WASHINGTON, D.C., 16 May 2002

**AIRCRAFT COMPONENTS REQUIRING MAINTENANCE  
MANAGEMENT AND HISTORICAL DATA REPORTS**

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

**REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS**

You can help improve this publication. If you find any errors or if you know of a way to improve this publication, please let us know. The recommended change should state clearly that the procedure is written incorrectly, difficult to perform, a safety hazard, or may cause damage to the equipment. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual directly to: Commander, US Army Aviation and Missile Command, ATTN: AMSAM-MMC-MA-NC, Redstone Arsenal, Huntsville, Alabama 35898-5000. A reply will be furnished to you as soon as possible.

# TB 1-1500-341-01

## 1. Purpose.

This Technical Bulletin (TB) prescribes the aircraft components, sub-components, modules and/or parts for which a requirement has been established to maintain and collect maintenance and historical data. **This bulletin supersedes the previous TB 1-1500-341-01, dated 4 September 2001, and incorporates up to and including Change 47 to the Unit Level Logistics System-Aviation (ULLS-A) Master Files.**

## 2. Responsibilities.

All activities, maintaining, stocking, storing, issuing, modifying, repairing and/or overhauling aircraft, aircraft components or assemblies assigned to the Department of the Army will comply with the provisions of this TB. This is to include all military activities, active U.S. Army units, U.S. Army National Guard units, U.S. Army Reserve units, depots and commercial contractors.

## 3. Definitions.

a. End Item. A final combination of end products, components, parts, and/or materials that is ready for its intended use (e.g., Aircraft).

b. Major/Higher Component. A combination of subassemblies, assemblies, components, modules, and parts connected in such a manner as to be a self-contained unit which, although part of an end item, is capable of operating independently of the end item (e.g., Engine T-53).

c. Component/Module. A combination of two or more sub-components or parts, mounted together in manufacture, that may be tested, replaced or repaired as a unit (e.g., starter, generator, fuel pump, line replaceable unit (LRU), printed circuit board). The term "module" is normally associated with electronic equipment and/or engines.

d. Sub-component (Subassembly). A combination of two or more parts that function together as a portion of a complete component (e.g., Fuel Control Unit).

e. Part. An item which cannot be disassembled or is of such design that disassembly is impractical,(e.g., Gear, Bolt).

f. Retirement Change ("RC") Item. An item that has been assigned a safe Maximum Allowable Operating Time (MAOT) since new, that it can safely be operated before it must be removed from service, mutilated, and lost to the Army inventory. This item can be repaired prior to reaching its MAOT, but normally will not be overhauled. The item must be removed from service when the MAOT is reached.

## TB 1-1500-341-01

g. Time Change ("TC") Item. An item that has a fixed operating Time Between Overhauls (TBO). The time is based on safety and/or design limitations. The item must be replaced with a new or overhauled item after the specified time. The item will then be overhauled at a depot level facility.

h. Condition Change ("CC") Item. An item that is changed and repaired on an "as-needed" basis. This item does not have a TBO assigned, therefore it is not overhauled.

i. Time Between Overhaul (TBO). The established allowable operating time since new or overhauled, that an item can be operated before it must be removed from service and returned to a depot level facility for overhaul. Time since new will not be "zeroed." Time since overhaul will be "zeroed" after an overhaul. Number of previous overhauls will be increased by one after an overhaul.

#### 4. General Instructions.

##### NOTE

In the event that you receive items that are of a later configuration or higher dash number (Part Number) which are not included in this TB, a DA Form 2410 (Component Removal and Repair/Overhaul Record) shall be prepared and submitted to Commander, U.S. Aviation and Missile Command, ATTN: AMSAM-MMC-MA-NC (2410), Redstone Arsenal, AL 35898-5000. Make an entry on DA Form 2408-16 (Aircraft Component Historical Record), 2408-16-1 (History Recorder, Component, Module Record), 2408-33-R (Meter Tracked Component Record), or AMSAM-MMC Form 719 (OH58D Side/Transverse Roof Beam Retirement Life Worksheet) in accordance with existing instructions.

