## Section I.

### INTRODUCTION

#### 1. Scope

This manual lists repair parts and special tools required for the performance of direct support and general support maintenance of the Guided Missile Carrier M730 and Guided Missile Carrier M730A1.

#### 2. General

These repair parts and special tools lists are divided into the following sections:

a. Repair Parts List - Section II. A list of repair parts authorized at the direct support and general support levels for the performance of maintenance. The list also includes parts which must be removed for the replacement of the authorized parts. Parts lists are composed of functional groups in ascending numerical sequence, with parts in each group listed in figure and item number sequence.

b. Special Tools List - Section III. A list of special tools and test equipment authorized for the performance of maintenance at the direct support and general support levels.

c. National Stock Number and Part Number Index - Section IV. A list, in ascending NIIN sequence of all national stock numbers appearing in the listings, followed by a list, in alphameric sequence, of all part numbers appearing in the listings. National stock number and reference number are cross-referenced to each illustration figure and item number appearance.

#### 3. Explanation of Columns

The following provides an explanation of columns found in the tabular listings.

a. Illustrations, Column (1). This column is divided as follows:

(1) Figure number, subcolumn (a). This column indicates the figure number of the illustration in which the item is shown.

(2) Item number, subcolumn (b). This column indicates that callout number used to reference the item in the illustration.

b. Source, Maintenance, and Recoverability Codes, Column (2). Source, maintenance and recoverability codes (SMR) of the uniform SMR code format are listed in column (2) in five positions as follows:

(1) Source codes. The source codes are entered in the first and second positions and are assigned to support the item for maintenance, repair, or overhaul of end items. Source codes are defined as listed below.

Code	Explanation
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which, because of probable discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later time.
KD	An item of a depot overhaul/repair kit and not purchased separately. Depot kit is defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance kit is defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB	Item included in both a depot overhaul/repair kit and a maintenance kit.
MO	Item to be manufactured or fabricated at the organizational level.
MF	Item to be manufactured or fabricated at the direct support maintenance level.
MH	Item to be manufactured or fabricated at the general support maintenance level.
MD	Item to be manufactured or fabricated at the depot maintenance level.
AO	Item to be assembled at the organizational level.
AF	Item to be assembled at the direct support maintenance level.
AH	Item to be assembled at the general support maintenance level.
AD	Item to be assembled at the depot maintenance level.
XA	Item is not procured or stocked. The requirements for the item will be filled by replacement of the next higher assembly or component.

Code	Explanation
XB	Item is not procured or stocked. If this item is not available through salvage, it is to be requisitioned.
XC	Installation drawing, diagram, instruction. sheet, or field service drawing that is identified by a manufacturer's part number.
XD	A support item that is not stocked. When required, item will be procured through normal supply channels.

**NOTE**

**Cannibalization or salvage may be used as a source of supply for any items coded above except those coded XA and aircraft support items as restricted by AR 700-42.**

(2) Maintenance code. Maintenance codes are entered in the third and fourth positions. They indicate the level of maintenance authorized to use and repair the support item as defined below.

(a) This maintenance code entered in the third position indicates the lowest maintenance level authorized to remove, replace, and use the support item. The Use maintenance level is indicated by one of the codes defined below.

Code	Explanation
C	Crew or operator maintenance performed within organization maintenance.
O	Support item is removed, replaced, and used at the organizational level.
F	Support item is removed, replaced, and used at the direct support level.
H	Support item is removed, replaced, and used at the general support level.
D	Support item is removed, replaced, and used at the depot, mobile depot, or specialized repair activity only.

(b) Repair. The maintenance code entered in the fourth position indicates whether the item is to be repaired. It identifies the lowest maintenance level with the capability to perform complete repair of all authorized maintenance functions. This position contains one of the following maintenance codes assigned by the services that require the code as defined below.

