# MAINTENANCE MANUAL for MILITARY PYROTECHNICS

## REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. You may mail, e-mail, or FAX your response. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms) or DA Form 2028-2 located in the back of this manual direct to: Commander, U.S. Army TACOM, Armament Research, Development and Engineering Center, ATTN: AMSTA-AR-WEL-S, Picatinny Arsenal, NJ 07806-5000. E-mail address is LSB@PICA.ARMY.MIL. FAX number is Commercial (973) 724-4633, DSN 880-4633. A reply will be furnished to you.

## CHAPTER 1 INTRODUCTION

### SECTION I. GENERAL

#### 1.1 SCOPE.

1.1.1 This is one of a series of technical manuals on maintenance of pyrotechnic materials. Information in this manual is limited to the responsibilities of Direct and General Support maintenance personnel.

1.1.2 Operator and Organizational level maintenance instructions are covered in:

1.1.2.1 TM 9-1370-203-20 for Pyrotechnics.

1.1.2.2 TM 9-1370-201-12 for MK 45 MOD O Aircraft Parachute Flare.

1.1.2.3 TM 9-1095-206-13&P for M206 Aircraft Countermeasure Flare.

#### NOTE

**These publications also contain the pertinent Maintenance Allocation Chart (MAC). Authorized procedures for each level of maintenance including Direct and General Support are specified in the MAC.**

1.1.3 Operating instructions are contained in:

1.1.3.1 TM 9-1370-206-10, Pyrotechnic Signals.

1.1.3.2 TM 9-1370-207-10, Pyrotechnic Simulators

1.1.3.3 TM 9-1370-208-10, Photoflash Cartridges, Surface Flares and Miscellaneous Pyrotechnics.

#### 1.2 FORMS, RECORDS, AND REPORTS.

1.2.1 Forms generally applicable to units maintaining this material are listed in appendix A. A current listing of all forms is maintained in DA Pam 25-30. DA PAM 738-750 contains instructions on applicability and completion of forms.

1.2.2 A record should be kept of each inspection job undertaken on Depot Surveillance Record (DSR, DA Form 3022-R) in accordance with instructions in SB 742-1. Unsatisfactory or unusual inspection results will be reported on an Ammunition Condition Report (ACR, DA Form 2415) in accordance with instructions in DA PAM 738-750.

1.3 DESTRUCTION OF MILITARY PYROTECHNICS TO PREVENT ENEMY USE.

Destruction of military Pyrotechnics, when subject to capture or abandonment, will be undertaken by the user only when in the judgment of the unit commander concerned such action is necessary in accordance with orders or policy established by the Army Commander.

**SECTION II. DESCRIPTION AND DATA**

1.4 GENERAL.

For a detailed description and data of military pyrotechnic items, refer to Army Ammunition Data sheets for Military Pyrotechnics, TM 43-0001-37.

**SECTION III. SAFETY, CARE, AND HANDLING.**

1.5 GENERAL.

Requirements for safety, care, and handling of pyrotechnic items and accessories are included in TM 9-1300-206, AR 385-64, and the pertinent operator, and operator and organizational publications.

## CHAPTER 2 TOOLS AND EQUIPMENT

### 2.1 GENERAL

Tools, equipment, and packing materials, in addition to those available to the using organization, are supplied to Direct and General Support maintenance units for maintaining military pyrotechnics.

### 2.2 TOOLS AND EQUIPMENT.

2.2.1 Tools, and accessories having general application to this materiel are authorized for issue by Packing Materials, Accessories, and Tools List (app B).

2.2.2 Except when otherwise indicated, local fabrication of tools and equipment is not authorized.

2.2.3 Special tools, required to accomplish the maintenance indicated in chapter 4, are listed in SC 494095-CL-A11 for Direct Support and SC 4935-95-CL-A03 for General Support.

### 2.3 EXPENDABLE AND DURABLE ITEMS LIST.

Appendix C lists expendable and durable items which are required by Direct Support and General Support maintenance personnel.

**THIS PAGE INTENTIONALLY LEFT BLANK**

## CHAPTER 3 INSPECTION REQUIREMENTS

### SECTION I. GENERAL

#### 3.1 PURPOSE OF INSPECTION.

A complete plan of all maintenance work including inspections is required. Prepare Standing Operating Procedures (SOP) that contain detailed production techniques, standards, and controls necessary to produce a quality product. See the applicable sections of TM 9-1300-250 for planning procedures and SOP preparation and approval.

#### 3.2 AMMUNITION SURVEILLANCE.

Surveillance includes those actions necessary to evaluate the current degree of serviceability of pyrotechnics. See AR 702-6, AR 740-1, AR 702-12, and SB 742-1 for policy, responsibilities and procedures applicable to the Ammunition Surveillance and Quality Evaluation Program.

