	VI. Illustrations	6-1
	VII. NSN, Reference No. Index	7-1

Section I INTRODUCTION

1. Scope.

This manual lists repair parts, special tools, and other support equipment required for performance of organizational, direct support, and general support maintenance of the SHILLELAGH guided missile system.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. *Section II. Repair Parts List.* A list of repair parts authorized for use in the performance of organizational maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending numerical sequence, with the parts in each group listed in figure and item number sequence. Bulk materials are listed in NSN sequence.

b. *Section III. Special Tool List.* Not applicable.

c. *Section IV. Repair Parts List.* A list of repair parts authorized for use in the performance of direct and general support maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending numerical sequence, with the parts in each group listed in figure and item number sequence. Bulk materials are listed in NSN sequence.

d. *Section V. Special Tools List.* Not applicable.

e. *Section VI. Illustrations.* A series of exploded views of assemblies and sub-assemblies arranged in functional group and figure number sequence. All exploded parts are identified with callout numbers placed in clockwise sequence. These exploded views reflect repair parts plus those parts which must be removed in the process of disassembly for replacement or repair of the authorized item. The # (number symbol), used as a callout on illustrations, indicates an unlisted part furnished with the associated items.

f. *Section VII. National Stock Number and Reference Number Index.* A list, in ascending numerical sequence of all National stock numbers appearing in the listings, followed by a list, in alphameric sequence, of all reference numbers appearing in the listings. National stock number and reference numbers are cross-referenced to each illustration figure and item number appearance. This index is followed by a cross-reference list of reference designators to figure and item numbers, when applicable.

3. Explanation of Columns.

The following provides an explanation of columns found in the tabular listings:

a. *Source, Maintenance, and Recoverability Codes (SMR).*

(1) *Source Code.* Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

Code	Definition
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfitting. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which, because of probable discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later time.
KD	An item of a depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB	Item included in both a depot overhaul/repair kit and a maintenance kit.
MO	Item to be manufactured or fabricated at organizational level.
MF	Item to be manufactured or fabricated at the direct support maintenance level.
MH	Item to be manufactured or fabricated at the general support maintenance level.
MD	Item to be manufactured or fabricated at the depot maintenance level.
AO	Item to be assembled at organizational level.
AF	Item to be assembled at direct support maintenance level.
AH	Item to be assembled at general support maintenance level.
AD	Item to be assembled at depot maintenance level.
XA	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB	Item is not procured or stocked. If not available through salvage, requisition.
XD	A support item that is not stocked. When required, item will be procured through normal supply channels.

NOTE

Cannibalisation or salvage may be used as a source of supply for any items source coded above except those coded XA, XD, and aircraft support items as restricted by AR 700-42

(2) *Maintenance Code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

NOTE

Items with source code of XA will be blank in the third and fourth positions of the SMR code since these items will have the same level of maintenance as their next higher assembly.

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorised to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

Code	Application/Explanation
C	Crew or operator maintenance performed within organizational maintenance.
O	Support item is removed, replaced, used at the organisational level.
I	Support item is removed, replaced, used by the direct support element of integrated direct support maintenance.
F	Support item is removed, replaced, used at the direct support level.
H	Support item is removed, replaced, used at the general support level.
D	Support items that are removed, replaced, used at depot, mobile depot, specialized repair activity only.

NOTE

Codes "I" and "F" will be considered the same by direct support units.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

Code	Application/Explanation
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F	The lowest maintenance level capable of complete repair of the support item is the direct support level.
H	The lowest maintenance level capable of complete repair of the support item is the general support level.
D	The lowest maintenance level capable of complete repair of the support item is the depot level, performed by depot.
L	Repair restricted to designated specialised repair activity.
Z	Nonreparable. No repair is authorised.

Code

Application/Explanation

B No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) *Recoverability Code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Recoverability Code

Definition

Z	Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.
O	Reparable item. When uneconomically reparable, condemn and dispose at organisational level.
F	Reparable item. When uneconomically reparable, condemn and dispose at the direct support level.
H	Reparable item. When uneconomically reparable, condemn and dispose at the general support level.
D	Reparable item, When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
L	Reparable item. Repair, condemnation, and disposal not authorised below depot/specialized repair activity level.
A	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

b. *Federal Stock Number.* Indicates the National stock number assigned to the item and will be used for requisitioning purposes,

c. *Description.* Indicates the Federal item name and, if required, a minimum description to identify the item. When the part to be used differs between serial numbers of the same model, the effective serial numbers are shown as the last line of the description. The reference number indicates the primary numbers used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements, to identify an item or range of items. The Federal Supply Code for Manufacturers (FSCM) is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or Government agency, etc.