a. The required method of maintaining aviation maintenance forms and historical data collection on important aircraft components/parts is prescribed in DA PAM 738-751 (The Army Maintenance Management System - Aviation (TAMMS-A)). The successful collection and utilization of this data is solely dependent upon the timely and accurate processing of all required forms.

b. DA Forms 2408-16, 2408-16-1, 2408-33-R, and AMSAM Form 719 serve as permanent records for important historical data applicable to components, sub-components and parts. These forms identify components, sub-components or parts installed on an end item. The components, sub-components and parts identified in this Technical Bulletin (TB) will be entered on one or more of those forms. The accuracy of all entries on the forms cannot be overemphasized, since they are the primary data source for the completion of DA Form 2410.

c. The DA Form 2410 data allows AMCOM to track where the item is currently installed and where it has been installed in the past, tracks time on the item, shows repairs/overhauls, shows who made the repair/overhaul and provides other current and historical data to be used by AMCOM, the engineering

## TB 1-1500-341-01

community, and the Program Managers for analysis. Upon removal of a component, sub-component and/or part from a higher component or an aircraft, a new set of DA Form 2410 will be completed and distributed in accordance with DA Pamphlet 738-751. When an item is removed a 2410, copy 1, will be completed to show the removal. If the item is inspected/repared, copy 2, will be completed. All parts replaced during the inspection/repair will be listed on the backside of copy 2. When the item is (re)installed, copy 3, will be completed. Failure to comply with this requirement could result in the mandatory condemnation or early overhaul of the affected component, thereby causing a drain on the Army's economic and maintenance resources.

d. Normal entries on DA Form 2408-16, 2408-16-1, 2408-33-R, and 2410 will be completed as outlined in DA Pamphlet 738-751. ULLS-A units will maintain the DA Form 2408-33-R and certain 2408-16 entries manually.

e. Entries for all tracked Auxiliary Power Units (APUs) will be accomplished on a DA Form 2408-16-1 and DA Form 2410 as outlined in DA Pamphlet 738-751. ULLS-A units will maintain the forms manually.

f. Entries for OH-58D Side Beams and Transverse Roof Beams will be accomplished on an AMSAM-MMC Form 719 and DA Form 2410 per Maintenance Information Message, OH-58D-MIM-99-008. ULLS-A units will maintain the forms manually.

g. Entries for OH-58D Corner Mounts and Restraint Spring Assemblies will be accomplished on a DA Form 2408-16 and DA Form 2410 per Maintenance Information Message, OH-58D-MIM-99-007. ULLS-A units will maintain the DA Form 2408-16 for the landings/autorotations manually.

h. Entries for T703-AD-700/700A/700B engines, for cycles and hot section factors, will be accomplished on a DA Form 2408-16 and 2410 per TB 1-2840-256-20-03 (OH-58-98-ASAM-01). ULLS-A units will maintain the forms manually.

i. Entries for the AN/ALQ-144(V) and selected sub-components will be accomplished using DA Form 2408-33-R and 2410 per Maintenance Information Message, GEN-MIM-00-001. ULLS-A units will maintain the forms manually.

j. This TB has incorporated the requirements of Maintenance Information Messages, GEN-MIM-00-001 and GEN-MIM-00-002 to track specific Communications and Electronics Command (CECOM) items. These items will be tracked using the aircraft "Condition Change" DA Form 2408-16 and DA Form 2410.

### NOTE

The appropriate technical manual (-23) for each mission, design, series (MDS) or end item will be used to determine the correct TBO or MAOT of "TC" or "RC" components/parts. There may be times when items contained herein will not be listed in the appropriate technical

## TB 1-1500-341-01

manuals for the following reasons: (1) Assignment of a new basic Part Number; (2) Parts recently superseded by another part, but still remaining in the army inventory.

k. This TB is divided into three different Sections with items in each section subdivided into separate groupings applicable to specific end items (aircraft, engines, major/higher components, and CECOM items). End item aircraft are designated by mission, design and series (MDS). Section I is grouped by system in Work Unit Code (WUC) sequence. Section II is grouped by system in Part Number sequence. Section III is grouped by system in National Item Identification Number (NIIN) sequence. In Section I, the identity (family) of components, sub-components and parts will appear directly beneath the nomenclature of the next higher component, indented two spaces to the right. Each section will consist of the following columns:

- (1) NOMENCLATURE - Name of the item (module, component, sub-component, or part).
- (2) PART NUMBER - Part number of the item.
- (3) NSN - National Stock Number of the item.
- (4) WUCD - Work Unit Code of the item.
- (5) A - MODEL USED ON. The different models (such as; aircraft, engines) the item is used on.
- (6) B - TYPE COMPONENT. Codes are TC for Time Change items, RC for Retirement Change items, and CC for Condition Change items.

