## PREFACE

- P-1 This Mission Training Plan represents the first efforts of the Field Artillery School to use the Automated Systems Approach to Training (ASAT) software to produce training products. This software is a relational database designed to assist training developers in their efforts to produce quality training products in a digital format and deliver the products to users in the field as soon as possible. However, because a database and not a word processor produced this MTP, several peculiarities exist.
- a. Many types of sections perform many of the tasks in this manual. Therefore, you may see elements listed in the manual that do not exist in your unit. This happens because of the database process used. An example of this: You will see the command section listed as an element in the element/collective task listing in chapter 2 of all battery MTPs. A firing battery does not have a command section. This happens because Battery Commanders as well as Battalion Commanders perform the task "Reduce Battlefield Stress". The task appears in every MTP produced by USAFAS. You will also see the command section listed as an element that performs the task in chapter 5. When you review the task in chapter 5 keep this mind that some elements you see will not exist you specific unit, and you should disregard those elements.
  - b. Another thing that may appear unusual arises from the fact that when several different sections in different types of units perform the same task, you will see supporting individual tasks for MOS codes you do not have in your unit. Once again, disregard these individual tasks if they do not pertain to your unit.
- P-2 When you review the manual you will also see the format of the manual has changed considerably. This change was brought about in order to leverage the power of the database and to improve the school's ability to provide you with the most accurate and up to date information available.
- a. The Army has put considerable effort into the development of Combined Arms Training Strategies. (CATS) These strategies are address in more detail in the body of the manual in chapter 3.
  - b. The CATS effort has produced a number of training strategies for the FA community. Presently we have strategies for every type of unit in the FA. These strategies are listed in MS Word format on the WIDD home page. The address is listed in chapter 3. When you go to the site, open the table of contents and then go to unit training and you will see the hot link to CATS events.
- P-3 We are attempting to develop training products in a time when the bulk of systems are highly computerized and changes are common and frequent. Not only is equipment changing, but also, the concept of unit structures and missions are undergoing dramatic changes. All these things affect unit-training products. This rapidly changing environment causes changes to tasks and strategies. Up to this point, the field (users) had to wait until a new word processing document was produced to capture the new materials for specific tasks or training strategies. This caused the field to always be behind in the latest task data. We are very close to having the ability to make changes today and deliver them to the field tomorrow. By using ASAT and SATS, the field can get much closer to real time information. As tasks and CATS strategies are updated to reflect new technology, new doctrine, or improvements, the field will have access to this information through SATS. They will do this by downloading the new task from the Reimer Digital Library Data Repository (see chapter 3 for the address) or by going to WIDD homepage and getting a word processing document.

- a. The advantage of getting the database product from the Reimer data repository is that the data will be imported directly into your SATS database and will update the existing task. This will save you time and effort since the database produces reports, training events, and may be used to produce unit METL.
  - b. The disadvantage of using the WIDD home page is that the unit will have to manually input data into SATS and this will require more time and present the possibility for mistakes.
- P-4. Training strategies: In this MTP, we have attempted to define the minimum acceptable performance for units and sections in order to be considered "qualified". We have developed training strategies and Artillery Tables that support this concept.
- a. This minimum standard has been defined by units in the field and captured by developers at the field artillery school. Unit commanders may modify this standard and establish standards they feel better fit their specific mission.
  - b. We have developed many training strategies that support the artillery tables. We have a training strategy (CATS event) titled "Howitzer Section Tasks (06-TS-4001). This event includes all the tasks listed in the section tables in appendix "B" and several other tasks that have been recommended for training because they are easily trained with the howitzer section tasks.
  - c. In addition to artillery table tasks for cannon and MLRS firing sections, CATs events have been developed for most sections including the battalion and battery FDC sections, platoon operations centers, RADAR sections, Met sections, and all staff sections. The artillery tables above section level have CATS events that support them just as the sections do.
  - d. The gunnery strategy we developed requires that all elements in the gunnery chain, (weapon system, POC, FDC, and FIST) all train in a stand-alone mode (walk) on the tasks they must perform without stimulus or input from other elements. In this mode the use of training devices such as DSTATS, SISTIM, or embedded training capabilities can and should be used.
  - e. In addition to CATS events that have been developed to support the artillery tables, USAFAS has developed training support packages (TSP) to assist units. You will find a complete list of these TSPs in chapter 4 along with instructions on how to obtain and use them.

P-5. Any comments or questions should be addressed to Henry Koelzer, Chief, Unit Training Branch, Warfighting, Integration, and Development Directorate, USAFAS.

## CHAPTER 1

### Unit Training

- 1-1. General: This mission training plan (MTP) provides the commander and leaders with guidance on how to train the key collective tasks of the unit. It also provides guidance for those that must evaluate a unit's performance (observer controllers/mentors/evaluators).
- 1-2. The specific details of the unit's training program depends on the following factors:
  - a. A Combined Arms Training Strategy.
  - b. Unit's mission-essential task list (METL).
  - c. Directives and guidance from higher headquarters.
  - d. Training priorities of the unit.
  - d. Availability of training resources and areas.
- 1-3. Supporting Material: This MTP describes a mission-oriented training program that must tie in with the next higher echelon's training program. The unit's training program consists of:
  - a. ARTEP/MTP: This Army training and evaluation program (ARTEP) indicates the relationship of the battery's training program to the battalion-training program, etc.
  - b. Soldier training publications (STPs) for the appropriate military occupational specialty (MOS) and skill levels (SLs).
  - c. Officer Education System (OES) manual for Officers or the Warrant Officers Education System (WOES).
- 1-4. Contents: This MTP is organized into six chapters and three appendices:
  - a. Chapter 1: Unit Training provides the explanation and organization of this MTP. This chapter explains how to use this MTP in establishing an effective training program. It also gives guidance for evaluating a unit's performance.
  - b. Chapter 2: Training Matrix, shows the relationship between Army Universal Task List (AUTL), BOS, and collective tasks. Also provided is the relationship between Collective and Individual supporting tasks.
  - c. Chapter 3: Combined Arms Training Strategy (CATS), training event matrices. This chapter gives an overview of CATS and how it affects unit training. It also tells users of this manual how to obtain CATS.
  - d. Chapter 4: Training Support Packages available. This chapter contains information about Training Support Packages available for units affected by this MTP. It also contains information on how to best use them and where to obtain them.
  - e. Chapter 5: Training and Evaluation Outlines, provides the training and evaluation criteria for all the tasks. Each task has a training and evaluation outline (T&EO) that identifies task steps, performance measures, and individual and leader tasks. Critical performance measures are identified with a "+". See section 1-4 "Evaluation" for explanation of critical

performance measures. Each T&EO is part of a mission and, in various combinations, composes training exercises.

- f. Chapter 6: External Evaluation, provides instructions for the planning, preparation, and execution of an external evaluation.
- g. Appendix A: Time and Accuracy Standards, describes fire mission standards both digital and manual (cannon only).
- h. Appendix B: Artillery Tables, lists those tasks that have been determined to be combat critical for specific levels of fire support (launcher/gun, platoon, battery, and battalion.) These tasks are directly associated with section qualification and certification. CATS events have been developed around these tables.
- g. Appendix C: OPFOR Tasks and Standards, provides enhanced realism during unit training.

1-5. Task Assessment:

- a. Each task has a standard that measures the successful performance of the task and task steps that give directions on the how-to of task performance. Furthermore, some steps have performance measures listed as well. In order to assess a task and give a "T, P, or U" rating, we have attempted to identify a criteria that satisfies the needs of the commanders and is as non-ambiguous as possible. Keeping in mind that the commander has the ultimate responsibility of rating a task, this method below represents one way to assess tasks. It cannot possibly take into account all possible situations and apply METT-TC to the assessment. The commander must do that and use his subjective opinion to give the final rating.
- b. In addition to the standard, several task steps/performance measures are listed for each task. Each task step/performance measure is graded either "GO" or "NO-GO". The question, "Does a unit have to perform each task step/performance measure successfully in order to receive a "Trained" for the task?" has always arisen. In the past, the answer according to the MTP manuals was "Yes". We know however, the practical answer is no. As long as the task standard is met, and critical steps, identified with a "+", are performed to standard the unit will successfully perform the task. If every step were required for successful completion of a task, the unit would never have a rating of "Practice" for any task. We have attempted to identify critical steps for each task. We may have overlooked some steps, and you may not agree with our evaluation of critical steps. We ask your help to identify critical steps during your review and use of this manual.
  - (1) A rating of "T" = All critical task steps/performance measures as indicated by a "+" are performed, 70% of those task steps not listed as critical are performed and the element attains the task standard. "T" (trained) means that the unit can successfully perform the task to standard. Only sustainment training is needed. The leader/OC or trainer judges task performance to be free of significant shortcomings. Practice on "T" tasks is designed to keep soldiers from losing proficiency.
  - (2) A rating of "P" = All critical task steps/performance measures as indicated by a "+" are performed, less than 70% of those task steps not listed as critical are performed and the task standard is met. "P" (practice) means that the unit can perform the task with some shortcomings. The shortcomings are not severe enough to require complete retraining. Only refresher training is required. It is possible to fail each critical task step and attain the rating of "P". The determining factor is the task standard. The task standard must be met to receive a rating of "P".

(3) A rating of "U" = The unit fails to attain the task standard. "U" (untrained) means that the unit cannot perform the task to standard. The element has failed one or more critical task step/performance measure. The determining factor is the failure of the unit to perform the task to the stated standard. It may be assumed that if a critical task step is failed, then the task standard cannot be met. The leader must prepare a comprehensive strategy to train all tasks not executed to standard.

- Any discrepancy you find in our analysis of critical task steps needs to come to the attention of the Field Artillery School (ATTN: Henry Koelzer koelzerh@doimex2.sill.army.mil) Phone DSN 639-3300/4050 CML 580-442-3300/4050

- a. Units should strive to receive a "GO" on each performance measure. "NOGOs" should be brought out during AARs and Critiques. Units should train to eliminate "NO-GOs" from future evaluations.
- f. Evaluations can be internal or external. Internal evaluations are conducted at all levels, and they must be inherent in all training. External evaluations are usually more formal and are normally conducted by a headquarters above the unit being evaluated. (See Chapter 6, External Evaluation.)
- g. A critical weakness in training is the failure to evaluate each task every time it is executed. The ARTEP concept is based on simultaneous training and evaluation. Too often, leaders do not practice continuous evaluation. Often, soldiers or small units are trained to perform a task to standard; then later, when they execute that task as part of a training exercise, they execute it poorly or incorrectly and are not corrected. For this program to work, trainers and leaders must continually evaluate training as it is being executed.
- h. Leaders should emphasize direct, on-the-spot evaluations. Correcting poor performance during individual or small group training is easy to do. In higher-level exercises, it is usually not feasible to do this with outside evaluators, but the opportunity for correction should not be overlooked. Plan AARs at frequent logical intervals during the exercises (usually after the completion of a major subordinate task). This is a proven technique that allows you to correct performance shortcomings while they are still fresh in everyone's mind and prevents reinforcement of bad habits.
- i. FM 25-101 provides detailed instructions for conducting an AAR and detailed guidance on coaching and critiquing during training.

#### 1-6. Training And Evaluation Outlines

- a. General: Chapter 5 contains the collective task T&EOs for the unit. T&EOs are the foundation of the MTP and the collective training of the unit. T&EOs are training objectives (task, conditions, and standards) for the collective tasks, which support critical operations. The unit must analyze its METL to determine which T&EOs it must train. The unit must master those designated tasks to accomplish its critical mission.
- b. Structure: The T&EOs in chapter 5 are listed at Table 5-1.
- c. Format: Each T&EO contains the following items:
  - (1). Element: This identifies the unit or unit element(s) that performs the task.

- (2). Task: This describes the action to be performed by the unit.
  - (3). References: These are in parenthesis following the task number.
  - (4). Iteration: This is used to identify how many times the task was performed and evaluated during training. The "M" identifies when the task is performed in mission-oriented protective posture, level 4 (MOPP 4). Unless otherwise indicated, some iterations of all tasks are performed in MOPP 4.
- d. Commander/Leader Assessment: This is used by the unit leadership to assess the proficiency of the unit in performing the task to standard. Assessments are subjective in nature and use all available evaluation data and subunit leader input to develop an assessment of the organization's overall capability to accomplish the task. The following ratings are used:
- (1). T – Trained: The unit is trained and has demonstrated proficiency in accomplishing the task to standards.
  - (2) P - Needs practice: The unit needs to practice the task. Performance has demonstrated that the unit does not achieve standard without some difficulty or has failed to perform some task steps to standard.
  - (3) U – Untrained: The unit does not demonstrate an ability to achieve the task standard.
- f. Condition: A statement of the situation or environment in which the unit is to perform the collective task.
- g. Task standard: Performance criteria to successfully execute the task. This overall standard should be the focus of training. It should be understood by every soldier.
- h. Task Steps and Performance Measures: Task Steps are a list of actions that are required to successfully complete the task. These actions are further stated in terms of observable performance measures for evaluating training proficiency. The unit must be evaluated in the context of the current METT-TC conditions. Critical performance measures are identified with a "+". The unit must receive a "GO" on all performance measures identified with a "+".
- i. GO/NO-GO Column: This column is provided for annotating the element's performance of the task steps. Evaluate each performance measure for a task step and place an "X" in the appropriate column.
- j. Task Performance/Evaluation Summary Block: This block provides the trainer a means of recording the total number of task steps and performance measures evaluated and those evaluated as "GO." It provides the trainer a means to rate the unit's demonstrated performance as a "GO" or "NO-GO." It also provides the leader with a historical record for five training iterations.
- k. Supporting Individual Tasks: A listing of all supporting individual tasks required to perform the collective task correctly.
- l. OPFOR Tasks and Standards: Appendix C provides a list of generic OPFOR tasks. The standards specify overall OPFOR performance for each collective task.

- 1-6. Mission and Tasks: Because the field artillery supports all missions listed in the Army Tactical Mission list, (Offensive Actions, Defensive Actions, Stability Actions, Support Actions, Conduct Tactical Mission Tasks, Conduct Enabling Operations, and conduct Forcible Entry Operations), our mission list will fall directly in line with the tactical level of the Army Unit Task List. (AUTL). The AUTL is the language the Army is using to help understand the relationship between battlefield operation systems (BOS) and the supporting collective tasks among the BOS. Our existing missions fall directly in line with the AUTL.
- a. Move
  - b. Deploy
  - c. Acquire Targets
  - d. Deliver Fires
  - e. Perform Logistics
  - f. Coordinate Fire Support
  - g. Survive
  - h. Communicate
  - i. The missions we list are not really missions at all. They are however, categories of tasks. These categories allow commanders to easily locate collective tasks that will support their METL.
  - j. Collective training by its nature, is multi-echelon. A unit may train a specific category of tasks (Deploy/Maneuver) separately, however when performing collective training more than one category of tasks is almost always trained. I.e. Some Command and Control tasks will usually be performed during any training. Leaders are taking charge, making decisions, and informing subordinates of those decisions by some means of communications. Units must not forget the multi mission/AUTL level of training.
- 1-8. Principles of Training: This MTP is based on the training principles found in FM 25-100, Training the Force.
- 1-9. Training Strategy: The Army's Combined Arms Training Strategy (CATS), provides a template whereby units can develop and execute a training program for their critical missions. The purpose of CATS is to provide direction and guidance on how the Army trains and identifies the resources required to support that training. CATS provide the tools that enable the Army to focus and manage training in an integrated manner. Central to CATS is a series of proponent-generated unit and institutional strategies that describe the training and training resources required to train to standard.
- a. The unit training strategies central to CATS provide the commander with a descriptive "menu" for training. These strategies have been developed based on specific base TO&Es and do not reflect the MTOE that actually exists in the field. Commanders must massage these strategies to fit their specific situation and resources.
  - b. A unit's training strategy is composed of three separate training strategies. When integrated with the training tasks found in the MTP, they form a comprehensive and focused training strategy that allows the unit to train to standard. The elements of this unit's training strategy are:

- (1) Combined Arms Training Strategy. CATS provides a set of recommended training frequencies for key training events in a unit and depict those resources that are required to support the training events. This training includes not only those elements organic to a specific unit, but also units that work in coordination with that unit. I.e. The elements of the maneuver brigade that are supported by the brigade fire support element and the Forward Support Battalion or Aviation Lift Company habitually tasked to support the unit.
  - (2) Individual Training Strategy: The unit commander will develop a strategy to train individual tasks that are not trained at the institution and reinforce tasks taught at the institution. This strategy usually consists of some sort of "Prime Time Training" or "Sergeant's Time Training". The name given the training event is unimportant. The training time allocated is that time whereby the First Line Supervisor, meeting commanders guidance, trains his soldiers in those tasks required to accomplish those collective tasks that support the unit METL.
  - (3) Crew Training Strategy: This strategy allows for the section chief (first line supervisor) to train those METL tasks the commander has determined to be critical.
- c. When developing the unit's training plan, the commander identifies the training tasks from the MTP required to train his METL. Chapter 2 contains a matrix that lists tasks with an associated mission, however this may not reflect a complete or accurate list of tasks that a unit may need to accomplish its METL tasks.
- 1-10. Conducting Training: This MTP is designed to facilitate the planning, preparation, and conduct of unit training as explained in the FM 25-100, Training the Force, and FM 25-101, Battle Focused Training.
- a. The commander assigns the missions and tasks for training based on his METL and the training guidance from the next higher headquarters. Trainers must plan and execute training in support of this guidance.
  - b. The commander reviews the mission outline in Chapter 3 to determine whether the FTX and STXs provided will support or can be modified to support the senior commander's guidance. If they do not support the guidance or need to be modified, refer to the matrix in Chapter 2. The matrix provides a listing of collective tasks that must be mastered to perform the mission.
  - c. The commander prioritizes the tasks that need training.
  - d. The commander integrates training tasks into the training schedule by:
    - (1) Listing the tasks in the priority and frequency they need to be trained.
    - (2) Determining the amount of time required and how multiechelon training can be used for the best results.
    - (3) Determining where the training can take place.
    - (4) Determining who is responsible for what. The leader of the element being trained must always be involved.
    - (5) Organizing his requirements into blocks of time and training vehicles.

- e. The commander must approve the list of tasks to be trained and schedule them on the unit-training schedule.
- f. The commander must determine the equipment and supplies needed to conduct the training.
- g. The commander must keep subordinate leaders informed and oversee their training. The standards must be rigidly enforced.

1-11. Safety:

- a. Safety is a component of force protection. Commanders, leaders, and soldiers use risk assessment and management to tie force protection into the mission. Risk management assigns responsibility, institutionalizes the commander's review of operational safety, and leads to decision making at a level of command appropriate to the risk. The objective of safety is to help units protect combat power through accident prevention, which enables units to win fast and decisively with minimum losses. Safety is an integral part of all combat operations and begins with readiness. Readiness determines a unit's ability to perform its METL to standard. Readiness standards addressed during METL assessment are:
  - (1) Soldiers with the self-discipline to consistently perform tasks to standard.
  - (2) Leaders who are ready, willing, and able to enforce standards.
  - (3) Training that provides skills needed for performance to standard.
  - (3) Standards and procedures for task preference that are clear and practical.
  - (4) Support for task preference, including equipment, personnel, maintenance, facilities, and service.
- b. Risk management is a tool that addresses the root causes (readiness shortcomings) of accidents. It assists commanders and leaders in not only identifying what the next accident is going to be, but it also helps identify who will have the next accident. Risk management is a way to put more realism into training without paying the price in deaths, injuries, or damaged equipment. It also enhances soldier confidence in their ability to do their mission safely and in their leadership.
- c. Safety demands total chain of command involvement in planning, preparing, executing, and evaluating training. The chain of command responsibilities include--
  - (1) Commanders, who must:
    - (a) Seek optimum, not adequate, performance.
    - (b) Specify the risk acceptable to accomplish the mission.
    - (c) Select risk reductions provided by staff.
    - (d) Accept or reject residual risk, based on the benefit to be derived.
    - (e) Train and motivate leaders at all levels to effectively use

risk management concepts.

- (2) Staff, who must:
    - (a) Assist the commander in assessing risks and develop risk reduction options for training.
    - (b) Integrate risk controls in plans, orders, METL standards, and performance measures.
    - (c) Eliminate unnecessary safety restrictions that diminish training effectiveness.
    - (d) Assess safety performance during training; evaluate safety performance during after action reviews (AARs).
  - (3) Subordinate leaders, who must:
    - (a) Apply consistently effective risk management concepts and methods to operations they lead.
    - (b) Report risk issues beyond their control or authority to their superiors.
  - (4) Individual soldiers, who must:
    - (a) Report unsafe conditions, act, and correct the situation when possible.
    - (c) Establish a buddy system to keep a safety watch on one another.
    - (c) Take responsibility for personal safety.
    - (d) Work as a team member.
    - (e) Modify own risk behavior.
- e. Risk management is a five-step cyclic process that is easily integrated into the decision making process outlined in FM 101-5. The five steps are:
- (1) Identify Hazards. Identify the most probable hazards for the missions.
  - (2) Assess Hazards. Analyze each hazard to determine the probability of its causing an accident and the probable effect of the accident. Identify control options to eliminate or reduce the hazard. The Army Standard Risk Assessment Matrix (Figure 1-1) is a tool for assessing hazards.
  - (3) Make Risk Decisions. Weigh the risk against the benefits of performing the operations. Accept no unnecessary risks and make any residual risk decisions at the proper level of command

		HAZARD PROBABILITY				
		Frequent	Probable	Occasional	Remote	Improbable
		A	B	C	D	E
CATASTROPHIC	I	EXTREMELY HIGH				
CRITICAL	II	HIGH				
MARGINAL	III	MEDIUM				
NEGLIGIBLE	IV	LOW				

Effect

**Catastrophic** Death or permanent total disability, system loss, major property damage.

**Critical** Permanent partial disability, temporary total disability in excess of 3 months, major system damage, significant property damage

**Marginal** Minor injury, lost workday accident, compensable injury or illness, minor system damage, minor property damage

**Negligible** First aid or minor supportive medical treatment, minor system impairment

Probability

**Frequent** Individual soldier/item Occurs often in career/equipment service life.  
All soldiers exposed or item inventory Continuously experienced.

**Probable** Individual soldier/item Occurs several times in career/equipment service life.  
All soldiers exposed or item inventory Occurs frequently.

**Occasional** Individual soldier/item Occurs sometime in career/equipment service life.  
All soldiers exposed or item inventory Occurs sporadically, or several times in inventory service life.

**Remote** Individual soldier/item Possible to occur in career/equipment service life.  
All soldiers exposed or item inventory Remote chance of occurrence; expected to occur sometime in inventory service life.

**Improbable** Individual soldier/item Can assume will not occur in career/equipment service life.  
All soldiers exposed or item inventory Possible, but improbable; occurs only very rarely.