NOTE

When a stock numbered item is requisitioned the repair part received may have a different reference number than the part being replaced.

d. *Unit of Measure (U/M).* Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical

abbreviation (e.g., ea, in, pr, etc.), When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

e. Quantity Incorporated in Unit. Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A “V” appearing in this column in lieu of a quantity indicates that no specific quantity is applicable (e.g., shims, spacers, etc.). When the item has more than one application within the functional group, the total quantity will be shown on the first appearance. Subsequent reference to the same item will be indicated by the word REF.

f. 15-Day Organizational Maintenance Allowance.

(1) The repair parts reflected represent three authorized for use at the organizational category and will be requisitioned on an “as required” basis until stockage is based on demand in accordance with AR 710-2.

(2) Major Army Commanders are authorized to approve reductions in the range of support items authorized for use in units within their commands. Recommendations for increases in range of items authorized for use will be forwarded to the national level Maintenance Management Agency responsible for the preparation of the RPSTL. This agency will take action on such recommendations. Any changes approved will be reflected in a revision to the RPSTL.

(3) The range of repair parts authorized for use and which will be requisitioned initially on an “as required” basis, will be listed in the appropriate section of the Organizational Maintenance RPSTL.

g. 30-Day DS/GS Maintenance Allowances.

NOTE

Allowances in GS column are for CS maintenance only.

Direct and general support maintenance RPSTL consists of the following The Repair Parts List includes asterisk entries in separate columns, one for Direct Support (DS) and one for General Support (GS), as appropriate, to indicate the total range of repair parts authorized for use at that category. They will be requisitioned initially on an “as required” basis. The repair parts authorized at the DS/GS levels will be those authorized for the maintenance mission at these levels. Requirements for repair parts stockage and for distribution to supported units will be based on demand and determined in accordance with AR 710-2.

h. 1-Year Allowances Per 100 Equipments/Contingency Planning Purposes. This column indicates opposite the first appearance of each item the total quantity required for distribution and contingency planning purposes. The range of items in-

dicates total quantities of all authorized items required to provide for adequate support of 100 equipments for one year.

i. Depot Maintenance Allowance Per 100 Equipments. This column indicates the total quantity authorized for depot maintenance of 100 equipments. Items authorized for use as required, but not for initial stockage, are identified with an asterisk in the allowance column.

j. Illustrations. This column is divided as follows:

(1) *Figure Number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item Number.* The number used to identify each item called out in the illustration.

4. Special Information.

a. The following publications pertain to Surface Attack Guided Missile and its components:

TM 9-2350-230-12

TM 9-1430-465-30

TM 9-1410-465-35

b. Items which have the word BULK in the figure number column will have an index number shown in the item number column. This index number is furnished for use as a cross-reference between the National Stock Number/Reference Number Index and the tabular lists.

c. The # (number symbol), used as a callout on illustrations, indicates an unlisted part furnished with the associated items.

5. How to Locate Repair Parts.

a. When National Stock Number or Reference Number is Unknown:

(1) *First.* Using the table of contents, determine the functional group within which the repair part belongs. This is necessary since illustrations are prepared for functional groups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the functional group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When National Stock Number or Reference Number is Known:

(1) *First.* Using the Index of National Stock Numbers and Reference Numbers, find the pertinent Federal stock number or reference number. This index is in ascending NSN sequence followed by a list of reference numbers in ascending alphabetic sequence, cross-referenced to the illustration figure and item number.

(2) *Second.* After finding the figure and item number, locate the figure and item number in the

repair parts list.

