the trainer needs to refer to the applicable gunnery manual for the appropriate course of fire. Those standards and courses of fire need to be integrated into the training exercise.

5-2. Structure. The T&EOs in this chapter are listed in Table 5-1. The mission-to-collective task matrix in Chapter 2 lists the T&EOs required to train the critical wartime missions according to their specific BOS.

5-3. Format. The T&EOs are prepared for every collective task that supports critical wartime operation accomplishment. Each T&EO contains the following items:

- a. Element. This identifies the unit or unit element(s) that perform the task.
- b. Task. This describes the action to be performed by the unit, and provides the task number.
- c. References. These are in parenthesis following the task number. The reference that contains the most information (primary reference) about the task is listed first and underlined. If there is only one reference, it is not underlined.
- d. Iteration. This is used to identify how many times the task is performed and evaluated during training. The "M" identifies when the task is performed in mission-oriented protection posture (MOPP) 4.
- e. Commander or Leader Assessment. The unit's leadership uses this to assess the proficiency of the unit in performing the task to standard. Assessments are subjective in nature. Therefore, use all available evaluation data and subunit-leader input to develop an assessment of the organization's overall capability to accomplish the task. Use the ratings listed below.
 - (1) T - Trained. The unit is trained and has demonstrated its proficiency in accomplishing the task to wartime standards.
 - (2) P - Needs practice. The unit needs to practice the task. Performance has demonstrated that the unit does not achieve the task to standard without some difficulty or has failed to perform some task steps to standard.
 - (3) U - Untrained. The unit cannot demonstrate an ability to achieve wartime proficiency.
- f. Task Conditions. This describes the situation or environment in which the unit is to do the collective task.
- g. Task Standards.
 - (1) The task standard states the performance criteria that a unit must achieve to successfully execute the task. This overall standard should be the focus of training and should be understood by every soldier.
 - (2) The trainer or evaluator determines the unit's training status using performance observation measurements (where applicable) and his judgment. The unit must be evaluated in the context of the METT-TC conditions. The conditions should be as similar as possible for all evaluated elements. This will establish a common base line for unit performance.

h. Task Steps and Performance Measures. This is a list of actions that are required to complete the task. These actions are stated in terms of observable performance for evaluating training proficiency. The task steps are arranged sequentially along with supporting individual task and their references. An asterisk (*) to the left of the step number indicates the leader tasks within each T&EO. Under each task step are listed the performance measures that must be accomplished to correctly perform the task step. If the unit fails to correctly perform one of these task steps to standard, it has failed to achieve the overall task standard.

i. GO/NO-GO Column. This column is provided for annotating the platoon’s performance of the task steps. Evaluate each performance measure for a task step and place an X in the appropriate column. A major portion of the performance measures must be marked a GO for the task step to be successfully performed.

j. Task Performance/Evaluation Summary Block. This block provides the trainer with a means of recording the total number of task steps and performance measures evaluated and those evaluated as GO. It also provides the evaluator with a means to rate the unit’s demonstrated performance as a GO or NO-GO. It also provides the leader with a historical record for five training iterations.

k. Supporting Individual Tasks. This is a listing of all supporting individual tasks required to correctly perform the task. The reference number, tasks number, and task title for each individual task are listed.

l. OPFOR Tasks. These standards specify overall OPFOR performance for each collective task. The standards ensure that the OPFOR soldiers accomplish meaningful training and force the training unit to perform its task to standard or “lose” to the OPFOR. The OPFOR standards specify what must be accomplished--not how it must be accomplished. The OPFOR must always attain its task standards, using tactics consistent with the type of enemy they are portraying.

5-4. Usage. The T&EOs can be used to train or evaluate a single task. Several T&EOs can be used to train or evaluate a group of tasks such as an STX or FTX.

TASK: Conduct Operational Decontamination (03-3-C224.05-T01A)
 (FM 3-5) (FM 3-100) (FM 3-11)

ITERATION: 1M 2M 3M 4M 5M (Circle)

COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The unit is operating in a contaminated environment and/or is contaminated. Performance degradation from mission-oriented protection posture (MOPP) 4 is increasing, and protective gear is in danger of penetration by contamination. Time and the tactical situation permit the unit to conduct operational decontamination. Replacement protective gear is available for each soldier. For a nonsupported decontamination, unit decontamination equipment and supplies are available and operational. For a supported decontamination, a decontamination unit is available, operational, and tasked to provide decontamination support. This task is always performed in MOPP4.