Risk Levels

Extremely High Loss of ability to accomplish mission.  
High Significantly degrades mission capabilities in terms of required mission standards.  
Medium Degrades mission capabilities in terms of required mission.  
Low Little or no impact on mission accomplishment.

Figure 1-1. Risk Assessment Matrix:

- (4) Implement Controls. Integrate specific controls into operational plans (OPLANs), operation orders (OPORDs), standing operating procedures (SOPs) and rehearsals. Communicate controls to the individual soldier.
  - (4) Supervise. Determine the effectiveness of controls in reducing the probability and effect of identified hazards to include follow up and after action review. Develop the lessons learned.
- 1-12. Environmental Protection: Protection of natural resources has continued to become an ever-increasing concern to the Army. It is the responsibility of all unit leaders to decrease, and if possible, eliminate damage to the environment when conducting training. Environmental risk management parallels safety risk management and is based on the same philosophy as safety risk management. Environmental risk management consists of the following steps:
- a. Identify Hazards: Identify potential sources for environmental degradation during analysis of mission, enemy, terrain, troops, and time available (METT-T) factors. This requires identification of environmental hazards. An environmental hazard is a condition with the potential for polluting air, soil, or water and or destroying cultural and historical artifacts.
  - b. Assess the Hazard: Analyze potential severity of environmental degradation using environmental risk assessment matrixes (Figure 1-3). Severity of environmental degradation is considered when determining the potential effect an operation will have on the environment. The risk impact value is defined as an indicator of the severity of environmental degradation. Quantify the risk to the environment resulting from the operation as extremely high, high, medium, or low, using the environmental risk assessment matrixes.
  - c. Make Environmental Risk Decisions. Make decisions and develop measures to reduce high environmental risks.
  - d. Brief Chain of Command: Brief chain of command (to include installation environmental office, if applicable) on proposed plans and pertinent high-risk environmental matrixes. Risk decisions are made at a level of command that corresponds to the degree of risk.
  - e. Implement Controls: Implement environmental protection measures by ntegrating them into plans, orders, SOPs, training performance standards, and rehearsals.
  - f. Supervise: Supervise and enforce environmental protection standards.

### Training Matrixes

2-1. General. The training Listing assists the commander in planning the training of his unit's personnel. The mission identification table listed below (Figure 2-1) provides mission identification for the unit.

<b>Mission Identification Table</b>

2-2. Mission to Collective Tasks Listing. This listing (Figure 2-2), identifies the mission and their supporting collective tasks. The tasks are listed under the appropriate BOS which are indicated by an asterisk in the listing. The BOS used in this listing are defined in TRADOC Pam 11-9. A specific mission is trained by identifying collective tasks in the vertical column for the mission. Based on the proficiency of the unit, training is focused on operational weaknesses.

#### MISSION: ACQUIRE TARGETS

<b>Collective Task(s)</b>	(06-1-A000) PREPARE THE FA INTELLIGENCE PORTION OF THE FIELD ARTILLERY SUPPORT PLAN
	(06-1-A008) PREPARE THE BATTALION RECONNAISSANCE AND SURVEILLANCE PLAN
	(06-1-A025) PROCESS AND DISSEMINATE INTELLIGENCE INFORMATION
	(06-1-A071) DEVELOP THE FA-FOCUSED IPB
	(06-1-A009) DIRECT THE OPERATION OF FIELD ARTILLERY ACQUISITION ASSETS
	(06-4-Q001) PERFORM HASTY SURVEY (RADAR)
	(06-4-Q003) EMPLACE AND PREPARE RADAR EQUIPMENT FOR OPERATIONS
	(06-4-Q045) PERFORM SURVEILLANCE AND LOCATE TARGETS
	(06-4-U013) PROVIDE MET SUPPORT
	(06-5-A006) ESTABLISH AN OBSERVATION POST (FIRE SUPPORT TEAM)
	(06-4-Q009) OCCUPY A RADAR SITE
	(06-4-Q010) RECONNOITER A RADAR POSITION
	(06-4-Q011) PERFORM UNIT MAINTENANCE ON RADAR EQUIPMENT
	(06-1-A002) CONTROL AND MONITOR FA OPERATIONS

#### MISSION: COMMUNICATE

- Collective Task(s)** (06-1-A065) PLAN AND ENFORCE OPERATIONS SECURITY AND COUNTERINTELLIGENCE OPERATIONS  
(06-1-C029) ESTABLISH AND MAINTAIN WIRE COMMUNICATIONS  
(06-2-A005) PROVIDE ORGANIZATIONAL COMMUNICATIONS/ELECTRONICS MAINTENANCE SUPPORT  
(06-2-A078) PERFORM OPERATORS MAINTAINENCE ON COMMUNICATIONS EQUIPMENT  
(06-1-A002) CONTROL AND MONITOR FA OPERATIONS  
(06-1-A014) DEVELOP THE BATTALION COMMUNICATIONS PLAN  
(06-1-A015) COORDINATE AND DIRECT BATTALION COMMUNICATIONS OPERATIONS  
(06-1-A091) DISTRIBUTE AND CONTROL COMSEC MATERIAL  
(06-2-A000.06-C000) ESTABLISH AND MAINTAIN COMMUNICATIONS  
(06-2-A001) COMMAND AND CONTROL COMMUNICATIONS OPERATIONS  
(06-4-A000) ESTABLISH FM RETRANSMISSION STATION  
(11-2-C302.06-C001) ESTABLISH AND OPERATE A SINGLE-CHANNEL VOICE RADIO NET  
(11-5-0102.06-A000) INSTALL /OPERATE/MAINTAIN A SINGLE CHANNEL VOICE RADIO STATION  
(11-5-1102.06-A001) INSTALL/OPERATE/MAINTAIN A SINGLE CHANNEL GROUND AND AIRBORNE RADIO SYSTEM (SINGARS) FREQUENCY HOPPING (FH) NET

**MISSION: COORDINATE FIRE SUPPORT**

- Collective Task(s)** (06-1-A039) PARTICIPATE IN FIRE SUPPORT REHEARSAL OPERATIONS  
(06-1-C095) ANALYZE TARGETS  
(06-1-C096) EXECUTE FIRE SUPPORT  
(06-1-C097) SYNCHRONIZE FIRE SUPPORT  
(06-1-C098) PLAN FIRE SUPPORT FOR THE MANEUVER BRIGADE  
(06-1-C099) ESTABLISH THE FIRE SUPPORT CELL  
(06-1-W100) CONTROL COUNTERFIRE OPERATIONS  
(06-1-W102) MAINTAIN CONTINUITY OF OPERATIONS  
(06-1-W103) COMMAND AND CONTROL DELIVERY OF FIRES  
(06-1-W104) EXECUTE BATTALION FIRE MISSIONS  
(06-1-W105) ESTABLISH AND MAINTAIN THE FIELD ARTILLERY BATTALION TACTICAL OPERATIONS CENTER  
(06-1-W300) PERFORM TOP-DOWN FIRE PLANNING  
(06-2-A098) PREPARE FOR COMBAT  
(06-2-A099) DEVELOP AND COMMUNICATE A PLAN  
(06-4-W108) CONTROL AND COORDINATE FIRE PLANS  
(06-6-A087) CONDUCT FIRE SUPPORT PLANNING  
(06-1-A000) PREPARE THE FA INTELLIGENCE PORTION OF THE FIELD ARTILLERY SUPPORT PLAN  
(06-1-A008) PREPARE THE BATTALION RECONNAISSANCE AND SURVEILLANCE PLAN  
(06-1-A080) REQUEST BATTLE DAMAGE ASSESSMENT  
(06-1-A011) SUPERVISE FIELD ARTILLERY PLANNING  
(06-1-A035) SUPERVISE FA OPERATIONS DURING MISSION PREPARATION AND EXECUTION  
(06-1-A037) CONDUCT FA REHEARSALS (FA COMMANDER)  
(06-1-A045) PARTICIPATE IN REHEARSAL OPERATIONS (BRIGADE FIRE SUPPORT ELEMENT)

(06-1-A046)	SUPERVISE IMPLEMENTATION OF THE FIRE SUPPORT ANNEX
(06-1-A048)	PLAN FIRES IN SUPPORT OF MANEUVER OPERATIONS
(06-1-A049)	PARTICIPATE IN REHEARSAL OPERATIONS (COMPANY FIRE SUPPORT TEAM)
(06-1-A050)	COORDINATE, DIRECT, AND ADJUST OTHER FIRE SUPPORT ASSETS
(06-1-A053)	PREPARE THE FA OPERATIONS ESTIMATE
(06-1-A054)	PUBLISH THE FIELD ARTILLERY SUPPORT PLAN
(06-1-D030)	SUPPORT AN AIRHEAD OPERATION (AIRBORNE UNITS ONLY)
(06-1-E031)	SUPPORT AN AIR ASSAULT OPERATION
(06-4-Q035)	OBSERVE FRIENDLY INDIRECT FIRES (RADAR)
(06-4-U013)	PROVIDE MET SUPPORT
(06-4-U014)	SUSTAIN MET OPERATIONS
(06-5-A006)	ESTABLISH AN OBSERVATION POST (FIRE SUPPORT TEAM)
(06-5-A047)	ESTABLISH FIRE SUPPORT OPERATIONS
(06-1-A002)	CONTROL AND MONITOR FA OPERATIONS
(06-1-A012)	ESTABLISH AND MAINTAIN SITUATIONAL AWARENESS WITHIN THE FA BATTALION
(06-1-A051)	ESTABLISH AND MAINTAIN SITUATIONAL AWARENESS
(06-1-M033)	CONDUCT ON SITE LIAISON WITH CONTROLLING HEADQUARTERS
(06-5-C040)	COORDINATE AND CONTROL FIRE PLAN EXECUTION

#### MISSION: DELIVER FIRES

<b>Collective Task(s)</b>	(06-1-A008) PREPARE THE BATTALION RECONNAISSANCE AND SURVEILLANCE PLAN
	(06-1-A011) SUPERVISE FIELD ARTILLERY PLANNING
	(06-1-A035) SUPERVISE FA OPERATIONS DURING MISSION PREPARATION AND EXECUTION
	(06-1-A037) CONDUCT FA REHEARSALS (FA COMMANDER)
	(06-1-A045) PARTICIPATE IN REHEARSAL OPERATIONS (BRIGADE FIRE SUPPORT ELEMENT)
	(06-1-A054) PUBLISH THE FIELD ARTILLERY SUPPORT PLAN
	(06-1-A079) CONDUCT SITUATION DEVELOPMENT
	(06-3-A002) PLAN AND COORDINATE SURVEY OPERATIONS
	(06-3-A003) PROCESS SURVEY INFORMATION
	(06-4-C017) ESTABLISH AZIMUTH BY SIMULTANEOUS OBSERVATION
	(06-4-C018) ASSUME DIRECTIONAL CONTROL
	(06-4-C019) ESTABLISH AZIMUTH BY ASTRONOMIC OBSERVATION
	(06-4-U014) SUSTAIN MET OPERATIONS
	(06-4-V001) UPDATE PADS BY USING ASSUMED DATA
	(06-4-V002) ESTABLISH SURVEY CONTROL BY THREE POINT RESECTION
	(06-4-V003) USE PADS TO EXTEND SURVEY CONTROL
	(06-4-V004) SUBMIT SURVEY REPORTS AND COMBAT INFORMATION
	(06-4-V005) PLAN AND EXECUTE SURVEY OPERATIONS
	(06-4-V006) ESTABLISH A DECLINATION STATION
	(06-4-V007) EXTEND AZIMUTH BY DIRECTIONAL TRAVERSE
	(06-5-A008) CONDUCT FIRE MISSIONS (FIRE SUPPORT TEAM)
	(06-2-A055) MOVE THE HHB, HSB, OR SVC BATTERY ELEMENT
	(06-1-A002) CONTROL AND MONITOR FA OPERATIONS
	(06-1-A010) PLAN AND COORDINATE A FIELD ARTILLERY RAID

- (06-1-A012) ESTABLISH AND MAINTAIN SITUATIONAL AWARENESS WITHIN THE FA BATTALION
- (06-1-A016) COORDINATE BATTALION AMMUNITION RESUPPLY OPERATIONS
- (06-1-A089) COMMAND AND CONTROL DELIVERY OF FIRES

**MISSION: DEPLOY**

- Collective Task(s)** (06-2-A066) CONDUCT BATTERY PRE/REDEPLOYMENT OPERATIONS
- (63-1-8050.06-A000) DIRECT DEPLOYMENT ALERT ACTIVITIES
  - (63-1-8051.06-A001) ESTABLISH THE EMERGENCY OPERATIONS CENTER
  - (63-1-8052.06-A002) OPERATE THE EMERGENCY OPERATIONS CENTER
  - (63-1-8053.06-A003) SUPERVISE BATTALION DEPLOYMENT/REDEPLOYMENT ACTIVITIES
  - (63-1-8054.06-A004) UPDATE MOVEMENT PLAN/ORDER
  - (63-1-8055.06-A005) COORDINATE PREPARATION FOR OVERSEAS MOVEMENT PROCESSING SUPPORT
  - (63-1-8056.06-A006) PROVIDE DEPLOYMENT PERSONNEL AND ADMINISTRATIVE SERVICES SUPPORT
  - (63-1-8057.06-A007) COORDINATE FAMILY ASSISTANCE SUPPORT
  - (63-1-8058.06-A008) COORDINATE DEPLOYMENT TRAINING SUPPORT
  - (63-1-8059.06-A009) PERFORM DEPLOYMENT INTELLIGENCE SUPPORT FUNCTIONS
  - (63-1-8060.06-A010) PROVIDE DEPLOYMENT LOGISTICS SUPPORT
  - (63-1-8061.06-A011) PERFORM DEPLOYMENT ADVANCE PARTY ACTIVITIES
  - (63-1-8062.06-A012) COORDINATE ONWARD MOVEMENT
  - (63-1-8063.06-A013) COORDINATE REAR DETACHMENT SUPPORT
  - (63-1-8064.06-A014) PERFORM HOME STATION REAR DETACHMENT ACTIVITIES
  - (63-1-8065.06-A015) COORDINATE RECONSTITUTION FOR REDEPLOYMENT
  - (63-1-8066.06-A016) PREPARE REDEPLOYMENT MOVEMENT PLAN/ORDER
  - (63-1-8067.06-A017) PROVIDE REDEPLOYMENT SUPPORT
  - (63-1-8068.06-A018) PERFORM REDEPLOYMENT ADVANCE PARTY ACTIVITIES
  - (63-1-8069.06-A019) PERFORM THEATER REAR DETACHMENT ACTIVITIES
  - (63-1-8070.06-A020) COORDINATE HOME STATION ACTIVITIES

**MISSION: MAINTAIN AND RESUPPLY**

- Collective Task(s)** (06-1-A018) MANAGE AND COORDINATE BATTALION SUPPLY OPERATIONS
- (06-1-A019) DRAW AND TURN IN AMMUNITION (BATTALION AMMUNITION PLATOON/SECTION)
  - (06-1-A038) ESTABLISH AND MAINTAIN THE BATTALION ADMINISTRATION AND LOGISTICS OPERATIONS CENTER (ALOC)
  - (06-1-A057) REPORT AMMUNITION INFORMATION
  - (06-1-A058) COORDINATE HOT REFUEL OPERATIONS
  - (06-1-A059) SUPERVISE SUSTAINMENT OPERATIONS
  - (06-1-A060) COORDINATE AND MONITOR BATTALION CSS OPERATIONS DURING MISSION PREPARATION AND EXECUTION
  - (06-1-A061) PREPARE THE LOGISTIC ESTIMATE
  - (06-1-A062) PREPARE THE LOGISTIC PLAN

(06-1-A063) ESTABLISH AND MAINTAIN A BATTALION SUPPORT OPERATIONS CENTER (BSOC)

(06-1-A064) PROVIDE BATTALION AMMUNITION SUPPORT

(06-1-A073) MANAGE BATTALION SUPPLY RECORDS AND SUBMIT REPORTS

(06-2-A005) PROVIDE ORGANIZATIONAL COMMUNICATIONS/ELECTRONICS MAINTENANCE SUPPORT

(06-2-A007) COORDINATE COMBAT SERVICE SUPPORT FOR A FIELD ARTILLERY BATTERY

(06-2-A078) PERFORM OPERATORS MAINTAINENCE ON COMMUNICATIONS EQUIPMENT

(06-4-A001) MANAGE MAINTENANCE RECORDS AND SUBMIT REPORTS

(06-4-A002) ESTABLISH AN ORGANIZATIONAL MAINTENANCE FACILITY

(06-4-A003) MAINTAIN PETROLEUM, OILS, AND LUBRICANTS

(06-4-C005) DISTRIBUTE AND STORE AMMUNITION (CANNON)

(06-4-C007) TRANSPORT AMMUNITION (BATTALION AMMO PLATOON/SECTION)

(06-4-C011) PREPARE AMMUNITION FOR AIR TRANSPORT

(06-4-Q011) PERFORM UNIT MAINTENANCE ON RADAR EQUIPMENT

(10-2-C230.06-A001) PROVIDE UNIT SUPPLY SUPPORT

(10-2-C317.06-A002) PROVIDE FOOD SERVICE SUPPORT

(12-1-C403.06-A002) REPORT CASUALTIES

(12-1-C404.06-A003) PERFORM STRENGTH ACCOUNTING

(12-1-C405.06-A004) CONDUCT REPLACEMENT OPERATIONS

(12-1-C406.06-A005) PROCESS PERSONNEL AND ADMINISTRATIVE ACTIONS

(12-1-C407.06-A006) ESTABLISH A TEMPORARY ENEMY PRISONER OF WAR COLLECTION POINT

(12-2-C321.06-A007) MAINTAIN COMPANY/BATTERY STRENGTH

(12-3-C216.06-A008) MAINTAIN PLATOON STRENGTH

(16-1-1001.06-A000) CONDUCT COMMAND RELIGIOUS SUPPORT PROGRAM

(43-2-C322.06-A000) PERFORM UNIT LEVEL MAINTENANCE

(43-2-C323.06-A001) MANAGE UNIT MAINTENANCE OPERATIONS

(06-1-A007) PARTICIPATE IN THE OPERATION ORDER PROCESS (S-1)

(06-1-A016) COORDINATE BATTALION AMMUNITION RESUPPLY OPERATIONS

**MISSION: MOVE**

**Collective Task(s)** (06-1-E032) PLAN AND COORDINATE A TACTICAL AIRLIFT

(06-4-Q002) MARCH-ORDER RADAR EQUIPMENT

(03-3-C208.06-A006) CROSS A RADIOLOGICALLY CONTAMINATED AREA

(03-3-C226.06-A011) CROSS CHEMICALLY CONTAMINATED AREA

(06-2-A003) OCCUPY A TACTICAL ASSEMBLY AREA

(06-2-A004) CONDUCT OCCUPATION OF POSITION AREA

(06-2-A022) DEFEND AGAINST AMBUSH

(06-2-A055) MOVE THE HHB, HSB, OR SVC BATTERY ELEMENT

(06-2-E006) PREPARE FOR AIR MOVEMENT

(06-4-U012) DISPLACE A MET SECTION

(06-1-A056) COORDINATE AND CONTROL BATTALION MOVES

(06-3-A004) COMMAND AND CONTROL BATTERY/PLATOON/SECTION MOVEMENT OPERATIONS

**MISSION: SURVIVE**

- Collective Task(s)** (06-1-A065) PLAN AND ENFORCE OPERATIONS SECURITY AND COUNTERINTELLIGENCE OPERATIONS
- (06-1-A071) DEVELOP THE FA-FOCUSED IPB
- (06-1-A080) REQUEST BATTLE DAMAGE ASSESSMENT
- (06-5-A000) PERFORM OBSERVATION AND SURVEILLANCE
- (06-5-A001) PERFORM CRATER ANALYSIS OPERATIONS
- (19-2-C702.06-A000) HANDLE ENEMY PRISONERS OF WAR
- (19-3-3105.06-A001) PROCESS CAPTURED DOCUMENTS AND EQUIPMENT
- (06-1-A079) CONDUCT SITUATION DEVELOPMENT
- (06-1-A088) COMMAND AND CONTROL SURVIVABILITY OPERATIONS
- (06-4-V004) SUBMIT SURVEY REPORTS AND COMBAT INFORMATION
- (03-2-C310.06-0000) CONDUCT A CHEMICAL SURVEY
- (03-2-C312.06-A001) CONDUCT THOROUGH DECONTAMINATION OPERATIONS
- (03-3-C201.06-A002) PREPARE FOR OPERATIONS UNDER NBC CONDITIONS
- (03-3-C202.06-A003) PREPARE FOR A CHEMICAL ATTACK
- (03-3-C203.06-A004) RESPOND TO A CHEMICAL ATTACK
- (03-3-C205.06-A001) PREPARE FOR A FRIENDLY NUCLEAR STRIKE
- (03-3-C206.06-A005) PREPARE FOR NUCLEAR ATTACK
- (03-3-C208.06-A006) CROSS A RADIOLOGICALLY CONTAMINATED AREA
- (03-3-C222.06-A007) RESPOND TO THE RESIDUAL EFFECTS OF A NUCLEAR ATTACK
- (03-3-C223.06-A008) RESPOND TO THE INITIAL EFFECTS OF A NUCLEAR ATTACK
- (03-3-C224.06-A009) CONDUCT OPERATIONAL DECONTAMINATION
- (03-3-C225.06-A010) CONDUCT CHEMICAL RECONNAISSANCE
- (03-3-C226.06-A011) CROSS CHEMICALLY CONTAMINATED AREA
- (06-1-A023) DIRECT NBC OPERATIONS
- (06-2-A002) REINFORCE AND RESTORE THE UNIT PERIMETER
- (06-2-A022) DEFEND AGAINST AMBUSH
- (06-3-A000) PLAN AND CONDUCT DEFENSE AND SECURITY OF THE BATTERY/PLATOON AREA AND MATERIAL
- (06-4-A004) ESTABLISH BATTALION AID STATION
- (06-5-A002) PERFORM ANTIARMOR OPERATIONS
- (06-5-A003) PERFORM DESTRUCTION OF MATERIAL AND RECORDS
- (08-1-1612.06-A000) PLAN FOR COMBAT HEALTH SUPPORT OPERATIONS (BATTALION LEVEL)
- (08-2-0003.06-A001) TREAT CASUALTIES
- (08-2-0232.06-A002) TREAT NUCLEAR, BIOLOGICALLY, AND CHEMICALLY CONTAMINATED CASUALTIES.
- (08-2-0319.06-A005) PROVIDE GROUND AMBULANCE EVACUATION SUPPORT
- (08-2-C316.06-A006) TRANSPORT CASUALTIES
- (12-1-C401.06-A000) REDUCE BATTLEFIELD STRESS
- (44-1-C220.06-A000) USE PASSIVE AIR DEFENSE MEASURES
- (44-1-C221.06-A001) TAKE ACTIVE COMBINED ARMS AIR DEFENSE AGAINST HOSTILE AIR PLATFORMS
- (06-1-A021) PLAN AND COORDINATE MEDICAL OPERATIONS
- (06-1-A038) ESTABLISH AND MAINTAIN THE BATTALION ADMINISTRATION AND LOGISTICS OPERATIONS CENTER (ALOC)