#### 3.3 INSPECTIONS.

##### 3.3.1 Serviceability.

3.3.1.1 Pyrotechnic items will be inspected by a Quality Assurance Specialist (ammunition), or MOS 55X40 personnel under the guidance of a Quality Assurance Specialist (ammunition), to determine serviceability or unserviceability according to SB 742-1 and other pertinent SB's of the SB 742-1370 series (appendix A-4d).

3.3.1.2 Required maintenance for unserviceable materiel will be indicated on the inspection report (para 1-2b). Direct Support and General Support units are limited to maintenance on packaging materials for pyrotechnic items. Because of their uniqueness, work on the pyrotechnic items themselves is strictly a Depot level operation.

3.3.2 Pre-Maintenance. At the unpack operation prior to start of work, pyrotechnic external packaging materials will be screened one hundred percent. Direct Support and/or General Support will perform pre-maintenance screening which will include the following:

3.3.2.1 All packaging material items with defects, as listed in table 3-1, will be repaired or replaced during maintenance, if possible. Where the critical defect of conflicting or confusing markings cannot be positively resolved, and the packaging remarked to correct the problem, small quantities of the items may be disposed of locally. Where large quantities are involved, disposition instructions contained in para 3-8b will be followed.

3.3.2.2 Other evidence of poor workmanship or defects that could cause accelerated deterioration or adversely affect the protection of the items will be corrected.

##### 3.3.3 In-Process.

3.3.3.1 In-process inspections are an integral part of the maintenance procedures to assure that previous

work is adequate and acceptable prior to proceeding with further operations.

3.3.3.2 Since these inspections are part of the maintenance procedures contained in chapter 4, they will not be specifically covered in this chapter.

### 3.3.4 Final Acceptance.

3.3.4.1 Packaged pyrotechnic items will be inspected after maintenance has been completed. The final acceptance inspection will determine whether or not maintenance accomplished has returned unserviceable packaging to an acceptable condition.

3.3.4.2 Quality Assurance Specialist (Ammunition), or MOS 55X40 personnel under the guidance of a Quality Assurance Specialist, will perform and certify this inspection prior to returning materiel to its storage area.

## 3.4 INSPECTION METHODS.

3.4.1 Visual Inspection. Careful observation of item, noting listed defects and any other abnormalities.

3.4.2 Manual Inspection. Movement by hand of specified area of item to determine if listed defect(s) exists (e.g., incorrect loose part).

3.4.3 Gage Inspection. Checking an item with a measuring instrument or a standard mating piece to determine if its size is acceptable in certain critical areas. Defects are derived from either predetermined standards or on a "go" "no go" basis (e.g., a ring gage).

## 3.5 EXENT OF INSPECT.

3.5.1 Sealed Packages. During maintenance inspections and operations on pyrotechnic items, those packed in barrier bags or sealed cans should not be opened. Therefore, sealed packages will usually be subjected only to visual inspection. A sample item may be opened (and disposed of) to determine proper marking for the packaging, if necessary.

3.5.2 Processed Item's. All processed items will be subjected to in-process inspections and a final acceptance inspection.

## **SECTION II. CLASSIFICATION OF MATERIAL DEFECTS**

### 3.6 GENERAL.

Pyrotechnics packaging defects, listed in table 3-1, provide the required method of inspection during maintenance for categories of defects. Categories of defects listed in the table are defined in SB 742-1. An Acceptable Quality Level (AQL) established for each defect is provided in table 3-1 for evaluation during final acceptance inspection. Details on the use of AQL's in the SB's and table 3-1 will not be covered in this manual since AQL's are to be used only by personnel already completely familiar with them.

3.7 IN-PROCESS AND FINAL INSPECTION.

All pyrotechnic packing materials processed will be subject to in-process and final inspection to assure acceptability. In-process and final inspections will be included as an integral part of all maintenance standing operating procedures.

3.8 DISPOSITION OF LOTS AFTER MAINTENANCE.

3.8.1 Each lot that meets the AQL in table 3-1 is acceptable for issue and use. Where the critical defect of conflicting or confusing markings cannot be positively resolved and the packaging remarked to correct the problem, small quantities of the items may be disposed of locally. Where large quantities are involved, disposition instructions contained in b below will be followed.

3.8.2. Lots found with any critical or major defects, or a rejectable number of minor defects, will be inspected 100 percent and reworked within the capability of the unit as specified in the Maintenance Allocation Chart (MAC). If the required maintenance is beyond the capability of the unit and its supporting elements, request disposition instructions through command channels from the Director, US Army Armament and Chemical Acquisition and Logistics Activity, ATTN: AMSTA-AC-MAS, Rock Island, Illinois 61299-7630, in accordance with DA PAM 738-750.