TASK STANDARDS: The unit decontaminates its individual gear and conducts MOPP gear exchange (using the buddy system) without sustaining additional casualties from nuclear, biological, and chemical (NBC) contamination. The unit limits the contamination transfer hazard by removing gross chemical contamination on equipment and minimizes contamination on soldiers according to Field Manual (FM) 3-5. The unit reduces radiological contamination to negligible risk levels according to FM 3-5 and reduces chemical and biological contamination to accelerate the weathering process and eventually provide temporary relief from MOPP 4. The time required to perform this task is increased when conducting it in MOPP 4.

TASK: Perform Risk Management Procedures (71-2-0326.05-T01A)
 (AR 385-10) (FM 25-100) (FM 3-0)

ITERATION: 1 2 3 4 5 M (Circle)

COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The element is deployed performing its combat mission. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: Leaders and soldiers are aware of potential safety problems when conducting the task. The element trains to standard and does not take shortcuts that endanger element members. All risks taken are necessary to accomplish the training objectives. Appropriate measures are taken to minimize risks. The time required to perform this task is increased when conducting it in mission-oriented protection posture (MOPP) 4.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> * 1. The commander identifies the risk or safety hazards. <ul style="list-style-type: none"> a. Analyzed the operation plan (OPLAN), the fragmentary order (FRAGO), and the operation order (OPORD) for specified and implied missions (tasks). b. Integrated safety into every phase of the planning process. c. Assessed the risks before issuing a FRAGO when the mission or conditions changed. * 2. Leaders evaluate the risk or safety hazards identified in the operation. <ul style="list-style-type: none"> a. Compared the risk to the acceptable level of risk in the commander's intent, based on the stated training objective. b. Determined the likelihood of equipment and personnel losses from accidents. c. Described the operation in terms of high, medium, or low risk. d. Prepared courses of action (COAs) that minimized accidental losses. * 3. The commander (or leaders) eliminates or reduces the risk or safety hazards. <ul style="list-style-type: none"> a. Chose a COA that maximized the operation and minimized the risk. b. Developed procedures that reduced the risk or safety hazards. c. Prescribed the safety or protective equipment. d. Briefed the elements before all operations. 4. The element carries out the safety procedures. <ul style="list-style-type: none"> a. Received safety briefings before all operations. 		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
b. Practiced the safety procedures during all mission rehearsals. c. Made on-the-spot safety corrections. NOTES: 1. Safety is a part of realism--and realism includes building safety into the training so that safe practices, which eliminate accidents, become second nature during war (refer to Field Manual [FM] 25-100). 2. FM 3-0 emphasizes the need for boldness and that commanders must take "risks and tenaciously press soldiers and systems" as an imperative of the Air Land Battle. However, such an imperative is founded on the premise that protecting the force to the maximum extent possible ensures winning the battle. Formally, risk is an expression of possible loss over a specific period of time or number of operational cycles as defined by the Center for Army Safety.

CHAPTER 6

External Evaluation

6-1. General. An external evaluation assesses the unit's ability to perform its mission. Using units may modify this evaluation based on the METT-TC and other considerations as deemed appropriate by the commander. Selected T&EOs from Chapter 5 that involve the total unit and employ a realistic OPFOR and the use of the MILES are used for the evaluation. At the completion of the evaluation, the commander can identify the strengths and weaknesses of his unit. These strengths and weakness are the basis for future training and resource allocations.

6-2. Preparing the Evaluation. The commander must standardize evaluation procedures to accurately measure the unit's capabilities. Table 6-1 is a sample evaluation scenario that contains the mission as well as the appropriate tasks necessary to develop the scenario and execute the evaluation. Figure 6-1 is a graphic representation of the scenario. Selective tailoring is required because it is not possible to evaluate every task. The following procedures are suggested for developing the evaluation:

c. Select the tasks for the evaluation of every mission. List the selected tasks on the task summary sheet, which is used for recording the results of the evaluation.

d. Compile the selected missions and tasks in the order that they logically occur in the detailed scenario (Table 6-1). Group the selected missions and tasks into parts for continuous operations. The parts can be interrupted at logical points to assess the MILES casualties and to conduct in-process AARs.