Code	Explanation
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F	The lowest maintenance level capable of complete repair of the support item is the direct support level.
H	The lowest maintenance level capable of complete repair of the support item is the general support level.
D	The lowest maintenance level capable of complete repair of the support item is the depot level, performed by depot, mobile depot, or specialized repair activity.
L	Repair restricted to designated specialized repair activity.

Code	Explanation
Z	Nonreparable, no repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) Recoverability code. This code is entered in the fifth position. It is assigned to a support item to indicate the disposition action on an unserviceable item. This fifth position contains one of the codes defined below.

Code	Explanation
Z	Nonreparable item. When unserviceable, condemn it and dispose of it at the level indicated in the third position (use).
O	Reparable item, when not economical to repair, condemn it and dispose of it at the organizational level.
F	Reparable item, when not economical to repair, condemn it and dispose of it at the organizational level.
H	Reparable item, when not economical to repair, condemn and dispose at the general support level.
D	Reparable item; when beyond lower-level repair capability, return it to depot. Condemnation and disposal are not authorized below depot level.
L	Reparable item; repair, condemnation, and disposal not authorized below the depot/specialized repair activity level.
A	Item requires special handling because of specific reasons (i.e., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. National Stock Number, Column (3). This column indicates the national stock number assigned to the item which will be used for requisitioning purposes.

**NOTE**

**National stock numbers that are missing for P source-coded items are not currently recorded in the AMDF. When these stock numbers are broadcast in the AMDF they will be provided by a change to this manual.**

d. Federal Supply Code for Manufacturer (FSCM) Column (4). This column is the 5-digit numeric code listed in SB 708-42, which is used to identify the manufacturer, distributor, or government agency, etc.

e. Part Number, Column (5). This column indicates the primary number used by the manufacturer (individual, company, firm, corporation, or government activity), which controls the design and characteristics of the item by means of its engineering drawings, specification standards, and inspection requirement, to identify an item or range of items.

**NOTE**

**When a stock numbered item is requisitioned, the repair parts received may have a different part number than the part being replaced.**

f. Description, Column (6). This column indicates the Federal item name, and a minimum description required to identify the item. Items that are part of a kit or set are identified in the description. Material required for manufacturer or fabrication is identified and is listed in Bulk Material List.

g. Unit of Measure (U/M), Column (7). This column indicates the standard or basic quantity by which the listed item is used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation; e.g., ea, in., pr; etc., and is the basis used to indicate quantities and allowances in subsequent columns. When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. Quantity Incorporated in Unit, Column (8). This column indicates the quantity of the item used in the functional group. A V appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers; etc.).

**4. Special Information**

a. Usable on codes are shown in the description column. Uncoded items are applicable to all models. Identification of the usable on codes used in this publication are:

Code	Used on
114	M730 Carrier, Guided Missile Equipment, Self-propelled.
115	M730A1 Carrier, Guided Missile Equipment, Self-propelled.

b. The basis of issue for authorized special tools, test and support equipment is the number of end items of equipment supported and the number of personnel allocated to perform the required maintenance operations as follows: (such as, one soldering iron per five MOS 284.1 supporting 1 - 15 Radio Set AN/ARC-51).

c. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the SMR column the higher category.

d. The following publications pertain to carrier, guided missile equipment, self-propelled M730 and carrier, guided missile, self-propelled M730A1 and their components.

TM 9-2350-238-34	Direct and General -support Maintenance Manual for Angle Drive, Cooling Fan (2990-00-712-1280); Gearcase Transfer (2520-00-711-8377, 2520-00-179-5608, 2520-00-572-8605, 2520-00-800-3405, 2520-00-918-0599, 2520-00-933-6425, 2520-00-177-9370); Differential, Steering Control (2520-00-714-6135); Drive Assembly, Output (2520-00-895-9164); Final Drive, Vehicular (2520-00-224-7952); Brake Assembly, Pivot Steer (2520-00-088-9866, 2520-00-003-8334); Cylinder Assembly, Hydraulic Brake Master (2530-00-679-9169).