3.8.3 Any maintenance operation which results in a change to the information on the Lot Ammunition Data Card requires the addition of an alphabetic suffix to the lot number. Suffixes will be obtained through command channels from the US Army Industrial Operations Command, ATTN: AMSIO-SMI, Rock Island, Illinois 61299-6000.

**Table 3-1. Classification of Packing Defects**

Component	Category	Defect	Method of inspection	Reference	AQL
<b>POLYSTYRENE CONTAINERS (Incl MK 45 Mod 0 and PA 142 Containers)</b>					
Container	Minor	Cracks, dents, pieces missing in top and bottom halves.	Visual	TM 9-1370-201-12	0.65
Markings	Major	Markings incorrect, incomplete or illegible	Visual	para 4-7	0.40
Tape	Major	Tape pieces missing, loose, or torn	Visual/ Manual	TM 9-1370-201-12	0.40
Preformed Packing	Minor	Damaged, split not properly seated pinched	Visual	TM 9-1370-201-20 &P (PA 142)	0.65
<b>PALLETS, WOODEN BOXES, AND CRATES</b>					
Hardware	Minor	Inoperative or loose Nails, screws, and fasteners which can be replaced or properly sealed.	Visual/ Manual	para 4-8	0.65
	Minor		Visual	para 4-8	0.65
Ends	Major	Damage which requires disassembly of	Visual	para 4-8	0.40

Table 3-1. Classification of Packing Defects (Continued)

Component	Category	Defect	Method of inspection	Reference	AQL
Ends	Major	Damage which requires disassembly of box.	Visual	para 4-8	0.40
	Minor	Broken or missing cleats and handles.	Visual	para 4-8	0.65
<b>PALLETS, WOODEN BOXES, AND CRATES (Continued)</b>					
Wood	Major	Splits closer than 1 inch to edge of board or adjoining split or over 1/8-inch wide, or board broken or missing	Visual/ Manual	para 4-8	0.40
	Major	Warping which prevents insertion or removal of rounds and/or sealing of the box.	Visual Manual Visual	para 4-8 para 4-8	0.40 0.40
	Major	Excessive mildew and mold which cannot be removed and which render the markings illegible.			
	Major	Holes or loose knots which exceed 1-1/2 inches in largest diameter or 1/3 width of board.	Visual	para 4-8	0.40
	Major	Knots greater than 1/4 the width of the skid.	Visual	para 4-8	0.40
	Minor	Splits over 3 inches but no closer than 1 inch to edge of board or adjoining split; or 1/8-inch wide, which can be repaired by use of corrugated fasteners.	Visual	para 4-8	0.65
	Minor	Loose skids.	Visual	para 4-8	0.65
Strapping	Major	Missing, rusted, distorted, broken, or loose.	Visual	TM 9-1370-203-20	0.40
Wires	Major	Broken, rusted through, missing, or loose.	Visual	TM 9-1370-203-20	0.40
Marking	Critical	Conflicting or confusing marking so that positive identification of the item is in doubt. Applicable only to signals.	Visual	SB 742-1	Correct or demil
	Major	Incorrect, illegible or incomplete.	Visual	para 4-7	0.40
<b>FIBER CONTAINERS</b>					
Metal ends	Major	Perforations, excessive rust, or ends which are crushed or not securely crimped to body.	Visual	TM 9-1370-203-20	Demil

Table 3-1. Classification of Packing Defects (Continued)

## CHAPTER 4 MAINTENANCE PROCEDURES

### SECTION I. INTRODUCTION

#### 4.1 GENERAL.

4.1.1 Direct Support (DS) and General Support (GS) maintenance operations are restricted to the procedures in this manual and the procedures specified in the (MAC) charts of the publications referenced in paragraph I.b. On pyrotechnic materials Direct Support and General Support units are limited to maintenance on packaging materials.

4.1.2 Repair parts, packing materials, and expendable supplies (appendixes B and C) required by Direct Support and General Support units will be locally stocked. Direct Support and General Support units are also responsible for receiving and storing packaging materials salvaged from expended ammunition and for providing technical assistance to Operator and Organizational units.

4.1.3 Before beginning maintenance operations, a line layout and Standing Operating Procedures (SOP) are required. Guidelines for organizing the line and writing the SOP are contained in TM 9-1300-250.