6-3. Resource Requirements and Planning Considerations. Adequate training ammunition, equipment, and supplies must be forecasted and requisitioned. Table 6-2 is a consolidated list of the support requirements for this evaluation. It is based on experience with the scenario in Table 6-1. The evaluating HQ must prepare its own consolidated support requirements.

6-4. Selecting and Training Observers/Controllers. A successful evaluation depends heavily on selecting Os/Cs with the proper experience, training them to fulfill their responsibilities, and supervising them throughout the conduct of the evaluation.

a. A six-person O/C team comprised of the following personnel is suggested for performing an external evaluation:

- (1) Senior O/C.
- (2) Staff O/C.
- (3) Operations O/C.
- (4) Administration O/C.
- (5) Logistics O/C.
- (6) NBC O/C.

b. A thorough knowledge of the unit's mission, organization, equipment, and doctrine is required by the Os/Cs. They must understand the overall operation of the unit and how it is integrated into and supports force-projection operations. Team members must have a working knowledge of the common individual and collective tasks in areas such as local-defense convoy procedures, communications, and NBC. One member of the team must have detailed expertise in the NBC and local-defense, common-task areas. The Os/Cs should be equal in grade to the person in charge of the element they are evaluating, and they should have previous experience in the position being evaluated. All team members must be able to make objective evaluations, function effectively as a team member, and state their findings in writing and briefings.

c. O/C training focuses on providing Os/Cs with a general understanding of the overall evaluation, providing each O/C with a detailed understanding of the specific duties and responsibilities, and building a spirit of teamwork. O/C training includes--

- (1) The overall evaluation design, general scenario, master-events list, and the specific evaluation purposes and objectives.
- (2) The unit's METL and its linkage to the T&EOs and other materials contained in this ARTEP MTP.
- (3) The O/C team composition and general duties and responsibilities of each team member.
- (4) The detailed responsibilities of individual team members, with special emphasis on the master-events list items that are their responsibility. This includes--
 - (a) A review of written instructions and materials contained in the Os/Cs folders.
 - (b) A detailed reconnaissance of the area used for the evaluation.
 - (c) The O/C communications, and command and control (C²) systems.
 - (d) Safety procedures.
 - (e) Evaluation data-collection OPLAN and procedures.
 - (f) AAR procedures and techniques.

(5) A talk-through of the entire evaluation, which includes war-gaming all items on the master-events list in order of their occurrence, and a review of each team member's responsibilities and anticipated problems.

d. The senior O/C supervises the operation of the team. He provides the team leadership, focuses his efforts on ensuring that the Os/Cs fulfill their responsibilities and adhere to the evaluation plan, resolves problems, synchronizes the efforts of the team members, ensures close coordination among team members, holds periodic team-coordination meetings, plans and orchestrates the unit's AAR, and conducts specific evaluation-team AARs.

6-5. Selecting and Training Opposing Forces. The OPFOR support for an external evaluation of the unit is limited to two squads of dismounted infantry and two to five individuals who serve as enemy agents. Although OPFOR support is only used for some tasks, proper training and employment of this force is important to ensure a proper assessment of the unit's capabilities.

a. The OPFOR commander should be a company grade officer or a senior NCO who is well trained in OPFOR tactics and operations. In addition to the duties and responsibilities in leading various OPFOR elements, the OPFOR commander serves as a part-time member of the O/C team. In order to fulfill O/C responsibilities, the OPFOR commander must participate in O/C planning and training activities. He must be present during AARs.

b. OPFOR elements are trained, organized, and equipped to operate in a manner that depicts threat forces as realistically as possible. Their training includes--

- (1) Threat tactics and rules for engagement.
- (2) OPFOR missions and responsibilities.
- (3) OPFOR tasks and standards.
- (4) Threat weapons and equipment, if available.
- (5) C².
- (6) Safety.