TM 9-2350-238-34P	Direct Support and General Support Maintenance Repair Parts and Special Tools List (including Depot Maintenance Repair Parts and Special Tools) for Angle Drive, Cooling Fan (2990-00-712-1280); Gearcase, Transfer (2520-00-7118377, 2520-00-179-5608, 2520-00-572-8605, 2520-00-8003405, 2520-00-918-0599, 2520-00-933-6425, 2520-00-1779370); Differential, Steering Control (2520-00-714-6135; Drive Assembly, Output (2520-00-895-9164); Final Drive, Vehicular (2520-00-224-7952); Brake Assembly, Pivot Steer (2520-00-088-9866, 2520-00-003-8334); Cylinder Assembly, Hydraulic Brake Master (2530-00-679-9169).
LO 9-1450-585-12	Lubrication Order.
TM 9-1450-585-10	Operator's Manual.
TM 9-1450-585-20	Organizational Maintenance Manual.
TM 9-1450-585-20P	Organizational Maintenance Repair Parts and Special Tools List.
TM 9-1450-585-34	Direct Support and General Support Maintenance Manual.
TM 9-2520-254-34	Direct and General Support Maintenance Manual: Transmission, Automatic, (2520-00-066-4240) (Allison Div., GMC Model TX 100-1).
TM 9-2520-254-34P	Direct Support and General Support Maintenance Repair Parts and Special Tools List): Transmission, Automatic w/ Container, (2520-00-066-4239) (Allison Div., GMC Model TX100-1).
TM 9-2815-205-34	Direct Support and General Support Maintenance Manual: Engine, Diesel, w/Container (2815-00-124-5390), composed of: Engine, Diesel (Detroit Diesel GMC Model 5063-5299, Series 6V53) and Container Assembly (8145-00-138-7809); Engine, Diesel, w/Container (2815-00-909-5949), composed of : Engine, Diesel (Detroit Diesel - GMC Model 5063 5398, Series 6V53T) and Container Assembly (8115-00-9995356); and Engine, Diesel, w/Container (2815-01-0316154), composed of Engine, Diesel (Detroit Diesel GMC Model 5063-5395, Series 6V53T) and Container Assembly (8145-00-999-5356).
TM 9-2815-205-34P	Direct Support and General Support Maintenance Repair Parts and Special Tools List (including Depot Maintenance Repair Parts and Special Tools) for Engine, Diesel, w/ Container (2815-00-124-5390) composed of: Engine, Diesel (Detroit Diesel, Model 5063-5299, Series 6V53) and Container (8145-00-138-7809); Engine, Diesel, w/Container (2815-00-909-5949), composed of: Engine, Diesel (Detroit Diesel, Model 5063-5398, Series 6V53T) and Container Assembly (8145-00-999-5356); Engine, Diesel, w/Container (2815-01-031-6145), composed of: Engine, Diesel (Detroit Diesel, Model 5063-5395, Series 6V53T) and Container Assembly (8145-00-999-5356).

TM 9-2920-225-34 Direct Support and General Support Maintenance Manual: Generator Assemblies for Prestolite Model AMA-5102UT (2920-00-909-2483); Leece-Neville, Models 3002AC, 3002AD, 3002AE (2920-00-909-2483); Models 5504AA and 5504AB (2920-00-475-1446), Model 2184AC (2920-00-782-1955); Model 5300GP (2920-00-818-8635).

TM 9-2920-225-34P Direct Support and General Support Maintenance Repair Parts and Special Tools Lists (including Depot Maintenance Repair Parts and Special Tools); Generator, Engine Accessory (alternating current); Prestolite, Model AMA-5102UT (2920-00-909-2483); Leece-Neville, Models 3002AC and 3002AD (2920-00-909-2483); Models 5504AA and 5504AB (2920-00-475-1446); Model 2184AC (2920-00-782-1955); Model 5300GP (2920-00-818-8635).

e. Repair parts kits and gasket sets appear as the last entries in the repair parts listing for the group or assembly to which they apply.