(06-1-A060)	COORDINATE AND MONITOR BATTALION CSS OPERATIONS DURING MISSION PREPARATION AND EXECUTION
(08-2-0314.06-A003)	TREAT UNIT CASUALTIES
(08-2-0316.06-A004)	PROVIDE SICK CALL SERVICES
(08-2-R315.06-A007)	PERFORM FIELD SANITATION FUNCTIONS
(10-2-C002.06-A000)	PERFORM UNIT GRAVES REGISTRATION FUNCTIONS
(10-2-C317.06-A002)	PROVIDE FOOD SERVICE SUPPORT
(12-1-C402.06-A001)	PROVIDE MORALE, WELFARE, AND RECREATION SUPPORT
(12-1-C403.06-A002)	REPORT CASUALTIES
(12-1-C404.06-A003)	PERFORM STRENGTH ACCOUNTING
(12-1-C405.06-A004)	CONDUCT REPLACEMENT OPERATIONS
(12-1-C406.06-A005)	PROCESS PERSONNEL AND ADMINISTRATIVE ACTIONS
(12-1-C407.06-A006)	ESTABLISH A TEMPORARY ENEMY PRISONER OF WAR COLLECTION POINT
(16-1-1001.06-A000)	CONDUCT COMMAND RELIGIOUS SUPPORT PROGRAM
(06-1-A024)	COORDINATE BATTALION DEFENSE AND SECURITY OPERATIONS
(63-1-8050.06-A000)	DIRECT DEPLOYMENT ALERT ACTIVITIES
(71-3-R231.06-0001)	PERFORM RISK MANAGEMENT PROCEDURES

**03-2-C310.06-0000      CONDUCT A CHEMICAL SURVEY**

**Enlisted MOS: COM Skill Level: 1**

Individual Task(s)	
031-503-1014	IDENTIFY CHEMICAL AGENTS USING M8 DETECTOR PAPER
031-503-1015	PROTECT YOURSELF FROM NBC INJURY/CONTAMINATION WITH MISSION-ORIENTED PROTECTIVE POSTURE (MOPP) GEAR
031-503-1020	DETECT CHEMICAL AGENTS USING M9 DETECTOR PAPER
071-329-1005	DETERMINE A LOCATION ON THE GROUND BY TERRAIN ASSOCIATION

**Enlisted MOS: COM Skill Level: 2**

Individual Task(s)

031-503-2001 USE M256 OR M256A1 CHEMICAL AGENT DETECTOR KIT

**Enlisted MOS: COM Skill Level: 3**

Individual Task(s)

031-503-3004 SUPERVISE THE CROSSING OF A CONTAMINATED AREA  
031-503-3008 IMPLEMENT MISSION-ORIENTED PROTECTIVE POSTURE  
031-503-3010 SUPERVISE EMPLOYMENT OF NUCLEAR, BIOLOGICAL, OR CHEMICAL MARKERS  
071-326-5626 PREPARE AN ORAL OPERATION ORDER

**Officer MOS: COM Skill Level: Pre-Commissioned**

Individual Task(s)

04-3303.01-0020 Prepare Squad/Platoon Combat Orders

**Officer MOS: COM Skill Level: 2nd Lieutenant**

Individual Task(s)

04-3303.02-0014 Prepare Platoon or Company Combat Orders  
04-5030.00-2013 Implement Mission-Oriented Protective Posture Based on Threat or Direction  
04-5030.00-2022 Supervise Employment of Nuclear, Biological, or Chemical Markers

**03-2-C312.06-A001 CONDUCT THOROUGH DECONTAMINATION OPERATIONS**

**Enlisted MOS: COM Skill Level: 1**

Individual Task(s)

031-503-1004 PROTECT YOURSELF FROM CHEMICAL AND BIOLOGICAL INJURY/  
CONTAMINATION USING YOUR M17-SERIES PROTECTIVE MASK WITH  
HOOD  
031-503-1006 PROTECT YOURSELF FROM NBC INJURY/CONTAMINATION WHEN  
DRINKING FROM YOUR CANTEEN WHILE WEARING YOUR PROTECTIVE  
MASK  
031-503-1007 DECONTAMINATE YOUR SKIN AND PERSONAL EQUIPMENT USING AN  
M258A1 DECONTAMINATION KIT  
031-503-1008 PROTECT YOURSELF FROM CHEMICAL AND BIOLOGICAL INJURY/  
CONTAMINATION WHILE ELIMINATING BODYWASTE WHEN WEARING  
MOPP4  
031-503-1011 MAINTAIN YOUR M24 OR M25-SERIES PROTECTIVE MASK WITH HOOD  
031-503-1012 PROTECT YOURSELF FROM CHEMICAL AND BIOLOGICAL  
INJURY/CONTAMINATION USING YOUR M24 OR M25-SERIES PROTECTIVE  
MASK WITH HOOD  
031-503-1014 IDENTIFY CHEMICAL AGENTS USING M8 DETECTOR PAPER  
031-503-1020 DETECT CHEMICAL AGENTS USING M9 DETECTOR PAPER  
031-503-1033 DECONTAMINATE YOUR SKIN USING THE M291 SKIN DECONTAMINATING  
KIT (SDK)  
031-503-1034 DECONTAMINATE YOUR INDIVIDUAL EQUIPMENT USING THE M295  
INDIVIDUAL EQUIPMENT DECONTAMINATION KIT (IEDK)

**Enlisted MOS: COM Skill Level: 3**

**Enlisted MOS: 13R Skill Level: 2**

Individual Task(s)

061-294-5201	Evaluate Mission Operations Data for Firefinder Radars
--------------	--

**06-4-Q009 OCCUPY A RADAR SITE**

**Enlisted MOS: 13R Skill Level: 1**

Individual Task(s)

061-275-8003	Operate SINCGARS ICOM
--------------	-----------------------

061-275-8013	Construct Field Expedient Antennas
061-294-5001	Prepare the AN/TPQ-36 (V)8 Shelter for Operation
061-294-5004	Initialize the AN/TPQ-36 (V)8 Radar Set
061-294-5100	Emplace the AN/TPQ-36 Radar Trailer
061-294-5101	Emplace Operations Control Group OK-398(V)/TPQ
061-294-5102	Apply Power to the AN/TPQ-36 Radar
061-294-5103	Initialize the Firefinder Radars
061-294-5105	Emplace the AN/TPQ-37 Radar Trailer
061-294-5106	Emplace the MEP-115A/816A 60-KW Generator
061-294-5107	Apply Power to the AN/TPQ-37 Radar
061-294-5116	Operate Modular Azimuth Positioning System (MAPS)
061-294-5118	Emplace the MEP-112A Generator Set

**Enlisted MOS: 13R Skill Level: 2**

061-294-5001	Prepare the AN/TPQ-36 (V)8 Shelter for Operation
061-294-5004	Initialize the AN/TPQ-36 (V)8 Radar Set
061-294-5116	Operate Modular Azimuth Positioning System (MAPS)
061-302-1002	Set up and March Order an Aiming Circle
061-302-1003	Measure Angles with An M2 Aiming Circle

**Enlisted MOS: COM Skill Level: 1**

## Individual Task(s)

071-329-1001	Identify Terrain Features on a Map
071-329-1002	Determine the Grid Coordinates of a Point on a Military Map
071-329-1005	DETERMINE A LOCATION ON THE GROUND BY TERRAIN ASSOCIATION
071-329-1008	Measure Distance on a Map

**Enlisted MOS: COM Skill Level: 2**

Individual Task(s)

071-329-1004	Determine the Elevation of a Point on the Ground Using a Map
071-329-1006	Navigate from One Point on the Ground to Another Point While Dismounted
071-329-1015	Locate an Unknown Point on a Map and on the Ground by Resection
113-573-8006	USE AN AUTOMATED SIGNAL OPERATION INSTRUCTION (SOI)

**06-4-Q011 PERFORM UNIT MAINTENANCE ON RADAR EQUIPMENT**

**Enlisted MOS: 13R Skill Level: 1**

Individual Task(s)

061-275-8003	Operate SINCGARS ICOM
061-275-8013	Construct Field Expedient Antennas

**06-4-Q035 OBSERVE FRIENDLY INDIRECT FIRES (RADAR)**

**Enlisted MOS: 13R Skill Level: 1**

Individual Task(s)

061-294-5001	Prepare the AN/TPQ-36 (V)8 Shelter for Operation
061-294-5004	Initialize the AN/TPQ-36 (V)8 Radar Set
061-294-5010	Operate the AN/TPQ-36 (V)8 Radar Set in the Friendly Mode
061-294-5100	Emplace the AN/TPQ-36 Radar Trailer
061-294-5101	Emplace Operations Control Group OK-398(V)/TPQ
061-294-5102	Apply Power to the AN/TPQ-36 Radar
061-294-5103	Initialize the Firefinder Radars
061-294-5105	Emplace the AN/TPQ-37 Radar Trailer
061-294-5106	Emplace the MEP-115A/816A 60-KW Generator
061-294-5107	Apply Power to the AN/TPQ-37 Radar
061-294-5113	Operate the Firefinder Radars in the Friendly Fire Mode
061-294-5115	Prepare the Operations Control Group OK-398(V)/TPQ for Operation
061-294-5116	Operate Modular Azimuth Positioning System (MAPS)
061-294-5118	Emplace the MEP-112A Generator Set
061-294-5120	Operate the AN/TPQ-36(V)8 Radar Using the Remote Control Display Terminal (CDT)

**Enlisted MOS: 13R Skill Level: 2**

Individual Task(s)

061-294-5200 Evaluate Initialization of the Firefinder Radars

**Enlisted MOS: 13R Skill Level: 4**

Individual Task(s)

061-275-2001 Employ Field Artillery Communications Systems  
061-284-4211 Advise Maneuver Commander on Employment of Target Acquisition Assets

**06-4-Q045 PERFORM SURVEILLANCE AND LOCATE TARGETS**

**Enlisted MOS: 13R Skill Level: 1**

Individual Task(s)

061-294-5001 Prepare the AN/TPQ-36 (V)8 Shelter for Operation  
061-294-5004 Initialize the AN/TPQ-36 (V)8 Radar Set  
061-294-5010 Operate the AN/TPQ-36 (V)8 Radar Set in the Friendly Mode  
061-294-5100 Emplace the AN/TPQ-36 Radar Trailer  
061-294-5101 Emplace Operations Control Group OK-398(V)/TPQ  
061-294-5102 Apply Power to the AN/TPQ-36 Radar  
061-294-5103 Initialize the Firefinder Radars  
061-294-5105 Emplace the AN/TPQ-37 Radar Trailer  
061-294-5106 Emplace the MEP-115A/816A 60-KW Generator  
061-294-5107 Apply Power to the AN/TPQ-37 Radar  
061-294-5113 Operate the Firefinder Radars in the Friendly Fire Mode  
061-294-5114 Operate the Firefinder Radar in the Hostile Mode  
061-294-5115 Prepare the Operations Control Group OK-398(V)/TPQ for Operation  
061-294-5116 Operate Modular Azimuth Positioning System (MAPS)  
061-294-5118 Emplace the MEP-112A Generator Set  
061-294-5119 Operate the AN/TPQ-36(V)8 in the Hostile Mode  
061-294-5120 Operate the AN/TPQ-36(V)8 Radar Using the Remote Control Display Terminal (CDT)

**Enlisted MOS: 13R Skill Level: 2**

Individual Task(s)

061-294-5200 Evaluate Initialization of the Firefinder Radars

**06-4-U013 PROVIDE MET SUPPORT**

**Enlisted MOS: 93F Skill Level: 1**

Individual Task(s)

061-303-5100 Emplace the AN/TMQ-42 Hydrogen Generator  
061-303-5137 Operate the AN/TMQ-42 Hydrogen Generator

**Enlisted MOS: 93F Skill Level: 3**

Individual Task(s)

061-303-3206 Select Calcium Hydride Charges for Sounding Balloon Inflation  
061-303-5304 Supervise the Hydrogen Generator Operations

**06-4-U014      SUSTAIN MET OPERATIONS**

**Enlisted MOS: 93F Skill Level: 1**

Individual Task(s)

061-303-5100      Emplace the AN/TMQ-42 Hydrogen Generator

**06-4-V001      UPDATE PADS BY USING ASSUMED DATA**

**Enlisted MOS: 13M Skill Level: 1**

Individual Task(s)

113-610-2044      Navigate Using the AN/ PSN-11

**Enlisted MOS: 82C Skill Level: 1**

Individual Task(s)

061-302-1026      Record Field Notes  
061-302-1060      Measure Angles with a 0.2-MIL Theodolite  
061-302-1061      Measure Angles with a 0.002-MIL Theodolite  
061-302-5002      Update the Position and Azimuth Determining System (PADS)  
061-302-5003      Convert to Common Control  
071-329-1004      Determine the Elevation of a Point on the Ground Using a Map

**Enlisted MOS: 82C Skill Level: 2**

Individual Task(s)

061-302-2102      Evaluate Survey Information  
061-302-5008      Plan a Position and Azimuth Determining System (PADS) Survey

**Enlisted MOS: 82C Skill Level: 4**

Individual Task(s)

061-302-4301      Plan a Survey Operation

**Enlisted MOS: COM Skill Level: 1**

Individual Task(s)

071-329-1002      Determine the Grid Coordinates of a Point on a Military Map  
071-329-1005      DETERMINE A LOCATION ON THE GROUND BY TERRAIN ASSOCIATION

**Enlisted MOS: COM Skill Level: 2**

Individual Task(s)

071-329-1015      Locate an Unknown Point on a Map and on the Ground by Resection

**06-4-V002      ESTABLISH SURVEY CONTROL BY THREE POINT RESECTION**

**Enlisted MOS: 82C Skill Level: 1**

Individual Task(s)	
061-302-1015	Compute Comparative Accuracy of Two Distances
061-302-1026	Record Field Notes
061-302-1044	Compute a Three-Point Resection
061-302-1060	Measure Angles with a 0.2-MIL Theodolite
061-302-1061	Measure Angles with a 0.002-MIL Theodolite
061-302-8001	Transmit Information Messages

**Enlisted MOS: 82C Skill Level: 2**

Individual Task(s)	
061-302-2102	Evaluate Survey Information

**Enlisted MOS: 82C Skill Level: 3**

Individual Task(s)	
061-302-3203	Plan a Three-Point Resection
061-302-5024	Check Survey Field Notes and Computations

**06-4-V003 USE PADS TO EXTEND SURVEY CONTROL****Enlisted MOS: 82C Skill Level: 1**

Individual Task(s)	
061-302-1013	Measure Distance with a 30-Meter Steel Tape
061-302-1014	Repair a 30-Meter Steel Tape
061-302-1015	Compute Comparative Accuracy of Two Distances
061-302-1026	Record Field Notes
061-302-1040	Compute Azimuth and Distance From Known Coordinates
061-302-1041	Compute a Traverse and Closing Data
061-302-1042	Compute an Intersection
061-302-1043	Compute a Chain of Triangles
061-302-1060	Measure Angles with a 0.2-MIL Theodolite
061-302-1061	Measure Angles with a 0.002-MIL Theodolite
061-302-1063	Mark Survey Positions with the Position and Azimuth Determining System (PADS)
061-302-1065	Compute Conversion and Transformation of Coordinates and Azimuth
061-302-1069	Prepare the Backup Computer System (BUCS) for Field Artillery Survey Observation
061-302-1070	Compute Azimuth From an Artillery Astronomic Observation
061-302-1132	Compute a Trig Traverse to Determine a Distance
061-302-1202	Measure Distance with the Survey Equipment, Distance Measuring, Electronic-Medium Range (SEDME-MR)
061-302-2179	Perform Operator Preventive Maintenance on the Position and Azimuth Determining System (PADS)
061-302-5000	Perform an Astronomic Observation with a Theodolite
061-302-5002	Update the Position and Azimuth Determining System (PADS)
061-302-5003	Convert to Common Control

061-302-5004	Perform Initialization of the Position and Azimuth Determining System (PADS)
061-302-5005	Transfer the Position and Azimuth Determining System (PADS) to a Helicopter
061-302-5050	Measure an Azimuth with the Azimuth GYRO
061-302-5051	Perform Operator Checks and Services on the Azimuth GYRO

**Enlisted MOS: 82C Skill Level: 2**

Individual Task(s)

061-302-2102	Evaluate Survey Information
061-302-2165	Install the Position and Azimuth Determining System (PADS) in a Vehicle
061-302-3307	Plan a Trig Traverse
061-302-5008	Plan a Position and Azimuth Determining System (PADS) Survey

**Enlisted MOS: 82C Skill Level: 3**

Individual Task(s)

061-302-3201	Plan a Traverse Scheme
061-302-3202	Plan a Triangulation or Intersection Scheme
061-302-3203	Plan a Three-Point Resection
061-302-3217	Determine Datum, Spheroid or Ellipsoid, and Grid System for Area of Operation
061-302-4301	Plan a Survey Operation
061-302-5007	Locate Traverse Error
061-302-5009	Check Conversion and Transformation Computations
061-302-5024	Check Survey Field Notes and Computations

**Enlisted MOS: 82C Skill Level: 4**

Individual Task(s)

061-302-4301	Plan a Survey Operation
--------------	-------------------------

**06-4-V004 SUBMIT SURVEY REPORTS AND COMBAT INFORMATION**

**Enlisted MOS: 13B Skill Level: 4**

Individual Task(s)

061-306-6004	Perform Crater and Shell Fragment Analysis
--------------	--

**Enlisted MOS: 82C Skill Level: 1**

Individual Task(s)

061-275-8003	Operate SINCGARS ICOM
061-275-8009	Operate Mobile Subscriber Radio-Telephone Terminals
061-276-1011	Use SOI Extract
061-302-8001	Transmit Information Messages

## Individual Task(s)

061-275-8014 Supervise the Operation of SINCGARS  
 061-275-8017 Supervise the Operation of Mobile Subscriber Terminal Equipment

**Enlisted MOS: COM Skill Level: 1**

## Individual Task(s)

061-306-6005 Prepare and/or Submit Standard Shelling, Mortaring, and Bombing Report  
 301-348-1050 REPORT INFORMATION OF POTENTIAL INTELLIGENCE VALUE

**Enlisted MOS: COM Skill Level: 3**

## Individual Task(s)

031-503-3005 PREPARE AND SUBMIT NBC 1 REPORTS

**Officer MOS: COM Skill Level: Pre-Commissioned**

## Individual Task(s)

03-3711.04-0001 Report Information of Potential Intelligence Value

**06-4-V005 PLAN AND EXECUTE SURVEY OPERATIONS****Enlisted MOS: 82C Skill Level: 1**

## Individual Task(s)

061-302-5028 Enter a New Survey Control Point in the FED MSR  
 061-302-5029 Update the Survey Control Point File in the FED MSR  
 061-302-5030 Process a Survey Search Request in the FED MSR

**Enlisted MOS: 82C Skill Level: 2**

## Individual Task(s)

061-302-5008 Plan a Position and Azimuth Determining System (PADS) Survey

**Enlisted MOS: 82C Skill Level: 3**

## CHAPTER 3

### Combined Arms Training Strategies

- 3-1 Combined Arms Training Strategies (CATS): The concept of CATS has been with the Army for many years and unit training planners performed CATS planning even before the term existed. Every time a battalion S-3 planned an FTX, CPX, STAFFEX, or any other training exercise, the CATS process was used.
- 3-2 CATS Methodology: CATS is the overarching training strategy that a commander uses to maintain his unit within the band of excellence. The CATS concept requires the use of scarce resources to gain the maximum effect from training dollars and time. Use of embedded training devices and existing simulations/simulators should be an integral part of the training strategy. Elements of a platoon train and master (in isolation) the specific tasks they will perform before the platoon as a whole trains. This concept fits into the "crawl, walk, run" methodology of training. This allows for low OPTEMPO training and ensures the sections know their jobs before the platoon leaders perform the command and control functions. The same methodology applies to the battery, battalion and brigade. This method saves countless resources when used for higher echelon training events. Imagine sending a Battalion to the field for an FTX, and the howitzer section crews are unable to perform fire missions to standard. The training benefit for the staff and the fire support teams would be degraded. The concept of training lower echelon elements before training higher echelons has been used for many years. We now have written and documented strategies to do this.
- 3-3 CATS Development: USAFAS, in conjunction with TRADOC, has developed CATS for all units in the FA community. These strategies were developed using input from various unit commanders in the field (both FA and maneuver) and the experience of the training developers.
- a. TRADOC started developing CATS several years ago in text format using word processors. CATS are now available in a database format from the Reimer Data Repository at <http://155.217.58.100/>. Users must have a user ID and password to use this site. You can obtain that from the site after you log in. SATS users may download CATS events for various unit types and elements from the repository. SATS 4.1 does not have the utility of taking CATS events and turning them into a unit-training event by pointing and clicking. SATS 4.2 has that function. SATS 4.2 allows planners to use CATS that they have downloaded and imported. They can create a training event by massaging the downloaded event. They may not want some collective tasks or the resourcing may not reflect their specific situation. The planner modifies the event to meet the specific situation of the unit. Resources may be changed that reflect the actual resources of the unit. These can be changed for each training exercise as often as the unit wants. It may reflect that two howitzers are inoperative for a certain exercise and the fuel that they would have used will not be used.
  - b. CATS serves several purposes. First it assists the unit planners in developing training programs and exercises for their units. Second it assists the planners in determining resources needed to execute training exercises and will ultimately become the justification for resource requirements. Finally and not so tangible, CATS passes on the historical knowledge and experience of prior commanders. This will greatly decrease the learning curve of new commanders.
  - c. Each CATS event lists a set of tasks that developers have identified as the critical tasks for the event. They are the first thing listed in the event. An example of a CATS matrix is found and explained at the end of this chapter. The CATS matrix is a MSWord document and can only be found on the U.S. Army CATS homepage or the WIDD homepage at USAFAS. The addresses are listed below. The units should download the CATS database from the Reimer data repository for use in SATS. The use of CATS within the SATS program is very different then what you will see in the word processor format. The same data exists but in a different manner.

- d. The second purpose, that of resources, is filled when the commander identifies the required resources for a specific event. Not all events will have resources listed. Some events do not require the expenditure of class III or IV supplies which are the only classes of supplies listed with this version of CATS. The resourcing of a CATS event will become very important when the Army fully integrates the CATS resourcing into the Battalion Level Training Module (BLTM). BLTM will be used as the training resource requirement model for the Army. It will be based on input from units concerning the actual consumption of various classes of supply, OPTEMP, and status of training in the unit. Initially the CATS that have been developed for use by the Army will fill the resourcing requirement. However, as units report actual resources used, the resources for specific units and events will become more accurate.