6-6. Conducting the Evaluation. The senior O/C has overall responsibility for conducting the evaluation. He orchestrates the overall evaluation and the support provided by various individuals and elements that are specially selected and trained to fulfill designated functions and responsibilities.

a. Os/Cs must be free to observe, report, and record the actions of the unit.

b. The HQ two echelons above the unit being evaluated should select and train the control element for the evaluation. It issues orders, receives reports, provides feeder information, and controls the OPFOR.

c. All exercise participants and supporting personnel must ensure that every facet of the evaluation is conducted in a safe manner. Personnel observing unsafe conditions must take prompt action to halt them and must advise their superiors of the situation.

6-7. Recording External Evaluation Information.

a. The senior O/C is responsible for implementing the evaluation scoring system. Although the final evaluation is made up by the senior O/C, the full team participates in this process. Their reports reflect the overall ability of the combat engineer unit to accomplish its wartime missions.

b. The evaluation scoring system is based on an evaluation of the unit's performance of each mission-essential task and any other collective task contained in the overall evaluation plan. Use the following four steps for the evaluation:

- (1) Identify the ARTEP MTP T&EOs that correspond to each of the evaluation plan tasks.
- (2) Use T&EO standards to evaluate the unit's performances of the tasks. This is done for each evaluation plan task.
- (3) Record on the T&EO a GO for each performance measure performed to standard and a NO-GO for each performance measure not performed to standard.
- (4) Record the unit's overall capability to perform the task by using GO/NO-GO information recorded on each T&EO. Use the following definitions as guidance in making this determination:
 - (a) GO - The unit successfully accomplished the task or performance measure to standards.
 - (b) NO-GO - The unit did not accomplish the task or performance measure to standard.

c. Use other locally designed reports that are approved by the senior O/C and prescribed in the evaluation plan to collect the evaluation information. These reports assist the team in recording the information concerning the unit's capability to perform its wartime mission according to the established standards. This information will assist the senior O/C to determine the unit's overall final rating. The reports listed below can be used to collect the information.

- (1) Unit data sheet (Figure 6-4). This report records personnel and equipment status.
- (2) Environmental data sheet (Figure 6-5). This report records information concerning weather and terrain conditions present during the evaluation period.

6-8. After-Action Reviews. AARs provide direct feedback to unit members by involving them in the diagnosis process and by enabling them to discover for themselves what happened during the evaluation. In this way, participants identify errors and seek solutions that increase the value of the training and reinforce learning.

a. The senior O/C is responsible for the AAR process. He coordinates the entire AAR program from the initial planning of the evaluation through the after-actions phases.

b. Key steps in the AAR process are--

(1) Planning. Planning for AARs is started in the exercise preparation activities long before the start of the action evaluation. AARs are integrated into the general scenario at logical breakpoints and into the detailed evaluation scenario that is developed subsequently. Qualified Os/Cs are selected and trained in the AAR process as part of O/C training. This phase also includes the identification of potential AAR sites and the requisition of equipment and supplies needed to conduct the AAR.

(2) Preparation. AAR preparation starts with the beginning of the actual evaluation. In addition to observing the unit performing its critical tasks, this phase includes the review of the training objectives, orders, and doctrine. Final AAR site selection is completed and times and attendance are established. AAR information is gathered from applicable Os/Cs and unit personnel. The AAR is organized and rehearsed.

(3) Conduct. AARs are conducted at logical breakpoints in the exercise and at the end of the evaluation. When AAR participants have assembled, the AAR begins with the senior O/C introducing the session with a statement of the AAR purpose, the establishment of the AAR ground rules and procedures, and a restatement of the training and evaluation objectives. A successful AAR include the following guidelines:

(a) AARs are not critiques, but are professional discussions of training events.

(b) The senior O/C guides the discussion in a manner that ensures that participants openly discuss the lessons.

(c) Dialogue is encouraged among Os/Cs and unit personnel.

(d) All individuals who participated in the evaluation are present for the AAR, if possible. As a minimum, every unit or element that participates in the exercise is represented.

(e) Participants discuss not only what happened, but also how it happened and how it could have been done better.