6. Abbreviations.

<i>Abbreviation</i>	<i>Explanation</i>
ABEC	Annular Bearing Engineering Committee
AC	alternating current
AL	aluminum
ALALLOY	aluminum alloy
AMP	ampere(s)
ANLD	annealed
AWG	American Wire Gage
BDG-HD	binding head
BLK	Color Coding (electric cable identification)
	black
BR	brass
BRGT	bright
BRN	Color Coding (electric cable identification)
	brown
BT	bottle
C	centigrade, cycle(s), hundred
CARBS	<i>carbon steel</i>
CD OR ZN-PLTD	cadmium or zinc-plated
CD-PLTD	cadmium-plated
CHAM	<i>chamfer</i>
CK-HD	countersunk head
CO	container
CONE-PT	cone point
COND	conductor(s)
COP	copper
COR-RES-S	corrosion-resiztant steel
CROSS-RECESS-	cross recess round head
RD-HD	
CTD	coated
CTOC	center to center
CUP-PT	cup point
CUR.	current
DBLE	double
DC	direct current
DEG	degree(s)
DIA	diameter
DLD-F/C-PIN	drilled for cotter pin
DPDT	double-pole, double-throw
DPST	double-pole, single-throw
DR	double-row, drum
EA	each
EXTER	external
EXT-TEETH	external teeth (lock washer)
FIN.	finishing)
FL	flat
FL-CK-HD	flat countersunk head
FL-FIL-HD	flat fillister head
FL-HD	flat head
FL-PT	flat point
FLEX	flexible
FLGD	flanged
GRN	Color Coding (electric cable identification)
	green
GY	Color Coding (electric cable identification)
	grey
H	height, high
HD	head, hundred
HDLS	headless
HEX-HD	hexagon head
ID	inside diameter(s) (dimension)
INCAND	incandescent
IND	inductance, induction
INS.	insulated, insulating, insulator

Abbreviations

Explanation

INT	internal
INT-TEETH	internal teeth (lock washer)
LG	long (length)
LH	left-hand
MA	milliamperes(s)
MED	medium
MEG	megohm(s)
MH	millihenry(ies)
MIN-BAY-	miniature bayonet base
BASE	
MTG	mounting(s)
MTL	metal
NC	American National Coarse Thread
NF	American National Fine Thread
NI	nickel
NI-PLTD	nickel plated
NPT	American Standard Taper Pipe Threads
NS	American National Special Thread
OD	olive drab, outside diameter (dimension)
OPNG	opening
ORN	Color Coding (electric cable identification)
	orange
OZ	ounce(s)
PAN-HD	pan head
PASS-FIN	passivated-finish
P-BZ	phosphor bronze
PLTD	plated

THD	thread(ed) (s)
THK	thickness)
TND	tinned
TR	tracer(s), transmit-receive
TU	tube
TUN-FIL	tungsten filament
UF	microfarad(s)
UNC	Unified Coarse Thread
UNEF	Unified Extra Fine Thread
UNF	Unified Fine Thread
UUF	micromicrofarad(s)
v	volt(s)

<i>Abbreviations</i>	<i>Explanation</i>
W	watt(s), wide, width
W/	with
WHT	Color Coding (electric cable identification) white
W/O	without
X	by (as in 2x4)
YD	yard(s)
YEL	Color Coding (electric cable identification) yellow
ZN	zinc
ZN-PLTD	zinc-plated

7. Recommendations for Maintenance Publications Improvements.

You can help to improve this manual by calling attention to errors and by recommending improvements. Your letter or DA Form 2028 (Recommended Changes to Publications) should be mailed directly to Commander, U. S. Army Missile Command, ATTN: AMSMI-NPS, Redstone Arsenal, Alabama 35809, A reply will be furnished directly to you.

4-5		1	

IN THIS SPACE TELL WHAT IS WRONG AND WHAT SHOULD BE DONE ABOUT IT:

Item 5 is listed as a Screw but should be listed as a Knob.

In bubble J, callout 8 is depicted as a Washer and in bubble G, callout 8 is depicted as a Terminal Board. Recommend that bubble J callout 8 be changed to callout 2.

NOTE TO READER:

Your comments will go directly to the cataloger responsible for this manual, and he will prepare the reply that is returned to you. To help him in his evaluation of your recommendations, please explain the reason for each of your recommendations, unless the reason is obvious.

All comments will be appreciated, and will be given immediate attention. Handwritten comments are acceptable.

For your convenience, blank "tear out" forms, preprinted, addressed, and ready to mail, are included in this manual.