### 3-4. CATS MATRIX:

- a. The CATS matrix listed here is a copy of a report that is produced in MS Word format. All CATS matrix available outside the Reimer Data Repository will be in MS WORD or HTML format and located at the WIDD homepage under the Training and Doctrine Development Division unit training area. The location of this is <http://155.219.39.98/widd/WIDDToc.html>. This same matrix may be found at <ftp://ftp-dcst.monroe.army.mil/cats/index.htm>.
- b. The CATS matrix below is in Word format and looks like the ones you will find on the WIDD homepage and the CATS homepage. The data that you will download for import into SATS will come in a different format and have all the same information. It will be in database format and capable of viewing only in SATS. SATS 4.1 will not allow the user to alter or change the strategy. SATS 4.2 will allow this however. Notes that explain the elements of the matrix are included in bold and underlined text.

**Frequency:** Quarterly (4.0) This indicates the number of times the event will be trained during a year.

**Types of Events:** BCT FTX, CALFEX, CFX, CPX, FTX This lists the prescribed training event types. More than one event type may be listed. The developer has done this in order to provide the commander a choice of event types based the unit's OPTEMPO and needs.

---

**Training Audience:** COMMAND SECTION , OPERATIONS SECTION , MVR BDE FIRE SPT ELE , 3 MVR BN FIRE SPT ELE , 8 TANK CO FIST , 4 MECH INF CO FIST Who will be trained.

**Means (Event) (TADSS):** 1 - BCT FTX ( Simulations to train FA battalion C2)The means lists the type of event and any training aides, devices, simulations, or simulators that may be used to train this event.

**Estimated Duration:** 216 Hours Length of the event

**Replication of Conditions (A-D):** B This indicates the ability of the event to replicate warlike conditions. An "A" indicates a CTC type training event. "B" is some sort of live training not performed at a CTC. "C" and "D" indicates still lower quality training replication. "C" would mean an event that falls into the crawl or walk level of training and does not replicate warlike conditions very well. "D" indicates even less warlike conditions than "C".

**Multi-echelon Training:** FTX for HHB tasks in support of the division artillery CP using (06366L000), HHB/SVC BTRY MOVE (06366L100), HHB/SVC BTRY -PROTECT THE FORCE (06366L100), DIGITAL SUSTAINMENT TRAINING (06366L100), STAFFEX for Provide Fire Support using Simulation to support digitization/staff training (06366L100), STX for PERFORM LOGISTICS AND CSS (06366L100), TmTrng for Artillery survey training (06366L100) This is the training that will take place at the same time the main training is happening. The listed events are those that will take place simultaneously with the actual training of the staff in command and control functions. These events are listed for the same type of unit as this unit and may be found in the same set of CATS matrix as this CATS matrix.

**Critical Training Gates:**

**PURPOSE:** To attain and sustain proficiency on all battalion METL tasks. To demonstrate collective task proficiency at the Bn and Brigade Combat Team (BCT) level.

**OUTCOME:** The battalion is proficient in providing timely and accurate fires in support of the BCT and the commanders intent.

**EXECUTION GUIDANCE:** This action trains the battalion in all METL tasks. The commander must select an action based on his training assessment and the resources available to ensure that this task selection is trained 5 times a year. The FTX proposed in the CATS is a 216 hour FTX which may be extended to 254 hours to include the Deploy/Redeploy tasks. Two FTXs a year are suggested; one is the EXEVAL for the BCT. The cannon battalion FTX may be nested in the BCT FTX. Gunnery tasks are contained in the artillery tables appendix B, ARTEP 6-115- MTP and are included in this task selection, the battalion FTX, the CALFEX, and the battalion STX and LFX. This is specific guidance that explains the event and the methodology used to develop and train it.

**This is a new type event for the same set of tasks. However this would be an EXEVAL. This can be seen when you look under the Means line. The rest of the matrix is exactly like the parts above. Each different means will have the same types of listings.**

**Comments: (Includes purpose of event; outcome supported; execution guidance about execution of the event; constraints posed by TADSS/et al)**

**PURPOSE:** To train the BCT staff and leaders and all Fire Support Elements on the tasks required to synchronize, coordinate and integrate all direct and indirect fires available to the BCT, safely and with maximum effects on the enemy in support of the plan and the commander's intent.

**OUTCOME:** The BCT leaders and staff and FSO/FSE's are proficient at integrating, coordinating and synchronizing all fires available to the BCT.

**EXECUTION GUIDANCE:** The BCT events assume participation of the Brigade HQ and Command Group necessary to exercise the habitual staff/fire support relationships that require training in the DS battalion. The DS battalion is not resourced to support all TF training in the supported brigade with more than the dedicated Fire Support Slice. Operations are conducted with sufficient rigor to train the FSO/FSEs to become proficient at tasks such as Developing a Fire Support Plan, Coordinating Fire Support, Executing Fire Support, Executing Immediate CAS, and Keeping the DS FA Bn Updated. The training focus is on command and control of subordinate forces and the synchronization of supporting components such as intelligence functions in the conduct of fire support operations. Many of the tasks in this selection have a corresponding automated task or one that supports that task. These automated tasks are determined by the hardware/software version of automation available to the FSO. The growth of digitization of the battlefield and the future demands on situational awareness require leader training on these automated systems.

- 3-5. The use of CATS will assist commanders in their training efforts. It will ensure the commander has a sense of direction and has a starting point. The FA CATS have been developed Army wide in conjunction with maneuver units. The true combined arms methodology requires that we in the FA train with the units we support. We have ensured horizontal integration of our events. The maneuver units have the same number and type of major training events. I.e. One CTC rotation and one brigade FTX per year. This corresponds to the one CTC rotation and one FTX EXEVAL per year by a DS FA battalion. The execution guidance will also prompt commanders to ensure certain events are trained in conjunction with maneuver units. This will ensure we are performing "combined arms" training and not training the FA in isolation.

## CHAPTER 4

### Training Support Packages

- 4-1 Training Support Package (TSP) definition: A TSP is a plan (template) that has been designed around specific CATS events. The TSPs all use a common format. The major areas of the TSP include the tasks selected for training, the resources required and the execution guidance with a master events lists and possible scenarios when required
- 4-2 These TSPs will not fit every situation nor do they offer a one product fits all method of training. In some cases however, a commander decide to use a TSP in it's original form without any alterations. TSPs give commanders a starting point from which they may plan training events. A TSP tells "How To Execute Training"; the CATS strategy represents "What and Why to Train". CATS show how a training event fits into the overall strategy to prepare a unit for combat. TSPs take that strategy and help turn it into a real training event with real training goals. A TSP will give the commander an excellent idea about the resources required to perform a specific type of training event. They will also have a scenario, master event list, or time ordered event list to act as a stimulus for the event. Many of the TSPs will also have digital scenarios developed for DSTATS. Having these scenarios in the digital format and the stimulus already prepared will save many hours of work. Presently we have the following TSPs under development. As they become available they will be put on the WIDD homepage for use.

155 SP HOWITZER BN FDC EXERCISE  
 155 SP HOWITZER POC CERTIFICATION  
 MVR BDE FSE EXERCISE 155 SP BN  
 MVR BN FSE EXERCISE 155 SP BN  
 MVR BN FSE EXERCISE 105 T BN  
 MVR CO FIST EXERCISE 155 SP BN  
 MVR CO FIST EXERCISE 105T BN  
 FA BDE CPX  
 DIVARTY CPX  
 MLRS BN FDC EXERCISE  
 MLRS BTRY EXEVAL  
 155 SP BATTALION EXEVAL

- a. Commanders should use the parts of the TSP that best fit the specific event being planned. This is very easy to do because the TSPs are in MS Word format and may be edited in that environment. The entire TSP or select sections may be downloaded.
  - b. The TSP may be cut up to put OC or evaluator packets together. The T&EO task steps for the specific event are included in the TSP. They may also be found in SATS if the current task data for the MTP is in the Database.
  - c. Not only do the TSPs show the approximate amount of resources required to conduct a specific event, but also they have evaluator requirements and evaluator packets already built in.
- 4-3 At the present time we have four TSPs published; the MLRS, Paladin, 105T, and 155T section certification (dry) TSPs. Currently several contractors are developing 12 more TSPs. As these TSPs are completed, they will become available on the WIDD homepage at <http://155.219.39.98/doctrine/wddfrm.htm>. These documents will be in MS Word format and may be downloaded for use by units. The scenarios and events stimulus for DSTATS may also be downloaded from that site. The TSPs also use a digital map for some of the events. The map software and digital maps are available at the same sight.

- 4-4 The TSPs are task based and support specific CATS events. The M109A6 Paladin section certification supports the CATS event of "Perform Howitzer Section Tasks."
- 4-5 The TSPs have been written to allow use of existing training aides, devices, simulations, and simulators (TADSS). When required, a scenario will be developed and put into the DSTATS format. This will be available for download from the WIDD homepage. The use of DSTATS will greatly simplify training. The unit will no longer have to develop its own scenario or enter it into DSTATS.
- 4-6 The TSP developers have also incorporated the use of digital maps. This makes the conduct of certain events such as CPXs or STAFFEXs easier. There is no need to find mapsheets for specific areas. We will include most major training installations in the map index and overlays are also available for those areas. Presently we have only one map available and all TSPs have been built around that map. Units using the digital maps may project them onto a screen or use them on a big screen monitor. The software needed to display them is called Falcon View and it is available from the WIDD homepage. The digital map capability may not be available until mid year of 2000. In addition to the TSPs and all supporting materials being made available on the world wide web, we are also offering them in CD format. You may request them by going to the WIDD homepage and navigating to the unit training section. You will find a button that will allow you to request them on a CD. You may also call Henry Koelzer at the number listed below.
- 4-7 We welcome your input concerning the TSPs and any ideas you may have about the improvement of them.
- 4-8 The point of contact for all TSPs is Henry Koelzer, USAFAS.

## CHAPTER 5

### Training and Evaluation Outlines

5-1. Introduction. This chapter contains the training and evaluation outlines for the unit. T&EOs are the foundation of the MTP and the collective training of the units. T&EOs are training objectives (task, conditions, and standards) for the collective tasks, which support critical wartime operations. The unit must master those collective tasks designated by the unit's missions essential tasks list (METL) to perform its critical wartime operations. For collective live-fire standards, the trainer needs to refer to the applicable artillery tables (Appendix B) to determine the tasks to perform and the time standards (Appendix A) to identify the standards.

5-2. Structure. The T&EOs in this chapter are listed in Table 5-1. The Mission-to-Collective Task Matrix in Chapter 2 lists the T&EOs required to train the critical wartime missions according to their specific BOS.

5-3. Format. The T&EOs are prepared for every collective task that supports critical wartime operation accomplishment. Each T&EO contains the following items:

- a. Element. This identifies the unit or unit element(s)/section(s) that perform the task.
- b. Task. This is a description of the action to be performed by the unit, and provides the task number.
- c. References. These are in parenthesis following the task number. The reference, which contains the most information (primary reference) about the task, is listed first and underlined.
- d. Iteration. Used to identify how many times the task is performed and evaluated during training. The "M" identifies when the task is performed in MOPP4.
- e. Commander/Leader Assessment. The unit leadership uses this to assess the proficiency of the unit in performing the task to standard. Assessments are subjective in nature and use all available evaluation data and submit leader input to develop an assessment of the organization's overall capability to accomplish the task. The commander must use his experience and METT-TC to give an honest assessment of his unit's training status. This assessment will always be subjective. We have attempted to make the assessment as unambiguous as possible. We recommend using the following rating criteria.
  - (1) T - Trained. All critical task steps as indicated by a "+" are performed and the element attains the task standard. The element attains 70% of all non-critical task steps. "T" (trained) means that the unit can successfully perform the task to standard. Only sustainment training is needed. The leader/OC or trainer judges task performance to be free of significant shortcomings. Practice on "T" tasks is designed to keep soldiers from losing proficiency.

(2) P - Needs practice. The element attains the task standard and performs all critical task steps but fails to perform one or more non-critical task step. "P" (practice) means that the unit can perform the task with some shortcomings. The shortcomings are not severe enough to require complete retraining. Only refresher training is required.

(3) U - Untrained. The unit fails to attain the task standard and fails to perform one or more critical task step. "U" (untrained) means that the unit cannot perform the task to standard. The leader must prepare a comprehensive strategy to train all tasks not executed to standard.

(4) Communications allows the field artillery to perform its primary mission of delivering fires. We have a vast and varied array of communications systems in the inventory. These systems offer varying degrees of secure capability. SINGARS allows units to establish frequency hopping

secure nets while VRC-12 series radios allow units to establish secure communications with the KY-57. In those tasks that require the establishment of communications, the elements must establish the most secure communications their equipment allows. They will receive a "NOGO" for the task step of establishing communications if they fail to do this.

f. Condition. The task condition defines the situation or environment in which the unit is to perform the collective task.

g. Task standard.

(1) The task standard states the performance criteria that a unit must achieve to successfully execute the task. This overall standard should be the focus of training. Every soldier should understand it.

(2) The trainer or evaluator determines the unit's training status using performance observation measurements (where applicable) and his judgment. The unit must be evaluated in the context of the METT-TC conditions. These conditions should be as similar as possible for all evaluated elements. This will establish a common base line for unit performance.

h. Task Steps . This is a listing of actions that is required to complete the task. These actions are stated in terms of observable performance for evaluating training proficiency. The task steps are arranged sequentially along with supporting individual tasks and their reference. Leader tasks within each T&EO are indicated by an asterisk (\*). Each critical task step is indicated by a (+).

i. GO/NO-GO column. This column is provided for annotating the platoon's performance of the task steps. Mark each step as a "GO" or "NOGO". Units must establish the most secure communications they are capable of when a task step indicates "Establish communications" in order to receive a "GO".

j. Task performance/evaluation summary block. This block provides the trainer a means of recording the total number of task steps evaluated and those evaluated as "GO". It also provides the evaluator a means to rate the units demonstrated performance as a "GO" or "NO-GO". It also provides the leader with a historical record for five training iterations.

k. Supporting Individual Tasks. This is a listing of all supporting individual tasks required to correctly perform the task. Listed are the reference, task numbers, and task titles.

**ELEMENT:** MVR BDE FSE

**TASK:** ANALYZE TARGETS (06-1-C095)  
 (FM 6-20-10) (FM 6-20-40) (FM 6-20-50)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The brigade is preparing for or is engaged in combat operations. Communications have been established. Reports are being provided. The S3 is developing an operation order/operation plan (OPORD/OPLAN). Intelligence assets are providing data on the threat. The brigade commander orders the analysis of either conventional, nuclear, or chemical targets. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The fire support element (FSE) uses the targeting process of decide, detect, deliver, and assessment to recommend targets for attack, IAW applicable FMs and commander's guidance.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<ul style="list-style-type: none"> <li>* 1. The brigade commander directs the targeting effort. He receives support from the fire support coordinator (FSCoord) who advises him on all aspects of fire support (FS) planning, coordination, and synchronization with maneuver and the maneuvering of field artillery (FA) assets. The brigade commander provides guidance for the targeting effort. This guidance should include the following:                             <ul style="list-style-type: none"> <li>a. What critical tasks must be accomplished by fires. This includes the "when" and "why" it must be accomplished in relation to other events in the battle.</li> <li>b. How he intends to shape the battlespace with fires in terms of time and space.</li> <li>c. The critical enemy formation or function that, if attacked by fires, will lead most directly to mission accomplishment.</li> <li>d. The desired end state for each essential FS task.</li> <li>e. Combat assessment requirements.</li> </ul> </li> <li>* 2. To support the brigade commander in developing guidance, the FSCoord provides the following input to the commander:                             <ul style="list-style-type: none"> <li>a. Recommends targets to be engaged.</li> <li>b. Recommends delivery/attack system best suited for attack.                                     <ul style="list-style-type: none"> <li>(1) Ensures system meets established guidance (effects) and targeting objective with the least expenditure of ammunition.</li> <li>(2) Ensures sufficient ammunition by type is available to support the fire plan.</li> </ul> </li> <li>c. Recommends clearance-of-fires guidance.</li> </ul> </li> <li>* 3. As a part of the targeting process, the brigade S2 provides the following information:                             <ul style="list-style-type: none"> <li>a. High-value targets (HVT) based on target arrays.</li> <li>b. Enemy capabilities and projected course of action (COA).</li> </ul> </li> <li>* 4. The brigade S3 works closely with the S2, fire support officer (FSO), and targeting officer to prioritize the TSM before the commander approves it. Priorities should address:                             <ul style="list-style-type: none"> <li>a. What targets should be engaged.</li> <li>b. When the targets should be attacked.</li> <li>c. The desired effects on the target.</li> </ul> </li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 5. The commander approves the TSM developed by the targeting team. During wargaming, the S2 determines what targets brigade assets can acquire and what targets are translated into requests to higher headquarters.+</p> <p>* 6. The direct support (DS) FA battalion targeting officer facilitates the exchange of information between the brigade and the FA battalion S2s and the FSE. Specific functions he performs are:+</p> <ul style="list-style-type: none"> <li>a. Helps the S2 and the FSO determine specific target aspects and vulnerabilities. This includes target location error requirements and dwell times for a viable attack. He and the S2 are responsible for producing the target selection standards for the brigade.</li> <li>b. States the enemy vulnerabilities created by loss of certain functions or capabilities.</li> <li>c. Under the FSO's guidance, formulates and tracks the attack guidance used in the brigade and DS FA battalion CP.</li> </ul> <p>7. The division military intelligence (MI) battalion provides an intelligence and electronic warfare (IEW) support officer to the brigade to serve as a liaison with the MI unit supporting the brigade. The IEW support officer, in coordination with the S2 and S3, coordinates IEW targeting tasks with the supporting MI unit and the MI battalion.</p> <p>* 8. The brigade XO supervises and facilitates the actions of the targeting team as they perform conventional target value analysis (TVA). +</p> <ul style="list-style-type: none"> <li>a. Receives target attack criteria from the commander during wargaming.</li> <li>b. In conjunction with the S2 and targeting officer, analyzes enemy target array, considering:               <ul style="list-style-type: none"> <li>(1) Target value analysis of HVTs to produce HPTs.</li> <li>(2) Commander's target engagement priorities.</li> <li>(3) Engagement criteria.</li> <li>(4) Accuracy of target location.</li> <li>(5) Target characteristics (such as composition, disposition, degree of protection, size, location, shape, and mobility).</li> <li>(6) Terrain and weather.</li> <li>(7) Weapons and munitions available.</li> <li>(8) Observers available.</li> </ul> </li> </ul>

**CONDITIONS:** The battalion is conducting, or preparing to conduct, combat operations. They may be deployed in a maneuver unit zone/sector or in a Tactical Assembly Area (TAA). The battalion has received the higher HQ WARNO, OPORD, OPLAN, FASP, Fire Support Annex and/or FRAGO. The battalion has received higher HQ intelligence products consisting of at least an intelligence estimate, a Modified Combined Obstacle Overlay (MCOO) and a Situational Template (SITTEMP) for each enemy COA the unit must consider. The S3 has gathered the battle staff to initiate (or continue, for follow-on operations) planning using the Military Decision Making Process (MDMP).

Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The S2/intelligence section analysis using FA-focused IPB refines the higher HQ intel products to account for (1) artillery-specific planning considerations, (2) threats to subordinate organic and attached elements, and (3) assigned High Payoff Targets (HPTs) - all prior to conducting COA development.

Note: If higher or supported HQs has not provided intelligence products (or complete ones), the commander may adjust the amount of information (as indicated in the performance measures below) expected for each of the products above.

**TASK:** SUPPORT AN AIRHEAD OPERATION (AIRBORNE UNITS ONLY) (06-1-D030)  
(FM 100-27)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The battalion conducts preparation (in the corps marshaling area [CMA] or intermediate staging base [ISB]) and deploys with a mission to provide fire support for the air head phase of an airborne operation. The battalion conducts parallel planning (using the military decision making process [MDMP]) with the supported force in the CMA or ISB. The battalion has received the OPORD from the supported force (to include the fire support plan, assault plan, ground tactical plan, loading plan, and the air/land plan). The FA support plan has been developed and disseminated.

Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The battalion must provide effective fires in support of the maneuver force during the air head phase of an airborne operation. The operation is executed IAW the supported force OPORD, the FA support plan, and the unit TSOP.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>NOTE: The battalion is in the CMA or ISB.</p> <ul style="list-style-type: none"> <li>* 1. The battalion commander, with the assistance of the S3 and staff, prepares and gives an updated mission briefing to the following personnel:               <ul style="list-style-type: none"> <li>a. Battery commanders.</li> <li>b. Staff Officers.</li> <li>c. Target acquisition radar technician and survey chief.</li> <li>d. Brigade and battalion FSOs.</li> <li>e. The S3 establishes a timetable for execution of out loading sequence, if not established by the airborne SOP (ASOP).</li> <li>* 4. The S3 ensures loading plans (personnel and heavy drop) and assembly plans are briefed and conduct IAW OPORD, TSOP, and ASOP. +</li> <li>* 5. The battalion commander and S3 ensure that the battalion rehearses the fire support plan and FA support plan and participates in combined arms rehearsals. They verify:               <ul style="list-style-type: none"> <li>a. Planned programs and schedules.</li> <li>b. Ammunition to support offensive and defensive fires to support the ground tactical plan and expansion of the air head.</li> <li>c. All batteries participating in air head operations and any additional requirements such as team support.</li> </ul> <p>7. The operations section coordinates with the S4 for resupply.</p> <p>8. The battalion conducts pre-jump training (as part of the brigade or battalion tasks force).</p> <p>NOTE: The FA battalion has moved to the HDRS.</p> <p>9. The operations section coordinates the battalion movement of all equipment to be dropped by parachute to the HDRS. +</p> <p>*10. The S3 ensures that continuous security of the HDRS is maintained.</p> <p>*11. The S3 ensures that rigging deficiencies noted during inspections are corrected.</p> <p>*12. The S3 ensures that elements are loaded IAW cross load plan.</p> <p>NOTE: The FA battalion is dropped into the air head.</p> <p>*13. The battalion assembles all personnel immediately upon entry into the air head and enters the appropriate communications nets.</p> <p>14. The battalion derigs equipment and personnel immediately upon arrival on the DZ.</p> <p>15. The battalion rapidly occupies position areas that facilitate continual indirect fire support for the air head expansion and security elements outside the air head. +</p>

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The battery is conducting combat operations and is ordered to occupy an assembly area. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The advance party occupies the tactical assembly area IAW commander's guidance and unit TSOP. The battery moves into their assigned position completes preparation as specified by the OPORD. The battery complies with the rules of engagement (ROE).