(a) "TC" and "RC" items will be listed on the Aircraft Time Change DA Form 2408-16 or on a specified major component DA Form 2408-16, 2408-16-1, 2408-33-R, or AMSAM-MMC Form 719. Units that maintain the forms manually will mark the top margin of the Aircraft Time Change DA Form 2408-16 with "TIME CHANGE COMPONENTS."

(b) "CC" items will be listed on the Aircraft Condition Change DA Form 2408-16 or on a specified major component DA Form 2408-16, 2408-16-1, 2408-33-R, or AMSAM-MMC Form 719. Units that maintain the forms manually will mark the top margin of the Aircraft Condition Change DA Form 2408-16 with "CONDITION CHANGE COMPONENTS."

- (7) C - INTENTIONALLY OMITTED. This column was once used; it is now left blank.

(8) D - SEPARATE DA FORM 2408-16. An "X" here indicates the item requires it's own 2408-16 to record the installation and removal of sub-components/parts. These forms may contain a mixture of "TC", "RC" and "CC" items.

## TB 1-1500-341-01

(9) E - NEXT HIGHER COMPONENT DA FORM 2408-16. An "X" here indicates the item is listed on the next higher component 2408-16. These forms may contain a mixture of "TC", "RC" and "CC" items.

(10) F - AIRCRAFT "TC" DA FORM 2408-16. An "X" here indicates the item is listed on the Aircraft Time Change 2408-16.

(11) G - AIRCRAFT "CC" DA FORM 2408-16. An "X" here indicates the item is listed on the Aircraft Condition Change 2408-16.

(12) H - DA FORM 2410. An "X" here indicates the item requires that a 2410 be completed every time the item is removed, repaired, and/or installed. An "L" here indicates that the 2410 will be completed but it is not sent to AMCOM, it remains with the item for local history.

(13) I - SEPARATE DA FORM 2408-16-1:

(a) An "X" here for T700 series engines and APUs indicates the engine, engine sub-components and/or APU requires a separate 2408-16-1. These forms may contain a mixture of "TC", "RC" and "CC" items.

(b) An "X" here for specific CECOM managed items indicates that a 2408-33-R is required for the item. These forms may contain a mixture of "TC", "RC" and "CC" items.

(c) An "X" here for OH-58D Forward, Aft, Left and Right Handed Support Structures indicates that an AMSAM-MMC Form 719 is required. These forms may contain a mixture of "TC", "RC" and "CC" items.

(14) J - NEXT HIGHER COMPONENT DA FORM 2408-16-1:

(a) An "X" here for T700 series engines and APUs indicates the engine or APU sub-components and/or parts require an entry on the next higher component 2408-16-1. These forms may contain a mixture of "TC", "RC" and "CC" items.

(b) An "X" here for specific CECOM managed items indicates that an entry is required on the next higher component 2408-33-R. These forms may contain a mixture of "TC," "RC" and "CC" items.

1. When a major/higher component is removed from an aircraft only one set of DA Form 2410, for the major/higher component, is required for such action. The individual and sub-components (if any) DA Forms 2408-16, 2408-16-1, 2408-33-R, or AMSAM-MMC Form 719, and any DA Form 2408-5-1 will accompany the item through its repair or overhaul cycle. However, when a sub-component or part is separated from the major/higher component as an individual sub-component or part, a set of DA Form 2410 will be prepared and

## TB 1-1500-341-01

processed for each sub-component or part removed. Updating the appropriate historical records will be accomplished at this time in accordance with DA PAM 738-751.