4.1.4 In general, maintenance operations include but are not limited to the following:

4.1.4.1 Cleaning and preservation of packaging materials.

4.1.4.2 Removal of light rust and corrosion from metal packaging.

4.1.4.3 Repair and replacement of packaging materials.

4.1.4.4 Painting and markings.

4.1.5 Expendable supplies are listed in appendix C.

#### 4.2 DIRECT SUPPORT MAINTENANCE.

4.2.1 Direct Support maintenance is performed under the following conditions.

4.2.1.1 Upon receipt of unserviceable ammunition.

4.2.1.2 When maintenance is authorized to correct deficiencies in suspended ammunition lots.

4.2.1.3 When Operator and/or Organizational units request on-site assistance.

4.2.1.4 When inspection of on-hand stocks reveals the need.

4.2.2 Refer to FM 9-19 for mission and organization.

#### 4.3 GENERAL SUPPORT MAINTENANCE.

General Support maintenance is accomplished under the same conditions as Direct Support maintenance but on greater quantities of ammunition. Refer to FM 9-19 for mission and organization.

#### 4.4 UNPACKING AND REPACKING.

Step by step unpacking and repackaging procedures are given in TM 9-1370-203-20&P and TM 9-1370-201-12.

#### 4.5 INSPECTION.

Premaintenance, in-process, and final inspection requirements are defined in chapter 3.

### **SECTION II. CLEANING**

#### 4.6 RUST, DIRT, GREASE, AND DEFECTIVE MARKING REMOVAL.

##### **CAUTION**

**Dispose of rags contaminated with solvents by submerging in water in approved waste can to await burning**

##### 4.6.1 Metal Containers and Metal Ends of Fiber Containers.

- a. Include the following materials, tools and equipment:
  - (1) Abrasive material - sandpaper or corrosion removing compound.
  - (2) Disposable gloves.
  - (3) Can for flammable waste.
  - (4) Non-sparking wire brush.
  - (5) Plunger - type safety can.
  - (6) Rags.
  - (7) Alcohol.
  - (8) Work bench.
  - (9) Personal safety equipment (safety glasses).

- b. Receive material from unpacking or inspection operation
- c. Remove dirt, mud, and other foreign material, using rags or brushes. Use rags dampened with alcohol to remove grease.
- d. Using wire brush, remove flaked, chipped, blistered, or peeling paint.
- e. Remove rust, using wire brush, sandpaper, or corrosion removing compound.
- f. Inspect container for cracks or other damage or deterioration.
- g. Allow alcohol-cleaned surfaces to dry thoroughly before painting.

4.6.2 Non-metallic Surfaces (BBarrier Bag. Body of Fiber Container. Container for Mk45 Mod 0 Parachute Aircraft Flares).

- a. Include the following materials, tools and equipment:
  - (1) Alcohol.
  - (2) Disposable gloves.
  - (3) Rags.
  - (4) Work bench.
  - (5) Personal safety equipment (safety glasses).
- b. Receive material from unpacking or inspection operation.
- c. Remove dirt, mud, and other foreign material, using rags or brushes.
- d. Use alcohol sparingly if necessary to complete cleaning. Dampen clean rag with alcohol and wipe surface. Do not use detergent and water.
- e. Wipe surface thoroughly with clean dry rag to remove all grit, paint chips, residual alcohol, etc.
- f. Inspect container for cracks or other damage or deterioration.
- g. Allow alcohol-cleaned surfaces to dry thoroughly before painting.

**SECTION III. TOUCH-UP, PAINTING, AND MARKING****4.7 TOUCHING-UP CONTAINERS.**

- a. Include the following materials, tools, and equipment:
  - (1) Disposable gloves.
  - (2) Enamel - applicable color as indicated in table 4-1.
  - (3) Zinc chromate primer (used only when painting bare metal).
  - (4) Masking tape.
  - (5) Flammable waste can.
  - (6) Paint brush.
  - (7) Rags.
  - (8) Work bench.
- b. Receive material from cleaning operation.
- c. Cover those markings and areas which are in good condition with masking tape.
- d. Apply thin coat of primer over any bare metal and allow to dry. Brush or spray can may be used.
- e. Apply two very thin coats of enamel. Allow first coat to dry thoroughly before applying second coat. Brush or spray can may be used.
- f. Place material in safe location in work area until paint has dried.
- g. Remove masking tape.
- h. Restore marking, if required (para 4-9).

**CAUTION**

**Wear respirator during paint spraying operation.**

**Table 4-1. Colors for Painting and Marking Barrier Bags, Containers, and Boxes**

Item Body Marking End

Item	Body	Marking	End
SIGNAL, ILLUMINATION, GROUND: (Metal Container) Green Star, Cluster, M125A1 Red Star, Cluster, M158 White Star, Cluster, M159 Red Star, Parachute, M126A1 White Star, Parachute, M127A1 Green Star, Parachute, M195 Red Star, Distress, Parachute, M131	Gray Gray Gray Gray Gray Gray Gray	Black Black Black Black Black Black Black	Green Red White Red White Green Gray
SIGNAL, SMOKE, GROUND: (Metal Container) Green Parachute, M128A1 Red, Parachute, M129A1	Gray Gray	Black Black	Green Red
SIGNALS, SMOKE, GROUND: M62, (Fiber Container) M64, M65 and M66	None	White	Black
FLARES, AIRCRAFT: (Plastic Container) Parachute, Mk 45 Mod 0 and Mk 45 w/Adapter	None	Black	None
SIMULATOR, ATOMIC EXPLOSION: (Steel Drum) M142	White w/ brown stripe	Black	White
INNER PACK, Barrier Material (Refer to Appendix D for applicable item)	None	Black	None
BOXES, WOOD	None	Black	None