(f) Participants review the sequence of the events associated with the hazards and the risk assessment made before the exercise. As a minimum, the review should address hazards that presented themselves (but were not identified) and each incident of fratricide or near fratricide and how it could be avoided in the future.

(g) Events not directly related to major events are not examined.

(h) Participants do not offer self-serving excuses for inappropriate actions.

(i) The AAR end result is that soldiers and leaders, through discovery learning, gain a better understanding of their individual and collective strengths and weaknesses and become more proficient in training for and performing their critical tasks.

NOTE: Reference materials for conducting an AAR are Training Circulars (TC) 25-6 and 25-20, and FM 25-101.

APPENDIX A - EXERCISE OPERATION ORDER (OPORD)

For use of the OPORD, refer to the exercise outlined in Chapter 4 and to Figure A-1.

OPERATION ORDER	
(classification) FOR TRAINING PURPOSES ONLY	
Operation Order _____ 20_____	Copy ___ of ___ copies 25th Engineer Battalion
Task Organization:	
1. SITUATION.	
<p>a. Enemy Forces. Contact with the enemy has been broken. The enemy has withdrawn deep to the rear. He being reinforced with motorized rifle forces and is preparing to counterattack within 24 hours. The enemy is expected to use nonpersistent nerve agents. Enemy air is expected to be active in the area. Latest INTSUM indicates that the enemy may have a platoon-size combat outpost in the battalion sector. Enemy units occupying the combat outpost are half strength. Counterattacking forces are expected to be full strength.</p>	
<p>b. Friendly Forces. 1st Brigade conducts a passage of lines to seize Objective Richmond. On order, 1st Brigade continues the attack forward of PL Green.</p>	
<p>(1) Missions of units on left and right flanks, as required.</p>	
<p>(2) Supporting engineer unit missions, as required.</p>	
<p>(3) Supporting fires: 2nd Battalion, 61st Field Artillery, is in direct support.</p>	
2. MISSION. The TF conducts a passage of lines and attacks to seize and secure objective Richmond no later than 090600Z. On order, the TF prepares to continue movement forward of PL Green.	
3. EXECUTION.	
<p>a. Concept of the Operation: See overlay developed by the trainer in the field.</p>	
<p>(1) Maneuver. TF 1-25 departs AA Red Cloud with two company teams abreast and two teams following. Team A leads on Axis Oak and is the main attack. Team B leads on Axis Pine and is supporting the attack. Teams C and D follow on Axis Oak and Pine respectively. The commander's intent is to gain contact with the enemy, and locate and fix the enemy's main body so that the brigade can conduct envelopments to destroy the enemy. It is necessary to destroy the enemies combat outposts. The unit must quickly reorganize and continue movement until the unit finds the main body. The company team that makes initial contact will attempt to fight through and destroy the enemy. If the unit cannot, they will provide a base of fire for maneuver with the remaining TF. The unit will continue movement to PL Green if no contact is gained. The unit will continue movement past PL Green on order.</p>	
<p>(2) Fire support. The priority of fires is to Team A initially and then to the team that is in contact (once contact is made).</p>

(3) Mines, obstacles, and fortifications. Critical checkpoints and identified obstacles are shown on the obstacle overlay.

b. Subunit Missions (as required).

c. Engineer. Priority of support is to the two lead teams. On order, conduct breaching operations in support of the team in contact. Be prepared to support hasty defense on order.

d. Coordinating Instructions.

(1) Report all enemy contact.

(2) Report all enemy obstacles.

(3) Report crossing of the PLs.

(4) Additional information, as required.

4. SERVICE AND SUPPORT. Per the brigade's SOP.

5. COMMAND AND SIGNAL.

a. Command.

b. Signal.