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The advance party, under the supervision of the BC, moves to the assembly area and prepares the area for the main body arrival. +</p> <ul style="list-style-type: none"> <li>a. Establishes initial security.</li> <li>b. Reconnoiters the area.</li> <li>c. Prepares the area IAW the TSOP.</li> <li>d. Assigns the section sectors.</li> <li>e. Checks for and marks or removes enemy obstacles and mines.</li> <li>f. Checks the area for NBC contamination.</li> <li>g. Selects the anti-armor firing positions on armor avenues of approach.</li> <li>h. Establishes internal/external wire communications.</li> <li>i. Selects element locations.</li> </ul> <p>2. As the battery elements clear the release point, advance party members, waiting in covered and concealed positions, move out to guide them to selected or designated area without halting.</p> <p>3. Elements do not interfere with other elements during occupation. +</p> <p>4. The battery establishes and maintains local security from enemy air and ground forces. +</p> <ul style="list-style-type: none"> <li>a. Section chiefs confirm defense sectors with the BC/1SG.</li> <li>b. OPs are placed on critical avenues of approach based on the commander's guidance. The OPs establish communications.</li> <li>c. Unit maintains noise, light, and camouflage discipline.</li> <li>d. Unit conducts patrols IAW the TSOP.</li> </ul> <p>5. The unit prepares for the next mission IAW the TSOP. +</p> <p>* 6. The BC/1SG coordinates, as a minimum, with the element on the left and right. +</p> <ul style="list-style-type: none"> <li>a. Establishes responsibility for overlapping enemy avenues of approach between adjacent sections.</li> <li>b. Exchanges information on OP locations and unit signals.</li> </ul> <p>* 7. The BC/1SG develops a defense plan. +</p> <ul style="list-style-type: none"> <li>a. Prepares the defense diagram.</li> <li>b. Employs all anti-armor weapons.</li> <li>c. Establishes automatic weapons left and right limits and/or the final protective line.</li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
d. Emplaces mines and obstacles, ensuring they are covered by fire. * 8. The BC/1SG forwards the defense sketch to the battalion TOC; retains one copy for unit use. 9. On leaving the tactical assembly area (TAA) the battery accomplishes the following: + a. Recovers all mines and obstacles. b. Eliminates signs of the unit's presence in the TAA (trash, aiming stakes, communication wire, etc.). c. Does not leave anything of intelligence or materiel value.

**TASK:** USE PADS TO EXTEND SURVEY CONTROL (06-4-V003)  
(FM 6-2)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The battery is conducting combat operations and survey operations are being performed. The survey plan has been issued and directs that survey control be extended by use of PADS. The supporting survey element has provided a SCP for cannon within 25 kilometers of the battery and within 30 kilometers of MLRS firing platoons. The survey section is equipped with PADS, a survey set supplementary equipment, T-2 or a T16 theodolite, GPS, and 1:50,000-scale maps of the area. The PADS has been initialized. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The survey section/PADS party extends survey control to all designated elements IAW the survey plan using 10 minute zero velocity corrections. The survey is closed on the starting point or a second known point of equal or higher accuracy, and PADS accepts the closure update data.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
* 1. The chief surveyor or team chief accurately plots known SCPs on the map. + * 2. The chief surveyor or team chief locates and identifies SCPs on the ground. + 3. The team performs initial update of PADS. + 4. The team establishes survey control IAW the survey plan and does the following: a. Performs 10 minute zero velocity corrections. b. Performs position and azimuth marks with plumb bob. c. Performs position and azimuth marks without plumb bob if necessary. 5. The team closes survey on starting point or second known point of equal or higher accuracy using 10 minute zero velocity corrections. + NOTE: If PADS accepts closure update data, the survey is considered a closed survey. 6. The team recalls and records adjusted data. NOTE: The PADS should not be shut down until the mission has been completed. 7. The team performs shutdown procedures on PADS.

**TASK STANDARDS:** Establish a declination station within the criteria stated in the mission order and FM 6-2.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
* 1. Chief surveyor selects the location of the declination station. + a. Selects a location convenient to using units. b. Selects a location away from magnetic attractions.  2. Survey section performs field work. a. Selects at least one (preferably two) azimuth mark(s) located between 300 and 1,000 meters from the declination station. b. Determines the grid azimuth to the azimuth mark(s) by using either astronomic observation; PADS; survey instrument, azimuth gyro, lightweight (SIAGL); or directional traverse. c. Measures the vertical angles to the azimuth mark(s). d. Records field notes.  * 3. Chief surveyor checks data for compliance with fourth-order specifications. + a. Checks traverse field notes and computations. b. Checks astronomic observation field notes and computations.

**CONDITIONS:** A unit is contaminated with a persistent chemical agent during combat operations. Time is available to conduct reconstitution, to include thorough decontamination. A supporting smoke/decon (or decon) platoon is tasked to conduct the thorough decontamination mission. This task is always performed in MOPP4.

**TASK STANDARDS:** The smoke/decon platoon sets up the detailed equipment decon site and removes all contamination from the equipment/vehicles. The contaminated unit sets up the detailed troop decon (with technical advise from the decon platoon) and processes all personnel. The responsible units properly close the site and report the location to higher headquarters.

 (FM 3-5) (STP 21-1-SMCT) (STP 21-24-SMCT)

**ITERATION:** 1M 2M 3M 4M 5M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The unit has conducted combat operations within an NBC contaminated area. Personnel are experiencing degraded combat effectiveness. MOPP gear is in danger of being penetrated by contamination and there is little time for planning. Time and the tactical situation permit the unit to conduct MOPP gear exchange and vehicle wash down. Site security is established. Replacement MOPP gear for each soldier, all organic equipment (such as NBC detection, decon, and marking materials; pioneer tools; communications equipment; vehicles and/or aircraft) and supplies, decon unit support, decon site and link up point locations have been established, and FM 3-5 are on hand/available. This task is always performed in MOPP4.

**TASK STANDARDS:** The unit decontaminates their individual gear, conducts the MOPP gear exchange (utilizing the buddy system) without sustaining additional casualties from NBC contamination. Limit the contamination transfer hazard by removing gross chemical contamination on equipment, and minimize contamination on soldiers IAW FM 3-5. Reduce radiological contamination to negligible risk levels IAW FM 3-5. Reduce chemical and biological contamination until it is safe to unmask.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
* 1. Element leader selects a route. + a. Uses NBC 5 (Chemical) report and/or recon reports to select a route. b. Selects route that minimizes exposure consistent with the mission. c. Obtains route clearance and approval.  2. Element prepares for crossing the area. + a. Assumes MOPPP level 4 for crossing the area. b. Ensures all drivers, vehicle commanders, and leaders know route of march and/or have strip maps. c. Ensures vehicles are buttoned up (mounted movement). d. Places externally stored equipment inside or covers with available material. e. Attaches M9 detector paper to personnel and vehicles to provide warning of contamination.  3. Element crosses the area. + a. Avoids low ground, overhanging branches, and brush to the extent allowed by the tactical situation. b. Conducts dismounted movement, if necessary, as rapidly as possible. c. Crosses area as quickly and carefully as possible.  4. Element exits the contaminated area. + a. Checks for casualties. b. Reports casualties (if applicable). c. Conducts necessary decontamination. d. Continues the mission.

**TASK:** ESTABLISH BATTALION AID STATION (06-4-A004)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The battalion is conducting combat operations. The general area for the battalion aid station has been designated. The battalion requires medical support beyond the capability of the combat medic. The tactical situation allows for the establishment of a battalion aid station. Adequate medical supplies and equipment are available at the support aid station to support the battalion. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The physician assistant/emergency treatment NCO selects and coordinates a site for the battalion aid station ICW with S3/operations. Ensures that the battalion aid station is established IAW the commander's guidance and unit TSOP.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The physician assistant/emergency treatment NCO selects and coordinates a site for the battalion aid station within the designated area and does the following: +</p> <ul style="list-style-type: none"> <li>a. Selects an area that provides the best cover, concealment, drainage, and access to and egress from evacuation vehicles and helicopter landing site.</li> <li>b. Obtains approval to occupy selected site from S3/operations section.</li> <li>c. Notifies supporting medical facility, and all supported units of movement of battalion aid station, location of new site, and estimated time to be operational.</li> <li>d. Examines entire selected site for placement of all medical treatment team assets and selects areas for all assets that do not impede access to and egress from the battalion aid station or patient flow.</li> <li>e. Ensures that the battalion aid station is established IAW the commander's guidance/TSOP.</li> </ul> <p>2. The medical treatment team members establish the battalion aid station and do the following: +</p> <ul style="list-style-type: none"> <li>a. Establish the battalion aid station IAW physician assistants guidance and TSOP.</li> <li>b. Position all supplies and medical equipment sets so as not to impede patient flow.</li> <li>c. **CONDITIONS:** Unit receives a warning order from the higher HQ staff element to prepare for treatment and decontamination of an estimated 10 to 20 NBC casualties with an ETA of 60 to 90 minutes. A decontamination and treatment area outside of the unit area was previously identified in the layout plan and has been established to receive casualties. Protective equipment and NBC supplies, to include antidotes, are available. Nonmedical personnel from supported units are on hand to assist the unit NBC team in performing patient decontamination. Personnel have been ordered to the appropriate MOPP level by the commander. Unit NBC team is prepared to assist with monitoring and/or screening nuclear and chemical casualties for contamination. A helicopter landing area for NBC casualties and an ambulance and contaminated vehicle turn around point have been identified. A hot line has been constructed. Mass casualty procedures may be required if the number of casualties exceeds unit capabilities. This task may be performed under all environmental conditions. The unit may be subject to attack by threat forces, including air, ground, NBC, or DE attack. NOTE: Personnel forward of the hot line must be in MOPP 4. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** NBC treatment and decontamination area is established prior to the arrival of casualties. Patient(s) are treated and decontaminated IAW FM 8-10-7, FM 8-230, FM 8-285, and TSOP.

<p>Notes: Aim points for propeller-driven aircraft are the same as for helicopters. Select aim points in football field lengths---one football field equals approximately 91meters. Once the lead distance is estimated, the riflemen and machine gunners aim and fire their weapons at the aim point until the aircraft has flown past that point. Maintain the aim point, not the lead distance. The weapon should not move once the firing cycle starts. Establish preselected aim points when the platoon is in a static position. Accuracy in relation to target hits is not necessary. Accuracy in relation to the aim point is not necessary. A coordinated high volume of fire that the aircraft has to fly through will achieve the desired results. **TASK:** DISTRIBUTE AND STORE AMMUNITION (CANNON) (06-4-C005)  
 (TM 9-1300-206)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The battalion is conducting combat operations. CSS guidance has been received from higher HQ. The battalion trains are established. Ammunition is being used, and the batteries require ammunition support or resupply. The battalion ammunition section is directed to store ammunition. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The battalion ammunition section distributes and stores ammunition IAW the commander's guidance, TSOP and all applicable FMs/TMs.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. The section replenishes ammunition at the time and in the amounts directed by the commander.+ a. Inspects ammunition for serviceability and damage as it is distributed. b. Collects all unserviceable ammunition and ensures it is stored separately from serviceable ammunition.  2. The ammunition officer and sergeant maintain an ammunition storage area by ensuring all ammunition is stacked and marked by type, lot number, and weight zone. (weight zone for cannon units only) NOTE: Ensure ammunition is protected from weather by using 6 inches of dunnage if ammunition is on the ground, covering all ammunition with tents or tarpaulins, and allowing for ventilation. (cannon units only) a. Ensure all ammunition is protected from the enemy and enemy fire by concealing the storage area. b. Establish and maintain security by using concertina wire, posting guards and restricting access to the area. NOTE: If the tactical situation is such that the loss of ammunition to the enemy is imminent and evacuation is not feasible or possible, sub task 3 applies.  3. The senior individual present makes the decision to destroy only when the situation precludes evacuation. a. Ensures that all ammunition is destroyed and that no serviceable ammunition falls into enemy hands. b. Destroys ammunition by using demolition charges IAW applicable TMs. c. Notifies higher HQ when ammunition is destroyed.

**TASK:** PARTICIPATE IN FIRE SUPPORT REHEARSAL OPERATIONS (06-1-A039)  
 (FM 101-5) (STP 6-13F14-SM-TG)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The commander has approved the FS plan as part of the force OPLAN/OPORD. During the preceding planning process, instructions were issued specifying the type of rehearsals to be conducted and their timing.

Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** Participants in the rehearsal are the executors of the essential fire support tasks, and they practice executing their part of the EFSTs during the rehearsal.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The Commander conducts FS rehearsals with all essential personnel.+                      a. Initiates rehearsal planning after COA approval, to include site selection, security, and construction.                      b. Selects technique following guidelines established by unit TSOP.                      c. Briefs participants on planned FS operations.                      d. Conducts reduced rehearsals when time is limited, focusing on the most critical FS. aspects.                      e. Delegates the AFSCOORD to lead participants through major friendly and enemy events, contingencies, branch plans, and sequels.                      f. Reminds participants that the rehearsal is not a war game.                      g. Continues rehearsals until all required rehearsal objectives are met or until the time available expires.                      h. Records any adjustments or unresolved questions raised during the rehearsal.                      i. Resolves any open issues.                      j. Makes only required changes to the FS plan and provides for integration into the OPLAN/OPORD, as appropriate, through verbal orders, FRAGOs, etc.</p> <p>2. Assigns FS responsibilities to attack system managers, supported maneuver elements, observers, and sensor managers and validates the following: +</p>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>a. FS plan is in compliance with the commander's intent, FS guidance, and concept of operations.</p> <p>b. Verification of positioning and movement plans for FS and TA systems with maneuver operations.</p> <p>c. Integration of intelligence collection/ reconnaissance and surveillance plans with FS requirements. Includes availability of primary and backup observers/collection assets for each HPT.</p> <p>d. Integration of obstacle and barrier plans with FS operations.</p> <p>e. Verification of target locations, engagement criteria, ROE, FSCM, airspace coordination measures, and trigger points/events to initiate attacks.</p> <p>f. Battle hand off points, phase lines, or events for transition between deep and close battles.</p> <p>g. Responsibilities for the clearance of fires.</p> <p>h. Avoidance of unnecessary duplications.</p> <p>i. Adequacy of CSS arrangements in support of FS operations.</p> <p>j. Availability of adequate communications assets to satisfy range and volume requirements.</p> <p>* 3. During combined arms rehearsals the commander:</p> <p>a. Briefs the disposition of friendly and enemy FS elements, their ranges, and capabilities.</p> <p>b. Indicates when friendly FS elements initiate fires, who is firing, from where, the ammunition, and desired target effects.</p> <p>c. Ensures:</p> <p>(1) The FS plan is integrated and synchronized with the maneuver plan and deep, close, and rear battles.</p> <p>(2) Provisions are in place for acquiring, tracking, and reporting BDA for HPTs.</p> <p>(3) Positioning and displacement plans for FS and TA assets are integrated into force operations and potential movement and terrain management conflicts are resolved.</p> <p>(4) Implements measures to prevent fratricide, collateral damage, and noncombatant casualties.</p> <p>(5) Establishes COA to enhance the survivability of FS assets.</p> <p>(6) CSS and communications requirements are met.</p> <p>(7) Changes resulting from the rehearsal are integrated into a modified FS plan and provided to supporting and supported FS and TA assets.</p> <p>d. Subordinate units indicate when they initiate fires in accordance with their FS plans.</p> <p>* Indicates a leader task step.</p>

**TASK:** PLAN FIRE SUPPORT FOR THE MANEUVER BRIGADE (06-1-C098)  
 (FM 6-20-40) (FM 6-20-50) (FM 6-20-10)  
 (ST 6-20-20)

**ITERATION:** 1 2 3 4 5 M (Circle)  
**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The brigade is preparing for or is engaged in combat. A fragmentary order (FRAGO) has been received from higher headquarters. The brigade is conducting the command estimate process to develop an operation order (OPORD). Other fire support (FS) agencies (tactical air control party [TACP], brigade air and naval gunfire liaison company [ANGLICO]) have arrived and been integrated by the fire support element (FSE) to form the fire support cell (FSC). Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The FSE recommends proposed fires and targets to the commander and recommends the course of action (COA) best supported by his analysis. The FSE prepares high payoff target list (HPTL), attack guidance matrix (AGM), target selection standard (TSS), and the FS annex for the OPORD IAW applicable FMs, higher HQ OPORD and supported force commander's guidance.

The FA TOC/ALOC may have access to automated ABCS systems (AFATDS, ASAS, CSSCS, or MCS). Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The Commander identifies an information manager for the TOC/ALOC and FA command post. He prepares and maintains the Commander's estimate to the level of detail that he can issue planning guidance to the staff for the MDMP and make timely decisions during mission execution and accomplishes the purpose of all EFSTs.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. The Commander designates the CofS/XO/S3 or other appropriate individual as information managers. The information manager then performs the following: +</p> <ul style="list-style-type: none"> <li>a. Ensures the commander is kept informed of any and all information he deems appropriate and that will have an effect on the unit's ability to perform its mission.</li> <li>b. Analyzes METT-TC factors, to include changes in mission, facts, assumptions, and the tactical situation.</li> <li>c. Uses the G3/S3's operations estimate.</li> <li>d. Assesses:                             <ul style="list-style-type: none"> <li>(1) Intangibles of training, leadership and morale.</li> <li>(2) Input from subordinate commanders.</li> </ul> </li> <li>e. Analyzes available information, to include risk factors, force protection requirements, and availability of resources.</li> <li>f. Confirms staff estimates.</li> <li>g. Uses the FA commander's estimate to provide the force artillery staff and subordinate units the FA commander's planning guidance.</li> </ul> <p>* 2. The G3/S3 establishes commander's critical information requirements (CCIR), using the FA commander's estimate. +</p> <ul style="list-style-type: none"> <li>a. Defines essential additional information to support mission planning, preparation, and execution, for example:                             <ul style="list-style-type: none"> <li>(1) Status of the enemy's FA capabilities, TTP, and employment options.</li> <li>(2) Weather and terrain conditions.</li> <li>(3) Friendly force FA capabilities.</li> </ul> </li> <li>b. links CCIR to current and future operations.</li> </ul>

Integrates new information with prior FA threat model and current weather and terrain situation to identify any deviations from projected enemy COAs.</li> <li>f. Expeditiously updates and disseminates adjusted IPB products, to include:               <ul style="list-style-type: none"> <li>(1) CCIR (commander's critical information requirement) (PIR, EEFI, and FFIR (friendly forces information requirements).</li> <li>(2) Enemy FA order of battle/doctrinal template.</li> <li>(3) Situation, event, and decision support templates..</li> <li>(4) Obstacle overlays.</li> <li>(5) Collection and surveillance plans.</li> </ul> </li> <li>g. Disseminates information expeditiously to other staff elements in the FA CP (TOC and ALOC), subordinate formations, adjacent headquarters, and higher HQ FSC/FSE/DOCC.</li> <li>h. Provides input to the force FSC/FSE and ACE through the artillery intelligence officer.</li> </ul>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>i. Prepares intelligence reports IAW unit TSOP and provides input to the G3/S3 and higher HQ.</p> <p>* 4. The XO/G4/S4 provides the commander up dated CSS information as required and as available from CSS automated systems and other non automated systems and performs the following: +</p> <ul style="list-style-type: none"> <li>a. Assesses the impact of enemy capabilities on friendly logistical operations.</li> <li>b. Forecasts potential friendly losses by classes of supply and predicts corresponding resupply needs.</li> <li>c. Monitors FFIR and EEFI within the logistic area of responsibility.</li> <li>d. The ALOC lists internal and external support assets, availability, location, organization, and capabilities of corps support groups/corps support battalions and main support battalions/forward support battalions.</li> <li>e. The ALOC prepares a daily report on prevailing and projected weather conditions, terrain and their impact on projected logistic operations.</li> <li>f. The ALOC determines time available to plan, prepare, and execute support operations and react to mission requirements.</li> </ul> <p>5. The ALOC evaluates CSS reports submitted by subordinate commands and attached/OPCON units and informs the commander IAW CCIR of the following:</p> <ul style="list-style-type: none"> <li>a. Serviceability of FA weapons and equipment.</li> <li>b. Evacuation and replacement of weapon systems.</li> <li>c. Status of maintenance backlog in divisions, brigades, and DISCOM/COSCOM.</li> <li>d. Command regulated pacing items.</li> <li>e. Current equipment losses and projected status of maintenance activities and equipment readiness.</li> <li>f. Status of weapon system replacement operations and other requisitions.</li> <li>g. Transportation and movement requirements to include aerial resupply operations.</li> </ul> <p>6. The ALOC monitors shifting corps and division logistic capabilities and limitations during mission preparation and execution, evaluates changes impacting their operation and makes ongoing adjustments.</p> <p>7. The ALOC updates the FA TOC and commander/CofS/XO IAW CCIR.</p> <p>* 8. The commander acting in his role as FSCOORD, issues guidance on the information required to support fire support (FS) mission planning, preparation, and execution. +</p> <p>* 9. The FSCOORD continuously analyzes available information, risk factors, force protection requirements, and availability of resources. +</p> <p>*10. The FSCOORD monitors preparation and updating of the FS estimate.</p> <p>*11. Analyzes impact of projected METT-TC and other FS relevant factors on the existing FS estimate and considers:</p> <ul style="list-style-type: none"> <li>a. Changes in missions, facts, and assumptions.</li> <li>b. Significant developments in the tactical situation.</li> <li>c. Confirms the fire support cell (FSC)/FSE's FS estimate.</li> <li>d. Employs the FS estimate in determining changes to published OPLAN/OPORDs during mission preparation and execution.</li> <li>e. The FSCoord/G3/S3 maintains constant awareness of fire support coordination measures (FSCMs) in effect, rules of engagement (ROE), and any other restrictions to assist in the prevention of fratricide. +</p> <p>13. The FSCoord/G3/S3 continuously collects and analyzes information to control FS operations and ensures the following: +                      a. The physical layout of the FSC/FSE facilitates the exchange of information.                      b. Coordination within the FSC/FSE and with other staff elements (e.g., TAC and rear CPs, targeting team, analysis and control element (ACE), G3/S3 cells at Corps Arty/DivArty level.)                      c. Ensures availability and familiarity with a TSOP addressing the flow of FS information, to include:                      (1) Continuity procedures.                      (2) Battle hand off TSOPs.                      (3) Use of common language and terminology.                      (4) Transfer of shift personnel.</p> <p>14. The FSCoord/G3/S3 ensures communications and liaison (if needed) are established and maintained with all fire support assets organic to and attached to the command.</p> <p>15. The FSCoord ensures FS liaison officers (LNOs) and LNOs from other HQ have current knowledge of the force FS annex.+</p> <p>16. The FSCoord ensures coordination and synchronization of FS information during mission planning. Includes a dialogue with:                      a. Higher, adjacent, subordinate, reinforcing, or reinforced FA elements.                      b. Intelligence agencies.</p> <p>17. The FSCoord/G3/S3 monitors the current situation by exchanging information efficiently with the command group, other force HQ staff elements, higher HQ, subordinate FS elements, and intelligence agencies. +                      a. Assists in providing CCIR responses and the FSCoord's parallel FS information requirements.                      b. Maintains the status of all available FS assets (FA, CAS, NGF, AVN, IEW, ADA, etc.) This is done using existing ABCs systems and/or legacy digital systems and/or manual means.                      c. Acquires and assesses new information, ensuring subordinate units update information rapidly in compliance with TSOPs.</p> <p>18. The G3/S3 receives, processes, and updates the friendly and enemy situation on the FS situation map (SITMAP), target planning maps and overlays, and FS automated data base. Including but not limited to the following:                      a. Force and unit boundaries.                      b. Locations of maneuver, FS, and other relevant combined arms elements.                      c. FA delivered mines on appropriate maps.                      d. Changes in the enemy's FS order of battle.                      e. The current enemy situation as it pretrains to the FASP and the probability of the enemy deviating from the original plan.</p>

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** The element is tactically deployed, and must establish the communications networks. Operators have been briefed and issued SOI/SSI extracts, numerical cipher, authenticated system, operations codes and brevity lists. Situational hazards such as NBC conditions, OPFOR EW, and directional finding ability exists. Some iterations of this task are performed in MOPP 4. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** Operators establish and enter a radio net no later than the time prescribed in the OPOD/OPLAN. The net is not compromised. Time required to establish and operate increases when performing this task in MOPP 4.