**4.8 REPAINTING CONTAINERS.**

a. Include the following materials, tools and equipment:

- (1) Disposable gloves.
- (2) Enamel.
- (3) Flammable liquid safety can.
- (4) Paint brush or paint spray outfit.
- (5) Masking tape.
- (6) Rags.
- (7) Respirator.

- (7) Respirator..
- (8) Solvent.

b. Receive materiel from cleaning operation.

**WARNING**

**Wear respirator during paint spray operation.**

- c. Cover undamaged existing markings, if applicable, with masking tape.
- d. If possible, suspend container so it may all be painted at once. Otherwise, paint container in two stages, allowing first-painted areas to dry before turning container over to paint the rest.
- e. Using spray can or brush, cover bare metal with primer and allow to dry.
- f. Using sprayer, spray can or brush, paint container with two coats allowing first coat to dry before applying second.
- g. Inspect to assure paint coverage. Touch up as necessary.
- h. Remove masking tape, where applied.
- i. Touch up or replace markings as required following procedures in paragraph 4-9.

4.9 REMARKING BARRIER BAGS, CONTAINERS, AND BOXES.

4.9.1 General.

a. Materials, tools and equipment include the following:

- (1) Disposable gloves.
- (2) Marking stencil ink.
- (3) Plunger-type safety can.
- (4) Rags.
- (5) Rubber marking outfit or stencil and stencil brush.
- (6) Solvent.
- (7) Work table

Figure 4-10. Example of Marking on Wooden Packing Box.

**Figure 4-11. Marking For M2 Fire Starter Wooden Packing Box.**

- b. Refer to figures 4-1 through 4-11 for location, height of lettering and applicable data pertaining to markings
- c. Refer to table 4-1 for required color of markings.
- d. If necessary, paint in the appropriate color may be substituted for ink when stenciling.
- e. Clean all marking equipment as often as necessary and at the end of each shift or termination of the job, whichever comes first.

#### 4.9.2 Procedure.

- a. Receive materiel from inspection, cleaning, touch-up or painting operation.
- b. Mark by the more applicable or convenient method below ( a. or b.).

##### (1) Rubber-type methods.

- (a) Set type in holder giving required information.
- (b) Put a dab of ink on ink plate.
- (c) Roll brayer back and forth on ink plate to spread ink on brayer.

- (d) Roll inked brayer lightly across face of rubber type to apply light film of ink to type.
- (e) Place material with cylindrical surfaces in position to receive marking, then roll carefully across face of rubber type to apply ink marking.
- (f) Place material with flat surfaces in position to receive marking, then bring rubber type into contact with material.

(2) Stencil methods.

- (a) Make stencil for applicable marking
- (b) Put a dab of ink on plate.

**NOTE**

**A spray gun or spray can with paint of appropriate color may be used as an alternate for ink.**

- (c) Dip brush in ink to apply ink to bristles
  - (d) Position stencil over location on material to receive marking.
  - (e) While holding stencil firmly against material (masking tape may be used) rub bristles of brush over stencil to apply inked marking to material.
  - (f) Remove stencil carefully.
- (3) Allow ink to dry before handling material.
- (4) Check markings to assure that they are correct, neat and legible. Touch up as necessary.

4.10 WOOD PACKING BOX.

Painting wooden boxes in order to obliterate old markings.

a. Tools and equipment include the following:

- (1) Paint sprayer.
- (2) Can, disposable flammable waste.
- (3) Safety can, plunger type.

b. Expendable supplies include the following:

- (1) Masking tape.
- (2) Paint, ammunition.
- (3) Lacquer, obliterating.

#### 4.10.3 Procedure.

- a. Assure that box is clean and dry.
- b. Cover valid markings, if legible, with masking tape.

### **CAUTION**

#### **Wear Respirator During Spray Paint Operations.**

- c. Spray with olive-drab enamel or marking obliterating lacquer as required to obliterate unwanted markings.
- d. Air-dry until surface is no longer tacky.
- e. Inspect to assure complete coverage. Repaint spots if necessary.
- f. Mark box using stencil method (4-9b above).

#### 4.11 PAINTING AND REMARKING OF LIGHT BOXES.

Boxes with less than full contents will be painted and marked as specified in TM 9-1370-203-20&P.