## 5. How to Locate Repair Parts

a. When the national stock number or part number is unknown:

(1) First. Using the table of contents, determine the functional subgroup within which the repair part belongs, (i.e., engine, engine assembly, transmission, transmission assembly). This is necessary since illustrations are prepared for functional subgroups and listings are divided into the same groups.

(2) Second. Find the illustration covering the functional subgroup to which the repair part belongs.

(3) Third. Identify the repair part on the illustration and note the illustration figure and item number of repair part.

(4) Fourth. Using the Repair Parts Listing, find the functional subgroup to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When the national stock number or part number is known:

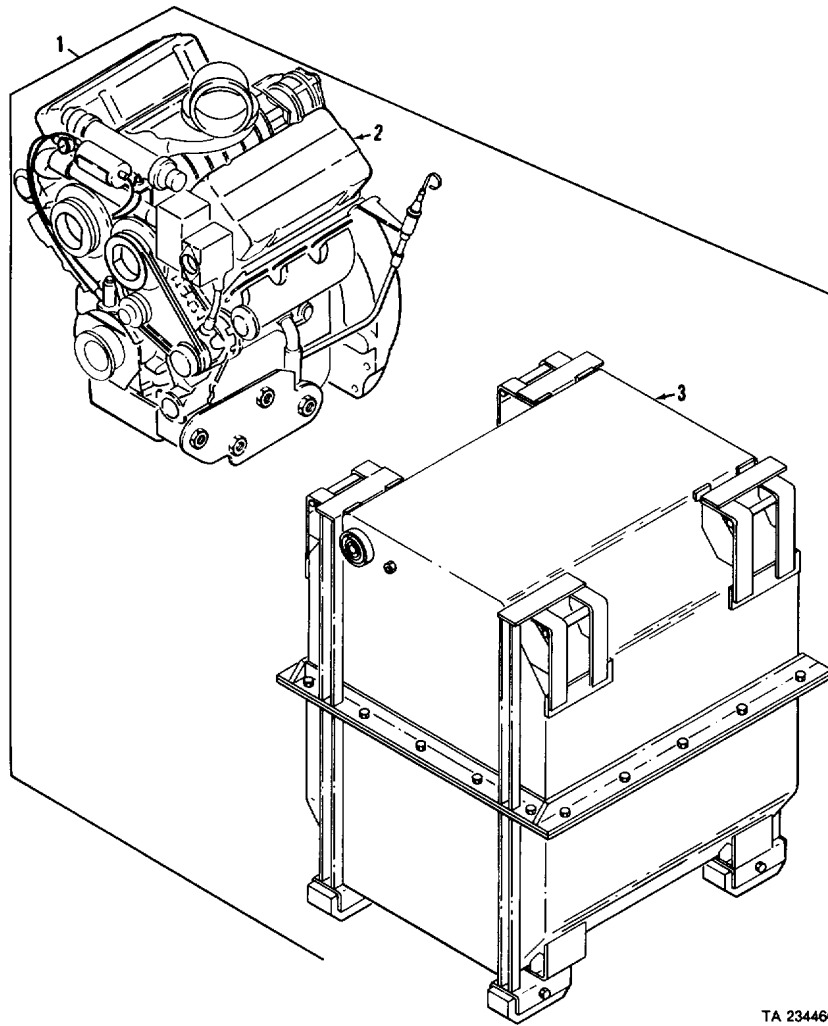

(1) First. Using the index of national stock numbers and part numbers, find the pertinent national stock number or part number. This index is in ascending NIIN sequence followed by a list of part numbers in ascending NIIN sequence followed by a list of part numbers in ascending alphameric sequence, cross-referenced to the illustration figure number.

(2) Second. Using the repair parts listings, find the functional subgroup of the repair part and the illustration figure number and item number referenced in the index of national stock numbers and part numbers.

## 6. Abbreviations