<p>* 1. Supervisor checks radios for completeness and operability. +                      a. Checks that vehicular and/or manpack systems are assembled correctly.  <b>WARNING:</b> High voltages exist at connector J1 on the mounting adapter. Be sure J1 is covered or capped when not in use.                      b. Checks that operator has logged amp hours (manpack only).                      c. Checks to ensure preoperational preventive maintenance checks and services (PMCS) are completed.  <b>CAUTION:</b> RF energy is present near the antenna during transmissions. Maintain at least 30 inches between vehicular antenna and personnel during transmission. An antenna tip cap must be in place on the antenna. Tie down the antenna so the distance from the ground to the tip cap is 7 feet or more.</p> <p>* 2. The supervisor selects the site.                      a. Selects primary and alternate locations within the general site.                      b. Establishes/maintains camouflage discipline.                      c. 6. Inspect all OE-254 antenna masts for the presence of "through" cracks around the notch before and after erection. Remove all antenna masts from service if "through" cracks of 1/4 inch or greater are identified and order replacement for these masts.  7. Use a gin pole or other suitable device to lift the antenna feed cone with elements off the ground to erect. This will reduce the stress placed on the antenna during erection.  8. Do not place an individual under the antenna during the erection process.  9. Place the notches on the backside of the antenna during erection to reduce the stress at the joints.  10. Remove one upper mast section as authorized by CECOM Message 102800Z Mar 90.

## CHAPTER 6

### External Evaluation

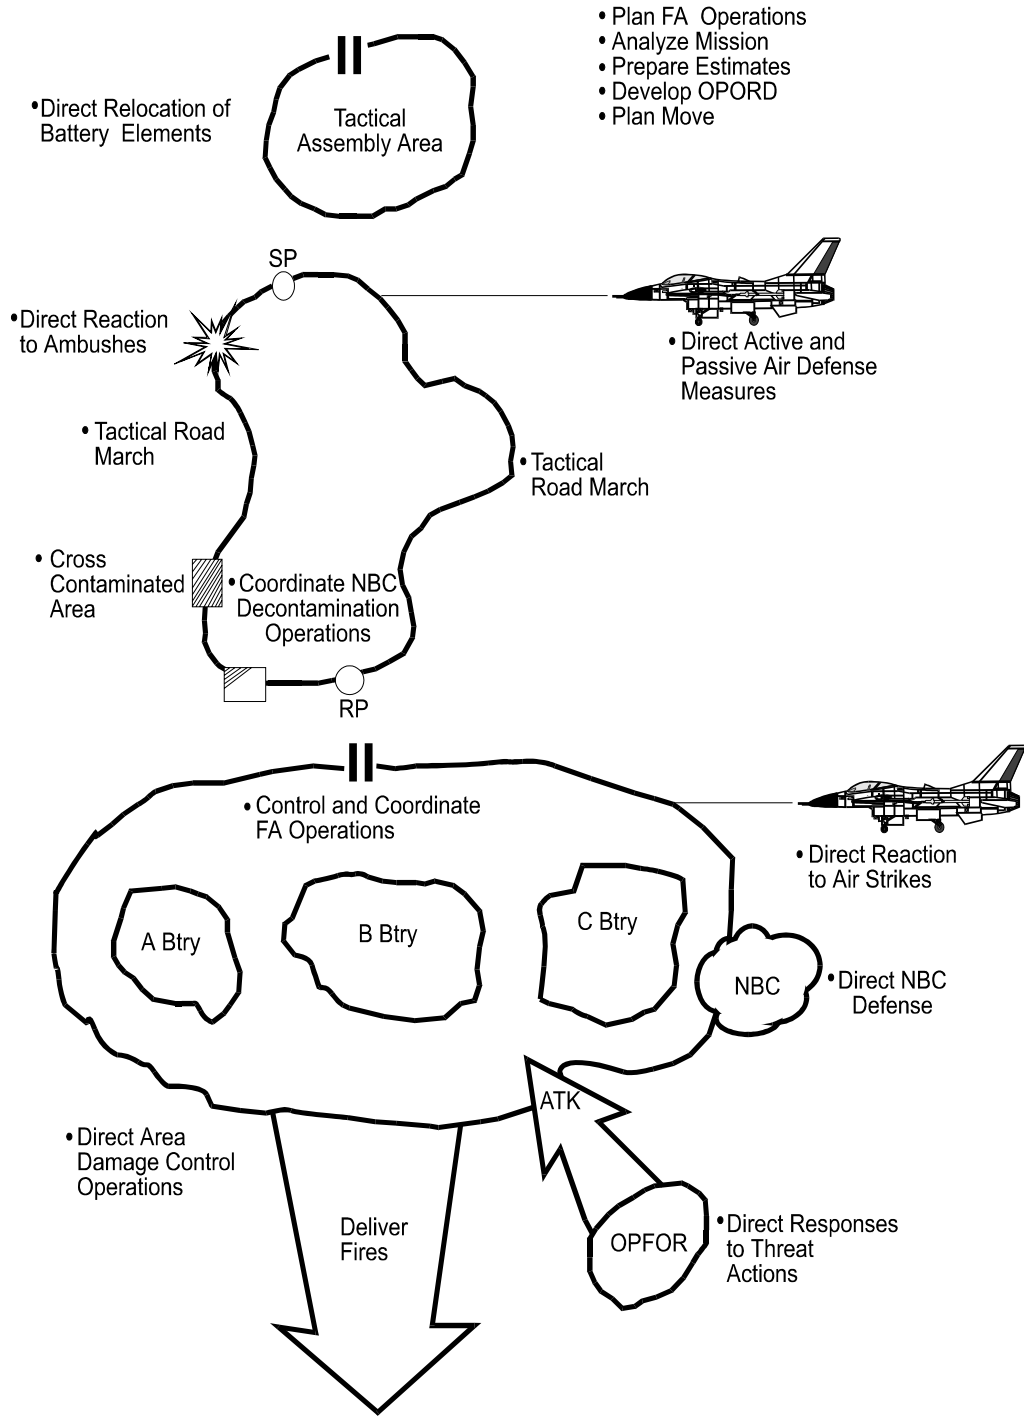

- 6-1. General. Evaluations are conducted to assess a unit's ability to perform its missions. This chapter is a guide for preparing evaluations. Using units may modify this evaluation, based on METT-TC and other considerations, as deemed appropriate by the commander. Selected T&EOs in Chapter 5 are used for evaluations that involve the total unit and employ a realistic OPFOR and the use of MILES. At the end of the evaluation, the commander can identify the strengths and weaknesses of his unit. These strengths and weaknesses are the basis for future training and resource allocations.
- 6-2. Preparing the Evaluation. The commander must standardize evaluation procedures to accurately measure the unit's capabilities.
- a. Preparing the Evaluation Instrument. The sample evaluation scenario in Table 6-1 contains the missions as well as the appropriate tasks necessary to develop the scenario and execute the evaluation. Figure 6-1 is a graphic representation of the scenario. Selective tailoring is required because it is not possible to evaluate every task. The following procedures are suggested for developing the evaluation.

- (4) Compile the selected missions and tasks in the order they logically occur in the detailed scenario. Group the selected missions and tasks in parts for continuous operations, Table 6-1, Sample Evaluation Scenario. Parts can be interrupted at logical points to assess MILES casualties and conduct in-process AARs.
- b. Forecasting and Requisitioning Resources. Adequate training ammunition, equipment, and supplies must be forecasted and requisitioned. Figure 6-4 is a list of support requirements for this evaluation. It is based on experiences with the scenario in Table 6-1. The evaluating headquarters prepares its own support requirements.
- c. Selecting and Preparing the Field Evaluation Site. Required size, type of terrain, OPFOR requirements, and administrative requirements are the basis for site selection. For this evaluation an area of 5 kilometers X 10 kilometers was selected. The OPFOR is positioned according to threat doctrine. The site must provide space for the administrative area required to support the evaluation.
- d. Planning Indirect Fire Simulation. Because it greatly influences the outcome of battles, reaction to indirect fire is an important consideration of the evaluation. Indirect fire simulation requires considerable planning to achieve realism.
  - (1) The fire marker control system outlined in TC 25-6 is a recommended method of simulating indirect fire. Due to the amount of required resources, this method may be difficult to support.
  - (2) The commander may use the evaluation control headquarters method or the simulation without OPFOR method to evaluate the unit's ability to react to indirect fire. If the evaluation control headquarters method is used, the OPFOR initiates a call for fire to the evaluation control headquarters, which simulates the tactical FDC. The control headquarters would then relay the delivery data to the O/Cs who would mark the impact of the round with artillery simulators and assess appropriate casualties. If an OPFOR is not used, the O/C may ignite artillery simulators and observe the unit's reactions. The FM 25 series provide assessment and computation tables that may be used to determine casualties. Indirect fire simulation must be realistic and limited to what the unit could reasonably expect under combat conditions.

### 6-3. Selecting the Observer/Controllers

- a. O/Cs must know the unit's missions, organization, equipment, and employment. The senior O/C should be at least equal in rank to the unit commander and have successfully performed in that specific or similar command position.
- b. The following are minimum rank and experience requirements for O/Cs:
  - (1) Battalion O/C is an officer with battalion command experience.
  - (2) Battery O/Cs are officers with battery command experience.
  - (3) Recorder is an officer or NCO at the evaluation control headquarters who receives "kill" information or results and time data from the O/Cs.

### 6-4. Training the Observer/Controllers. O/Cs standardize administration of the evaluation by understanding the following functional areas:

- a. Evaluation Design. Each part is designed to evaluate specific missions or tasks within the overall scenario. O/Cs must thoroughly understand the evaluation and correctly implement it.
- b. MILES. Each O/C, regardless of position, must have full knowledge of the unit's weapons and vehicles and must also thoroughly understand the MILES system being used. The unit commander is responsible for ensuring that all MILES equipment is functional before each part of the scenario.
- c. Evaluation Control System. This system ensures that the evaluation is administered in a consistent and standardized manner and that correct data is collected for the final evaluation. It includes the following elements:
  - (1) Rules of engagement.
  - (2) O/C duties and responsibilities.
  - (3) Communications systems.
  - (4) Evaluation data collection plan.

#### 6-5. Recording External Evaluation Information

- a. The evaluating headquarters develops the data recording instruments for the O/Cs. The Unit Data Sheet, Figure 6-5, documents demographic information which may reflect on a unit's performance. The Environmental Data Sheet, Figure 6-6, documents weather information in order to compare missions under differing environmental conditions. The Personnel and Equipment Loss Report, Figure 6-7, documents information that may affect the unit's degree of success during engagements with the OPFOR.

- b. The senior O/C has the overall responsibility for preparation of the external evaluation. This evaluation is based on his own findings and his subordinate O/C's input. Subordinate O/Cs use the task evaluation criteria (T&EO from Chapter 5 and Task Summary Sheet) to determine overall proficiency in their particular areas. The senior O/C compiles the external evaluation results as prescribed by the evaluating commander. Deviations from the task standard assessed by the battery O/C may be addressed in the senior O/C comments portion of the UPW.
- 6-6. Selecting and Training the Opposing Forces. The selection and training of the OPFOR is crucial to the success of a standardized evaluation. The OPFOR provide one of the control measures that influences the conditions under which the evaluation is administered. The unit should face an opponent who realistically resembles the threat in strength, weapons, and skill.
- a. Selection. Any qualified Skill Level 1 or 2 soldier can serve as a member of the OPFOR. Ideally, the OPFOR should be a small cohesive unit under the control of their leader or commander.
  - b. Training. The OPFOR must understand the following six major areas:
    - (1) Installation and operation of the MILES devices.
    - (2) Rules of engagement.
    - (3) Threat small unit tactics.
    - (4) Training scenarios.
    - (5) OPFOR weapons and equipment, if available.
    - (6) Safety.
  - c. Opposing Forces Strength
    - (1) Offense. Using MILES, the unit should outnumber the OPFOR three to one if an attack is to be successful. If the OPFOR are stronger than this ratio, only the most exceptional unit will be successful. They must be armed with weapons capable of defeating any of the unit's assets. As a general rule, the OPFOR should be strong enough to offer the unit a realistic challenge, but one that the unit can defeat when proper tactics are employed.
    - (2) Defense. The OPFOR, at a minimum, should have a three-to-one ratio of superiority, because anything less will not have sufficient weapons and ammunition to conduct a successful attack. They must be more than merely a series of targets to be destroyed. The OPFOR should be allowed to plan their own attack for each mission and not be forced into a "canned" attack that all units quickly defeat. Once the OPFOR establish their plan, they must use the same plan for all other like units for that event in order to maintain the objectivity and standardization of the evaluation.
- 6-7. Conducting the Evaluation. Evaluations are divided into three distinct areas. Each area requires a different degree of preparation and coordination.
- a. Preevaluation
    - (1) The senior O/C and all other O/Cs must perform reconnaissance of the evaluation area to know the unit's boundaries, disposition of the OPFOR, and the

most likely avenues of approach throughout the field evaluation site's area of operation.

- (2) The unit must prepare an OPORD and FRAGO to control the exercise. An order is prepared for each mission in the evaluation scenario. These can be prepared by using the skeleton orders contained in the STXs contained in Chapter 4.
- (3) Unit preparatory activities include installation and troubleshooting of MILES equipment, loading vehicles, conducting inspections, and performing other logistic and administrative actions, as required.
- (4) The OPFOR are placed in position and briefed while the unit is conducting its preparatory activities.
- (5) In this evaluation scenario, the unit is issued a movement order to move to an assembly area. When the assembly area has been occupied, the OPORD is issued. The O/Cs should make an equipment functions check after the unit occupies the assembly area and after the unit leaders have issued their instructions.

b. Evaluation

- (1) The evaluation team controls the evaluation in two ways. First, it uses measures established in both the movement order and in Paragraphs 3 and 5 in the OPORD and FRAGO. Second, the team controls the evaluation through the team commander (simulated by the senior O/C for this evaluation) on the team net. The team does not control in the traditional sense, instead it accompanies the unit as observers. Only the senior O/C has direct verbal contact with the unit commander. All other O/Cs do not speak to, aid, advise, point out positions, or in any way influence the unit's performance, except for a possible or actual safety issue or emergency. O/Cs are neutral throughout the evaluation.
- (2) Once the senior O/C issues the OPORD and movement order, the unit commander executes the events and actions prescribed in the first part of the evaluation scenario within the estimated time. From this point on all successive parts begin with a FRAGO.
- (3) The senior O/C terminates a part when the unit has completed all the events and actions in a particular area or has suffered so many casualties or damage that the part cannot be completed. The O/C must record the reasons for the termination in the margin of the O/C's Task Summary Sheet and report his action to the evaluation control headquarters. In the sample evaluation scenario, the completion of each event or action is indicated by "conducting sustainment operations." During this period, the senior O/C directs the unit to remain in position while "replacements" (personnel and equipment designated as killed or destroyed) are sent forward to reconstitute the unit. At this time, O/Cs must perform the following actions:
  - (a) Inspect all MILES equipment, record "kill" codes, and reset equipment. Any damage or inoperative MILES equipment is replaced.
  - (b) Resolve all casualty data to determine the time, place, number, and cause of casualties. This information is reported to the recorder in the evaluation control headquarters.

- (c) Debrief the unit to resolve questions. Afterwards, the senior O/C directs the unit to continue its mission after it receives a FRAGO or OPORD for the next part.
- (4) These guidelines should be followed by the O/Cs:
  - (a) Report major "kills" (vehicles, groups).
  - (b) Report major weapons fired. Together with reporting major kills, this is the best method for determining direct fire effectiveness. Both significant firings and hits are reported to the evaluation control headquarters.
  - (c) Enforce rules of engagement.
  - (d) Observe critical tactical events of time. O/Cs must spot and record any action that might have an effect on later performance or mission outcome.
  - (e) Record travel routes and unit's location.
  - (f) Inform OPFOR controllers of the unit's location, direction, and intent. This is necessary to enable OPFOR action to be controlled in accordance with the desired sequence of events.
  - (g) Enforce safety.
  - (h) Terminate mission.
- c. Post Evaluation. After the evaluation is terminated, the unit moves to an assembly area and performs the following actions:
  - (1) The unit O/C debriefs subordinate O/Cs and compiles all data (evaluator packets) for the evaluation.
  - (2) The unit O/C must complete the Task Summary Sheet.
  - (3) The unit O/C must turn in all completed O/C packets (with the O/C scoring system) to control headquarters for recording and analysis.
  - (4) The unit O/C must conduct an AAR of the unit's performance.
  - (5) Each element O/C should conduct an AAR of his element's performance.

#### 6-8. Conducting the After Action Review

- a. General. At the completion of each evaluation part, the AAR leader provides feedback to the unit in order to increase and reinforce learning.
- b. Feedback. Because all members of the unit participate in an AAR, each member becomes a source of feedback. This provides a richer "database" for key points. The AAR leader draws information from each member that becomes an important part of the discussion. This information is the basis for discussing alternate courses of action.
- c. Preparing the After Action Review. AAR preparation involves five steps:

- (1) Review training orders and objectives. Training objectives are the focus of the discussion of the exercise results. The FRAGOs and OPORDs included in the exercise design implement these objectives. The O/C should be familiar with the objectives, FRAGOs, and OPORDs so that he can note orders given by leaders of the evaluated unit and its subordinate elements that either implement these objectives or deviate from them.
  - (2) Observe the exercise. This is an active process. The emphasis is on noting those actions that make the difference between the unit's success or failure. The O/C does not need to remain close to the unit leader, since more can be seen from high ground near the lead element's location or along the unit's route of march. Because unit orders identify important activities and checkpoints, the O/C must be present when the commander issues the order. The O/C should position himself where he can best observe anticipated critical events. Examples of critical events include:
    - (a) Conducting a road march.
    - (b) Crossing a radiologically contaminated area.
    - (c) Reforming unit supply operations.
    - (d) Responding to a NBC attack.
  - (3) Select the site and assemble the participants. After the exercise, select a site for the AAR. If possible, hold the AAR where the majority of action occurred, where most of the critical events took place (normally where the OPFOR was positioned), or where the terrain can be observed. Usually, the OPFOR or unit objectives are suitable for assembling the players and conducting the AAR.
  - (4) Debrief the O/Cs. While the units are moving to the selected site, the O/Cs should be debriefed. The senior O/C must have a complete understanding of what happened in the exercise. The fourth step in AAR preparation is to obtain a detailed description of the exercise's events in the order in which they occurred.
  - (5) Review the events. After the senior O/C has a sound understanding of what happened during the exercise, he reviews the events that are ranked in terms of their relevance to the training objectives and their contributions to the exercise outcome. He selects as many events as can be covered in detail during the time allowed for the AAR and places them in chronological order.
- d. Conducting the After Action Review. Conducting the AAR requires five steps:
- (1) Organize the participants. When the O/C and AAR leader assembles the participants, he groups them according to their organization in the exercise. Each subordinate element's O/C is the element for which he is responsible.
  - (2) State the training objectives. The AAR leader makes a brief statement of the training objectives for the exercise. These are described as specifically as possible. He states any additional teaching points that he intends to cover during the AAR. These should be limited to three or four key points in order to keep the AAR focused and prevent it from becoming excessively long.
  - (3) Lead the discussion. The AAR leader guides the discussion of the events in their order of occurrence. Diagrams help players visualize the exercise development. The AAR leader starts by sketching the main terrain features and, as the AAR

proceeds, have the participants draw routes of advance, objectives, and locations of engagements. Each event is discussed in detail to make teaching points about the unit's performance during the event. In an effective AAR, the AAR leader should--

- (a) Avoid giving a critique or lecture.
  - (b) Guide the discussion by asking leading questions.
  - (c) Suggest the players describe what occurred in their own terms.
  - (d) Suggest the players discuss not only what happened, but how it happened, and how it could be done better.
  - (e) Focus the discussion to ensure that important tactical lessons are made explicit.
  - (f) Relate events to subsequent results.
  - (g) Avoid detailed examination of events not directly related to major training objectives.
  - (h) Encourage the participants to use diagrams to illustrate teaching points and to show route, phase lines, and objectives.
  - (i) Prohibit players from offering self-serving excuses for inappropriate tactical actions.
- (4) Review the sequence of the events associated with the hazards of the risk assessment made prior to the exercise. Ask the following questions:
- (a) Were effective controls put in place to avoid accidents?
  - (b) Was training realism reduced through artificial control measures?
  - (c) Were all participants aware of hazards down to the lowest level?
  - (d) Did any hazard present itself that was not identified, and what was done to overcome it?
  - (e) Were there incidents of fratricide or near fratricide, and how can they be avoided in the future?
- (5) Summarize key points. The AAR leader briefly summarizes teaching points in terms of training objectives covered in the AAR. After the summary, he can have a private conversation with the unit commander regarding his strengths and weaknesses, and what he can do to improve his performance and that of his unit. A good AAR leader--
- (a) Maintains order and discipline.
  - (b) Reviews the training objectives.
  - (c) Addresses important events as they occurred and how the unit could have done them better. During the discussion, the leader avoids a

- detailed examination of events not directly related to the training objective.
- (d) Traces the chain of events so all participants understand the results of mistakes. One mistake is often the partial cause of another.
  - (e) Clearly relates tactical events to teaching points.
  - (f) Involves participants in the discussion.
  - (g) Clearly and concisely gives summary and new training objectives.
  - (h) Reinforces points by using sketches, diagrams, or terrain models in the AAR.
- e. Reference Materials. Reference materials for conducting an AAR are TC 25-6, TC 25-20, and FM 25-101.