### **SECTION IV. REPAIR**

#### 4.12 INSPECTING AND RECONDITIONING PACKING BOX.

- a. Materials, tools and equipment include the following:
  - (1) Claw hammer.
  - (2) Enamel.
  - (3) Hand nail puller.
  - (4) Marking ink.
  - (5) Nails (assorted sizes).

- (6) Paint brush.
- (7) Rags.
- (8) Roller conveyer
- (9) Screwdriver.
- (10) Stencil (to be made on site).
- (11) Solvent.
- (12) Work table.

- b. Receive packing box from unpacking.
- c. Examine box. Repair, recondition, accept or reject as prescribed in TM 9-1370-203-20&P.
- d. Transfer accepted packing box to packing operation. Mark and place rejected boxes in reject area pending disposal.

#### 4.13 REPALLETIZATION.

- a. Materials, tools, and equipment include the following:

- (1) Steel strapping, 1-1/4 inches wide, length as required.
- (2) Seals for 1-1/4 inches steel strapping.
- (3) Strapping and sealing kit, 1-1/4 inches.
- (4) Personal safety equipment as required by TM 9-1300-250 and TM 9-1300-206 (goggles, gloves, shoes, etc.).

- b. Obtain good pallets from salvage.
- c. Place boxes on pallet. Refer to appendix D for arrangement.
- d. Install strapping, one strap per row of boxes as shown on figure 4-12 as follows:
  - (1) Cut pieces of strapping in lengths sufficient to completely encircle boxes and pallet with approximately 8 inches overlap
  - (2) Position one strap under pallet
  - (3) Insert one end of strap into strap stretch so that strap is held firmly by stretcher, with approximately 3 inches of strap protruding
  - (4) Place seal over strap end

- (5) Thread loose end of strap through seal and into stretcher bead.
- (6) Tighten strap by repeated movement of ratchet lever until edges begin to cut into boxes.
- (7) Using banding crimper, crimp seal in two places.
- (8) Release locking panel on stretcher and slide stretcher out.
- (9) Cut off excess strapping.
- (10) Repeat procedures outlined in (2) through (9) above for each strap.

Figure 4-12. Typical Palletization.

**APPENDIX B  
DIRECT SUPPORT AND GENERAL SUPPORT  
PACKING MATERIALS, ACCESSORIES, AND TOOLS**

**SECTION I. INTRODUCTION**

**B.1 SCOPE.**

This appendix lists packing materials, accessories, and tools required for the performance of Direct Support and General Support maintenance of military pyrotechnics.

**B.2 GENERAL.**

This appendix is divided into the following sections:

B.2.1 Section II - Packing Materials and Accessories - A list of packing materials authorized for the performance of maintenance at the direct support and general support levels.

B.2.2 Section III - Special Packing Tools List - A list of special tools and accessories authorized for the performance of maintenance at the Direct Support and General Support.

**B.3 EXPLANATION OF COLUMNS.**

The following provides an explanation of columns in Section II and III.

B.3.1 Column (1). Part Number/Drawing Number (PART NO./DWG. NO.) - The primary number used by the manufacturer which controls the design and characteristics of the item. Drawings can be obtained from originating source (see CAGE Code).

B.3.2 Column (2). Contractor and Government Entity Code (CAGEC) - A five-digit code used to identify the manufacturer, distributor, or Government agency/activity that supplies the item.

B.3.3 Column (3). Figure Number - The number of the figure where the item is identified/located if applicable.

B.3.4 Column (4). Description - The Federal item name and any additional description of the item required.

SECTION II. PACKING MATERIALS AND ACCESSORIES

(1) PART NO./ DWG. NO.	(2) CAGE CODE	(3) FIGURE NO.	(4) DESCRIPTION

8864731	19203		SALEE CLOSER: stl, 8-5/16 in. oa lg, 20 degree angle blade with 12 teeth <sup>1</sup> (5120-00-319-5434)

SECTION III. SPECIAL PACKING TOOLS LIST (Continued)

(1) PART NO./ DWG. NO.	(2) CAGE CODE	(3) FIGURE NO.	(4) DESCRIPTION
A-A-52215	58536 +		STRAPPING AND SEALING KIT: <sup>1</sup> (3540-00-565-6242) Consisting of the following: Sealer, steel strapping, hand: 3540-00-234-6742, qty 1 Stretcher, steel strapping, hand: 3540-00-278-1250, qty 1 Box, wood: 8115-00-897-5516, qty 1 Seal, strapping: 8135-00-290-1086, qty 1600 Strapping, steel: 8135-00-283-0667, qty 1 90 LB coil
MIL-S-43104 TY5	80244		STRAPPING AND SEALING KIT: <sup>2</sup> (3540-00-565-6244) Consisting of the following: Sealer, steel strapping, hand: 3540-00-223-8592, qty 1 Stretcher, steel strapping, hand: 3540-00-278-1251, qty 1 Cutter, steel strapping, hand: 5110-00-223-6281, qty 1 Box, wood: 8115-00-239-5294, qty 1 Seals strapping: 8135-00-239-5294, qty 100 Strapping, steel: 8135-00-283-0671, qty 1 90 LB coil

<sup>1</sup> Item is currently being processed for inclusion in SC 4940-95-CL-A11 for Direct Support Maintenance and in SC 4925-95-CL-A03 for General Support Maintenance.