APPENDIX B - THREAT ANALYSIS

B-1. Introduction.

a. Dramatic changes in Europe and within the former Soviet Union have reduced the likelihood of an east-west military confrontation in Europe. The threat in Europe has not gone away completely, but it is less immediate and changed in nature. Despite reductions, Russia will still have the largest army in Europe. Regardless of the stated peaceful intentions of current Russian political leaders, the Russian Armed Forces still possesses formidable capabilities, and those capabilities will remain, should conditions and intentions change. Other former Soviet republics are forming their own armed forces and could pose threats to each other or to other countries in the region. In this time of turmoil and uncertainty, the former Soviet military power remains a potentially dangerous challenge to US and North Atlantic Treaty Organization (NATO) security. However, this remnant of the former Soviet threat is just one of many.

b. Many other nations are obtaining or developing sophisticated weaponry. Various regional conflicts could cause the US to intervene bilaterally or as part of a multinational coalition to protect our interests or those of our allies. Other potential conflict areas could call for a variety of responses by either the US or the former Soviet republics or both. The threat may come in an organized military form, which may or may not follow the former Soviet model. It may also come in the form of insurgencies, terrorism, or narcotics trafficking. The US Army needs to be prepared to respond to this broad spectrum of potential threats that it could encounter in various contingencies.

B-2. Global Threats. Modern weapons and the capability to project military power to great distances beyond its own national borders would characterize a global-type threat, such as the former Soviet one. Against such a potential adversary, the threat to rear operations would include the following:

- Armored or mechanized forces breaking into our rear area.
- Airborne, airmobile, or amphibious assault forces inserted into our rear area.
- Long-range artillery, surface-to-surface missiles, or air strikes targeting rear-area assets.
- NBC weapons.
- Radio-electronic combat aimed at jamming or destroying our communications means and disrupting our C².
- Agents and saboteurs.

B-3. Regional Threats. Regional threats, such as Iraq or North Korea, have less capability to project power. However, they may have some of the same weapons and organizations as a global threat. In fact, lessening superpower tensions are contributing significantly to the proliferation of sophisticated weaponry to emerging nations. This applies not only to conventional ground and air weapons, but also to chemical and nuclear weapons and missile systems. A mature regional power, possibly with a global power as a major source of its military hardware, emphasizes the ability to project its forces throughout a given region.

B-4. Local Threats. Local threats have even more localized objectives and little capability to project power beyond their own borders or their immediate neighbors. They generally have less modern equipment than global or regional threat powers or at least a limited variety of modern weapons. Their equipment may include modern small arms and light artillery (mortars, howitzers, gun-howitzers, and rocket launchers), but often does not include sophisticated weapons such as long-range conventional artillery or high-performance aircraft. A local threat may be heavily supported by a regional threat or even by a global power. In the past, for example, Cuba assisted Soviet-backed movements in Angola, Nicaragua, and Ethiopia. This outside influence will often be reflected in the equipment, organization, or tactics of the local threat forces. However, the actions of a local threat are often limited to insurgencies,

civil wars, or border disputes. Insurgents, especially those with outside help, may be able to purchase modern weapons, but may not have developed a logistics base able to sustain continuous conflict. Therefore, they often concentrate on guerrilla tactics, sabotage, assassinations, booby traps, or explosives to achieve their objectives.

B-5. Special Situations.

a. The threat in special situations includes terrorism. Terrorism may satisfy the objectives of different types of threats discussed above. Terrorists are the least likely threat to use conventional forces and thus are the hardest to anticipate or to train against. Terrorist tactics include the following:

- Assassinating or maiming.
- Arson.
- Bombing.
- Hijacking, kidnapping, or hostage-taking.
- Raids and seizure of facilities.
- Sabotage.
- Hoaxes (such as bomb threats).

Aside from these threats, terrorists may also be able to obtain weapons of mass destruction. A political leadership that supports terrorism, as in Iraq, may control such NBC weapons. If nuclear weapons are too difficult to obtain, terrorists may instead employ chemical or biological weapons to reach their goals.

b. Narcotics trafficking is another special-condition threat. It may be supported or tolerated by a global power for political or economic reasons. It may also be tied in with regional or local threat powers or with terrorism. There is often a marriage of convenience between insurgent groups and the drug cartels. The cartels can spend significant amounts of money on the latest in technology for communications and security to protect their operations. They can also buy weapons and otherwise finance regional insurgencies and cross-border conflicts.

B-6. Bottom Line. The threat to rear operations includes all of the above categories. These threat categories are not mutually exclusive and may overlap with one another.