## Notes:

1. These tables are designed to be four separate evaluations: Observers, BN FDC, PLT/BTRY FDC & Guns.
2. Any Fire for Effect mission may be designated as a "multiple volley mission".
3. Missions with identical time standards have been combined; separate fire mission, same standard.
4. In the Adjust Fire mission tables, only one round observer adjustments are annotated (the initial round) and added to the FFE times when determining total mission time. That is, other than the radar or G/VLLD missions which by nature only allow for one round adjustments, the standard for adjust fire missions that employ subsequent rounds in adjustment must be calculated by adding the additional subsequent round adjustment times. Therefore, the " + " (plus) sign in these tables denote this possible addition of subsequent observer, FDC, and gun times for each of the subsequent rounds yielding a revised total mission time standard. Trainers and evaluators determine if subsequent adjustments in any mission become excessive.
5. PALADIN gun times include the computation of the technical solution by the AFCS.

6. Fuse quick is used as the baseline fuze in most of the fire mission tables. If fuze time or VT is used in a particular fire mission in lieu of fuze quick, 15 seconds will be added to the "gun time" standard for each round fired.

7. High angle fire mission tables allow 15 seconds more "gun time" than low angle tables.

8. Updates to this document will be posted on the Warfighting Integration and Development Directorate (WIDD) homepage <http://155.219.98/WIDD/>

A-1. Introduction. Accurate and timely artillery fires are critical for mission accomplishment and battlefield survival of the maneuver force. Recognizing this, FA units continue to improve their fire mission response time. These time standards represent the maximum amount of time a well-trained FA unit takes to place accurate fire on target. Accurate field artillery fires are a mandate, and no amount of speed in response times displaces this requirement. Trainers should be acutely aware of this fact and stress accuracy foremost in their training programs. As teamwork improves through training, response time should decrease without sacrificing accuracy. These time and accuracy standards apply only to Cannon units, for MLRS standards see ARTEP 6-397-30, MLRS Battery, or ARTEP 6-395, MLRS Battalion.

A-2. Purpose. This appendix has three purposes.

- a. It outlines the framework of MTP training objective time and accuracy standards for fire missions.
- b. It delineates the methodology by which fire mission total time standards should be timed for both basic and special missions.
- c. It provides an indication of strengths and weaknesses of each element of the gunnery team (FO, FDC, guns), by breaking down total mission time into section response times.

A-3. Fire Mission Accuracy Standards. There are two methods of determining if FFE achieves the MTP standard.

- a. The primary method is to subjectively decide, by observing from the observer's location, if the fires had the desired effect on the target. If so, the standard was met. If any element of the FFE (deviation, range, or HOB) was not obtained, the standard was not met
- b. Commanders are reminded that there are a myriad of variables that affect an artillery projectile's accuracy in terms of "hitting the target." If the commander cannot use the primary method of judging effects (visual determination) in his firing evaluation, the following graphical methods are offered. They use average firing data (the distribution of mean points of impact [MPI] around an aiming point) from a ballistics laboratory. There are two different procedures depending on whether or not the unit can meet the five elements of accurate predicted fire.
- c. If the five requirements for accurate predicted fire (target location and size, firing unit location, weapon and ammunition information, MET information [2 or 4 hour schedule], and computational procedures [see FM 6-40, Chapter 1]) can be met, and are properly applied, it is "statistically possible" to judge accuracy of the round being fired. Using a plotting board, or chart:
  - (a) Select a radius X value from Table A - 1 for the appropriate caliber weapon, charge, and angle of fire. Center the circle (X) about the aiming point.

(b) Using the corresponding radius Y value from the table, construct a circle in a manner to cover the largest quantity of rounds. The entire circle (Y) must lie on or inside circle X (Figure A - 1).

(c) To meet the standard, at least 75 percent of the total rounds fired must impact within the area of circle Y.

CAUTION

IF BCS IS BEING USED, THE AIMING POINT FOR A SPECIFIC HOWITZER MAY NOT BE THE SAME AS THE TARGET. (NOTE: As in a BCS special sheaf where howitzer aimpoints are selected 100 meters from the target location - ST 6-40-2)

Figure A -1. Five elements of accurate predicted fire are met.

(2) If the five requirements for accurate predicted fire cannot be met, then the 5 steps to improved firing data (rounds burst at a point of known location, determine did-hit & should-hit data, determine total corrections, isolate position constants [by quantifying all measurable non-standard conditions] update total corrections); or an observer-adjusted mission, should be used. To determine accuracy:

(a) Construct an initial circle with a radius of 50 meters, centered around the aiming point at which the observer calls for in fire-for-effect.

(b) Next, determine the radius of circle Y from Table A-1. (Radius Y is equal to 2 probable errors in range.) Then place the center of the Ym radius circle anywhere inside or on the circumference

of the 50-meter circle. Position the circle (Y) to include the maximum number of impacting rounds (Figure A-2).

(c) To meet the standard, at least 75 percent of the total rounds fired must impact within the area of circle Y.

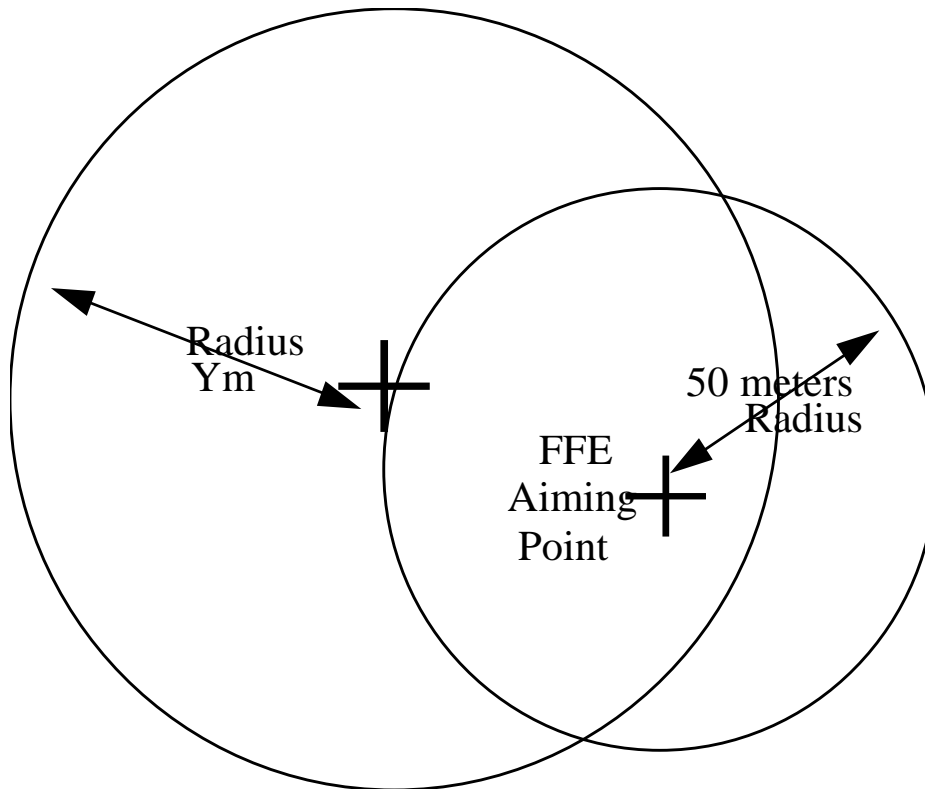

Figure A-2. Accurate predicted fire requirements not met.

(3) The preceding graphical methods were designed to determine the accuracy of a weapon. Trainers and evaluators must remember that most targets fired upon are area targets. Therefore, when judging effects, avoid the tendency to treat a grid coordinate sent by the observer as a point target. Consider the choice of munitions, method of attack, and acceptable dispersion of the FFE sheaf.

(4). Using a firefinder radar, or a G/VLLD, a round may be accurately plotted (within the tolerances of the system) and compared against the location of the aiming point. During the computation of special sheafs (for example, the circular sheaf used by the BCS), various aiming points are selected around the target. Care must be taken during any measurement of accuracy to ensure the burst is being compared against the proper aiming point for the howitzer being fired. This should reinforce the FDO's use of a proper sheaf in computing firing data (and resist the temptation to "close" the sheaf in an attempt to hit a "point" with an area weapon).

NOTE: If a firefinder radar is used to observe rounds impacting, it must be used in the friendly fire mode, with an "angle T" of less than 1,000 mils. A battery or platoon should be fired by piece, at 30 second intervals, or AMC (RADAR), for adequate control in spotting individual bursts.

NOTE: The above radii for X were computed by using the variances in range and deflection. The variance in range is equal to the sum of the variances due to muzzle velocity, range wind, air temperature, air density, gun location, drag, and precision. The variance for deflection is equal to the sum of the variances in gun location, crosswind, aiming and precision. Each radius for Y is equal to 2 probable errors in range.

A-4. Fire Mission Total Time Standards. Tables A - 8 through A - 30 are based on the following:

a. The goal of the Field Artillery is to achieve first round fire for effect on every fire mission. By meeting the five elements of accurate predicted fire, or by applying the five steps to improved firing data, units will be able to deliver fires on target or be close enough to necessitate limited subsequent adjustments.

b. The fire mission tables use four components to determine a mission's total time standard: Observer time; Battalion FDC (Tactical Fire Direction) time; Platoon/Battery (Tactical & Technical Fire Direction) time; and Gun time. Time Standards are listed for each section.

c. TOTAL MISSION time equals: Total Observer Time + Battalion FDC Total Time + Platoon/Battery FDC Total Time + Total Gun Time (by system). For example: The Platoon/Btry FDC can be evaluated without BN FDC or Observers. Total mission time would be the sum of the evaluated sections.

d. Three schema are used to determine the time standards. They are represented by the three columns in each table. The digital column represents the use of digital methods at each node in the processing of the mission (e.g., observer-FED or HTU; FDC-BCS; Guns-GDUs). The manual column is a voice call for fire, manual FDC, and voice fire commands method. Finally, the M109A6 Paladin column. The first entry is "Tactical Fire Direction" which is done by FDC. The AFCS computes the technical solution for firing the howitzer. Paladin "gun time" in the tables includes the AFCS computation time.

e. If for some reason automation fails, a switch to manual methods will occur. This means that the evaluator may have to zigzag between the columns and take times from both (digital & manual/voice) columns and add them together to compute the "Total Mission Time" standard. Thirty seconds may be added at the component where automation fails, or is non-existent, to compensate for time to switch to manual. This may also apply to Paladin units reverting to degraded mode operations.

f. In the Adjust Fire mission tables, only one round observer adjustments are annotated (the initial round) and added to the FFE times when determining total mission time. That is, other than the radar or G/VLLD missions which by nature only allow for one round adjustments, the standard for adjust fire missions that employ subsequent rounds in adjustment must be calculated by adding the additional subsequent round adjustment times. Therefore, the "+" (plus) sign in these tables denote this possible addition of subsequent observer, FDC, and gun times for each of the subsequent rounds yielding a revised total mission time standard. Trainers and evaluators determine if subsequent adjustments in any mission become excessive.

g. Fuze quick is used as the baseline fuze in the fire mission tables. If fuze time or VT is used in a particular fire mission, 15 seconds will be added to the "gun time" standard for each round fired.

h. The MTP time standards were developed through operational testing and subsequent field validation. These standards do not include the following:

- (1) Safety time by external safety personnel.
- (2) Time of flight--shot to munitions impact.
- (3) Illumination--shot to burst (illumination adjustment).

(4) Illuminati

#### A - 5. Evaluating Fire Mission Times.

a. The timing and sequencing for each fire mission (initial, subsequent correction, FFE) is shown in Table A - 2. This table is used to determine the basic start and stop times, by mission phase, for each fire mission. This overall mission table, when used in conjunction with the component section timing tables (A - 4 thru A - 6), gives the trainer/evaluator an accurate picture of how to determine unit fire mission timeliness.

b. Total mission time is usually kept using one of two methods. When training a FIST/COLT/FO, the observer trainer/evaluator is normally responsible for keeping both total mission time as well as the observer section time. Under general support (GS) unit conditions, where an observer may not be part of the unit evaluation, the FDC trainer/evaluator is normally responsible for keeping the total mission time as well as the FDC section time.

c. Safety time is embedded into the section's time to execute required actions (assumes chain of command personnel, e.g. safety certified chiefs of section). Units using other than chain of command safety personnel should record and subtract safety time from total mission time, if necessary.

d. Observer times are based on a team consisting of at least one observer assisted by an RTO/digital device operator (FO party, COLT, or FIST). Two such teams may be employed for firing a simultaneous mission.

e. Fire mission time standards may have to be modified by the trainer/evaluator when any of the following occurs:

(1) When bad weather prevents the effective execution of a fire mission (e.g., high, shifting winds when illumination rounds are being fired).

(2) When increased MOPP status in simulated NBC conditions adversely affect the unit's timeliness.

(3) When real or simulated personnel or equipment losses severely reduces unit capabilities.

(4) When the unit receives more fire missions than it can readily handle with the firing units that are available (e.g., high intensity war scenario).

f. If a howitzer misfires during the FFE phase of a fire mission, and the platoon leader or FDO calls the piece out of action, mission time will stop when all other pieces have fired in the initial volley of FFE. Misfires subsequently fired should be observed/evaluated for accuracy (effects).

g. There is no administrative requirement that every howitzer in the unit be in position and firing for each battalion mission. As a general rule, two-thirds of the battalion's firing capability should be in position and available to answer calls for fire. The bottom line is that the FDO is responsible to the commander for determining the volume of fire necessary to achieve the desired effects on the target and issues a fire order which appropriately reflects the number of available howitzers to fire.

h. Out of traverse missions may be a necessary part of some units' METL. The FA school has no established time standard for the execution of the re-laying of firing units on targets outside traverse limits. Units with these mission requirements should develop a standard for this procedure, battle drill it, and use this standard in training and evaluations. Once the firing unit is relayed, the tables in this Appendix will serve as the time standard for the fire mission itself.

i. Scheduling planned fires, as in a preparation or other program of fires, by its very nature is an untimed event. During the planning process for a battle, fire support personnel may be tasked to develop a particular schedule of fires to support the scheme of maneuver. This process is untimed. In an evaluation, the measure of success for a schedule of fires is whether or not it was executed when required, and had the intended effect on the target(s) to meet the commander's intent.

Table A -2. Overall Fire Mission Timing.

I. FFE Mission

PHASE	ACTION	TIMING
FFE	Observer identifies the target	Starts
	Last round in first volley of FFE is fired	Stops

II. Adjust Fire Mission

PHASE	ACTION	TIMING
Initial	Observer identifies the target	Starts
	Round is fired	Stops
Subsequent*	Initial/Subsequent round impacts	Starts
	Round is fired	Stops
FFE	Subsequent round (last) impacts	Starts
	Last round in first volley FFE is fired	Stops

\* Timing of this phase is repeated for each adjustment

NOTES: (1) FA cannon battalions with general support (GS) missions have no assigned observer personnel. In evaluating these units, observer time may not be considered in the evaluation. Therefore time starts when the FDC receives target location in the call for fire (initially) and an adjustment correction or FFE (subsequently).

(2) The "stopwatch" method of timing the adjust fire mission shown in part II above automatically accounts for time of flight (TOF). If the total mission time evaluator prefers a "let the clock run" method of timing the mission, he would strip the TOF(s) out of the total time at the end of the mission (per paragraph A-5, b.)

A-6. Special Situations. The timing techniques in paragraph A-5 apply to all MTP missions--adjust fire, FFE, and special munitions. However, certain missions require slightly adjusted timing techniques to evaluate them properly.

a. Illumination and/or coordinated illumination. When an observer is involved in the evaluation of this mission, the evaluator must adjust the timing sequence because of the peculiar illumination TOF determination.

(1) Time of flight during illumination adjustment is defined as shot-to-illumination mark time.

(2) Time of flight during HE adjustment under illumination is also defined as illumination shot-to-mark time. Since this time includes both illumination TOF to effective illumination on the target, and the HE TOF impact, the time represented by illumination shot to mark encompasses all of the variables that need to be stripped out of this portion of mission timing.

b. Simultaneous mission (Table This mission is to evaluate a platoon/battery. The stress of performing the simultaneous mission has often been a valuable training tool for the firing platoon/battery. Evaluating the timing of two adjust fire missions simultaneously is more difficult than merely running 2 total mission watches, one for each mission. Table A-2 must be adapted to a timing sequence that realistically strips out the mission variables. That is, the stopping of the watch following each shot to eliminate TOF variables may not be accurate (e.g. while the round for Mission 1 is in flight to the target area, Mission 2 may be in progress in the FDC). Timing should be conducted as follows:  
x4320

(1) During training not involving the evaluation of the observer team (GS type unit), the unit should not be charged with time when both the FDC and guns are idle and awaiting observer corrections for either mission. That is, should the occasion arise whereby rounds from both missions have been fired (guns idle), and the FDC has yet to receive a correction from the observer for either mission (FDC idle),

then that amount of time should be subtracted from the total mission time as often as this occurs in adjust fire. The second column of Table A-3 attempts to portray this occurrence.

(2) In evaluating a unit with an observer, the only variable time is when both rounds for the separate missions are in the air at the same time. This amount of time normally will be only a few seconds and may be negligible in the total mission time. The third column shown in Table A - 3 attempts to portray this occurrence.

Table A-3. Simultaneous Mission Timing.

A-7. Section Timing Standards.

a. For the FA gunnery team to meet the standards listed as MTP fire mission time standards, each element of the team (Observer, FDC, guns) must perform to standard.

b. Tables A - 4 thru A - 6 outline the "time starts - time stops" methodology for the timing of each phase of a fire mission for the Observer, FDC, and gun sections.

c. Ready to fire (RTF) time standards appear in Tables A - 7 thru A - 7.4. These tables prescribe the standards for the occupation of position areas for firing.

Time Starts: (Non PALADIN) When first howitzer stops in its firing position.

Time Stops: When every howitzer section has completed TLABSPAP procedures; Trails, Lay, Aimpoint established, Boresight verified, Safe (verification of lay), Prefire checks performed, Ammunition Prepared (one round per gun); commo established with the FDC and critical elements\* of the section chief's report rendered. The FDC has commo with guns, Battalion FDC, and FSE/FISTS, current sitmap posted, two means of computing firing data, XO's min QE determined (lowest charge), and has verified its data base.

(\*Reference FM 6-50, these critical elements should be designated in the unit's TACSOP)

NOTES:

1. Times do not include position improvement.
2. Times assume site to crest determined by advanced party.
3. Add 5 minutes for night occupation
4. Add 10 minutes for occupation of unprepared position
5. Time standard for M119A1 applies to all configurations.
6. Tasks do not reflect any local range safety regulations, or unit safety policies (safety "Ts", taping guns, staking guns, verifying data via a "bump mission", etc.)
7. Standards for use of the Gun Laying and Positioning System are being determined and will be made available on the WIDD homepage once they have been determined. The WIDD homepage address is <http://155.219.39.98/doctrine/wddfrm.htm>.

\*Paladin section standards include:

- a. Howitzer tactical move: verify location, verify direction, determine site data, input/verify firing limits (load EL, max EL, L/R sectors of fire), send piece status to POC, and concurrently perform prefire checks.
- b. Howitzer survivability move: determine site data, verify firing limits, send piece status to POC, concurrently perform prefire checks.

c. POC: establish voice and digital comms with guns and Bn FDC/FISTS, verify database, verify gun locations on sitmap, receive and verify site data from guns, compute and announce XO's min QE, verify firing limits w/guns, post current sitmap, and transmit an "X" in the "READY" block of the AFU;UPDATE to Bn FDC (RTF).

Time Starts: When FDC receives fire mission warning order.

Time Stops: When the last round is fired in the first volley of FFE.

\*Paladin Notes:

1. Moving Mission inside position area - find suitable location, arrive, verify immediate site to crest along commanded deflection, and execute fire mission. Time standard is 60 seconds.

2. Moving Mission outside position area - location, verify direction, arrive, verify immediate site to crest along commanded deflection, and execute fire mission. Standard is 75 sec.

Table A - 7.2 Ready to Fire Times – Air Assault Movement

I. Preparation standards for an air assault operation are:

30 minutes to rig all howitzers

40 minutes to rig all howitzers and prime movers

Time Starts: When the first vehicle arrives in the PZ.

Time Stops: When last vehicle is prepared (PZ posture).

II. Once the howitzers arrive at the new position the RTF standard is:

12 minutes for each serial (includes derigging and TLABSPAP - day time)

17 minutes night time

Time Starts: When first vehicle arrives in the firing position.

Time Stops: When every howitzer section and the FDC are ready to fire (see Table A-7).

NOTES:

1. The advance party is on the LZ, and lift helicopters arrive at the LZ.

2. If firing position is offset from LZ, allow 4 minutes for each serial to clear the LZ, then apply occupation time standards.

3. Time does not include position improvement.

4. Times assume site to crest determined by advanced party.

5. Add 10 minutes for occupation of unprepared position.

6. Time standard for M119A1 applies to all configurations.

Table A - 7.3 Ready to Fire Times - Air Assault Artillery Raid

440 I. Preparation standards for an air assault artillery raid:

30 minutes to rig howitzers.

Time Starts: When the first howitzer arrives at the PZ, or upon receipt of mission if the PZ is the firing position.

Time Stops: When the last howitzer is ready for liftoff.

II. Once the howitzers are in position:

10 minutes (day time)

20 minutes (night time)

Time Starts: When first howitzer touches down.

Time Stops: When the last howitzer is ready to fire.

NOTES:

1. Assumes raid is conducted with M119A1 in A-frame configuration with baseplate on.
2. Add 2 minutes if M119A1 is rigged in stowed position.
3. Add 2 minutes if M119A1 is rigged with baseplate removed.
4. Assumes all howitzers arrive at firing position in one serial.
5. Firing position is the LZ.

III. Fire mission is conducted IAW standards established in Tables A-8 thru A-30.

Time Starts: When howitzers are ready to fire.

Time Stops: When last round, first volley in FFE is fired.

IV. Extraction standards:

17 minutes to prepare howitzer for extraction, (19 minutes nighttime).

Time Starts: At EOM (command to march order for extraction is given).

Time Stops: When howitzers are ready to be extracted.

Table A - 7.4 Ready to Fire Times - Drop Zone Mission

Should the tactical situation require the Battery to conduct a fire mission from a drop zone, the following standards apply:

105mm: 15 minutes during the day (25 minutes at night).

155mm: 25 minutes during the day (40 minutes at night).

Time Starts: When last jumper, first pass, exits the aircraft.

Time Stops: After TLABSPAP procedures (less position improvement) are completed, and first round in adjustment is fired (adjust fire mission).

\* Unit is evaluated on determining FASCAM data. HE data may be computed separately and delivered for execution. Release of FASCAM has been received from proper authority. Coordination has been affected with the Engineers. Minefield Safety Zone is computed and disseminated per unit SOP.