<sup>2</sup> Item is listed in SC 4925-95-GL-A03 for General Support Maintenance. Item is currently being processed in SC 4940-95-CL-A11 for Direct Support Maintenance.

**THIS PAGE INTENTIONALLY LEFT BLANK**

**APPENDIX C  
EXPENDABLE AND DURABLE ITEMS LIST**

**SECTION I. INTRODUCTION**

**C.1 SCOPE.**

C.1.1 This appendix lists expendable and durable items which are required for Direct Support and General Support maintenance of Military Pyrotechnic.

C.1.2 Expendable supplies shall be requisitioned through normal supply channels to comply with maintenance requirements.

**C.2 EXPLANATION OF COLUMNS.**

C.2.1 Column 1. Item number. This number is assigned to the entry in the listing for referencing when required.

C.2.2 Column 2. Level. The column identifies the lowest level of maintenance that requires the item.

O - Unit Maintenance  
F - Direct Support Maintenance  
H - General Support Maintenance

C.2.3 Column 3. National Stock Number. This is the National Stock Number (NSN) assigned to the item; use it to request or requisition the item.

C.2.4 Column 4. Description. This indicates the federal item name and if required a description to identify the item. The last line of each item indicates the Commercial and Government Entity Code (CAGE) parenthesis followed by the part number.

C.2.5 Column 5. Unit of measure (UM) /Unit of Issue (U). This measure is expressed by a two character alphabetical abbreviation (e.g., EA, IN, PR). If the unit of measure differs from the unit of issue as in the Army Master Data File (AMDF) requisition the lowest unit of issue that will satisfy your requirements.

## SECTION II. EXPENDABLE AND DURABLE ITEMS LIST

**THIS PAGE INTENTIONALLY LEFT BLANK**

**APPENDIX D  
PACKING, MARKING AND STORAGE DATA**

**SECTION I. INTRODUCTION**

**D.1 SCOPE.**

This appendix contains information required by Direct Support and General Support of maintenance for repacking of military pyrotechnics.

**D.2 EXPLANATION OF COLUMNS.**

D.2.1 Item. Column 1 indicates the nomenclature of the military pyrotechnics.

D.2.2 DODIC. Column 2 indicates the Department of Defense Identification Code, assigned to the general description within the Federal Supply (Class for Military pyrotechnics).

D.2.3 Inner Pack Column 3 indicates the type of pack. Alpha legend is explained at end of appendix.

D.2.4 Number of Items Per Inner Pack Column 4 indicates the quantity of items per inner pack.

D.2.5 Outer Pack Column 5 indicates type of package. Alpha legend is explained at end of appendix.

D.2.6 Number of Items per Outer Pack Column 6 indicates the quantity of munitions in the outer pack.

D.2.7 Number of Inner Packs per Outer Pack Column 7 indicates the quantity of inner packs per outer pack.

D.2.8 Arrangement of Inner Packs per Outer Pack Column 8 indicates the quantity of inner packs as arranged in the boxes.

D.2.8 Total Weight (lbs). Column 9 indicates total weight of the outer and inner pack and contents.

D.2.9 Total Explosives Weight (lbs). (Column 10 indicates the total weight of explosives of the packaged military pyrotechnics.

D.2.10 Cube. Column 11 indicates result of the length, multiplied by the width, multiplied by height of the outer pack.

D.2.11 Number of Outer Packs per Pallet. Column 12 indicates the quantity of boxes placed on a pallet.

D.2.12 Arrangement of Outer Packs per Pallet. Column 13 indicates the quantity of boxes as arranged on the pallet.

D.2.13 Quantity Distance Class. Column 14 indicates the class assigned to military pyrotechnics in accordance with the quantity of explosives, materials and the distance separation relationship which provide defined types of protection. These relationships are based on levels of risk considered acceptable for the stipulated exposures.

D.2.14 Storage Compatibility Group. Column 15 indicates the group assigned to military pyrotechnics over-seas. The relationship between different items of ammunition, explosives and other dangerous materials whose characteristics are such that a quantity of two or more of the items stored or transported together is no more hazardous.

D.2.15 Footnote. Explanation is at the end of this appendix.