m. When a major/higher component containing reportable sub-components is lost or phased out of the Army inventory (for example, Defense Reutilization Management Office (DRM), Foreign Military Sales (FMS), etc.) prepare a DA Form 2410, copy 3, showing a loss to the Inventory for the major/higher component per DA PAM 738-751. Attach a copy of the current DA Form 2408-16, 2408-16-1, 2408-33-R, or AMSAM-MMC Form 719 listing the installed sub-components to the DA Form 2410, copy 3, loss. Mail to Commander, US Army Aviation and Missile Command, ATTN: AMSAM-MMC-RE-FC, Redstone Arsenal, Huntsville, Alabama 35898-5000 and AMCOM will complete the loss to the inventory for the sub-components.

n. DOD Materiel Condition Tags/Labels, per DA PAM 738-751, are to be used on all Army aeronautical equipment. These tags/labels do not supersede the requirement for, but will be used in conjunction with, applicable maintenance forms required by DA PAM 738-751. If a serviceable reportable item is received without the proper forms and records, but has a properly completed materiel condition tag attached to the item, the data on the tag will be used to assist in reconstructing the missing records.

o. Items **will not** be installed, repaired, or overhauled when the required DA Form 2410 and the materiel condition tag are both missing, and the overhaul and/or removal activity is not known. Request the required information for the forms and records from Commander, US Army Aviation and Missile Command, ATTN: AMSAM-MMC-MA-NC (2410), Redstone Arsenal, Huntsville, AL 35898-5000, DSN 897-2410, (Comm.) 256-313-2410, FAX 256-313-2075 (comm.), DSN 897-2075, or e-mail [data2410@redstone.army.mil](mailto:data2410@redstone.army.mil). AMCOM will provide the requested information or appropriate disposition instructions. The minimum essential information required by AMCOM to process requests for missing or incomplete historical data are the following:

- (1) Component nomenclature
- (2) National Stock Number
- (3) Part Number
- (4) Serial Number

p. Major/higher components may be coded as 'CC,' 'RC' or 'TC' components and have sub-components/parts listed on the back side of the DA Form 2408-16 or 2408-16-1 that are 'TC' or 'RC,' and which have an earlier removal time than the major/higher component. The removal/replacement time of the major/higher component is governed by the lowest life remaining, whether it is the major/higher component or a sub-component/part.

q. This TB contains additions, deletions and changes to the previous TB, dated July 1999. These additions, deletions and changes have been dictated by changes to -23 TMs and ISAQ, or release of Safety of Flights, Aviation Safety Action Messages, Maintenance Information Messages, and procurement of new equipment. The following is how the additions, deletions and changes should be handled.

## TB 1-1500-341-01

(1) Additions for items that are installed. Check columns 'D,' 'E,' 'F,' 'G,' 'I,' and 'J' to determine which forms and records need to be annotated. Check the appropriate form(s) to see if the item is already listed. If the item is already listed, no other action is required. If the item is not already listed, list it on the appropriate form(s) and complete a DA Form 2410, copy 2, to show a 'U' gain to the Army inventory and a copy 3 to show the installation of the item. Mail the completed copy 2 and 3 to Commander, US Aviation and Missile Command, ATTN: AMSAM-MMC-RE-FC, Redstone Arsenal, AL 35898-5000.

(2) Additions for items that are uninstalled. Check columns 'D,' 'E,' 'F,' 'G,' 'I,' and 'J' to determine which forms and records need to be annotated. Check the appropriate form(s) to see if the item is already listed. If the item is already listed, no other action is required. If the item is not already listed, list it on the appropriate form(s) and complete a DA Form 2410, copy 2, to show a 'U' gain to the Army inventory. The copy 3 will remain with the item until it is installed. Mail the completed copy 2 to the address in paragraph 3.q.(2).

(3) Deletions. Items which have been highlighted in gray shading and contain the letters "D", "E", "L", "E", "T", "E", "D" in columns 'D' through 'J' have been dropped from component tracking and will not be listed in the next revision of this TB. These items will be lined out on the appropriate form(s) and a statement inserted over the lined out entry, "Deleted IAW TB 1-1500-341-01, dated July XXXX". The delete date should be the published date of this new TB.

(4) Changes. An asterisk (\*) in the right hand margin indicates that something has been changed since the last revision.