## NOTES:

- (1) No digital method of determining FASCAM aimpoint data is available. Use manual method standard (15:00 min.).
- (2) Time standard for the FDC is determined by the number of aimpoints required. Multiply the number of subsequent aimpoints by value shown & add to the FDC total time = new FDC total time.
- (3) For HE execution, time stops at determination of FASCAM data, time starts again when FFE HE/TI (to simulate FASCAM) data is sent to the guns.

- (4) Multiply the number of rounds fired by the time shown (by weapon system), that time becomes total gun time. (Add 15 seconds per round, gun time, for high angle fire.)
- (5) Total mission time = new total observer time + new FDC total time + total gun time.

## NOTE:

(1) These two separate fire missions have the same time standards.

(2) Firing data precomputed and stored in the AFCS. The AFCS can store firing data for, either the Copperhead target or the Final Protective Fire (FPF) but not both. These time standards apply to the mission that is stored in the AFCS.

(3) For Non-Paladin units this would be an on-call mission with the tubes laid on the data. Firing data stored in the BCS.

2. If time fuze is fired for a HB registration, add 15 seconds to gun times.
3. Multiply gun time by number of rounds fired.
4. FDC must ensure that RADAR has the following data: Btry Loc., TGT Loc (to include ALT), QE fired, MAX ORD.

NOTES:

- Observer participation is not timed for this mission.
- If Platoon/Btry FDC orients the observers/conducts the registration, the FDC Time would be 1:15.
- This mission normally needs 6-8 rounds. HB is the most desirable method; it gives us a fuze TI correction. If MPI is conducted subtract 15 seconds from "EACH ROUND" gun time.

## APPENDIX B - ARTILLERY TABLES

B-1. General: Commanders determine how to train their units, and the manner chosen becomes the commander's training strategy. The artillery tables (AT) provide a list of tasks commanders may use to help develop their training strategy. The tables provide the structure for a progressive and sequential gunnery training strategy using dry-fire certification before live-fire qualification. These tables are aligned with the strategies outlined in DA Pam 350-38, Standards in Training Commission (STRAC). The tables do not lay out a strategy for training all tasks and areas required for the unit to obtain a rating of "Trained" on an ARTEP evaluation. Rather, the tables outline a plan for training the signature mission of the unit. Many unit elements (for example, mess, maintenance, and administrative services) require less intense training because they perform many of their ARTEP tasks on a daily basis. In addition, the tables are focused on the technical rather than the tactical aspects of unit collective training. Some tasks listed in the tables have both technical and tactical components; however, the primary goal of the tables is to outline a method of training the unit "gunnery" team to an acceptable level of technical proficiency. With this criterion in mind, no tactical tasks (for example, NBC, special teams, and so forth) are included in the tables.

### B-2. Features:

#### a. The ATs contain ARTEP MTP firing collective tasks.

(1) Chapter 5 is the source for all tasks, conditions, and standards for AT tasks. Section, Platoon, and Battery tasks are found in ARTEP 6-037-30-MTP. Battalion tasks are found in ARTEP 6-115- MTP.

(2) T&EOs are also identified in Chapter 5.

(3) This appendix lists FA tasks associated with each table.

(4) Certain tasks may be performed at different levels; crew/section, platoon and or battery. A task trained/certified at the crew/section level will certify the proficiency of that crew/section. That same task trained/certified/qualified at the platoon and or /battery level will qualify that crew/section's interaction and performance within the platoon and or battery.

b. The ATs provide a list of collective tasks that represents the **minimum** training requirements required of a specific element at a specific echelon.

c. The ATs provide a descriptive training strategy, which in conjunction with combined arms training strategies will provide commanders a starting point to maintain proficiency in the unit's primary mission of delivering fires. As always, the commander must decide how to best use his scarce resources to accomplish training goals.

(1) Commanders may modify the tables to meet METL and MACOM-unique training requirements.

(2) The Reserve Component units have unique constraints in their training environment such as wide dispersion of units and their equipment, conflicting schedules, limited access to impact areas and training land, and limited training days. They may have to combine ATs during training assemblies and annual training.

d. DA Pam 350-38 (STRAC) specifies the ammunition requirements.

B-3. Description:

a. Structure. The artillery tables provide the structure for progressive and sequential training for crew-, platoon-, battery-, and battalion. They identify the tasks for dry-fire training and certification and live-fire qualification. Units should train by using TADSS, when available, for dry-fire training and certification. The artillery tables are as follows: The ATs are divided into three phases for each echelon. They are training, certification, and qualification. The tables start at table 6. This was done to bring the numbering in coincidence with the maneuver tables. There is no table 9 for the same reason.

- 6--Crew/Section training (dry fire).
- 7--Crew/Section certification (dry fire).
- 8--Crew Qualification (live fire)
- 10--Platoon training (dry fire).
- 11--Platoon certification (dry fire).
- 12--Platoon qualification (live fire).
- 13--Battery training (dry fire)
- 14--Battery certification (dry fire).
- 15--Battery qualification (live fire).
- 16--Battalion training (dry fire).
- 17--Battalion certification (dry fire).
- 18--Battalion qualification (live fire).

(1) **Training** artillery tables:

(a) Training ATs prepare crews, platoons, batteries, and battalions for certification. The emphasis is on leader training and performing the tasks safely to standard without using ammunition.

(b) Units train by using these ATs with dry-fire procedures. The training ATs are AT 6, (crew), AT 10 (platoon), AT 13 (battery), and AT 16 (battalion).

(c) These tables are used with TADSS, when available. They require little training land and OPTEMPO and no ammunition.

(2) **Certification** artillery tables:

(a) Certification ATs prepare crews, platoons, batteries, and battalions for qualification. Their purpose is to certify that the echelon can perform the tasks safely to standard before live-fire qualification.

(b) Units train by using these ATs with dry-fire procedures. The certification ATs are AT 7 (crew), AT 11 (platoon), AT 14 (battery), and AT 17 (battalion).

(c) Certification ATs are used with TADSS, when available.

(3) **Qualification** artillery tables:

(a) Qualification ATs allow the platoon, battery, or battalion commander to evaluate the dry-fire training. The echelon's ability to perform the tasks safely and to standard is evaluated.

(b) Units train by using these tables with live-fire procedures. The qualification ATs are AT 8 (crew), AT 12 (platoon), AT 15 (battery), and AT 18 (battalion).

(c) The qualification ATs require extensive use of training land, OPTEMPO, and ammunition.

b. Critical gates: Critical gates are tasks or events that soldiers and units must perform to standard before they progress to subsequent tasks or events. ATs 7, 11, 14, and 17 are critical gates.

(1) AT 7 (crew certification) is the crew's critical gate preceding live fire or on to the platoon, battery, or battalion certification. Crews, for the purpose of ATs, are the FDC section and howitzer section.

(a) The standard for certification is to accomplish AT 8 tasks to MTP standards. Army regulation 220-1 details the requirements for section certification for reporting purposes. The AR states that a section will certify twice annually in a live fire manner. It also states that the section may certify as a part of a higher level exercise. In other words, a section does not need to live fire in isolation. They may certify during a platoon, battery, or even a battalion level training event and meet the requirements of certification per AR 220-1. The section tables 6, 7, and 8 list the tasks that sections must perform in order to become "certified" IAW AR 220-1. (See chapter 1 for task assessment standards)

(b) Crews must successfully complete AT 7 before participating in live-fire exercises.

(c) An echelon (such as a platoon or a battery) must have a part of its crews certified before proceeding to the platoon or battery certification. The standards are as follows:

- Gun section: two of three.
- Cannon Platoon: two of two per battery.
- MLRS Launcher section: two of three per platoon.
- MLRS Platoon: two of two per battery
- FDC section: cannon/MLRS platoon, one of one; cannon battery/MLRS, one of one.
- FIST: cannon battalion, 10 of 12, or 80 percent of assigned, before AT 12 if ACR or table 18 if a DS battalion.

(d) Each section has critical personnel who must be present during the certification. Commanders can designate additional personnel as critical. If new critical people are assigned to the section, the section should be retrained (AT 6) and recertified (AT 7) before proceeding to ATs 8, 12, 15, and 18. The minimum critical personnel are as follows:

- Cannon gun/MLRS firing section: section chief and gunner.
- FDC section: FDO/Battery Operations Officer and Chief Computer
- Fire Support Team/Colt/Striker section: Team/Section Chief and Fire Support Officer

(e) The weapon system TM establishes minimum crew size. Commanders can use this guidance in conjunction with critical personnel changes to determine if a crew can perform expected tasks and maintain its certification.

(2) AT 11 (platoon certification) is the platoon's critical gate to proceed to the platoon qualification (AT 8) or the battery certification (AT 14).

(a) The standard for certification is to accomplish AT 11 tasks to MTP standards using dry Fire techniques. (See chapter 1 for task evaluation)

(b) A platoon must be certified before participating in live-fire exercises.

(c) A platoon has critical leaders, in addition to the section's critical positions, who must be present during the certification. Commanders may designate which leaders are critical. These same critical leaders must be present during the battery certification (AT 14) for the platoon to maintain its

certification. The critical leader positions are the platoon leader and platoon sergeant. Commanders can designate additional positions as critical.

(3) AT 14 (battery certification) is the battery's critical gate to proceed to the battery qualification (AT 15) or battalion certification (AT 17).

(a) The standard for certification is to accomplish AT 14 (dry-fire) tasks to MTP standards. (See chapter 1 for task evaluation)

(b) A battery must be certified before participating in live-fire exercises.

(c) A battery has critical leaders who must be present during the certification. Commanders may designate which leaders are critical. These same critical leaders must be present during the battalion certification (AT 17) for the battery to maintain its certification. The critical leaders are as follows:

(4) AT 17 (battalion certification) is the battalion's critical gate to proceed to the battalion qualification (AT 18).

(a) The standard for certification is to accomplish AT 17 (dry-fire) tasks to MTP standards.

(b) A battalion must be certified before participating in a live-fire exercise.

B-4. Standards in Training Commission (STRAC). DA Pam 350-38 provides a table (Annual Ammunition Requirements) for each FA weapon system and organization.. These tables will list all the fire missions and associated ammunition. A brief description of the new tables is below. Using STRAC strategies:

a. Two tables are used to determine ammunition requirements and specify the training strategy for each type of unit. Each of these tables provides different information and they should be used in conjunction with each other. For example tables 3-6, 3-7, apply to 155 Direct Support battalions (TRC A). The tables are:

(1) Annual Requirements to Train Fire Tasks identified in MTP (e.g. Tables 3-7). This table identifies every ARTEP MTP fire mission that applies to a specific 155mm battalion. Further it identifies the echelon (platoon, battery, battalion) that should train each fire mission in consonance with the unit METL. Resources for CALFEXs are in table 3-7.

(2) Ammunition Requirements for type-weapon system and unit (e.g. table 3-7). The Xs on the matrix identify the missions STRAC resources. Trainers must understand that not all fire missions are resourced and that STRAC and Artillery Tables are descriptive training strategies. Commanders must use their judgment, METL, and training assessment to develop training plans that will meet their needs and satisfy their training requirements.

(3) Descriptive Training Strategy. e.g. Table 3-7. This table provides a suggested frequency to train each event (Artillery Table, CALFEX, and EXEVAL) that requires ammunition. Further it identifies the ammunition required to train each event. This table specifies the total STRAC annual ammunition authorization for 155 Direct Support battalions (TRC A). Similar tables are provided in this chapter for every other cannon and MLRS unit.

c. Close Support (CS) tasks are included in 105 mm Howitzer battalion tables. These satisfy the mission to provide close-in fires in support of light infantry units.

**B-5. Multiechelon Training.**

a. Multiechelon training is the simultaneous training of more than one echelon on different tasks, the conduct of different exercises by a unit, or the training of different tasks by elements of the unit. Multiechelon training occurs whenever collective training is being conducted. Anytime training above soldier level is going on, multiechelon training is being done.

b. The ATs, by their collective nature, are multiechelon training. Training, certification, and qualification ATs are designed to help train or evaluate training at crew platoon battery, and battalion levels. All ATs sustain individual MOS proficiency. While certifying or qualifying at platoon through battalion levels, training for crews continues, since ATs are multiechelon training.

**B-6. TADSS-Based Training Strategy:** TADSS-based training uses a mixture of TADSS and end items. The mixture is based on need and availability of TADSS and training resources. Availability of TADSS gives commanders training alternatives.

**B-7. Individual and Leader Training:** The ATs do not address individual or leader training. The Common Task Training (CTT), MOS training, and leader training must precede crew training (AT 6).

a. Soldier's Manuals/Trainer's guides (SMs/TGs) identify combat-critical MOS training requirements. They already exist for every MOS and skill level. They provide the MOS training plan and references for training individual soldier skills.

b. The SMs and TGs support the Army individual training and evaluation program (ITEP). The ITEP has two components:

- Commander's evaluation.
- Common task test.

**B-8. Certification and Qualification Scenarios.** Leaders at the platoon, battery, and battalion levels must develop a METL-based scenario when using the certification and qualification ATs. This scenario will help to make the certification and qualification ATs more meaningful, thus making the training more beneficial. The use of Combined Arms Training Strategies will help commander in this effort. CATS are more fully explained in the MTP chapter 3.

**B - 9. Artillery Tables.** Trainers use the following ATs with this MTP.

## APPENDIX C - OPFOR TASKS

C-1. The OPFOR tasks in this appendix are designed for use by trainers to create a tactical situation that may replicate combat conditions and environments as much as possible. The trainers must use their imagination and ingenuity to provide the evaluated unit a realistic and comprehensive training experience. Use of OPFOR play in a training event will add to the realism and offer a more rewarding training experience to the unit. This will produce better-trained units.

C-2. The tasks listed here do not represent the entire set of simulations or activities an OC or trainer may use to create the desired training environment. Trainers must use ingenuity and use their creative abilities to help the training unit become a well prepared combat ready unit.

C-3. The execution of these tasks must create confusion and stimulate reactions on the part of the tested/training unit. Many tasks require the use of pyrotechnics and blank ammunition. **Explosive devices can injure and kill.** The utmost care must be used when employing these devices. **Blank ammunition may blind or do other permanent damage to a person.** The OIC/NCOIC of the OPFOR detail must ensure safety briefings are given and that all OPFOR players understand the required safety procedures and policies for specific types of devices and blanks.

**ELEMENT:**

**TASK:** Disrupt Movement and Operations Using Persistent and Nonpersistent Chemical Weapons (06-5-OP01)

**ITERATION:** 1M 2M 3M 4M 5M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** OPFOR units deliver chemical agents by means of conventional artillery weapons, rockets, or aircraft along selected supply routes and key bases in the rear area. This task is always performed in MOPP4.

**TASK STANDARDS:** The OPFOR uses real and simulated chemical agents to disrupt movement and operations of specific elements. The reaction of the personnel and leaders are observed, recorded, and reported.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Delivers chemical agents in low and/or dense wooded areas.		
2. Delays movement of enemy supplies and equipment to forward areas.		
3. Restricts enemy movement in rear area.		
4. Channels movement into predesignated ambush areas.		
5. Contaminates enemy supplies and equipment.		
6. Inflicts a high rate of casualties on enemy forces.

**TASK:** DISRUPT ENEMY MOVEMENT AND OPERATIONS USING TACTICAL NUCLEAR WEAPONS  
(06-5-OP02)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** Tactical nuclear weapons are employed against key locations in the rear area. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The OPFOR will employ simulated tactical nuclear weapon use in a specific area so as to provide a stimulus for the evaluated unit to react. The OPFOR will record and report any observed reactions.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Disrupts and/or delays movement of equipment and supplies to forward areas. 2. Destroys enemy equipment and supplies. 3. Inflicts a high rate of nuclear casualties among enemy troops. 4. Denies the enemy use of specified areas. 5. Contaminates enemy equipment and supplies. NOTE: Use with task: Advise the FA Commander on NBC Defense Measures.

**TASK:** CONDUCT HASTY AMBUSH (06-5-OP03)

**ITERATION:** 1M 2M 3M 4M 5M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** OPFOR element is moving into a wooded area when an enemy march element is seen moving along a nearby route. This task is always performed in MOPP4.

**TASK STANDARDS:** The OPFOR prepares an ambush site and uses various types of pyrotechnics to simulate conditions of actual combat. They will disrupt the enemy and try to confuse him. They will record and report the reaction and actions taken by the enemy.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Prepares ambush site before arrival of enemy element. 2. Surprises enemy forces. 3. Inflicts heavy casualties within designated kill zone. 4. Inflicts heavy damage to vehicles and equipment within a designated kill zone. 5. Delays enemy march element from reaching the specified destination for a specified period. 6. Withdraws, on order, within 2 minutes of ambush initiation. 7. Sustains no casualties. 8. Reports actions to superiors.

**OPFOR TASKS AND STANDARDS**

**NONE:**

**ELEMENT:**

**TASK:** CONDUCT DELIBERATE AMBUSH (06-5-OP04)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** OPFOR element is operating along an enemy MSR. OPFOR intelligence reports an enemy element is conducting a road march along route. Enemy march element is approximately 15 minutes from arrival at ambush point. OPFOR element possesses automatic weapons, antiarmor weapons, and command detonated mines. OPFOR headquarters orders complete destruction of march element. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The OPFOR conducts the ambush by using pyrotechnics and simulated road blocks or some other type obstacle if the ambush is a blocked type ambush. They report the actions and reactions of the enemy forces.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Prepares ambush site before arrival of enemy element.		
2. Surprises enemy forces.		
3. Forces enemy march element to halt in kill zone.		
4. Initiates ambush, on order, by the OPFOR leader.		
5. Kills, wounds, or captures all enemy personnel, and destroys all specified vehicles and equipment in the kill zone.		
6. Engages all enemy reinforcements and security elements.		
7. Sustains no casualties from enemy forces.		
8. Consolidates and withdraws from area, on order.		
9. Reports all specified PIR and other intelligence requirements.

**NONE:**

**ELEMENT:**

**TASK:** CONDUCT SNIPER OPERATIONS (06-5-OP05)

**ITERATION:** 1 2 3 4 5 (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** OPFOR assigns snipers, regular or irregular elements, in the enemy rear area along the MSR and near support sites. This task should not be trained in MOPP4.

**TASK STANDARDS:** The OPFOR establishes sniper positions as needed. MILES systems will be used to simulate hits.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Sets up well concealed locations.		
2. Engages vehicle drivers or personnel on foot with short bursts of semiautomatic fire.		
3. Kills or wounds selected target.		
4. Prevents position from being discovered by enemy forces.		
5. Evacuates the area without being spotted.		
6. Reports all specified PIR and other intelligence requirements to OPFOR headquarters.

**OPFOR TASKS AND STANDARDS**

**NONE:**

**ELEMENT:**

**TASK:** CONDUCT AIR ATTACKS (06-5-OP06)

**ITERATION:** 1 2 3 4 5 (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** OPFOR elements in the rear area have forwarded positions of enemy support sites or locations of moving elements. OPFOR aircraft is dispatched to attack enemy installations or convoys. This task should not be trained in MOPP4.

**TASK STANDARDS:** The OPFOR coordinates with aviation units to provide aircraft for this task. They provide the aviation unit the details of the operation and coordinates the location, time, and flight path with all controlling headquarters.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Locates support sites or convoys.		
2. Makes attack runs on designated targets.		
3. Destroys enemy equipment, supplies, and vehicles.		
4. Sustains no loss of aircraft.

**NONE:**

**ELEMENT:**

**TASK:** CONDUCT AIR RECONNAISSANCE (06-5-OP07)

**ITERATION:** 1 2 3 4 5 (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** OPFOR headquarters requires intelligence on locations and identification of enemy elements. Aircraft is dispatched to take photographs and make visual inspection of enemy rear area. This task should not be trained in MOPP4.

**TASK STANDARDS:** The OPFOR uses available air platforms to recon the enemy area of operations.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Photographs assigned sectors. 2. Takes quick visual checks where cloud ceiling is low. 3. Locates enemy positions in rear area, particularly support and storage bases, and command and control facilities. 4. Sustains no loss of aircraft. 5. Reports PIR and other information requirements to OPFOR headquarters. Use with tasks that monitor operations security (OPSEC) Measures, establish OPSEC data base, and implement OPSEC activities and programs.

**NONE:**

**ELEMENT:**

**TASK:** GATHER INTELLIGENCE (06-5-OP08)

**ITERATION:** 1 2 3 4 5 (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** OPFOR small elements, operating in the rear area, are planning attacks on enemy bases. Information is needed to complete plans. This task should not be trained in MOPP4.

**TASK STANDARDS:** The OPFOR uses all available means to gather intelligence information.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Identifies all PIR and other intelligence requirements. 2. Passes undetected through any outpost, defensive wire, or warning device. 3. Moves to an observation point that offers cover and concealment and is close enough to gather PIR and other intelligence requirements. 4. Gathers all PIR and other intelligence requirements. 5. Withdraws from the area undetected. 6. Reports all information to OPFOR headquarters. Use with tasks that monitor OPSEC measures; and implement OPSEC activities and programs.

**NONE:**

**ELEMENT:**

**TASK:** ATTACK A REAR AREA SUPPORT BASE (06-5-OP10)

**ITERATION:** 1 2 3 4 5 M (Circle)

**COMMANDER/LEADER ASSESSMENT:** T P U (Circle)

**CONDITIONS:** OPFOR element locates a support base in the rear area. PIR and other intelligence requirements are obtained by OPFOR patrols. OPFOR element has automatic and anti-armor weapons, and light mortars. OPFOR element is approximately the size of two platoons. Some iterations of this task should be performed in MOPP4.

**TASK STANDARDS:** The OPFOR locates a support base in the enemy rear area. It conducts a deliberate attack on the base.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
1. Develops an attack plan. 2. Initiates attack by using a scheme of maneuver that exploits enemy flanks, gaps, and weaknesses 3. Uses covered and concealed routes to approach enemy force flanks, gaps, or weakly held areas. 4. Employs indirect fire to support attack. 5. Penetrates enemy defenses. 6. Destroys equipment and supplies. 7. Inflicts heavy casualties. 8. Isolates support base by blocking reinforcements. 9. Forces enemy units to displace. w30 10. Withdraws before support base is reinforced.

## **Section II**

### **Terms**

**DA Pam**  
Department of the Army Pamphlet

**MCOO**  
modified combined obstacles overlay

**Mission essential task list (METL)**

A compilation of collective mission essential tasks which must be successfully performed if an organization is to accomplish its wartime mission(s).

**pilot balloon (PIBAL)**

a small balloon whose ascent is followed by a theodolite in order to obtain data for the computation of the speed and direction of winds in the upper air

**radio direction finder (RDF)**

a technique in which a radio receiving set together with its associated equipment is used to determine the direction from which a radio signal is transmitted by tracking the signal

**Technical manual (TM)**

A publication which describes equipment, weapons, or weapons systems with instructions for effective use. It may include sections for instructions covering initial preparation for use and operational maintenance and overhaul.

**Topographic Support System (TSS)**

A modular set of topographic equipment consisting of survey, cartographic, reproduction, and military geographic information (MGI) subsystems. The modules are either van or trailer mounted.