### **D.3 DEPARTMENT OF TRANSPORTATION (DOT) CLASSIFICATION MARKING.**

D.3.1 General. DOT classification marking is specified on the outer package. DOT marking for all military pyrotechnics except those listed below is "SPECIAL FIREWORKS-HANDLE CAREFULLY-KEEP FIRE AWAY".

D.3.2 Cartridges. Photoflash: M112A1 and M123A1. DOT classification marking for M112AI and M123AI photoflash cartridges is "EXPLOSIVE BOMBS".

D.3.3 Flare, Dispenser: XM19. DOT classification marking for XM19 dispenser flare is "BOMB, RACK, AIRPLANE".

D.3.4 Marker. Location. Marine: Dye, AN-59. DOT classification marking for AN-M59 dye marine location marker is "MARKER, AMMUNITION, NONEXPLOSIVE".

D.3.5 Simulator. Atomic Explosion. M142. DOT classification marking for M142 atomic explosion simulator is "EXPLOSIVE BOMB".

### **D.4 MARKING DATA.**

Refer to figures 4-1 through 4-10 for required marking data.

## LEGEND for columns 3 and 5:

a --- lead-foil envelope/carton  
 b --- carton  
 c --- carton/waterproof bag-  
 d --- waterproofed carton  
 e --- paperboard box/barrier bag  
 f --- metal container  
 g --- fiber container  
 h --- barrier bag  
 i --- none  
 j --- waterproof carton

k --- carton/sealed bag  
 l --- fiberboard carton  
 m --- paperboard carton  
 n --- container  
 o --- plastic bags  
 p --- wood box  
 q --- wood crate  
 r --- plastic container  
 s --- metal drum  
 t --- metal box  
 u --- wirebound box

By Order of the Secretary of the Army:

Official: 

JOEL B. HUDSON  
Acting Administrative Assistant to the  
Secretary of the Army  
01644

DENNIS J. REIMER  
General, United States Army  
Chief of Staff

Distribution:

To be distributed in accordance with DA Form 12-40E. Block 0322 requirements for TM 9-1370- 203-34.

## The Metric System and Equivalents

### Linear Measure

1 centimeter = 10 millimeters = .39 inch  
 1 decimeter = 10 centimeters = 3.94 inches  
 1 meter = 10 decimeters = 39.37 inches  
 1 dekameter = 10 meters = 32.8 feet  
 1 hectometer = 10 dekameters = 328.08 feet  
 1 kilometer = 10 hectometers = 3,280.8 feet

### Weights

1 centigram = 10 milligrams = .15 grain  
 1 decigram = 10 centigrams = 1.54 grains  
 1 gram = 10 decigrams = .035 ounce  
 1 decagram = 10 grams = .35 ounce  
 1 hectogram = 10 decagrams = 3.52 ounces  
 1 kilogram = 10 hectograms = 2.2 pounds  
 1 quintal = 100 kilograms = 220.46 pounds  
 1 metric ton = 10 quintals = 1.1 short tons

### Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce  
 1 deciliter = 10 centiliters = 3.38 fl. ounces  
 1 liter = 10 deciliters = 33.81 fl. ounces  
 1 dekaliter = 10 liters = 2.64 gallons  
 1 hectoliter = 10 dekaliters = 26.42 gallons  
 1 kiloliter = 10 hectoliters = 264.18 gallons

### Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch  
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches  
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet  
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet  
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres  
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

### Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch  
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches  
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

## Approximate Conversion Factors

To change	To	Multiply by	To change	To	Multiply by
inches	centimeters	2.540	ounce-inches	Newton-meters	.007062
feet	meters	.305	centimeters	inches	.394
yards	meters	.914	meters	feet	3.280
miles	kilometers	1.609	meters	yards	1.094
square inches	square centimeters	6.451	kilometers	miles	.621
square feet	square meters	.093	square centimeters	square inches	.155
square yards	square meters	.836	square meters	square feet	10.764
square miles	square kilometers	2.590	square meters	square yards	1.196
acres	square hectometers	.405	square kilometers	square miles	.386
cubic feet	cubic meters	.028	square hectometers	acres	2.471
cubic yards	cubic meters	.765	cubic meters	cubic feet	35.315
fluid ounces	milliliters	29.573	cubic meters	cubic yards	1.308
pints	liters	.473	milliliters	fluid ounces	.034
quarts	liters	.946	liters	pints	2.113
gallons	liters	3.785	liters	quarts	1.057
ounces	grams	28.349	liters	gallons	.264
pounds	kilograms	.454	grams	ounces	.035
short tons	metric tons	.907	kilograms	pounds	2.205
pound-feet	Newton-meters	1.356	metric tons	short tons	1.102
pound-inches	Newton-meters	.11296			

### Temperature (Exact)

°F	Fahrenheit temperature	5/9 (after subtracting 32)	Celsius temperature	°C
